

How to fix ms-windows-store: purgescaches on Windows 10

If you get the error 'ms-windows-store: purgescaches app didnt start' on the Microsoft Store, please follow the article below to know how to fix it.

1. Fix ms-windows-store PurgeCaches by PowerShell

PowerShell is known to be a popular encoder, and in the future they will be the mainstream in Windows. To fix ms-windows-store PurgeCaches with PowerShell, do the following:

Step 1: You proceed **Right-click on the Start Menu** and select **Windows PowerShell (Admin)** to launch the software.

Step 2: After *PowerShell* appears, copy the command below to paste into the software and press **Enter** to run.

PowerShell -ExecutionPolicy Unrestricted -Command "& {\$ manifest = (Get-AppxPackage * WindowsStore *). InstallLocation + 'AppxManifest.xml'; Add-AppxPackage -DisableDevelopmentMode -Register \$ manifest}"

Step 3: Then, you continue to enter the command below and press **Enter** to re-launch the Microsoft Store.

```
Get-AppxPackage -allusers Microsoft.WindowsStore | Foreach {Add-AppxPackage -DisableDevelopmentMode -Register "$($_.InstallLocation)AppXManifest.xml" }
```

Once finished, please reopen the Microsoft Store to check.

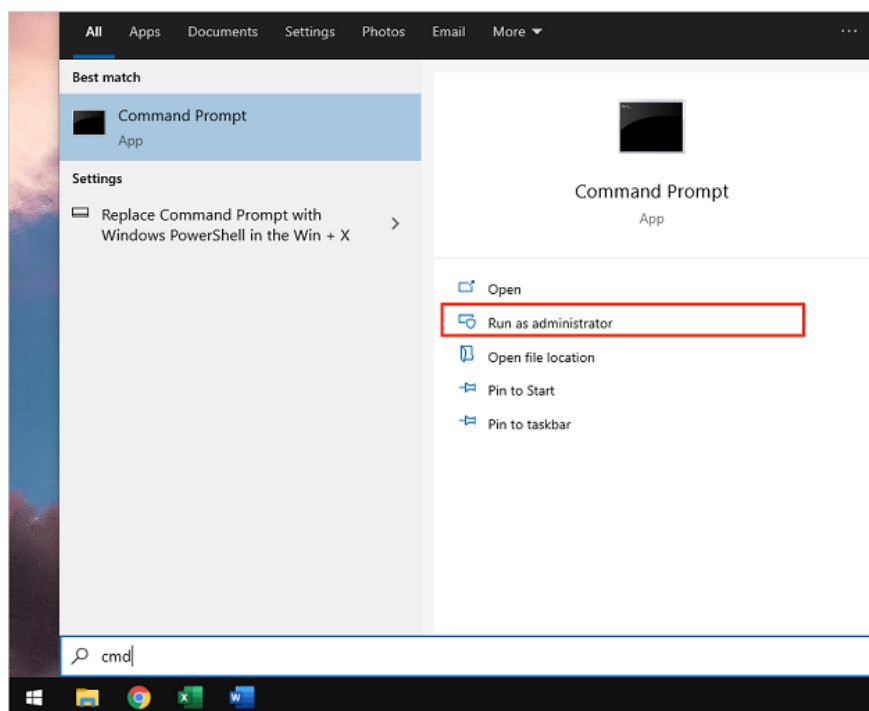

```
Administrator: Windows PowerShell
PS C:\Windows\system32> Get-AppxPackage -allusers Microsoft.WindowsStore | Foreach {Add-AppxPackage -DisableDevelopmentMode -Register "$($_.InstallLocation)AppXManifest.xml" }
>>
```

2. Fix ms-windows-store PurgeCaches by Command Prompt

Similar to PowerShell, Command Prompt is also a basic command prompt on Windows 10 and to fix ms-windows-store PurgeCaches by cmd, do the following:

Step 1: You proceed to open the **Start Menu** , enter **Command Prompt** and select **Run as administrator** to open with admin rights.

Step 2: When the Command Prompt window appears, enter the following command and press **Enter** to run.

SFC / scannow

After the command has been run to 100%, exit the Command Prompt and reopen the Microsoft Store to check.

```
Administrator: Command Prompt - SFC /scannow
Microsoft Windows [Version 10.0.19041.508]
(c) 2020 Microsoft Corporation. All rights reserved.

C:\Windows\system32>SFC /scannow

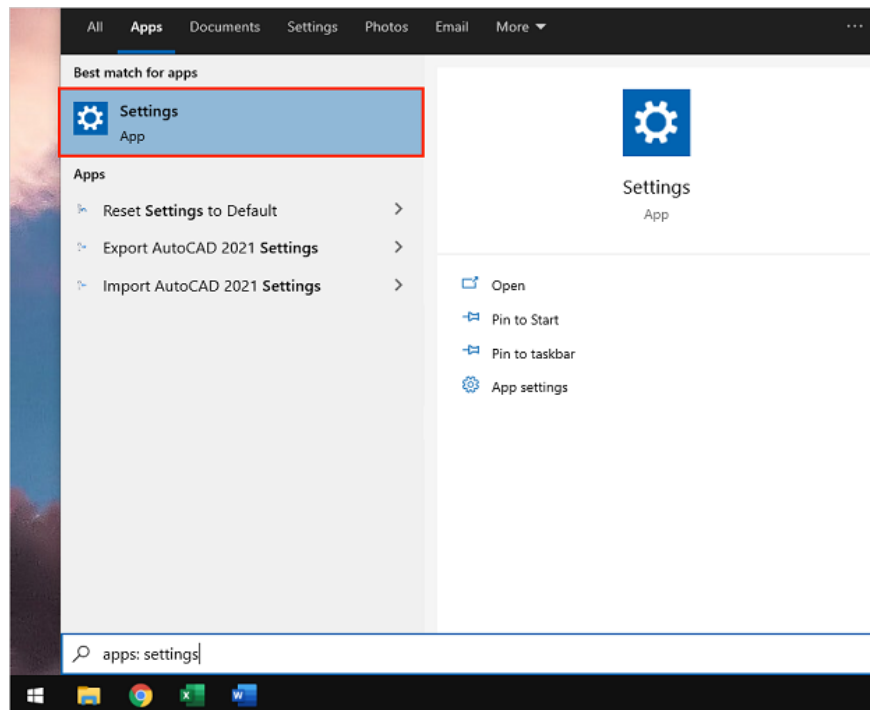

Beginning system scan. This process will take some time.

Beginning verification phase of system scan.
Verification 2% complete.
```

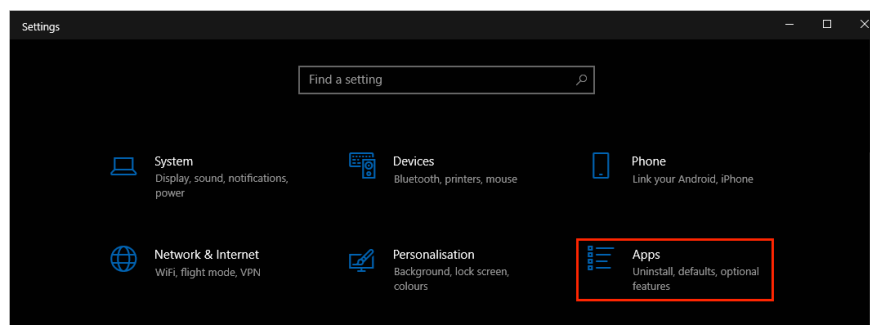

3. Fix ms-windows-store PurgeCaches error using Settings

In addition to the above methods, you can use Settings to restore the settings of the Microsoft Store.

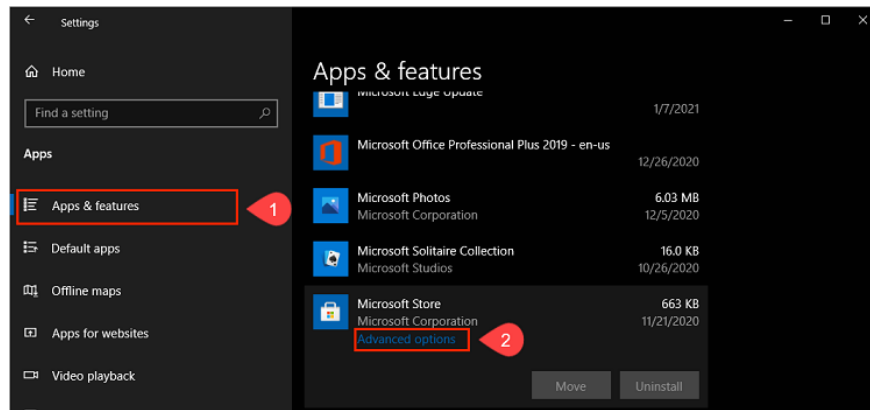

Step 1: You shall open **Settings** by clicking on the Start Menu or press the **Windows + I**.

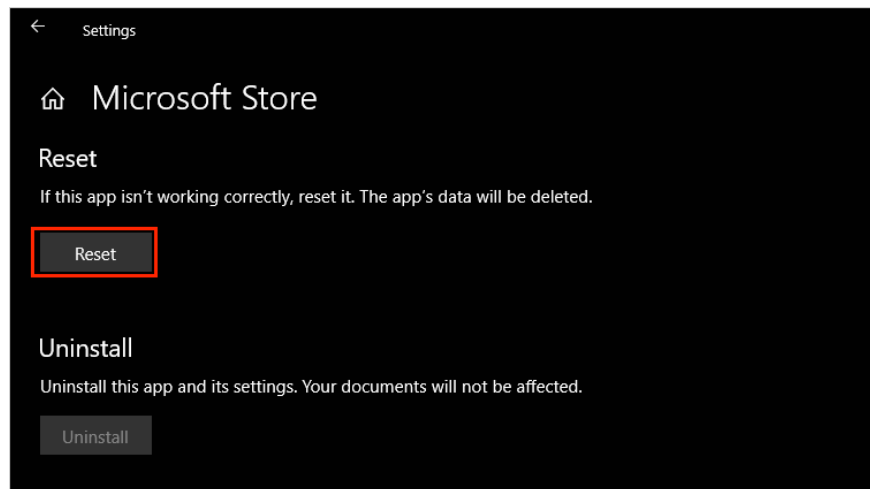

Step 2: Then, you select **Apps** to open the application settings on the computer.

Step 3: Next, select **Apps & features (1)** and navigate to Microsoft Store to select **Advanced Options (2)**.

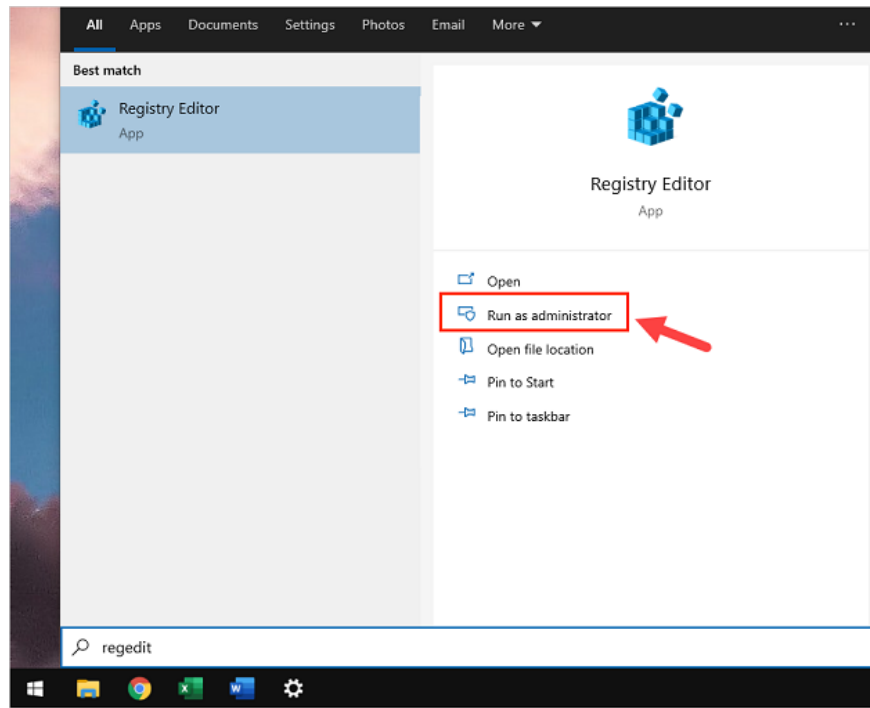

Step 4: Finally, you choose **Reset** to restart Microsoft Store to default.

4. Fix ms-windows-store PurgeCaches error with Registry Editor

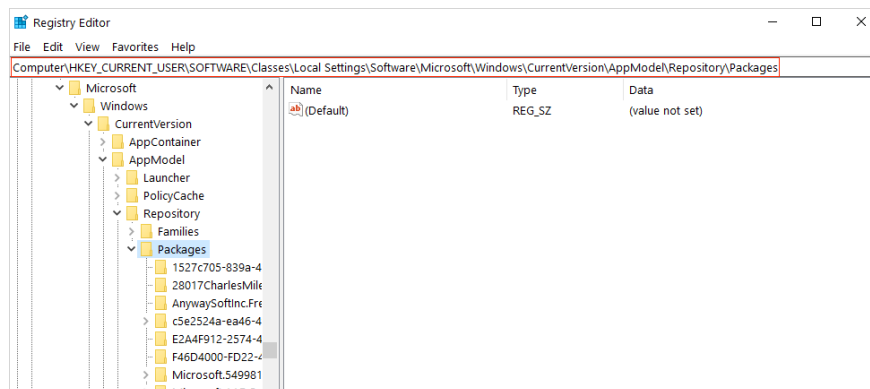

Sometimes the error on the Microsoft Store also comes from an issue that doesn't have enough access. To solve this problem you will have to interfere in the Registry Editor.

Step 1: You proceed to open the **Start Menu** and enter **Registry Editor** to open.

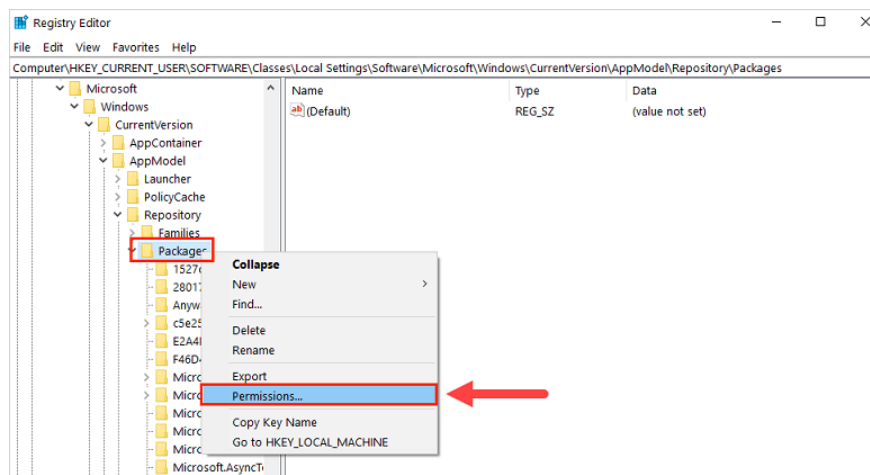

Step 2: Then, copy the following URL and paste it into the link bar on **Registry Editor** to move to the necessary location.

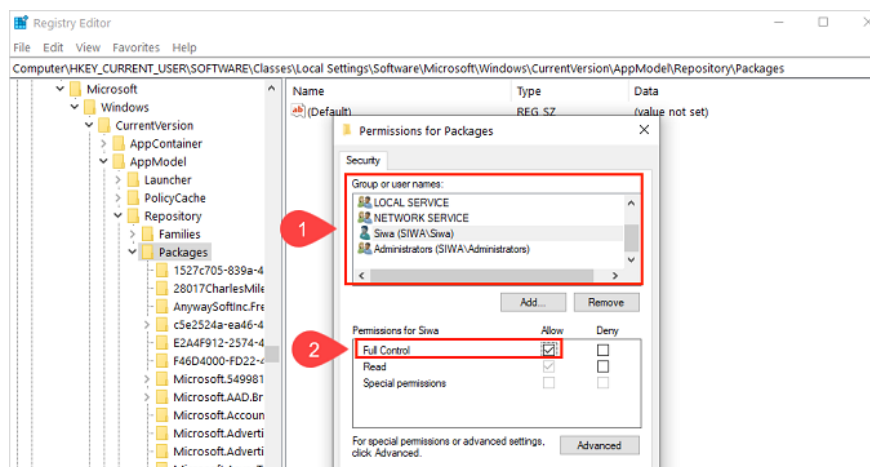

HKEY_CURRENT_USERSoftwareClassesLocal
SettingsSoftwareMicrosoftWindowsCurrentVersionAppModelRepositoryPackages

Step 3: Here, right click on **Packages** and select **Permissions...**

Step 4: Then, you proceed to select the **User** account you **are using (1)** and tick the **Allow (2)** section of **Full Control** . Finally, you choose **Apply => Ok** and restart your computer.
