

How to fix the error can not post Story on Instagram

To fix the error of not posting Story on Instagram, we have many different ways to fix the error. Failure to post Story to Instagram may be due to a server software error, or an application error.

To fix the error of not posting Story on Instagram, we have many different ways to fix the error. Failure to post Story to Instagram may be due to a server software error, or an error from the Instagram app. At that time, the application will stop working, may not load the message board, or post Story on Instagram. Because there are many causes of Story posting error on Instagram, we also have many different ways to fix problems. The following article will guide you on how to fix the error of not posting Story on Instagram.

1. Cause of error posting Story on Instagram

As mentioned above, the error can not post Story on Instagram due to many reasons.

1. Server software errors: Instagram regularly updates the system to upgrade features or add patches. It may be that you posted Story on Instagram during the update so an error occurred.
2. Instagram application error: The application has a problem, and the problematic operation also causes an error when posting Story to Instagram.
3. Poor network connection: The last cause may be due to network problems, unstable 3G / 4G connection.

2. How to fix the error can not post Story on Instagram

Method 1: Wait a few minutes and then repost Story

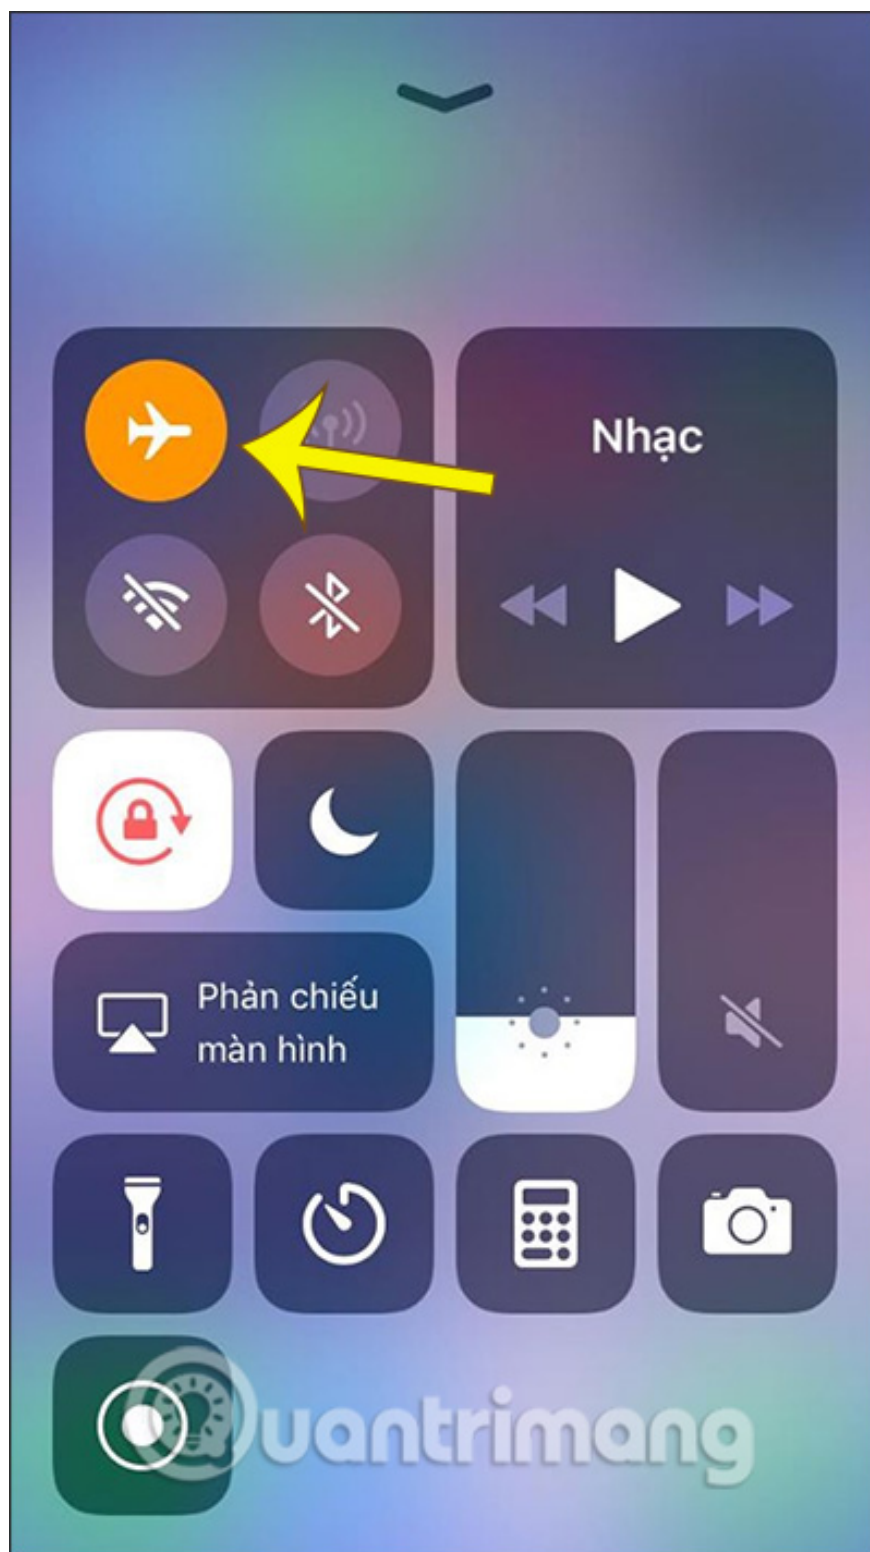

When you can not post Story on Instagram, we wait for a while and then proceed to post from the beginning. If still not, see how to fix it below.

Method 2: Turn off WiFi again, mobile data

Story's failure to post to Instagram may be due to a problem with the internet connection. Let's turn off and then turn on WiFi again, or switch to using mobile data to try it.

Method 3: Turn on airplane mode (Airplane Mode)

This method has been used by many people and the Story bug has been fixed. You turn on airplane mode and wait for a few seconds, then turn off and reconnect WiFi.

Method 4: Delete Instagram data

When we clear data and clear cache on Instagram, the application will be reset from scratch. This can also fix the error of not posting Story on Instagram or other errors.
