

How to fix vertical screen stripes, horizontal stripes

Computer screen errors often occur in many different types, especially for long-term computers. So how to fix the screen vertical stripes, horizontal stripes?

Computer monitors that are used for a long time, or used continuously for a long time will often have problems with screen errors, such as screens with horizontal stripes, vertical stripes, blurring, discoloration, dead spots or screen quality. not like old and fading.

Stripe on the screen is often caused by many causes and there are 2 main types: vertical stripes and horizontal screen stripes. These stripes will stretch the screen's length and width and will usually be white or pink. If the user does not fix it in time, the stripes will increase. So how to fix vertical stripes, horizontal stripes on the screen?

Instructions for fixing computer screen errors

The cause of a screen error, displaying vertical or horizontal stripes may be due to VGA failure, screen failure, loose screen cables, or software conflicts, incompatible drivers.

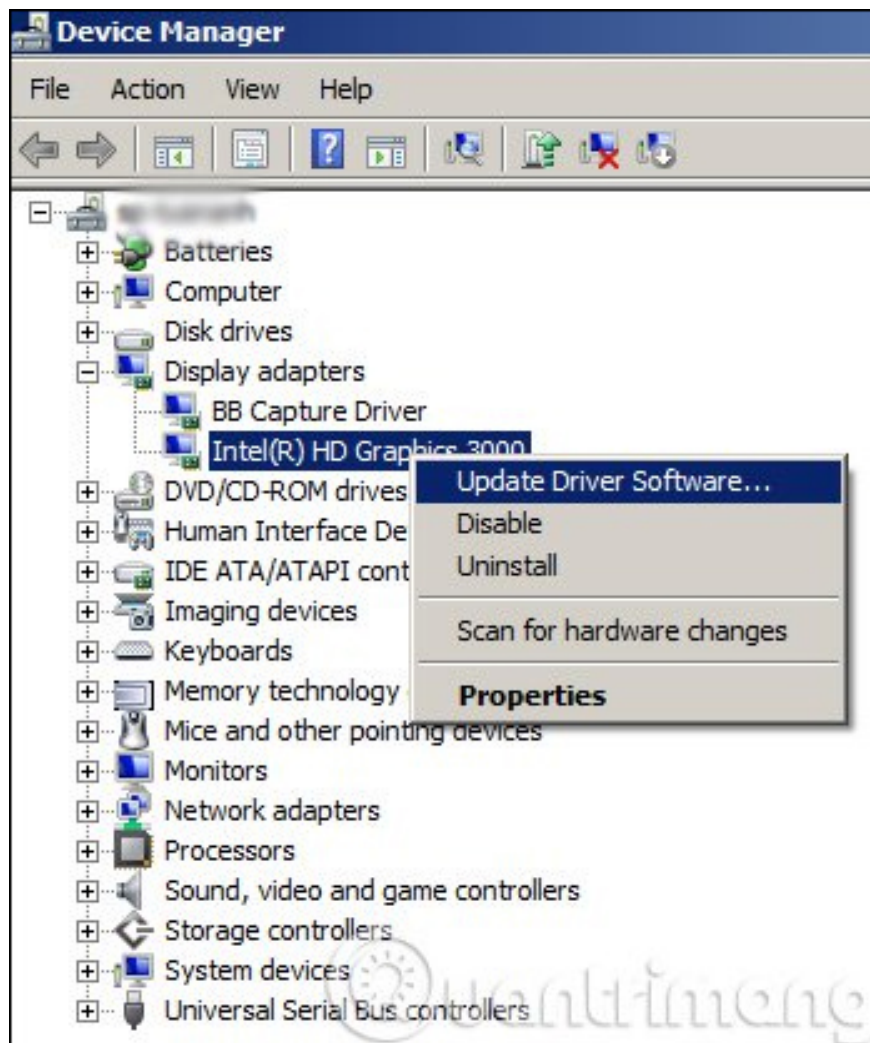

1. Error due to software conflict, driver

This cause of a screen stripe error is less likely to occur, but you should still check the details to determine the correct cause of the screen error.

Users should pay attention when booting the computer if the DOS screen (black screen at the beginning) still shows the display stripes is certainly not due to this reason. If the DOS screen is not streaked, but when entering the Windows screen displaying stripes, it may be due to software conflicts.

Fix : you need to reinstall the video card driver.

2. Horizontal and vertical stripes due to screen error

If the laptop appears vertical and horizontal stripes, it may be due to the screen so try to see 1 image on 2 different computers. If it is not streaked, it is the screen, and if it is still striped, it is not the screen.

Fix : If due to the screen, the user must replace the new screen. Depending on the type of monitor and carrier used, the cost of each type of screen will be different.

3. Stripe screen due to VGA error

This is also a common cause for older laptops that only use removable drivers without on board. You can first check for VGA striped screen errors with some phenomena such as:

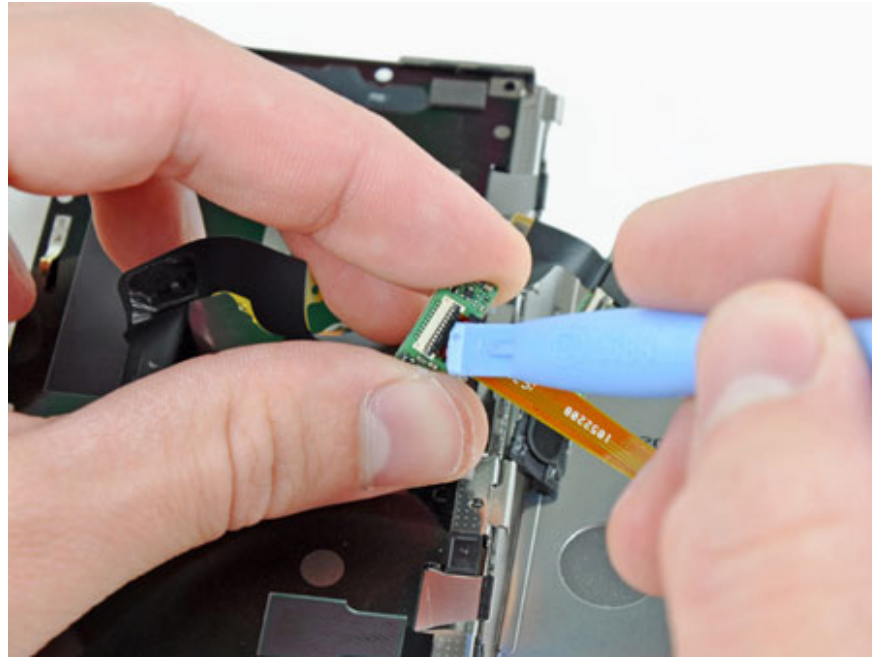

1. The horizontal or vertical stripes are not visible on the screen.
2. At first, not being used, using it for a while.
3. Automatically restart the laptop when used long.

Fix : Depending on the situation and the cause, there will be specific remedies. In the case of a VGA error, it is best to bring the item to the repairman to repair the computer with VGA, or remove VGA or replace the mainboard.

4. Error of screen stripes due to cables

This cause happens to the desktop when connecting a monitor with a cable. As for a laptop, it may be because of a cable problem or during a collision, the cable is affected.

Fix : Fix this error, you also need to bring the device to the repair center to replace the cable.

Horizontal stripes, screen vertical stripes can be caused by many reasons. So you need to identify the cause with your computer condition. It is best to bring the computer to a computer repair center to properly check the status of the computer screen error.
