

# How to fix iPhone not install apps

Not being able to install apps is one of the very common problems when using iPhone, iPad. How to fix the above situation?

Please perform the following steps to **fix iPhone, ipad** cannot install apps

## 1. Check network connection

Faulty network connection is one of the main reasons why you can't install apps. To fix this, users just need to go to Settings on iPhone, disable WiFi or Cellular (mobile data) options, wait a few seconds and turn it on again.

In case the iPhone still displays the Cannot Connect to App Store error message (can't connect to the App Store), go to Settings and turn on Airplane mode (airplane mode), wait about 30 seconds and turn off. .

Note, when airplane mode is activated, all connections on the iPhone, including cellular, Internet, Bluetooth . will be completely disconnected.

## 2. Update date and time

Some services and applications on the iPhone may not work correctly if the date and time are incorrectly set. To fix this, go to Settings - General - Date & Time (date and time), and then enable the Set Automatically option.

Besides, users should also check that the current Time zone is correct or not, if not, you just need to reset.

## 3. Restart iPhone

Restarting the device is the easiest way to fix unknown errors, including not being able to access the App Store to install apps.

To do this, go to Settings - General - Shut down - Slide to power off (slide to shutdown). When the iPhone is completely turned off, users only need to press and hold the power button for about 3-5 seconds until the Apple logo appears.

## 4. Check the running status of Apple services

In addition to the above methods, you should also try to check the operation status of Apple services by visiting <https://www.apple.com/support/systemstatus/>.

If the App Store item shows green, everything is working properly, otherwise, red indicates problems. At this point, you will not be able to do anything except wait for Apple to fix the problem.
