

How to fold a paper bag, how to easily fold a paper bag.

You can fold your own paper bags to hold essential items, and with paper bags, you can draw or decorate the outside to make them more unique.

Typically, paper folding is done to make boats , cranes , the cardinal directions (east, west, north, south) , paper flowers , etc., and these are usually used for decoration. In addition, there are also practical items made from folded paper, including paper bags.

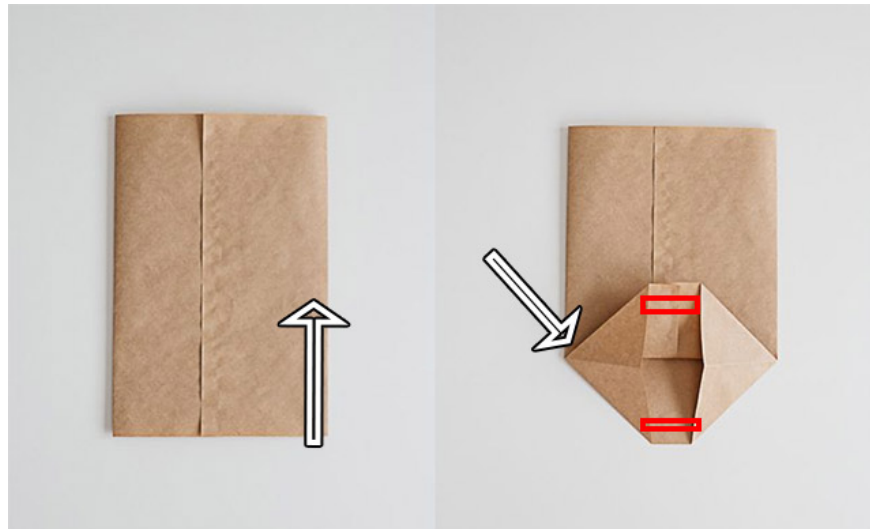

With the goal of creating an environmentally friendly solution, paper bags are far more biodegradable than plastic bags. Paper bags are made from wood, which is biodegradable and renewable. Plastic bags, on the other hand, are made from petroleum and natural gas, are non-renewable, and difficult to decompose.

Many people are replacing plastic bags with paper bags, and if you want to try it, you can fold your own paper bags following the instructions below.

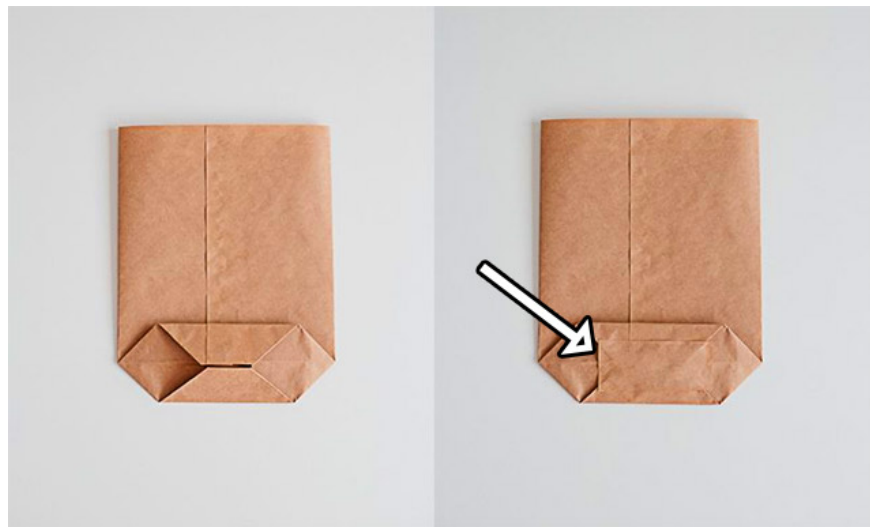

How to fold and stack paper bags easily

Step 1: First, you need an A4 sheet of paper. Draw a line down the middle of the A4 paper. If the paper has one colored side, draw a line on the white side. Then, fold the two edges along that line and use tape to stick them together.

Next, to create the bottom of the bag, fold up along a crease, then fold both sides inwards and apply double-sided tape or glue to the red paper as shown in the image below.

Step 2: Once you've glued the bottom of the bag as shown in the image, glue another piece of paper to the middle of the bottom. Then, go back to the opening, reach inside, and open it. You now have a complete paper bag.

If you're folding a paper bag using plastic wrap, use a hole punch to create holes on both sides of the bag, avoiding punching too close to the edge. Thread each end of the string through the holes and tie a knot, making sure it doesn't slip through. Do the same on the other side of the bag.

Folding this type of simple paper bag, as shown in the picture above, is very easy. You should also note that you should only put lightweight items in the bag.
