

# How to fix the error 'Cannot obtain the app name, failed to save' in NoxPlayer

When setting up a keyboard on a computer that simulates gestures like on a mobile phone, has there ever been an error Cannot obtain the app name, failed to save? If you are in this situation, please follow the following article.

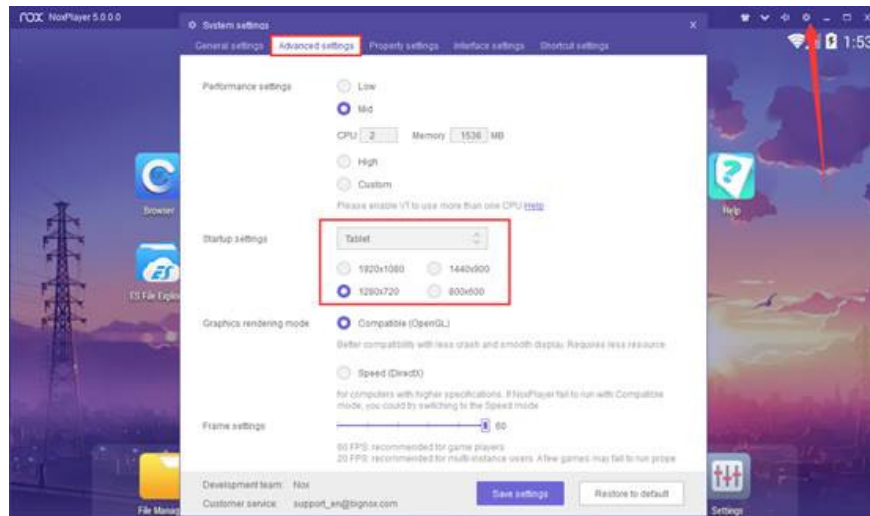

In NoxPlayer, you can set up keyboard controls to simulate walking gestures and hand gestures such as swiping, typing to control game characters to play mobile games more efficiently on the computer. For example, you can use traditional WASD keys to play MOBA games like Mobile Legends and Vainglory on your computer.

1. 10 best Android emulator software for Windows
2. Play Android game on PC using NoxPlayer (Nox App Player)

Sometimes you may encounter the following error message in NoxPlayer when saving the keyboard settings. Record message '**Cannot obtain the app name, failed to save**' ( **failed to** get the application name and saved failed). You can follow these instructions to fix this error.

First, go to the NoxPlayer System Settings (the gear icon in the upper right corner of the Nox window)> **Advanced settings** > change the resolution of NoxPlayer> **Save settings** > then try setting and saving the settings keyboard.

If the above does not solve the problem, you can try turning off NoxPlayer and all anti-virus software on your computer, creating a new Nox object in the multi-object manager and try Set up, save keyboard settings in this new object.

Good luck!
