

How to fix errors that cannot open Word files

There are cases when unfortunately Word file fails to open, it will cause a lot of inconvenience. In this article, TipsMake.com will guide you how to open those corrupted Word files.

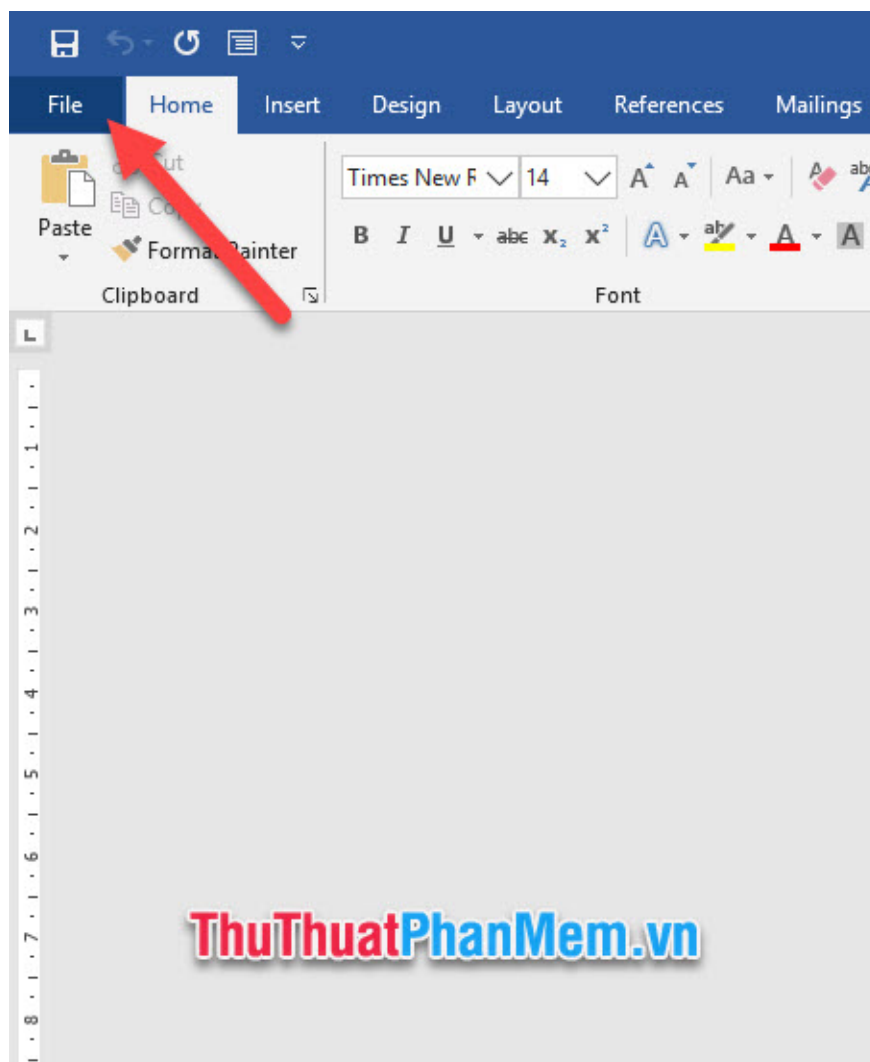

Word is one of the most important and important office software in Vietnam. We often use Word to create and share important data, but there are also cases where the unfortunate Word file does not open, causing a lot of inconvenience. In this article, TipsMake.com will guide you how to open those corrupted Word files.

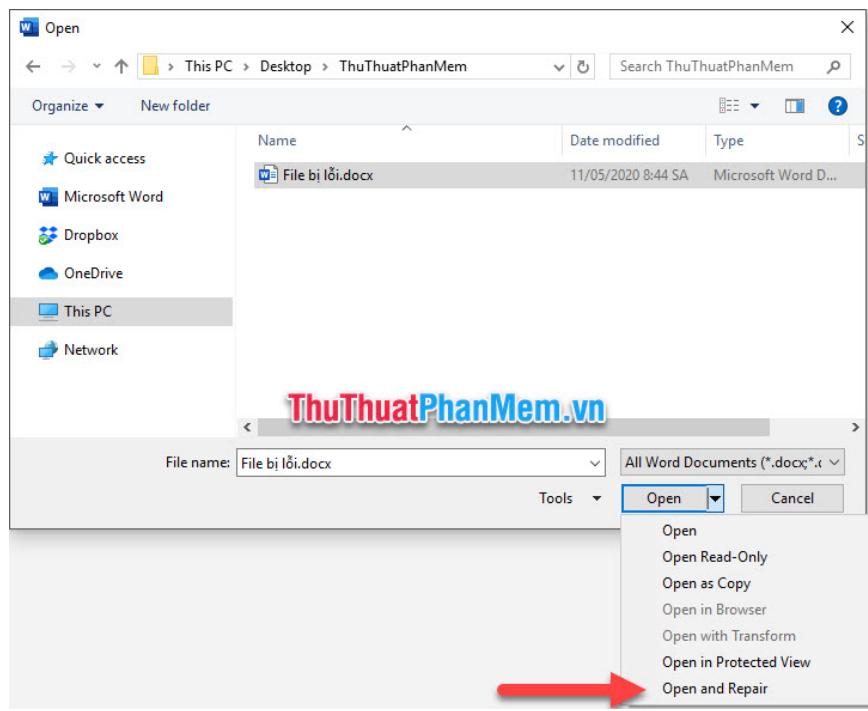

1. Use Repair to open the corrupted Word file

When a Word file fails, you can fix that file with the following steps.

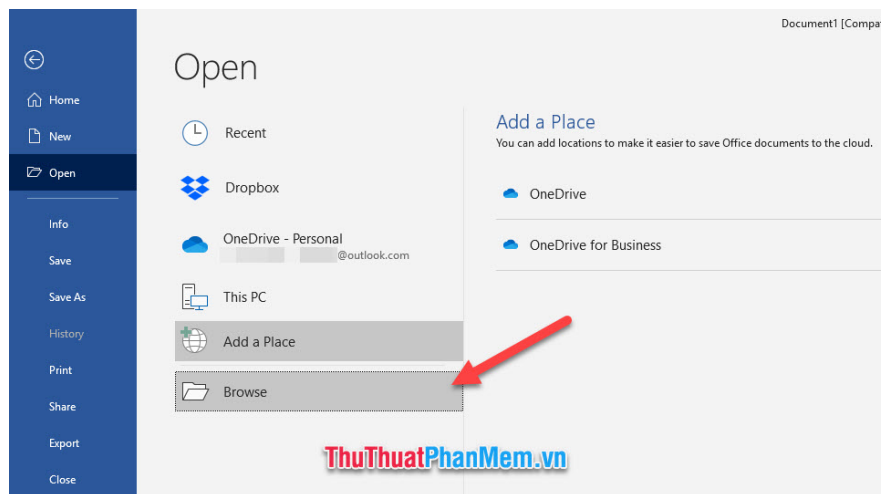

First, open a new Word file, then go to the **File** ribbon on the toolbar.

Next, you click on the **Open** line in the **File** . Or you can use the key combination **Ctrl + O** to perform both steps above.

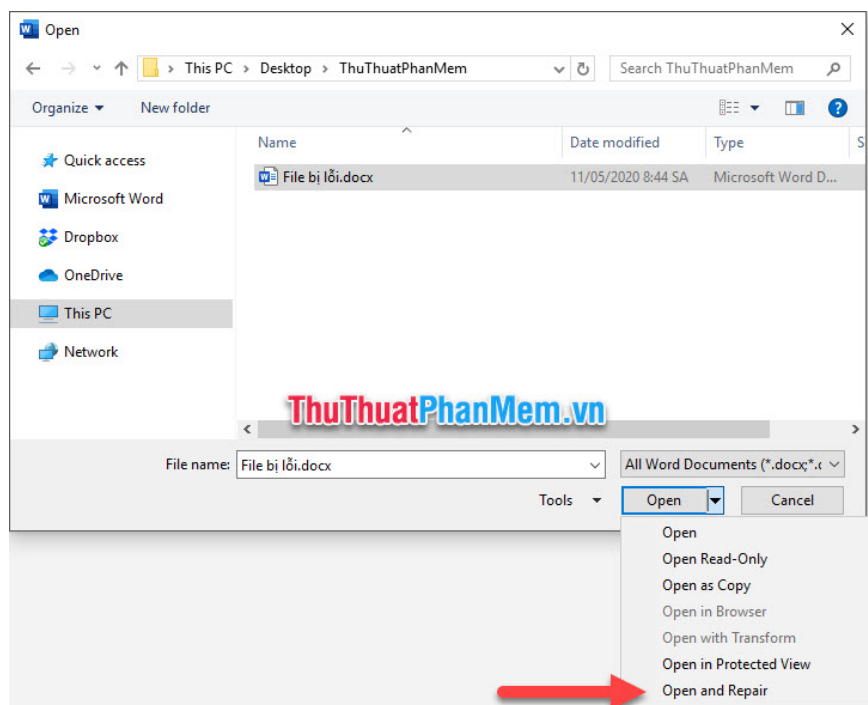

Next, click **Browse** to be able to search and open the corrupted Word file in the computer.

When searching and clicking on the Word file, click the dropdown arrow of the **Open** option .

Next, select the line **Open and Repair** .

Word will then correct the corrupted Word file and open it for you.

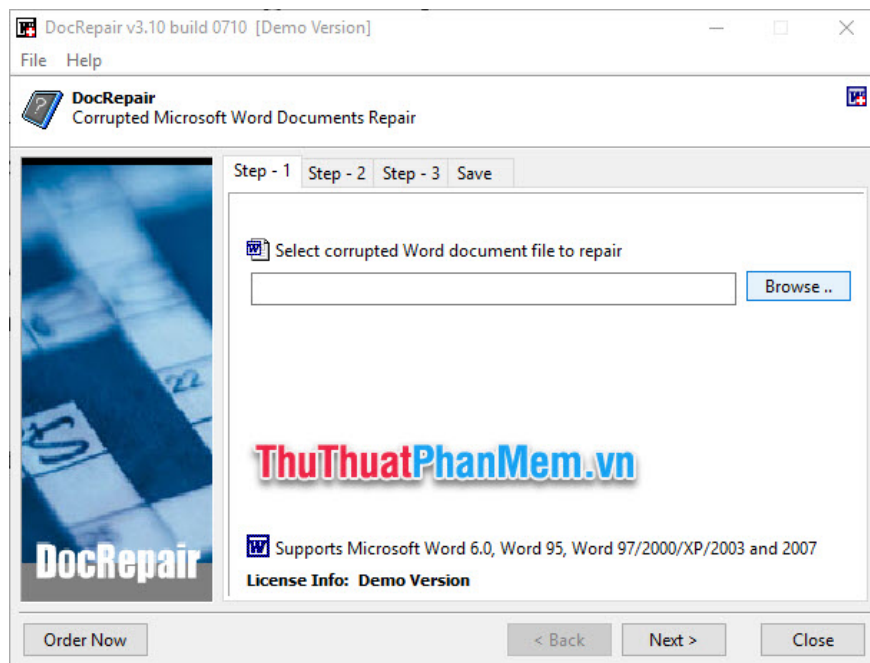

2. Open the corrupted Word file with the software

The software that can fix the errors and open your Word file is the DocRepair software.

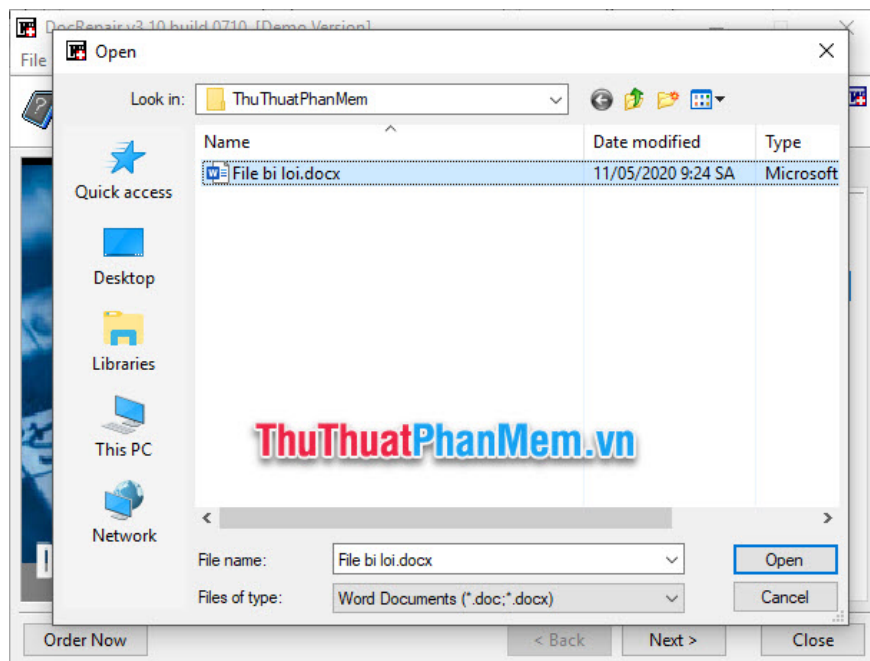

You can download DocRepair at the homepage of DocRepair.

After downloading the DocRepair file to your computer, install and launch the software. DocRepair's interface and uses are quite simple.

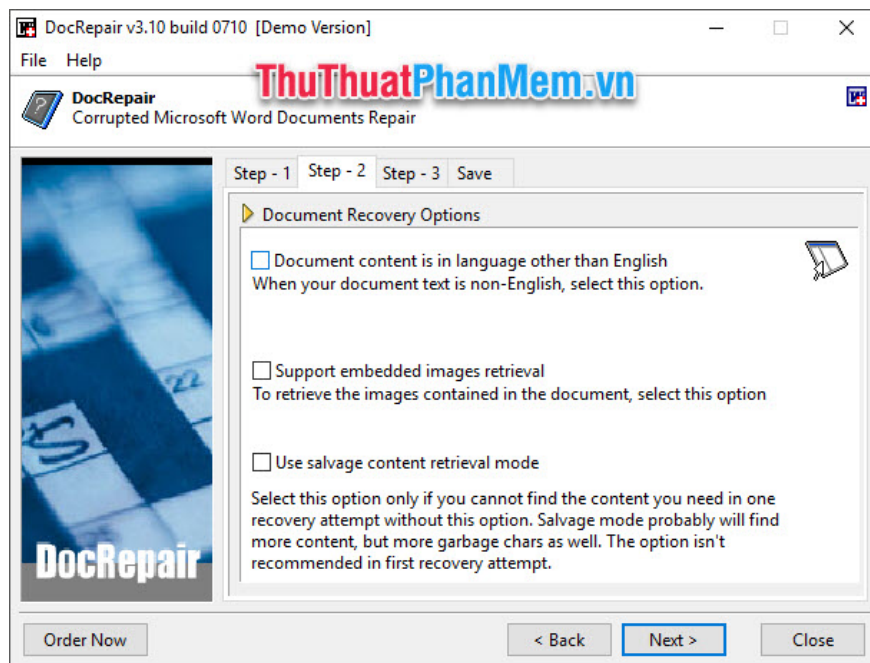

In the first step, all you need to do is upload the Word file you need to fix by clicking **Browse** and selecting the corrupted file in your computer.

You should rename the faulty file in your computer with Vietnamese or English names are okay, as long as there is no sign. If you name the file with software accents it will not be able to read the file.

Next, click **Next** to move to the second step. At this step, the software will ask you the options to fix Word file errors.

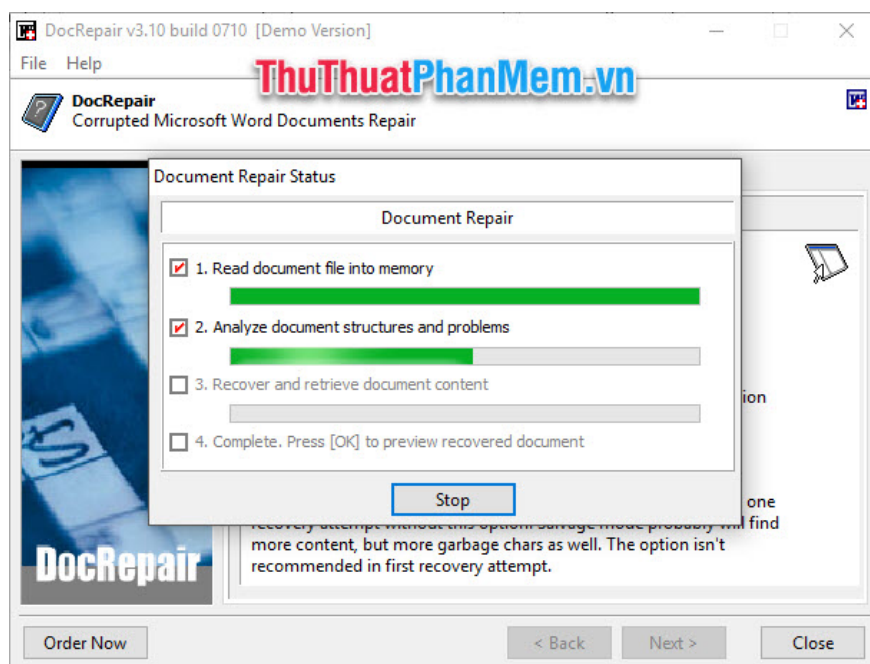

Document content is in language other than English : Document content in languages ??other than English .

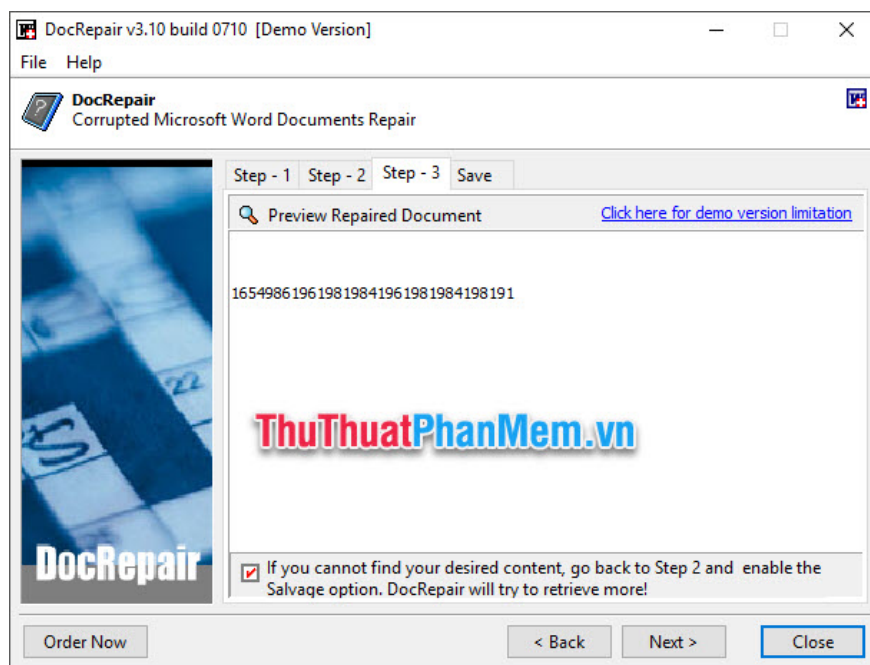

Support embed images retrieval : Support embedded **images retrieval** .

Use salvage content retrieval mode : Use salvage content retrieval mode .

Click **Next** to move to the next step, which will start correcting the Word file.

You can see the errors have been corrected at **Step-3** of this software.

After the error correction has been completed, click Next to save the corrected Word file. Now you can open the corrected Word file up normally.
