

How to get 2K points only after 3 hours of playing EverWing on Facebook?

How to play EverWing game on Facebook to achieve 2K after 3 hours of play? How to quickly defeat friends playing EverWing?

After only a few short hours, mobile game EverWing has become a new phenomenon in the Facebook game village, not only on Facebook but also on Messenger apps. If you have played through an airplane shooting game, it is not strange to play EverWing, move left or right to destroy the enemy.

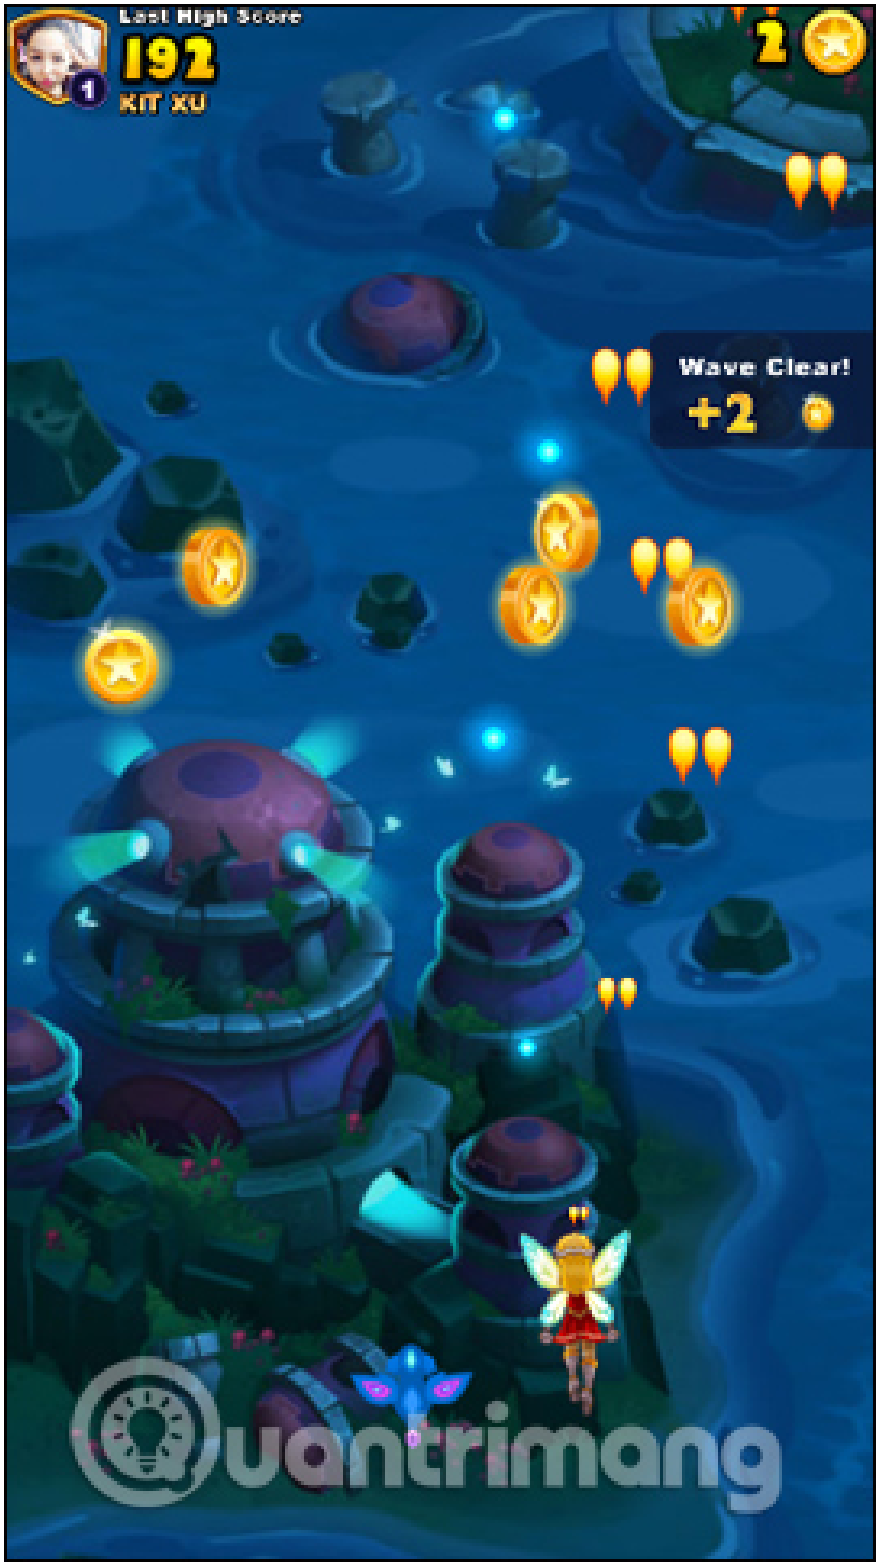

The war becomes even more interesting when we can invite friends to play EverWing games on Facebook. So how can you defeat the guys who play EverWing as quickly as possible? A few tips below will help players achieve 2000 points only after about 3 hours of playing EverWing on Messenger.

1. How to play EverWing game on Facebook Messenger
2. Tips for playing EverWing games on Facebook for new gamers
3. How to increase gold, very fast level in EverWing game

1. Collect lots of gold coins in EverWing:

Before setting foot in EverWing, players need to know the basic play of EverWing as well as the types of items that can increase your strength. The goal in each game is **to destroy the enemy and earn lots of gold** . Gold coins are the only resource that can empower your play character.

Having a lot of gold in hand will help upgrade characters faster, level 12 or level 13 to create stable damage.

Play mode is the mode that gamers need to put all their strength to make a lot of gold. Collect lots of gold during play, or other items. Do not spend money on buying items or unlocking other characters. Items that appear during play should also be taken care of. All items will be valuable, like increasing gold coins or increasing your power.

1. Magnets: smoking gold coins along the way for a while.

2. The Rush Flower: not lose your life when you collide with an enemy.
3. Mushrooms: increase the speed of firing enemies up to 2 times.
4. Lucky grass: increase 1 level and the highest level is level 70.
5. Purple diamonds: add 10 points and 10 gold coins.
6. Blue diamonds: add 40 points and 40 gold coins.
7. Raid Boss Raid Energy (lightning): increase the firepower to attack Boss.
8. Marigold (red flower): Increases damage to attack Boss.

2. Focus on unlocking the lock Lily:

EverWing provides us with many characters, but temporarily don't unlock many characters that should initially focus on the first character. When you reach **level 6**, spend an amount of money to **unlock the LiLy character** with the ability to double the amount of gold received.

If LiLy has been unlocked, use the earned gold to **upgrade LiLy characters to the highest level possible** , increasing the power of the character. Just play the main mode and make lots of gold coins also help you strengthen.

3. Select the battle to attack Raid Boss:

When the player has unlocked the character LiLy and then upgraded the character to level 10, join the fight with Boss with friends on Facebook. Click on the link to play with your friends to find the Boss. If any type of Boss is hunted and destroyed by a lot of people, quickly attack them to gain the advantage for yourself.

If the bosses don't have a lot of searchers, just make sure to attack bosses with blood about 3 million. These medium-sized Bosses will not consume too much of your strength, but can earn you some necessary benefits.

The mode to destroy Boss on EverWing will be rewarded with a lot of gold coins, along with possessing a number of rare animals necessary for the war. With that amount of gold, upgrade LiLy to level 35 or 40. Since then, the amount of damage that LiLy brings has also increased. So no matter what kind of enemies you face, handling them will no longer be difficult.

In short, to achieve the highest score possible, focus on strong firepower, not unlocking many characters. In order to do so, earn lots of gold coins, then unlock the LiLy character and increase the character level to increase the power.

Of course with any game and the game EverWing also need good techniques in battle. That is the first step for you to go further in the game, plus a little luck, beating many friends on Facebook will not be a problem anymore.

Wish you all have fun playing games!
