

How to fix the black screen of the Raid game

When playing Raid, there are many gamers who encounter black screen phenomenon, cannot access the game. So what is the way to handle black screen error on CF?

Raid game is still one of the great titles of the PC game series, attracting for me a large fan volume right after its launch. However, these games will often take up a lot of system capacity. Especially for those with weak configuration, there will often be problems such as screen black errors.

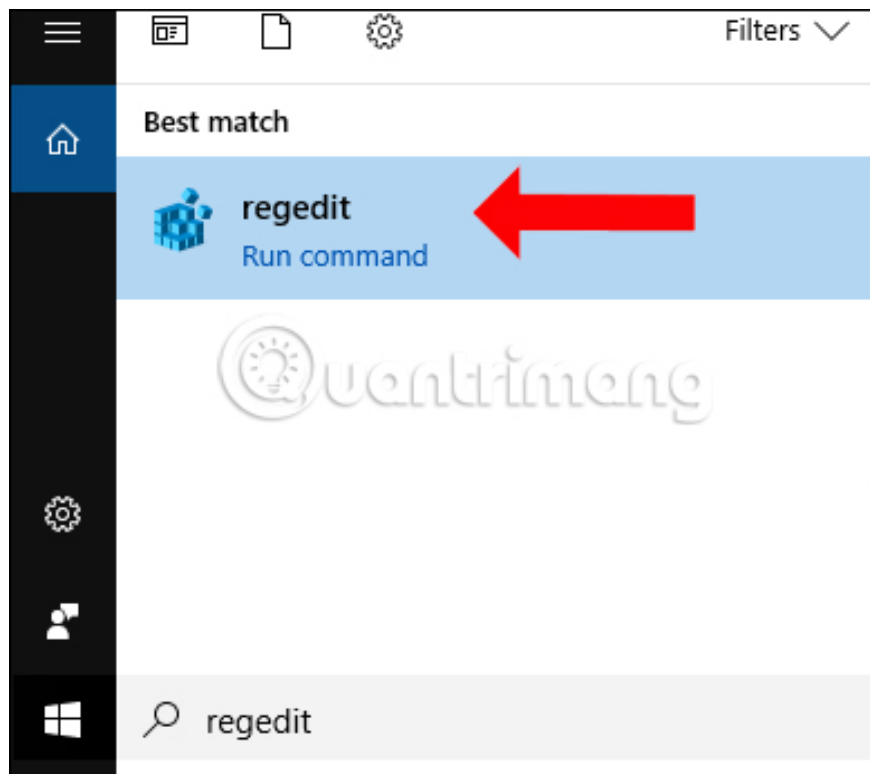

When accessing the game, the game screen will become dark and you will not be able to access it to play the game. This error is often concentrated and appears on Windows XP machines. So how to fix black screen error when playing Raid?

Instructions to fix black screen error on CF game

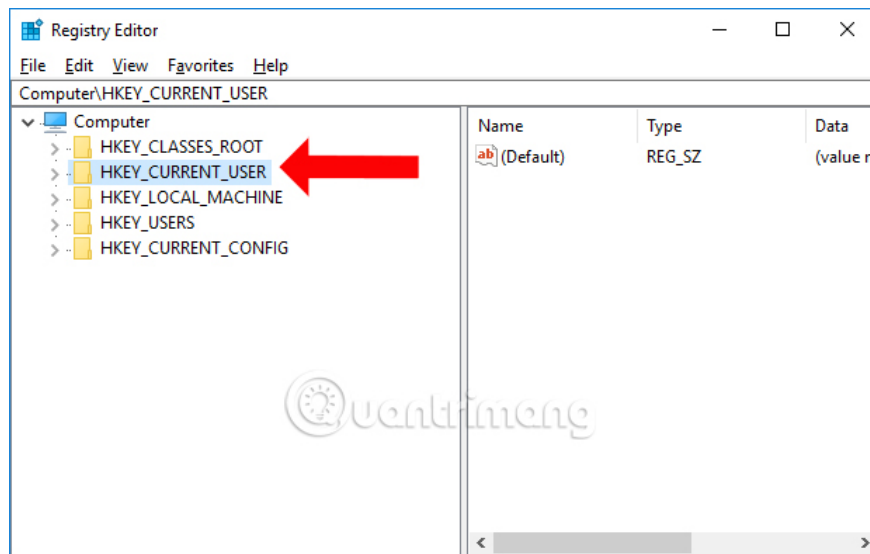

Step 1:

In the search bar on Windows, users enter the **keyword regedit** and then click on the search result.

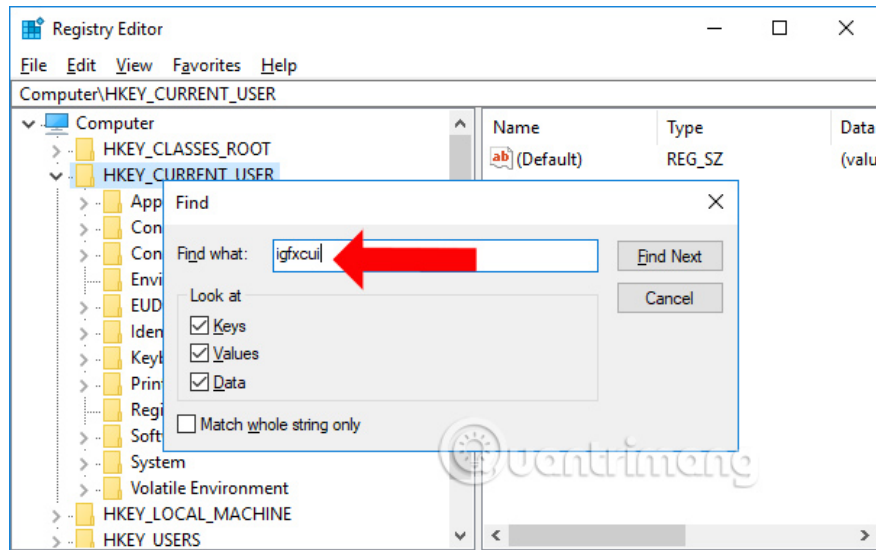

Step 2:

In the Registry Editor interface, the user clicks **the HKEY_CURRENT_USER folder.**

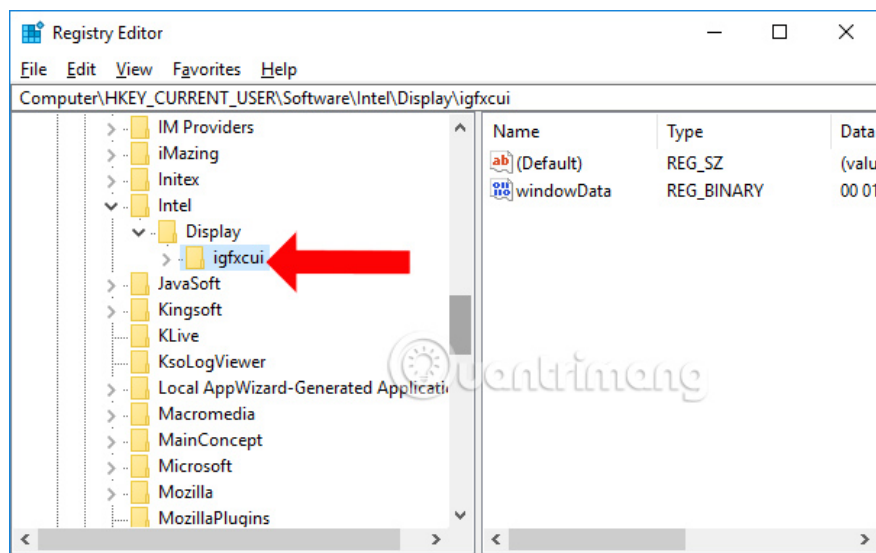

Here press **Ctrl + F** to open the search interface and then press the **keyword igfxcul** and press Enter. Or we can press Find Next 2 times.

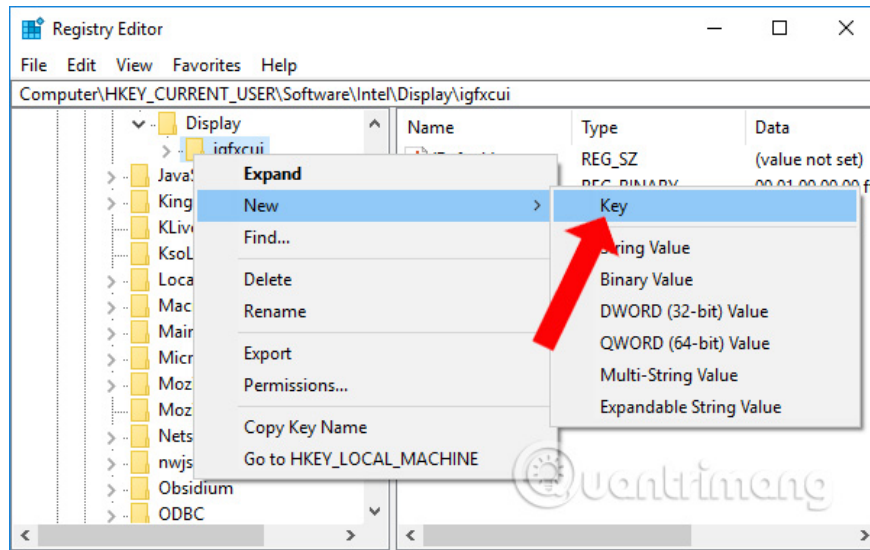

Step 3:

Once you have found igfxcul, click on this item. If there is a 3D item then click, if not, you need to create a 3D item in igfxcul.

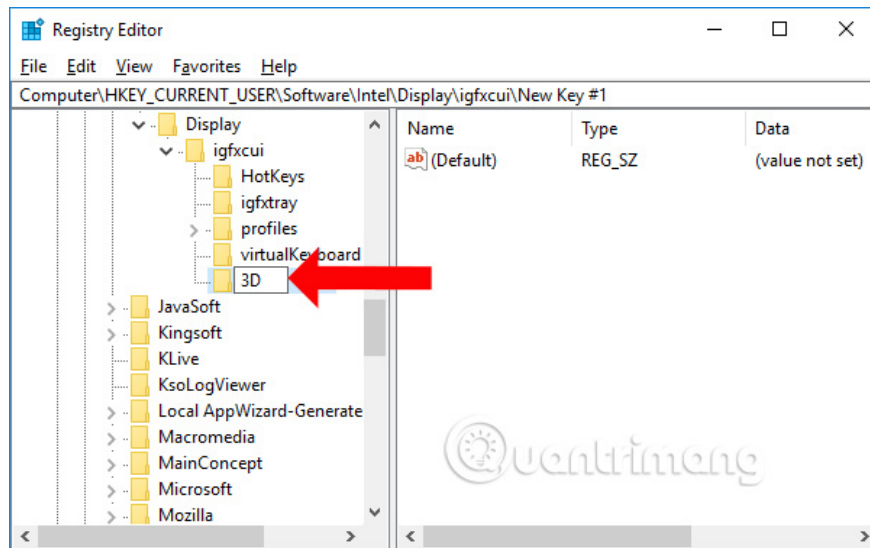

Step 4:

Right-click on the igfxcul item and select **New** and then click on **Key** to create a new key.

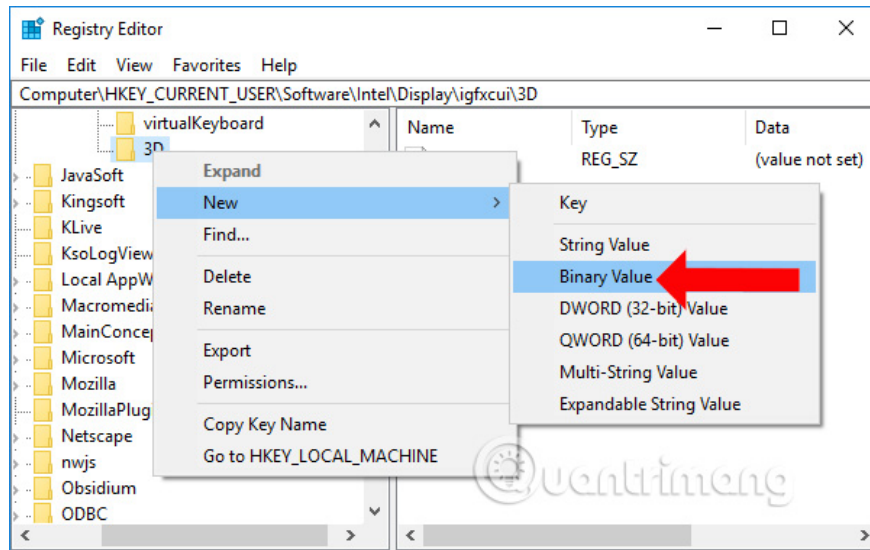

Enter the name for the newly created key, 3D .

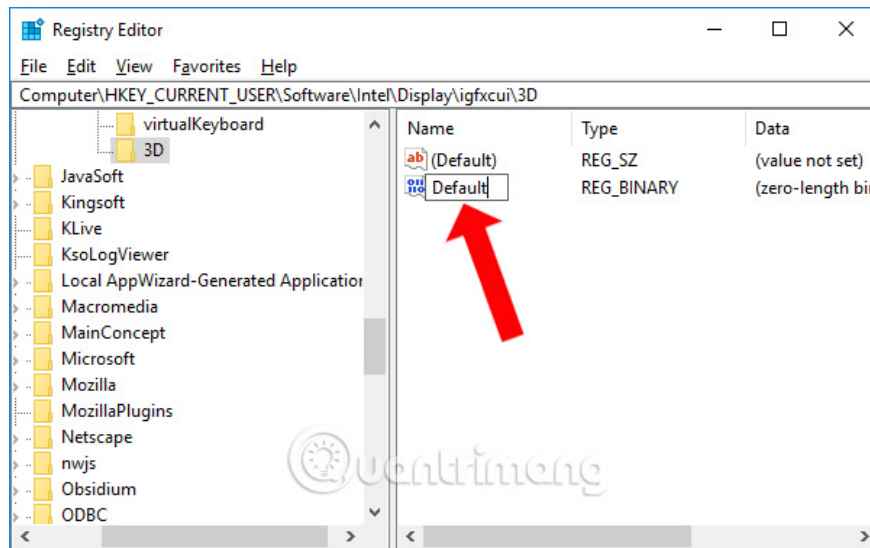

Step 5:

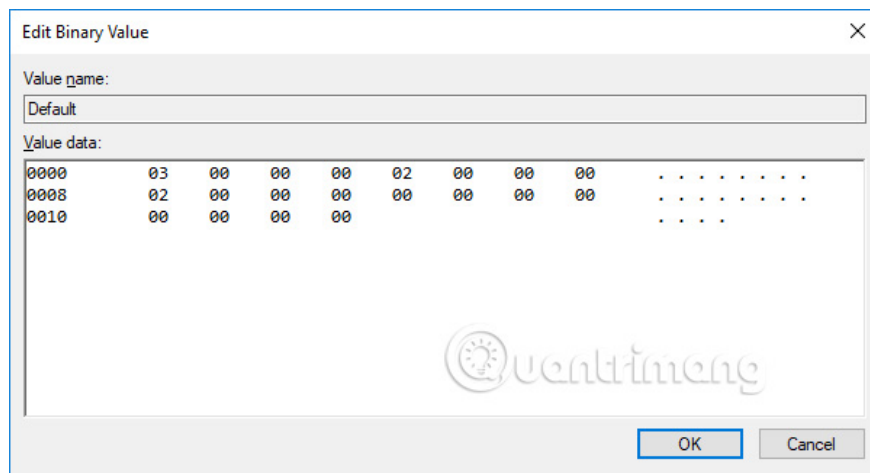

Continue right-clicking on the 3D key, click **New** and then select **Binary Value** .

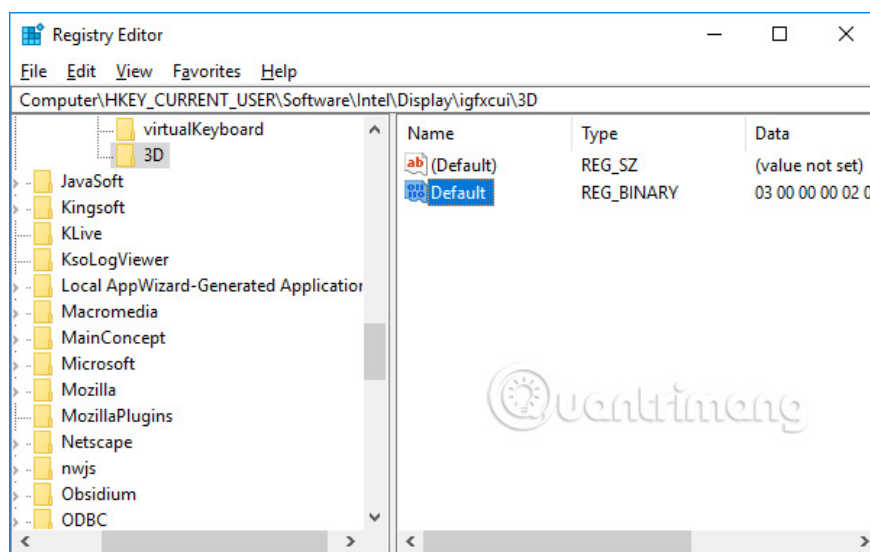

Next rename **the newly created value** , from New Value # 1 to **Default** .

Next, right-click the value to choose Modify or double-click the value to bring up a new dialog box. Here you enter the values `??` in turn as follows `03 00 00 00 02 00 00 00 02 00 00 00 00 00 00 00 00 00 00` in the blank. No need to press Enter because the value will automatically return to the line. Click OK to save.

As such, the data value on the Registry Editor will be as shown below.

By requiring a large game console configuration, black screen will happen more when playing Raid game on a low profile computer. It is best to install the game on computers that have a high configuration, meet the minimum configuration when playing Raid on a computer. In addition, if you are a person who likes shooting game genre, you can try playing a game Clicking a game is also being chosen by many people.
