2. **Ultrasurf cannot connect to the computer error .**
3. **Unable to connect to the Internet after disabling Ultrasurf .**

### How to fix Ultrasurf errors when using it.

Here are some common errors users often encounter when using Ultrasurf:

#### ***1. Ultrasurf Failed To Connect To Server error***

The Ultrasurf Failed To Connect To Server error is a common one users encounter when using the application to spoof their IP address or access blocked websites.

The cause of Ultrasurf connection errors with the server may be corrupted or faulty Windows system files. Corrupted or faulty system files can cause a range of problems for the user's computer.

The reason system files become corrupted can be due to improper uninstallation of software or applications, or it could be due to viruses and malware attacking the user's computer and deleting entries in the Windows file system.

To fix the Ultrasurf connection error, follow these steps:

*Step 1:* Restart your computer and log in as the administrator.

*Step 2:* Click **Start** => **All Programs** => **Accessories** => **System Tools** => **System Restore** (on Windows 7).

On Windows 10, you can refer to the article " How to use System Restore on Windows 10" on TipsMake for detailed instructions on how to access and use System Restore.

*Step 3:* In the window that appears on the screen, select **Restore my computer to an earlier time** , then click **Next** .

*Step 4:* On **this** list , click a restore point , find and click the most recent system restore point, then click **Next**.

*Step 5:* On the confirmation window, click **Next**.

*Step 6:* After the recovery process is complete, restart your computer, reinstall Ultrasurf, and check if the error persists.

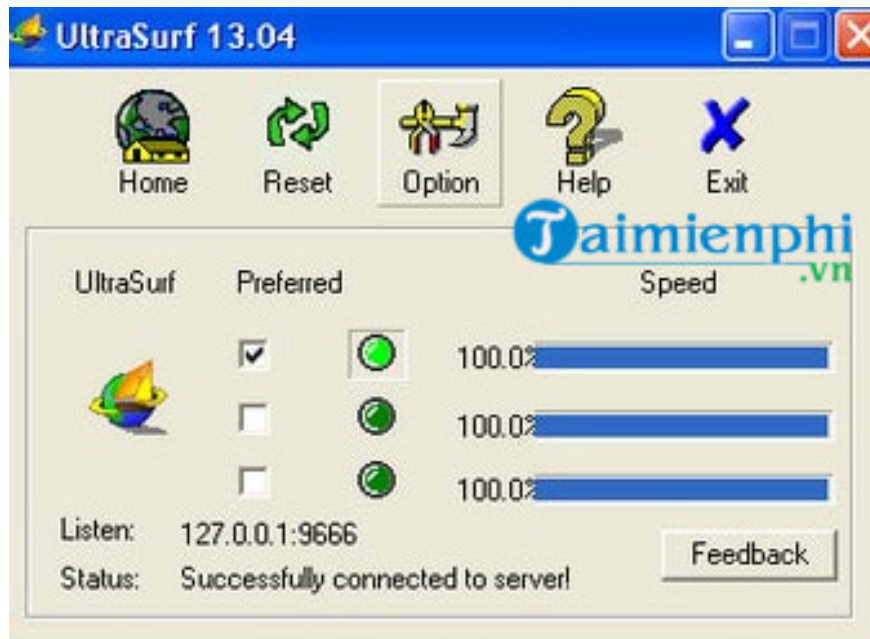

## ***2. Ultrasurf fails to connect to computer.***

On several forums, users share reports of recurring connection errors and problems with Ultrasurf. The best solution to fix these errors and issues is to use extensions or alternative software to Ultrasurf.

Several utilities and software programs are designed to work similarly to Ultrasurf, such as Browsec, Hotspot Shield, or DNS Jumper, etc.

### 3. Error: Unable to connect to the Internet after disabling Ultrasurf.

The reason you're unable to access the internet after closing Ultrasurf is because you didn't close the application after use and shut down your computer immediately, causing a computer conflict.

Readers can also refer to our article on **how to fix the internet access error after turning off Ultrasurf**. This is basically a simple error, but if you don't know how to handle it, our article will help you with this issue.
