

# How to fix Play it Safe in Cyberpunk 2077

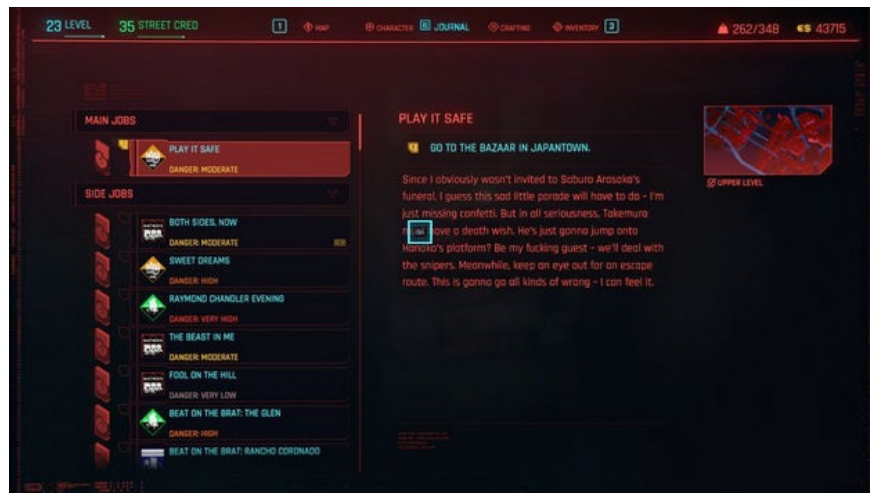

Cyberpunk 2077 released with a lot of bugs in the game. And one of the errors that players are facing in Cyberpunk 2077 today is Play It Safe that prevents them from going deep into the game. In this article, TipsMake will share you how to fix Play it Safe in Cyberpunk 2077.

**Cyberpunk 2077** is facing heavy criticism because of the number of bugs that players constantly encounter. Currently, players are encountering an annoying bug, causing them to freeze in place, unable to continue exploring the game. Since the main stories are linked, the player cannot ignore one of them, but needs to perform the quest to get into the game and this error is the main quest bug "Play it Safe".

In the **Play it Safe** error, Takamura will not call you for an indefinite period of time. While this is an important point in the game, without it you can't go any further. So, the article will share you some ways to fix **Play it Safe in Cyberpunk 2077** that you can apply to fix the problem.

## How to fix Play it Safe in Cyberpunk 2077

Like any story-based game, certain quests must be completed in order to continue the game. As noted above, Play it Safe is a major plot mission and is buggy. At this point, every player is likely to experience this issue.

Gamers who go to this mission feel uncomfortable. Because of this, the player does not receive a call from Takamura despite the long wait. CDPD is currently releasing updates, but they are not fully fixed yet. However, there are a number of easy solutions that have been discovered and have proven to be an effective fix.

All you need to do is pass "The Afterlife" with Hellman. That's because at the time of the mission your ticking clock will be at 30%. You need to correct this percentage because it will trigger the fix. Now you can wait there, pass 24 hours and reload the area. Alternatively, you can go back to the hostel, click on the terminal and touch

where you will appear. Now, wait for 24 hours and Takamura will call you immediately.

If this doesn't work, there's still another way to try it. This way, the player needs to kill himself in the game for it to work. Specifically, players have to wait 24 hours to pass, commit suicide and reload checkpoints. This would also trigger a call from Takamura.

Here are 3 possible fixes for the "Play it Safe" task in Cyberpunk 2077. Those who do not want to try these fixes can wait for CDPR to release their own hotfix version to resolve both problems. More bugs found in the game. Currently, the fixes in the article will help all those who are experiencing this problem in Cyberpunk 2077.

In addition, Cyberpunk 2077 also has many errors that players easily encounter such as crashes, for example, normally while playing Cyberpunk 2077.
