This will help protect the iPhone from malicious or unauthorized intrusion through your computer, without having to enter a password.

However, many iPhone errors do not appear Trust This Computer? when connecting to the computer, causing a computer error not receiving an iPhone connection in iTunes. The following article will guide you how to fix iPhone error not showing Trust This Computer ?.

1. The trick that makes iPhone use a bar-line number
2. How to check if iPhone has iCloud locked?
3. Instructions to restart iPhone when the device hangs

## Fix iPhone error not showing Trust This Computer?

### Method 1: Reconnect iPhone to computer

If we hurry to connect iPhone to a PC or Mac that is booting, or don't turn on iTunes before connecting, there is a possibility that an error will not display the message Trust This Computer? on iPhone.

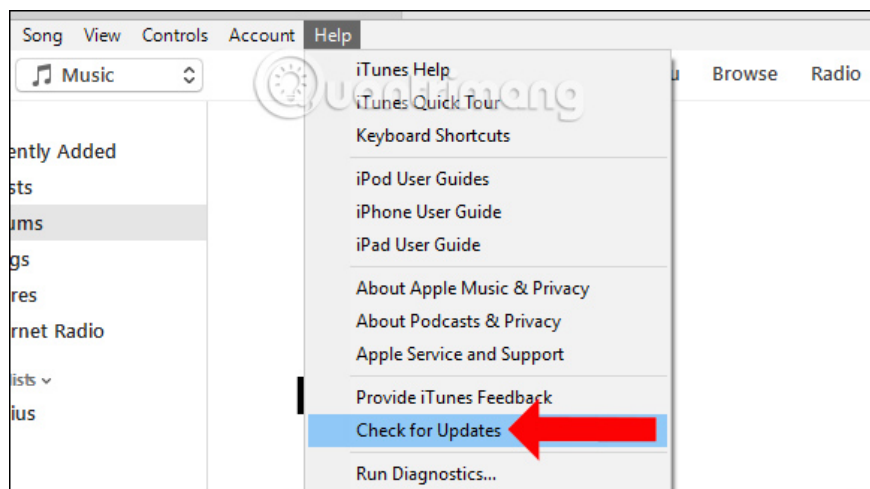

Please wait for the computer to boot, turn on iTunes and then connect to the iPhone. If it still doesn't show up, plug in the cable and reconnect it.

## Method 2: Update iTunes to the latest version

If iTunes version is old, it also causes the cause of not showing Trust This Computer ?. Try upgrading iTunes to the latest version.

In the iTunes interface click on **the Help item** and select **Check for updates** to check the new version of iTunes on your computer. After the update is complete, restart the computer and turn on iTunes to reconnect to the computer.

## Method 3: Restart your iOS device

Restarting the iPhone will help you to handle many errors on the machine, including error not showing Trust This Computer ?. Before restarting, disconnect the computer from the iPhone.

Press and hold the power button until a message appears **Slide to power off (Slide to power off)** . If it is iPhone X, press and hold the power button and the volume key up or down to open the shutdown slider.

1. Instructions on how to turn off and turn on the power of iPhone X

We then connect the iPhone to the computer.

#### **Method 4: Reset trusted settings**

When connecting to a computer, the iPhone will store information that computers have allowed to connect or refuse to connect. We can erase this information to reconnect from the beginning.

##### **Step 1:**

Click on **General settings** and then click on **Reset** .
