

How to fix the Facebook tab error is suspended in the browser

On the browser, the Facebook tab error falls into a state of being suspended, inactive for a period of time or even stopped completely.

Recently many Facebook accounts reflect the status of the Facebook web tab on the browser constantly falling into a stalled state, stopped working within a few minutes, or even stopped completely. The other tabs on the browser still work normally, there is no error.

Users cannot continue using it nor can they turn off the Facebook tab in the usual way. This situation occurs continuously in the browser, making us feel uncomfortable, affecting the work to be done. So how to fix the status of hanging Facebook tab on the browser?

Method 1: Change the network card DNS

We will fix this by conducting DNS changes in the network card on the computer.

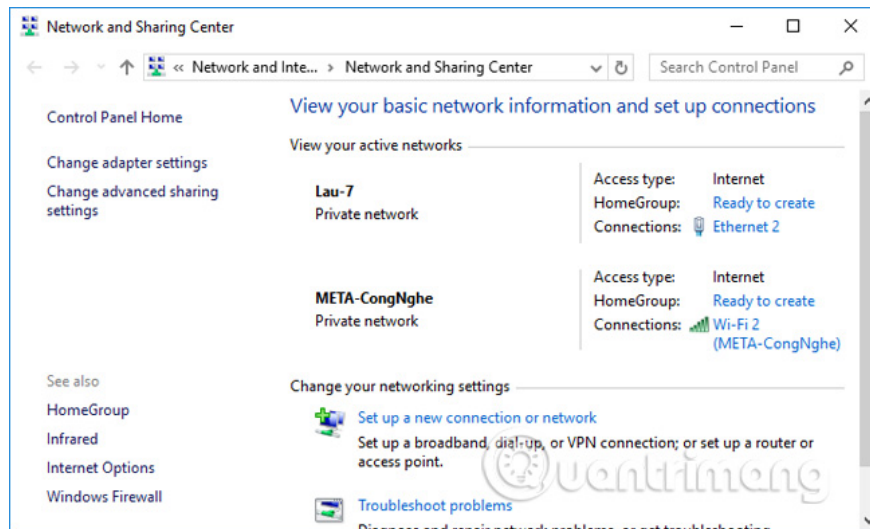

Step 1:

First, the user opens the network card management interface on the computer, by right-clicking **the network icon** connected to the Taskbar, and then selecting **Open Network and Sharing Center** .

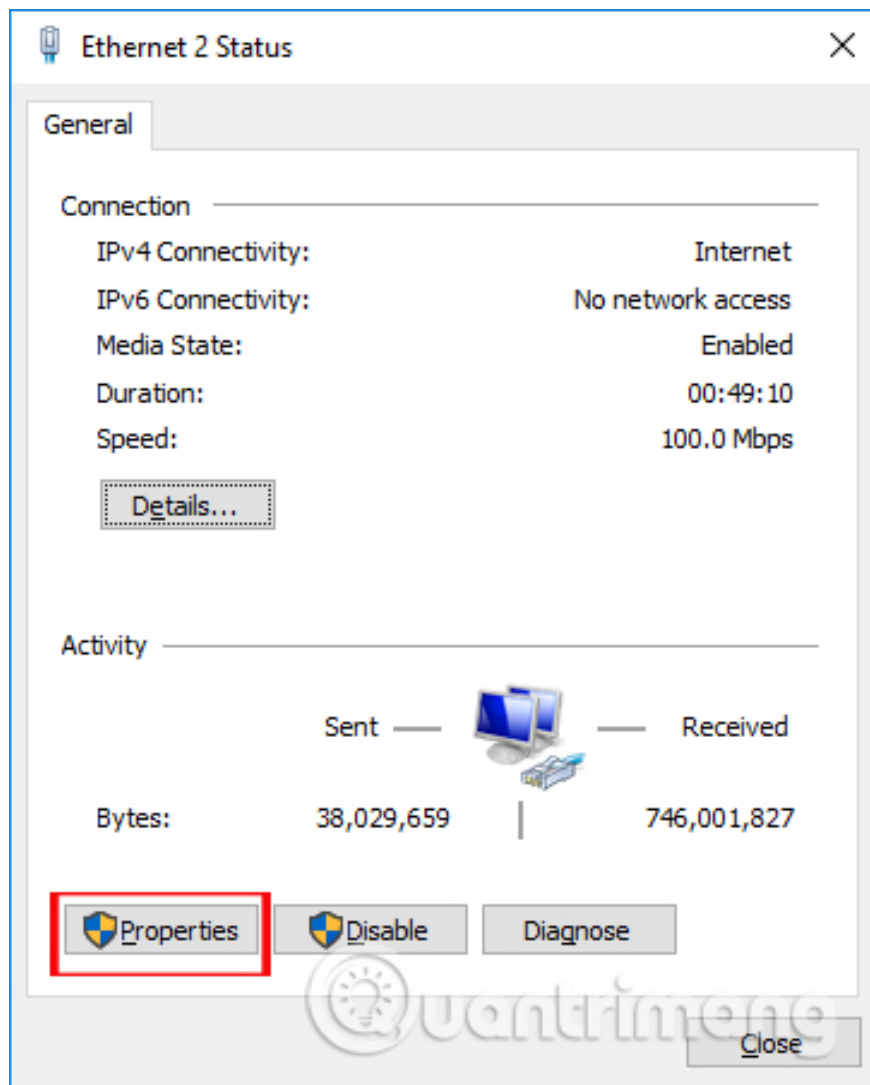

Step 2:

In the Network and Sharing interface, click the network connection that the computer is using, wired or WiFi network.

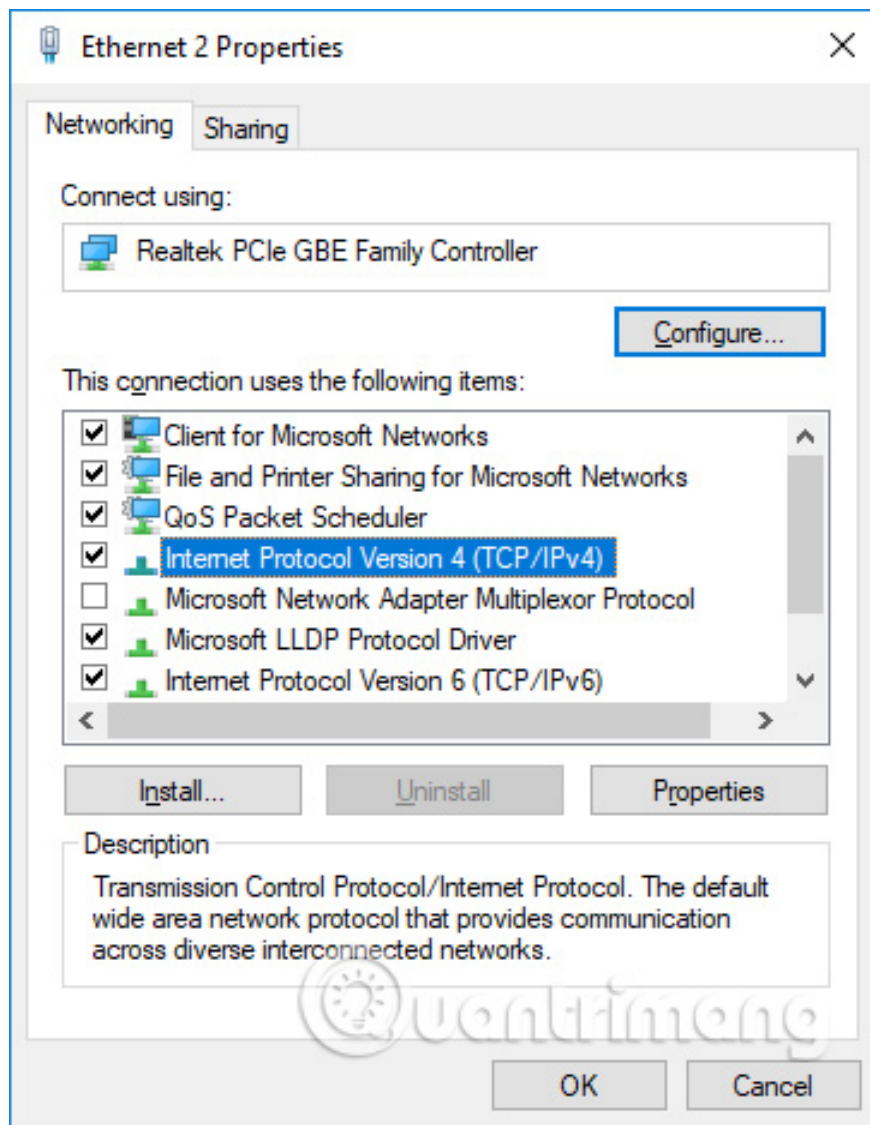

Then in the new dialog, click on the **Properties** button.

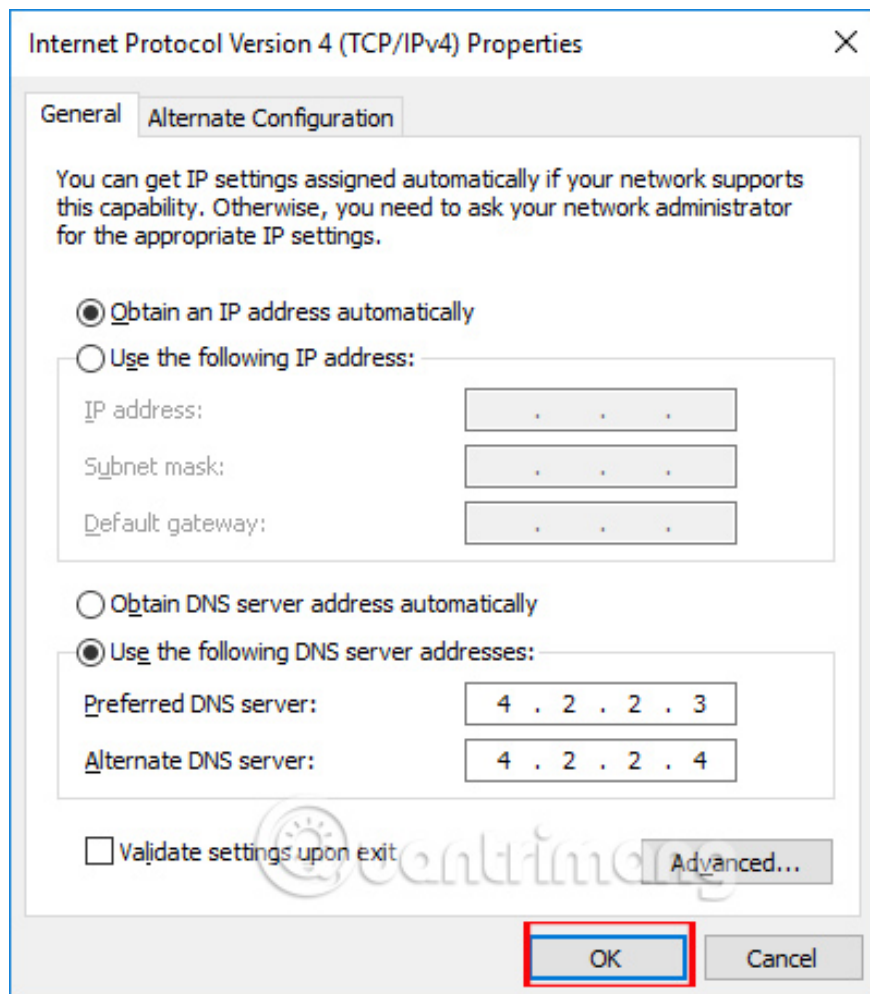

Step 3:

Next, double-click the **Internet Protocol Version (TCP / IPv4)** section .

Step 4:

In this interface, users will proceed to change DNS to static DNS with IP range of **4.2.2.3 and 4.2.2.4** . Check the box for **Use the following DNS service addresss** , then enter the DNS range above. Click **OK** to save.

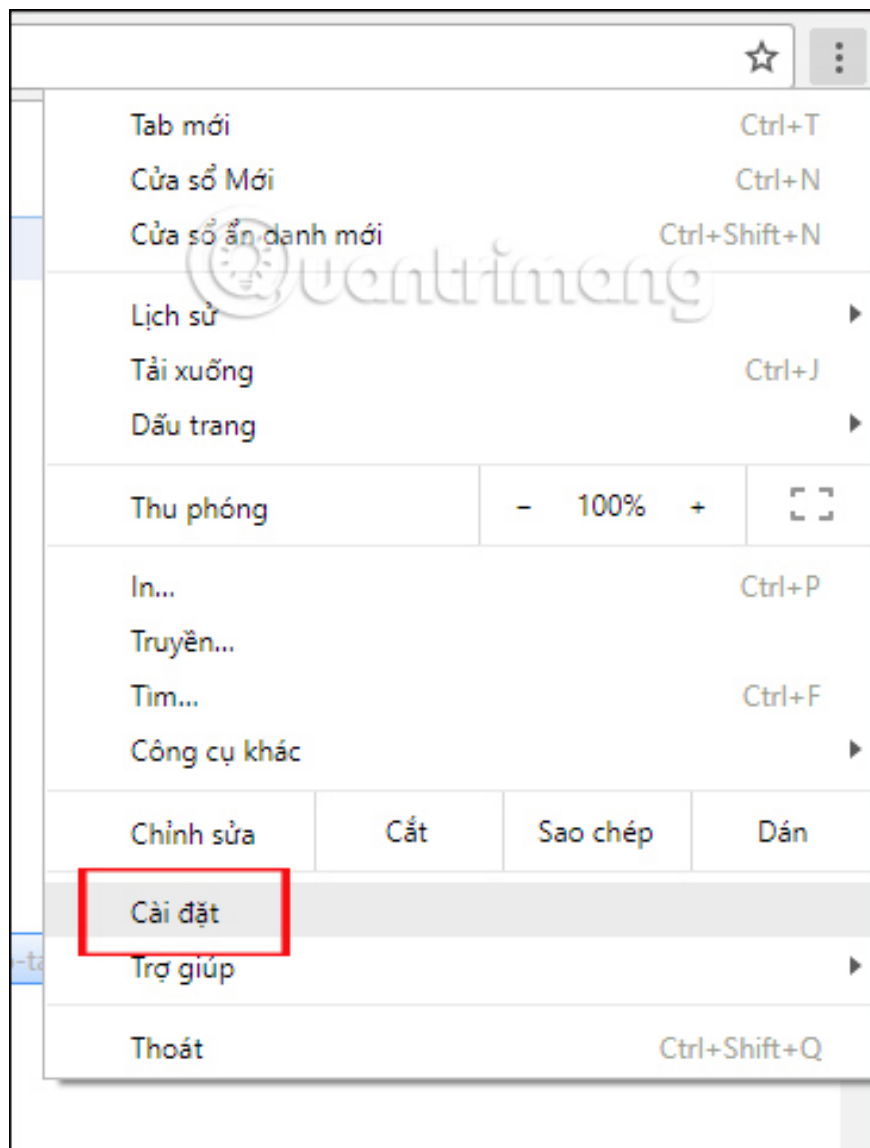

Finally, restart your browser for changes to be applied.

Method 2: Change settings on Chrome

This method will apply to Facebook web platform of Google Chrome browser.

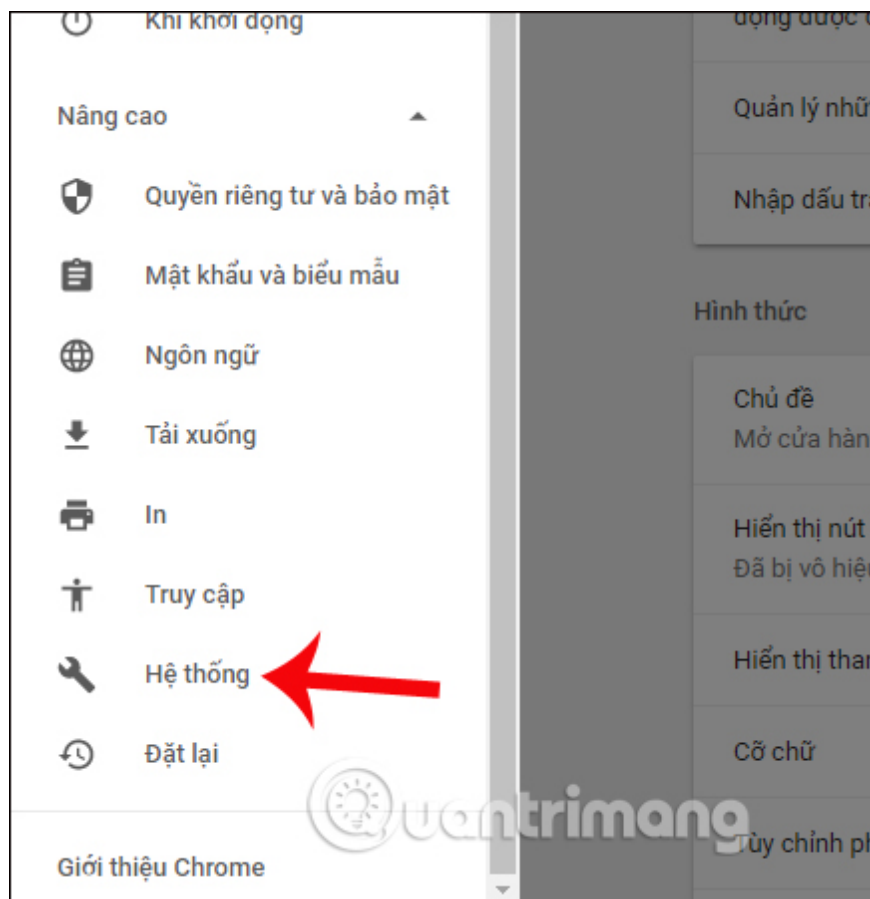

Step 1:

At the interface on the Chrome browser, users click on **the 3 vertical dots icon** and select **Settings** (Settings).

Step 2:

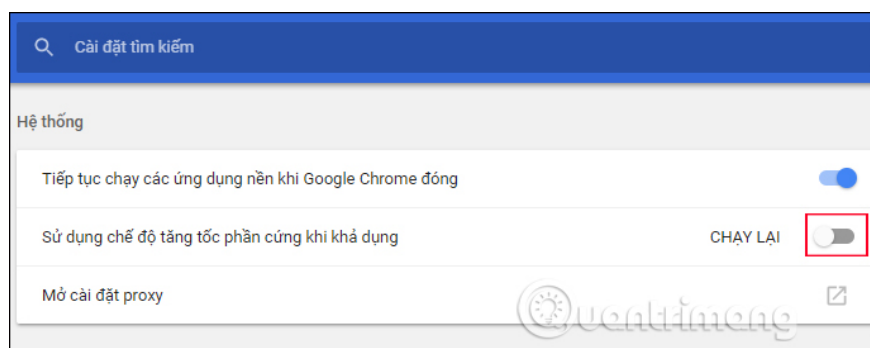

In the Settings interface, click on **the 3 dashes icon** and select Advanced, then click on the **System** settings group (System) in the drop down list.

Step 3:

Switch to the System interface with different options on the browser. Turn **off the** Use hardware acceleration option when available (Hardware acceleration when available).

Finally we restart the Chrome browser for the changes to take effect.

The above are 2 ways to fix the Facebook tab error on the browser with the phenomenon of hanging, being unusable and not turned off in the normal way. After trying to apply error correction with one of the above two ways, the phenomenon of suspended Facebook tabs on the browser will not appear again.

I wish you all success!
