

How to fix mobile data errors, iMessage and Facetime iOS 10 Beta Jailbreak

Some people after jailbreaking their iOS 10 devices have problems with mobile data, iMessage or Facetime does not work at all.

A new problem arises for those who have conducted jailbreaking their iOS 10 device is faulty mobile data (3G, 4G or LTE). Besides services like iMessage and Facetime also have problems, sometimes can not use and do not work. Since this is only a trial version, the features have not yet been finalized and some of the above errors arise. If you set your iPhone / iPad iOS 10 to jailbreak and meet the mobile data error status, iMessage and Facetime errors can refer to the tutorial below.

However, before doing so, please switch back to the English keyboard to make it easier to implement.

Step 1:

First of all on the device we need to download **Tweak MTerminal** and **Open SSH** from **BigBoss source** .

MTerminal

1.4-5

325 kB

Step 2:

Next, select **Settings> WiFi> select the network you are accessing** and click on **the extension (i)** . This takes the IP address of the WiFi network we are connecting to. **Copy the IP address** in the first line.

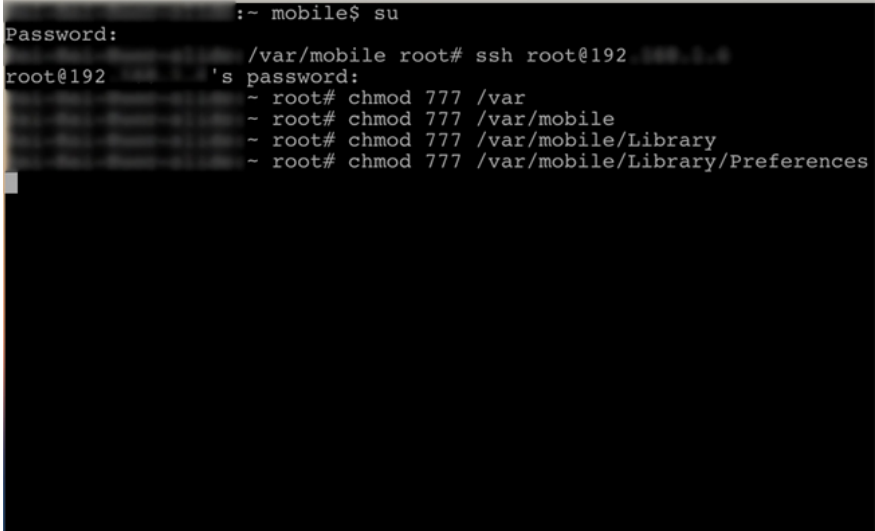

Step 3:

We open **MTerminal** then type the **keyword SU** and press **Enter** . Soon you will be asked to **enter your password** so you can continue. We type **alpine** then press **Enter** .

Step 4:

Next, type **ssh root @ [address_IP]** and then click **Enter** . If asked to **enter a password** , we will fill out **alpine** . Next you will **type the commands** as shown below:

```
chmod 777 / var
chmod 777 / var / mobile
chmod 777 / var / mobile / Library
chmod 777 / var / mobile / Library / Preferences
```

```
:- mobile$ su
Password:
/var/mobile root# ssh root@192.168.1.1
root@192.168.1.1's password:
- root# chmod 777 /var
- root# chmod 777 /var/mobile
- root# chmod 777 /var/mobile/Library
- root# chmod 777 /var/mobile/Library/Preferences
```

Step 5:

Finally we need to restart the device to fix the error effectively.

Above is a guide on how to fix errors related to mobile data, iMessage and Facetime does not work on iOS 10 Beta jailbroken. During implementation, always open mach_portal application. If your device has no stutter, lag or start up, we just need to press the Power key + Home button with iPhone 6s devices or below. With iPhone 7, you will press the Power + Volume Down button.

Refer to the following articles:

1. Complete how to fix Wifi error on iOS
1. Home button on iOS 10 device slowly responds, this is how to fix errors
1. Fix iPhone phone keyboard error running iOS 10 almost "freeze"

I wish you all success!
