Step 4:

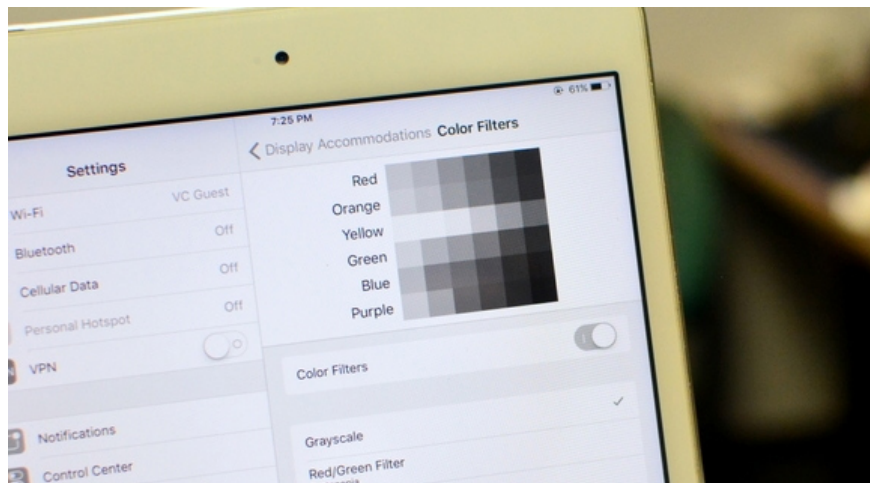

If users want to manually adjust the screen color manually, then click the **Color Shades** section, combined with the dragging the contrast scale.

Some suggestions for customizing the screen on the device:

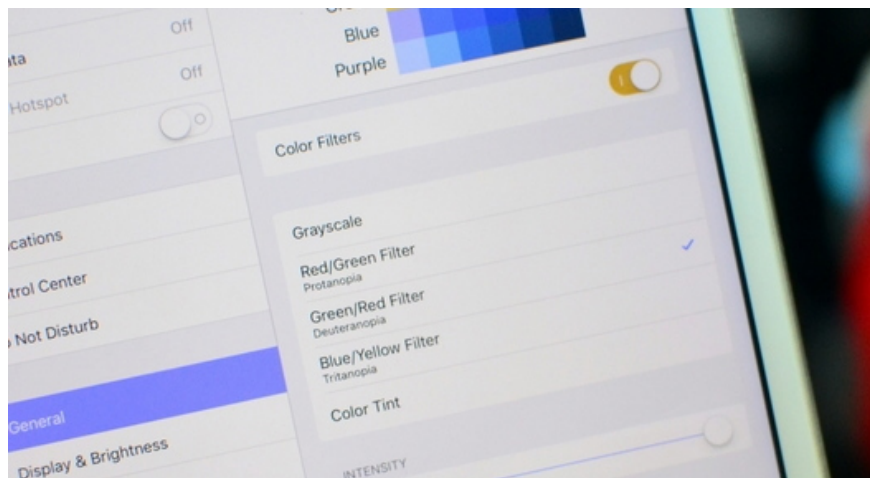

Editing to yellow tones limits glare when used.

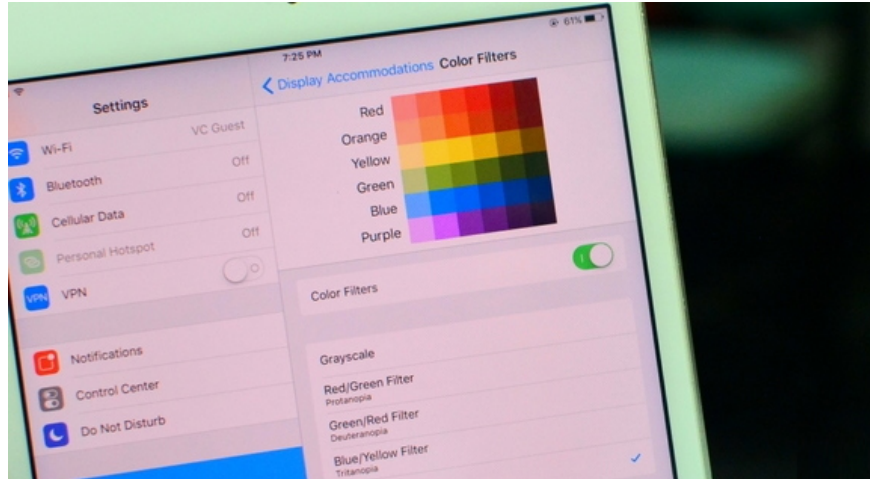

Adjust the screen to darker tones.

Or adjust the screen to blue tones.

We can also switch to the red screen if you like.

Above is a guide to customize colors for iPhone / iPad screen iOS 10, or fix yellow screen error with Display Accommodations. The disease is nearby, users can manually adjust the screen color to suit the needs of use.
