

How to fix IDM not automatically downloading music and video links on Chrome and Firefox

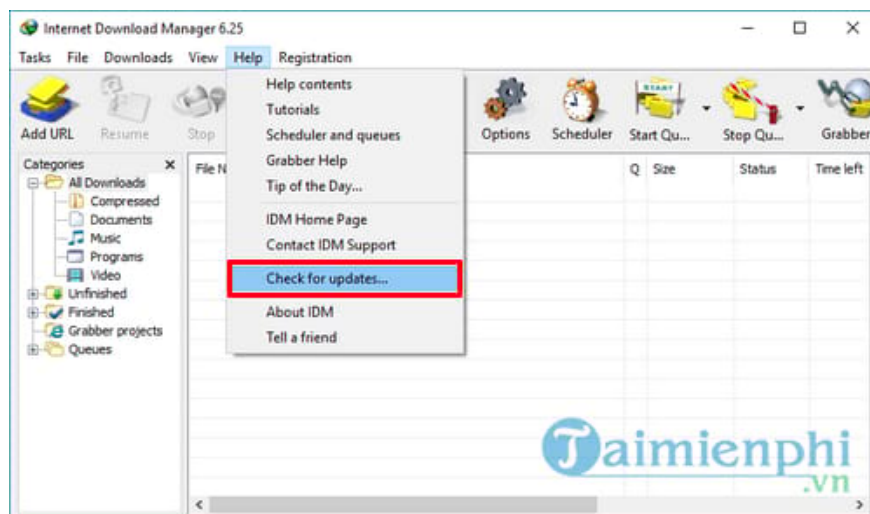

You want to download Youtube videos on Chrome or Firefox, but today IDM doesn't automatically catch the link like usual? Please refer to how to fix the error of IDM not automatically capturing music and video links on the most popular web browsers today.

The error of IDM not automatically downloading links to videos, Mp3. is quite common with users today. When encountering this error, users have installed IDM on their device but when opening a Youtube video, Facebook or a song, they listen to it. IDM does not automatically capture the link to be able to download that Youtube video or song to your computer like before.

How to fix IDM not automatically capturing music and video links

To fix the error of IDM not automatically capturing links, first open **IDM** and check your version to see if the version you are using is the latest version by selecting **Help -> Check for updates** . You can download the latest version of **IDM** , because if the IDM version is too old, it will not support capturing links on Google Chrome, Firefox or the new version of Coc Coc.

Next, for Firefox and Chrome browsers, follow the instructions below to learn how to fix errors when IDM does not catch links on Firefox or Chrome browsers.

1. How to fix IDM not automatically capturing links on Google Chrome

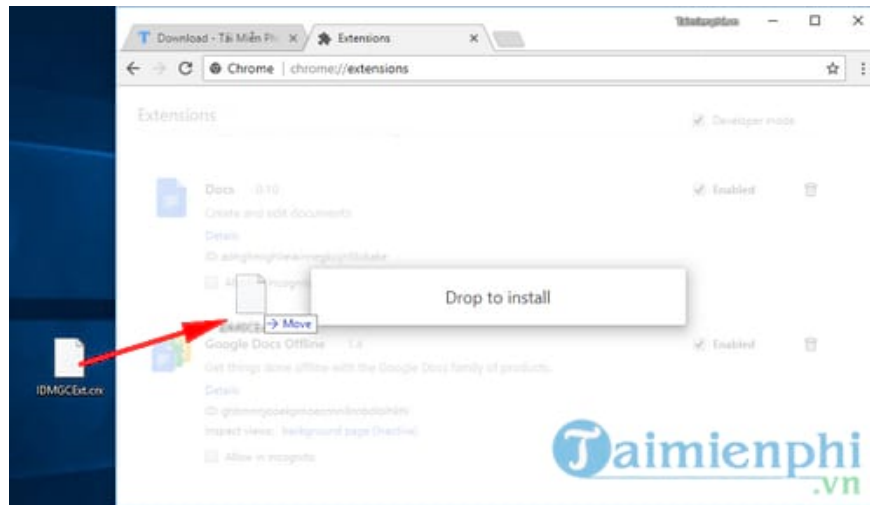

Step 1: Similarly, open your browser and enter **chrome://extensions/**

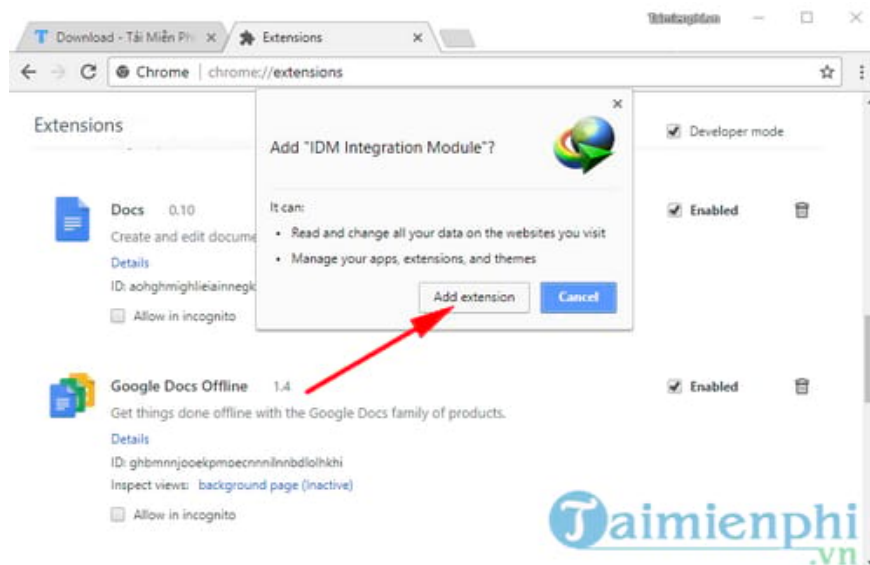

Step 2: You also open the IDM installation folder and copy the file **IDMGCEExt.crx** to the desktop

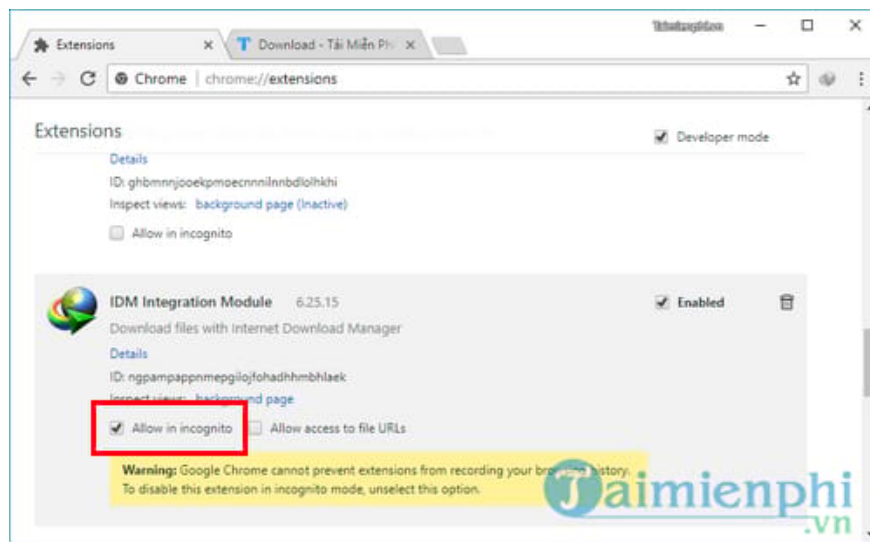

Step 3: Then you drag the **IDMGCEExt.crx** file on the desktop into the Chrome browser

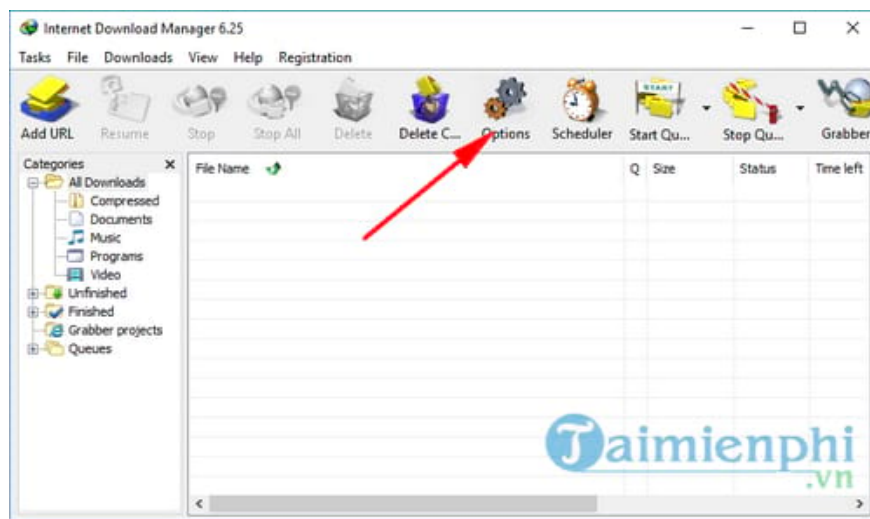

Step 4: A dialog box displays and you select **Add extension** to proceed with the installation

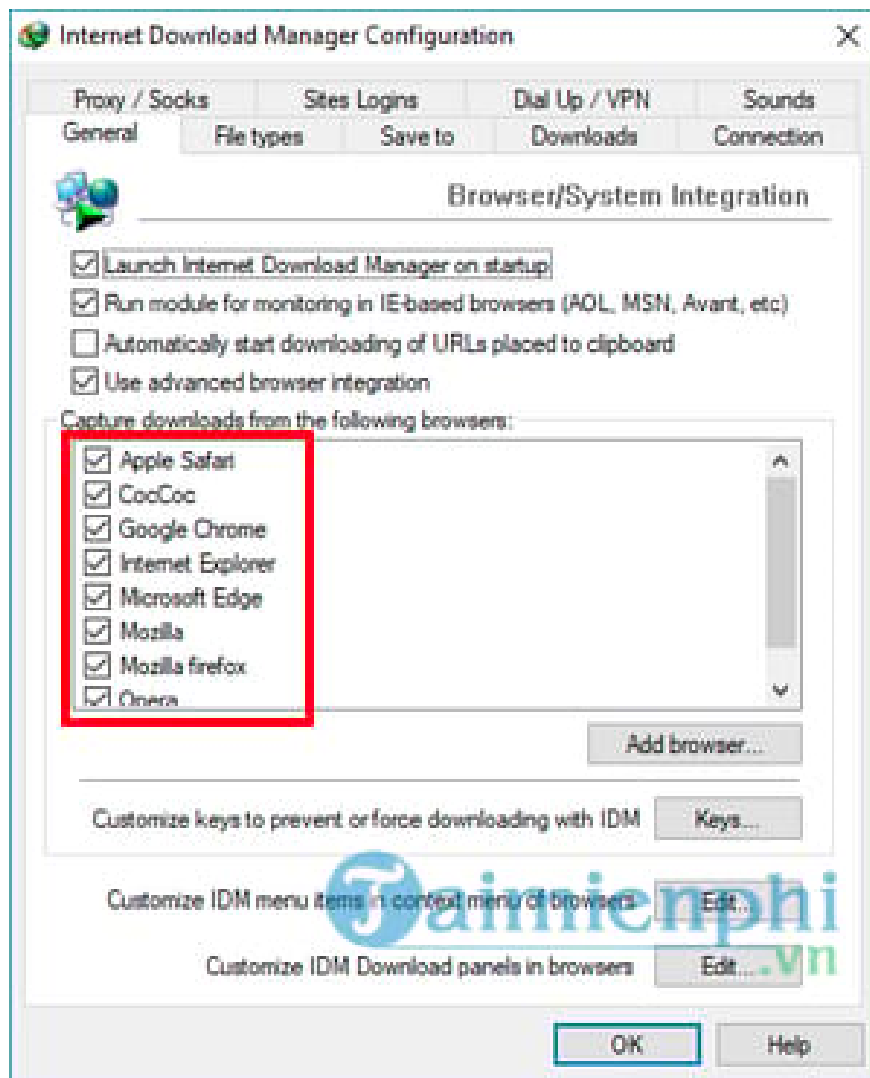

You can choose to add **Allow in incognito** for anonymous user status

Finally, open IDM and reset the settings. First, select Tab **Options**

In the **General** section , select the browsers, then click **OK**

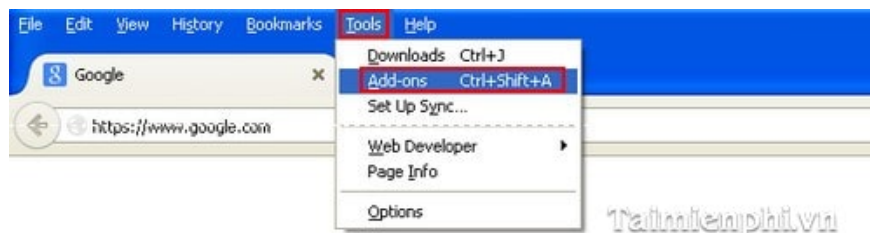

Next, select **File types** to add music or video extensions, then click **OK** to complete

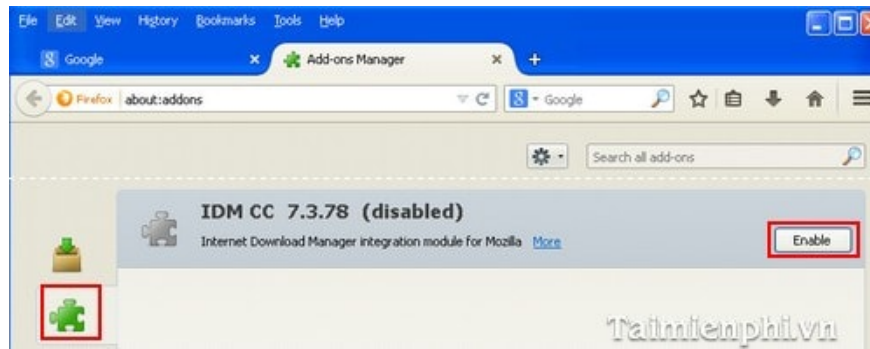

In case you have completed all the steps above but IDM still cannot automatically capture the link, you can try **downloading** the latest Chrome to your device.

2. How to fix IDM not automatically catching links on Firefox

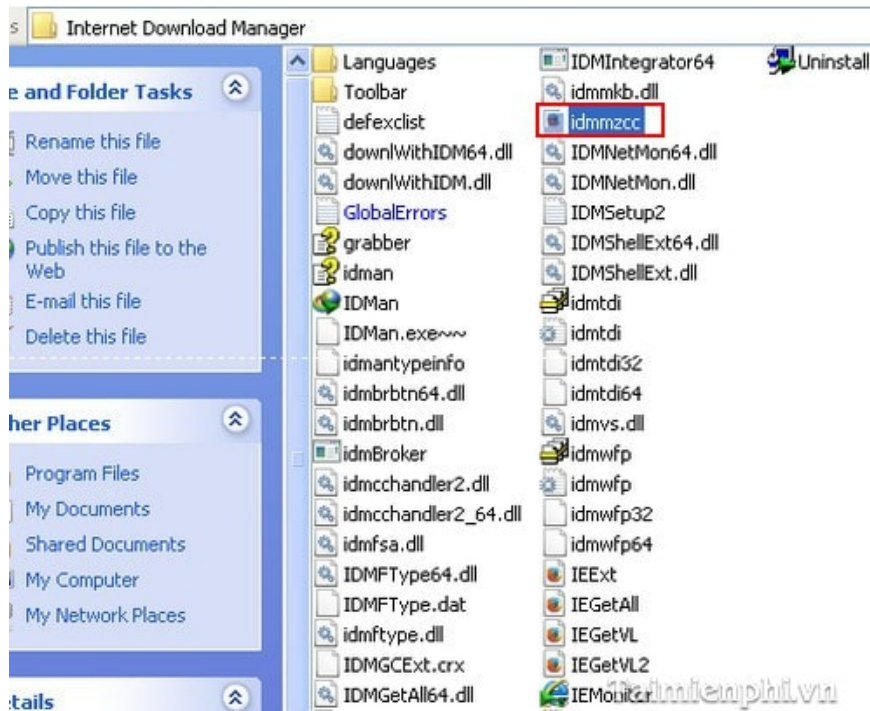

Step 1: Open Firefox browser, select Tools -> Add-ons

Step 2: In the Extensions section, check to see if IDM CC has been installed. If my computer has already installed it, I will choose Enable.

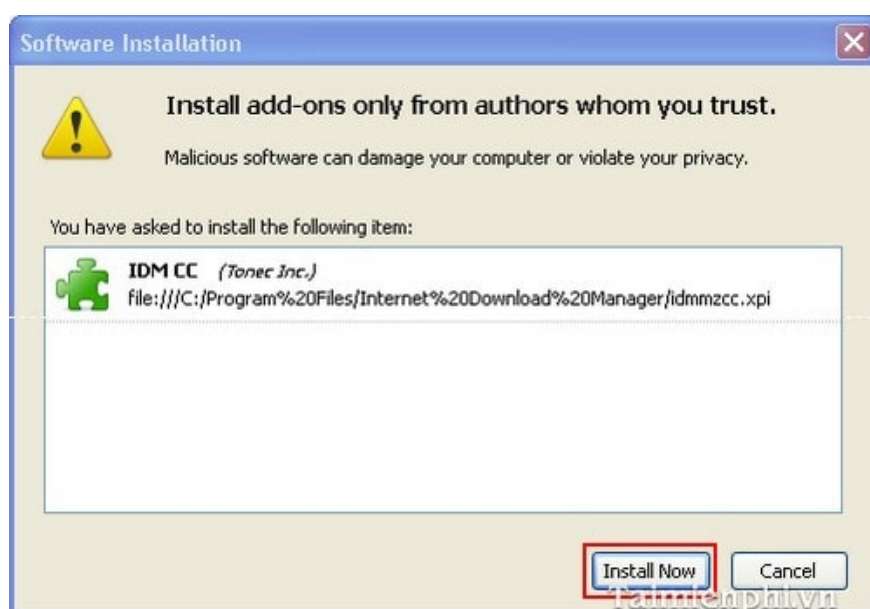

Step 3: For computers that have not yet installed it, go to the IDM installation folder and copy the idmmzcc file to the desktop.

Step 4: You will drag the file from this desktop into the Firefox browser

Step 5: After dragging the **idmmzcc** file into the browser, a dialog box will appear. To install, select Install Now

If you have installed **the Add-on** but still cannot do it, it may be because the add-on is not compatible with the current version of the browser, try updating Firefox or installing the latest version of Firefox. You should reinstall both IDM and Firefox to get the best support. Installing **IDM** is quite easy, with the latest version you will get more support.
