

How to fix the error does not print images in Word

Failure to print images, or not displaying images on Word will make it difficult for users to print documents.

It is very simple to insert images into Word and do the same on different versions of Word. And in the process of editing or printing data, sometimes you will encounter errors that cannot print images in Word, when printing Word documents, there will be no images in the file, affecting the contents of the file. Even if you change to an image with a smaller size, or a smaller size, the image still doesn't show up on Word to print or export to a PDF file.

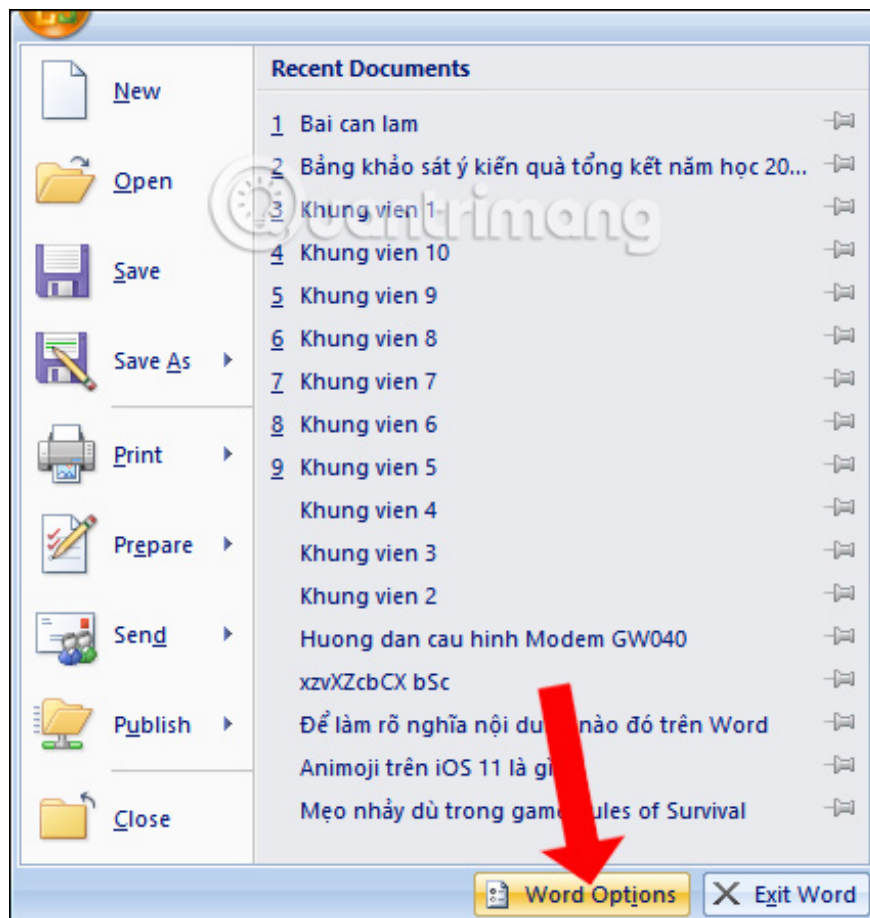

In fact, this is not too big a bug, but you can edit it right on the settings section of Word, with different versions to fix the problem of not printing images on Word.

Instructions for fixing errors cannot print images on Word

Step 1:

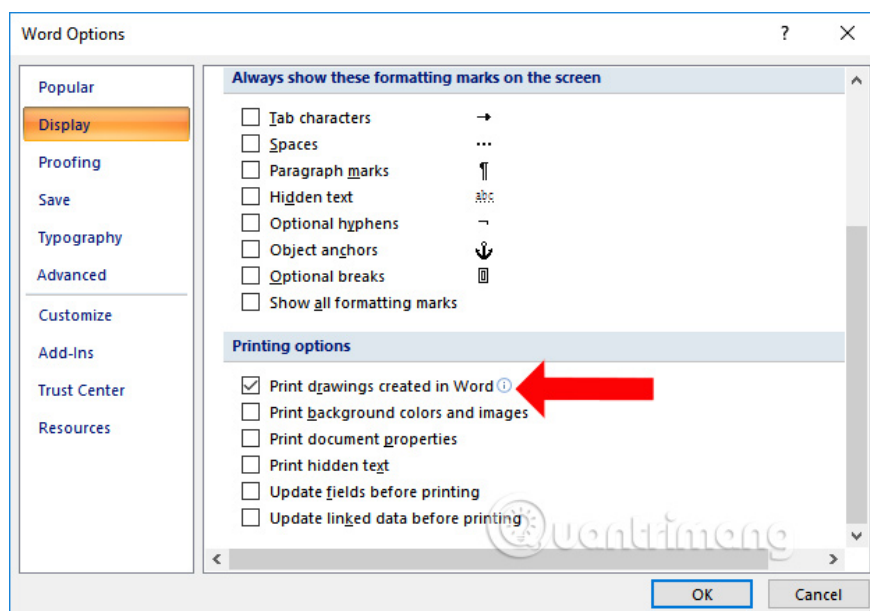

We click on **the Office icon** and then select **Word Options** .

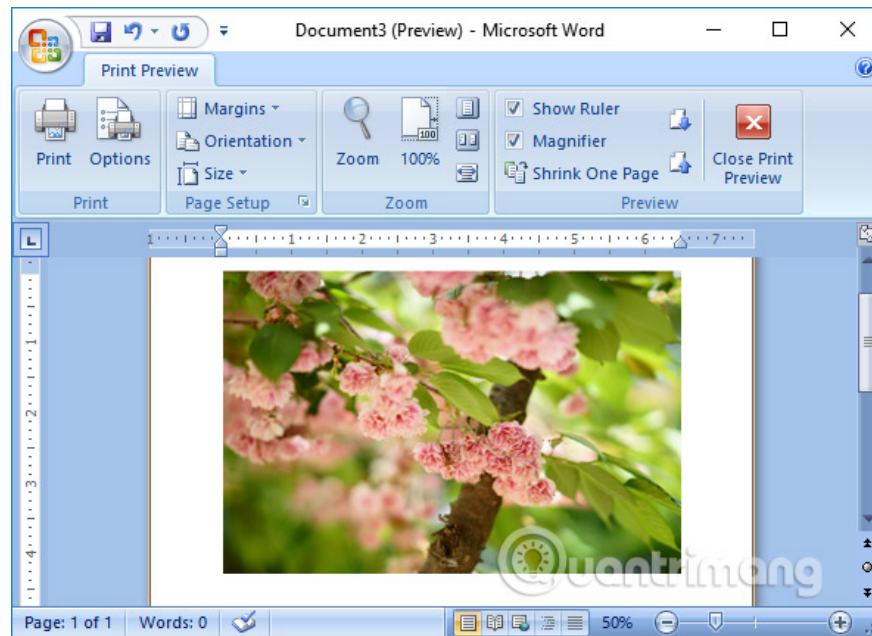

Step 2:

In the new interface click on the **Display** section, then look to the right to find the **Printing Options** group to customize the printing mode on Word.

Next, **select Print drawings created in Word** to display the Word image again when printing and click OK.

Go back to the document and click on Print to preview the document when printing. Images inserted into Word files will be displayed again.

Because during the print customization process, you inadvertently remove the display mode on Word when printing, and an error cannot occur when printing images on Word. Just adjust the print mode of images on Word as above.
