

# How to fix Your virus & threat protection is managed by your organization

On Windows, Microsoft equips users with an anti-virus software called Windows Defender (also known as Microsoft Defender, Windows Security...).

There are some users who prefer to turn off Windows Defender, but the vast majority of other users consider it the main tool to protect their computer.

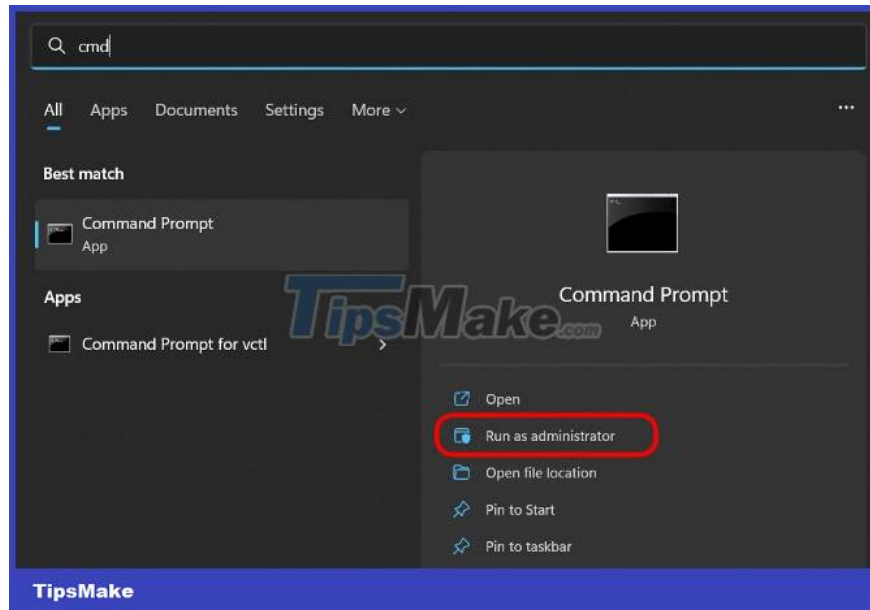

With the second group of users, when Windows Defender encounters an error, they will be very impatient and worried. **Your virus & threat protection is managed by your organization** is one of the common errors that users encounter. This error prevents users from turning on Windows Defender.

So to solve the error Your virus & threat protection is managed by your organization, what do you need to do? Let TipsMake.com help you.

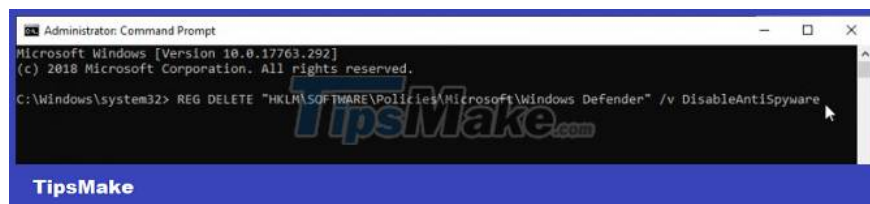

## How to fix the error Your virus & threat protection is managed by your organization

**Step 1 :** You press the **Start** button on the screen or the **Win** button on the keyboard then type **cmd**. In the search window you will see **Command Prompt results**, click on the **Run as administrator** line below.

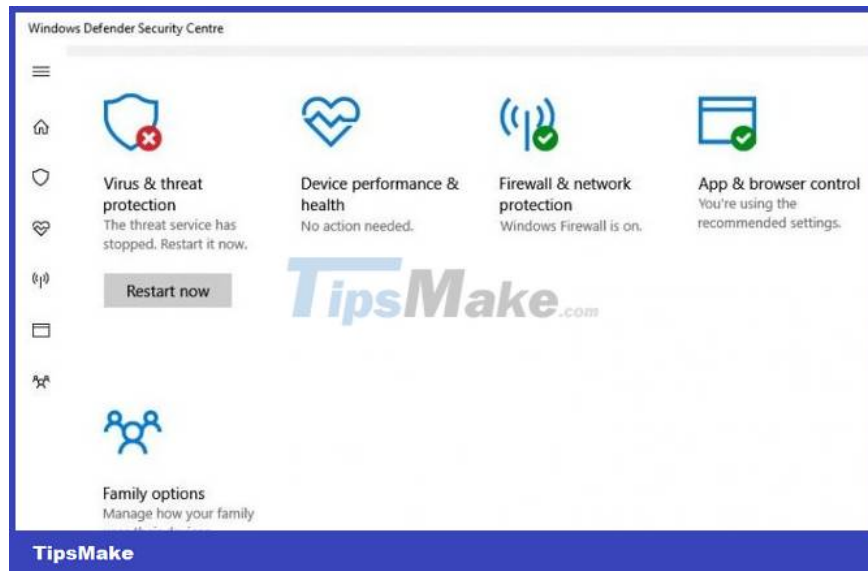

**Step 2 :** Copy the command line below and Paste into **Command Prompt** then press **Enter**.

```
REG DELETE "HKLM\SOFTWARE\Policies\Microsoft\Windows Defender" /v DisableAntiSpyware
```

**Step 3 :** After **Enter** you will see **Command Prompt** asking if you confirm the command or not. Yes/No question, press **Yes** and then **Enter** to confirm.

**Step 4 :** After running the command, turn off CMD and then reopen Windows Defender. At this point, you will see it asking you to restart the program, click **Restart now** to restart Windows Defender.

You wait for the system to finish rebooting and everything will work normally. Note that after restarting Windows Defender, you should conduct a scan of your computer system once to see if any viruses or malware have entered.

Good luck!
