Next, your system will automatically scan the network on the device and drag the **Control Center** from the bottom up, then turn on **Mobile Data** to reuse 3G / 4G of the device.

So you just fix the iPhone 3G / 4G error, note that those using **MobiFone** SIM will not fix this error because in the Enable LTE section there will be no Data Only feature.

If you are lucky without this error, you can enjoy the new features that iOS 12 brings, such as setting the time for an application, checking the new battery usage information, activating the temporary feature. When not disturbing for a certain period of time . Many other features that you can explore and experience, refer to the list
