2. In addition to Galaxy S8 and Galaxy S8 Plus, these are other accessories and products that Samsung has launched in their latest event.

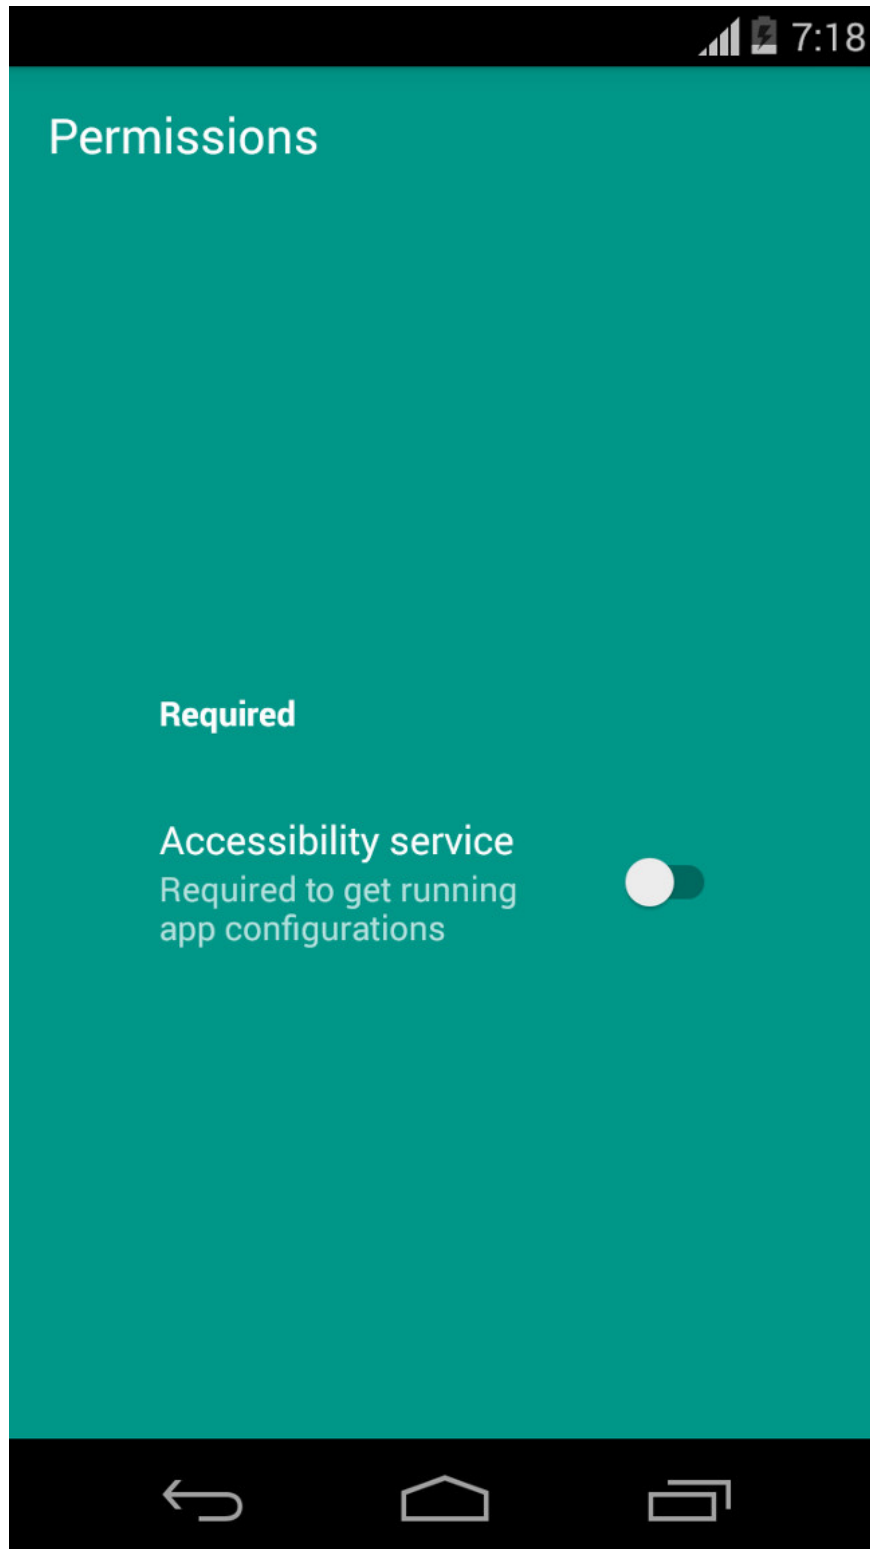

In a lot of changes in style, there is a small change, but it brings a newness to the user, that is changing from square border screen to curved border screen. Although this change has existed previously on LG G6, users are still eager to experience firsthand the curved border screen on Samsung Galaxy S8. Fortunately, there is a way to help Android users experience curved screen borders on mobile phones by changing the display border from square to curved. The following article will show you how to get a curved border display on your Android phone, using the Cornerfly app.

Download Cornerfly app to your device

## **Allows the app to use the Accessibility service**

1. Open the application Cornerfly up after downloading. After that, you will have to agree to allow the application to perform some specific actions by enabling the **Accessibility service** switch on the screen.  
Note: For phones with **Android 5.0 Lollipop** operating system or below, you will have to activate **Service overlay** on the Cornerfly application screen.

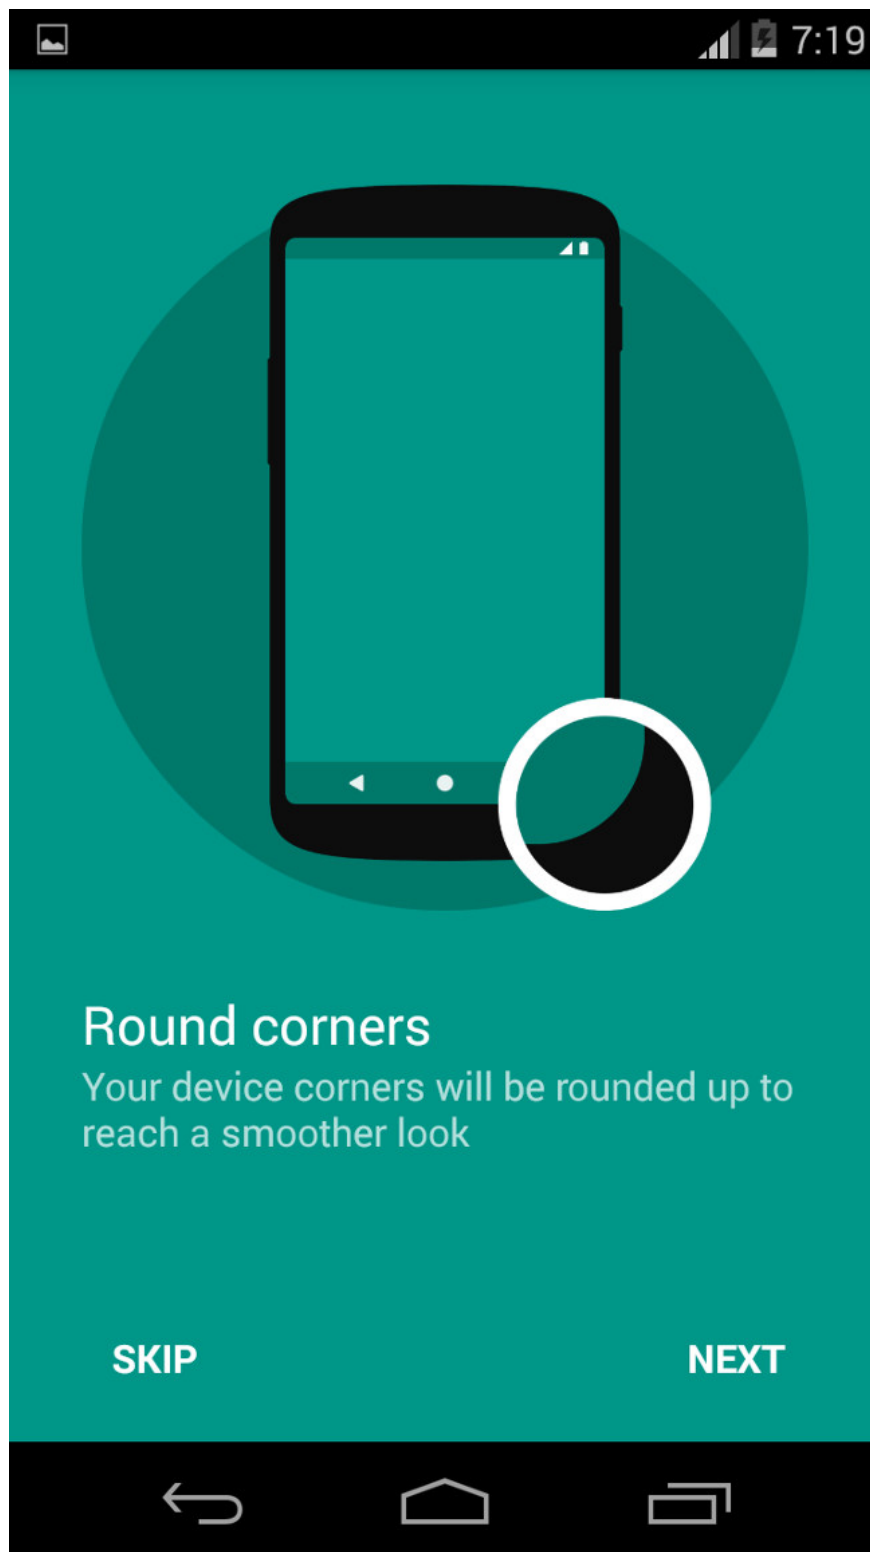

1. Now the application will automatically open the accessibility service inside your device and display it to a new screen, push the switch on the upper right corner of the screen to **On** , then press **OK** . Then press return 2 times and then click the **Check** icon to finish the installation.

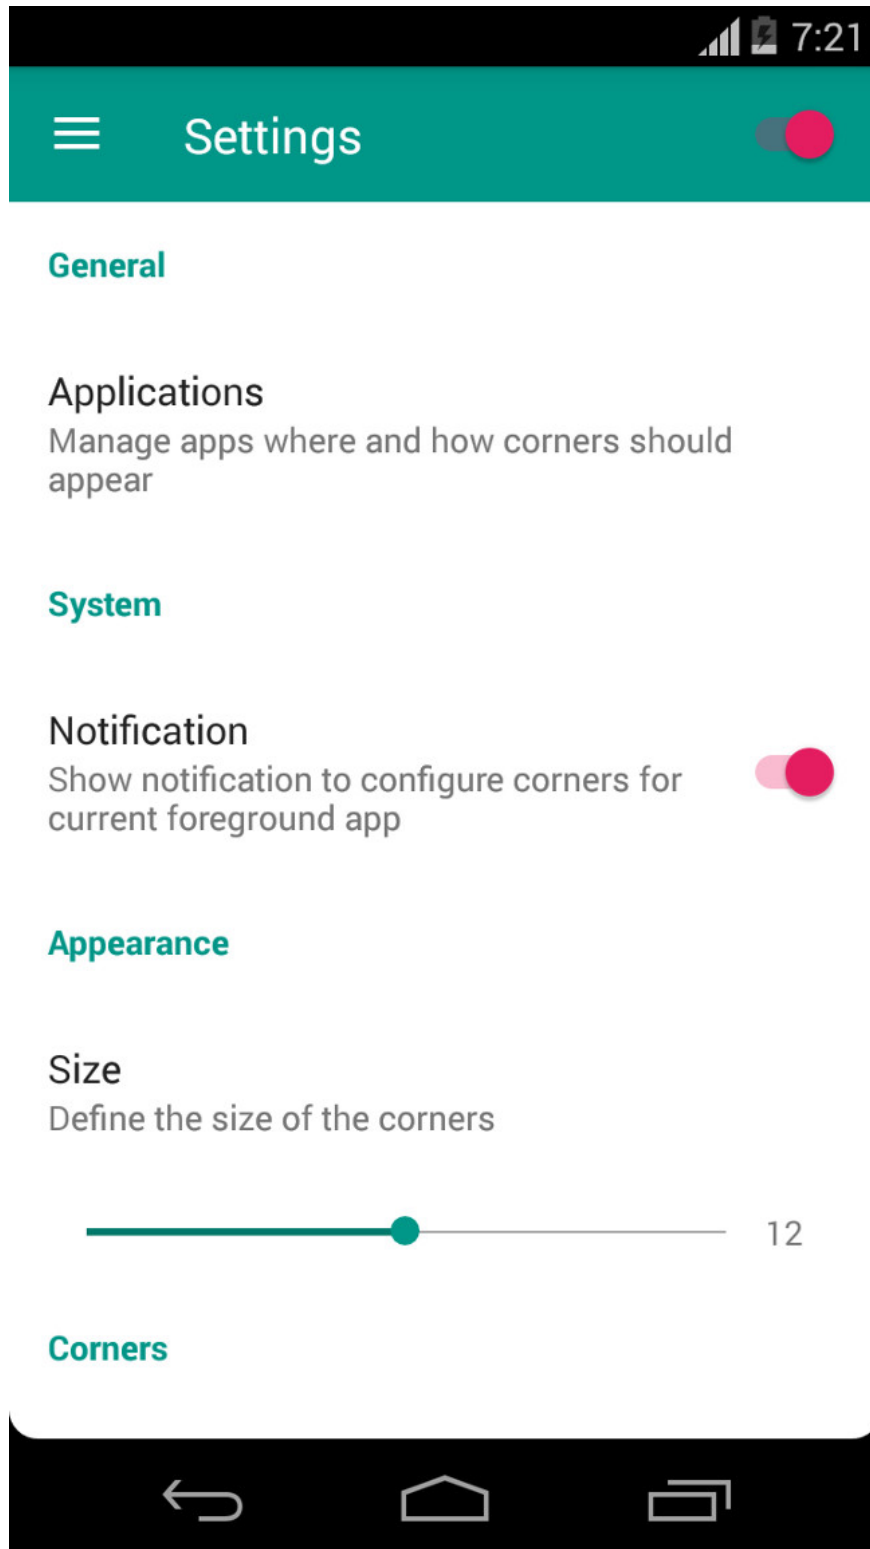

## Activate curved screen border display

1. Next, the screen will begin to show you how the application works. Click **Skip** or **Next** 2 times to skip.

1. Here, turn on the switch in the upper right corner of the application screen. At this point you will notice that the display of the device has turned into a curved border.

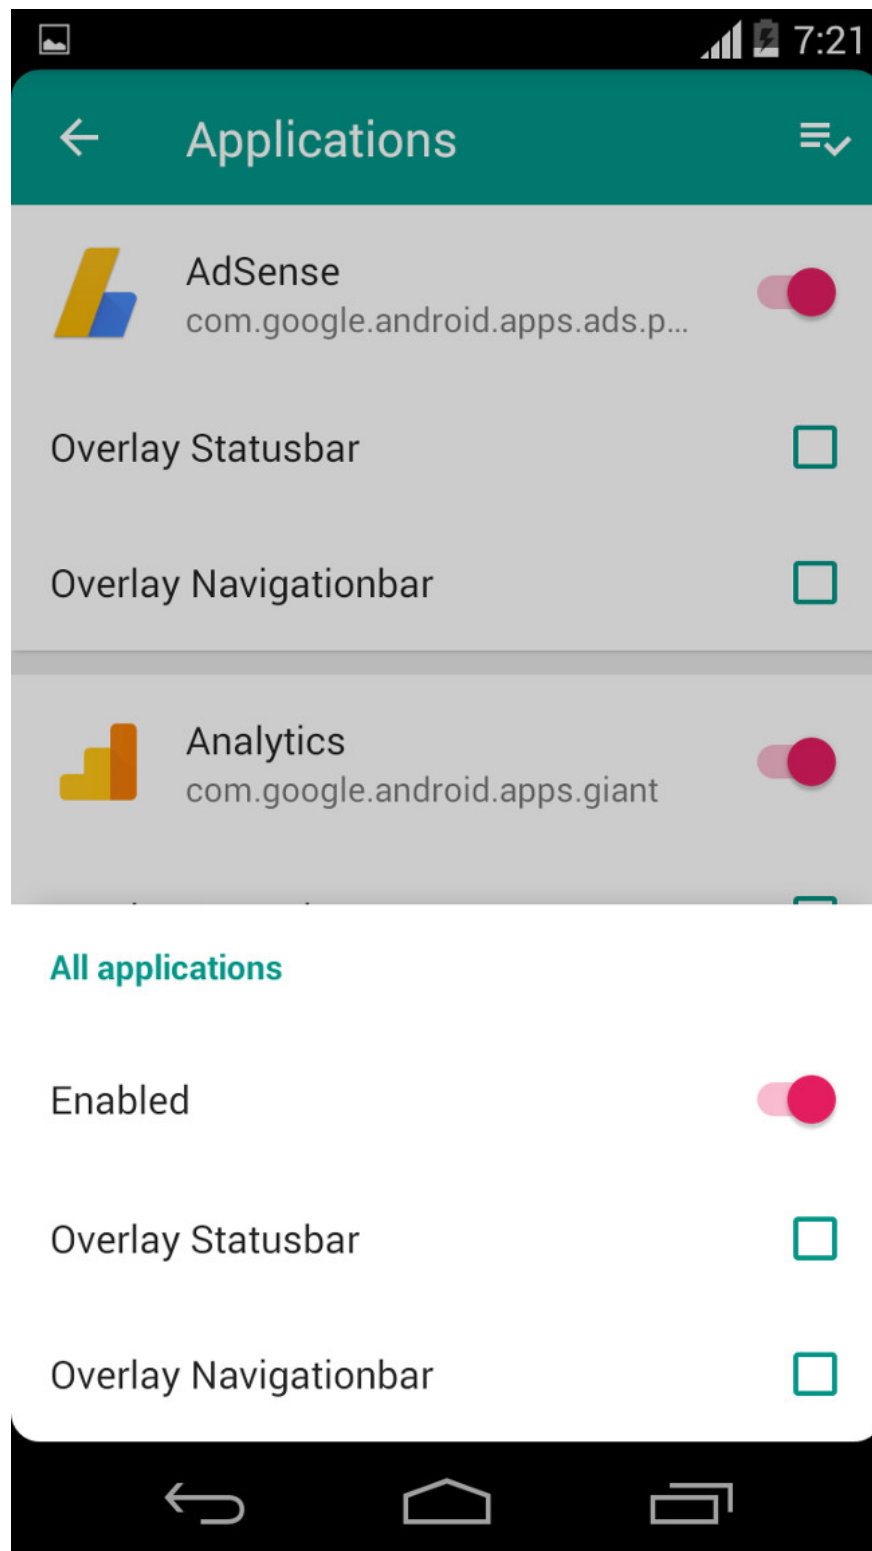

## Adjust the display border

Your next task is to adjust the border so that it looks smoother and more beautiful.

1. Go to **Applications** .
2. Click the icon with the traces next to the three dashes on the right corner of the screen.

3. Now the application will show a small panel, turn on the **Enabled** switch and check the **Overlay Navigation bar box** .

Now you can experience the curved border display on your Android device.
