Cookies and Token on Facebook have many different features to support managers, raise many different virtual Facebook accounts. However, the use of Cookies and Token is potentially risky because others can easily log into Facebook if they have them. In this article, Software Tips will guide you how to get Cookies and Facebook Token.

I. How to get Facebook Cookies

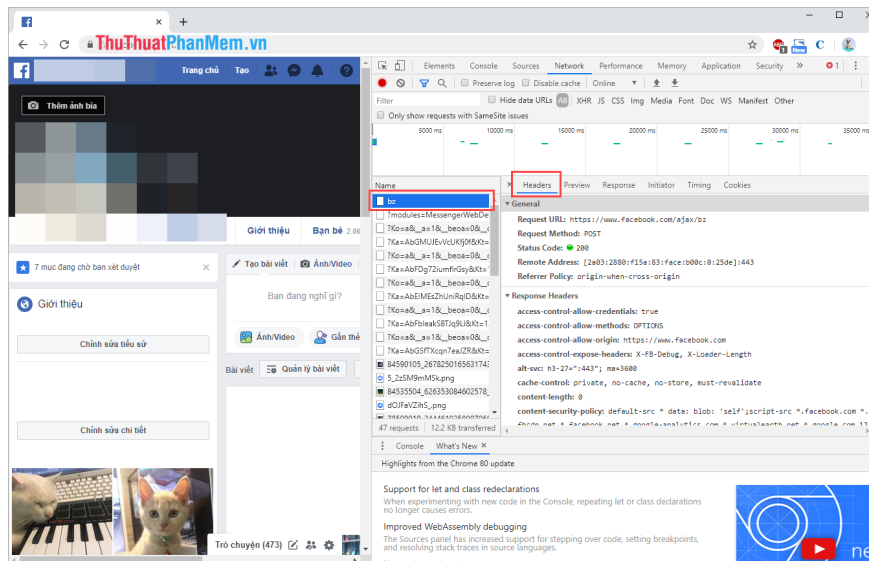

Note: Cookies on Facebook can only be obtained on your personal account, you cannot get Cookies of others.

Step 1: You proceed to access your profile and press **F12** to display the development mode table. Then, you select the **Network** tab .

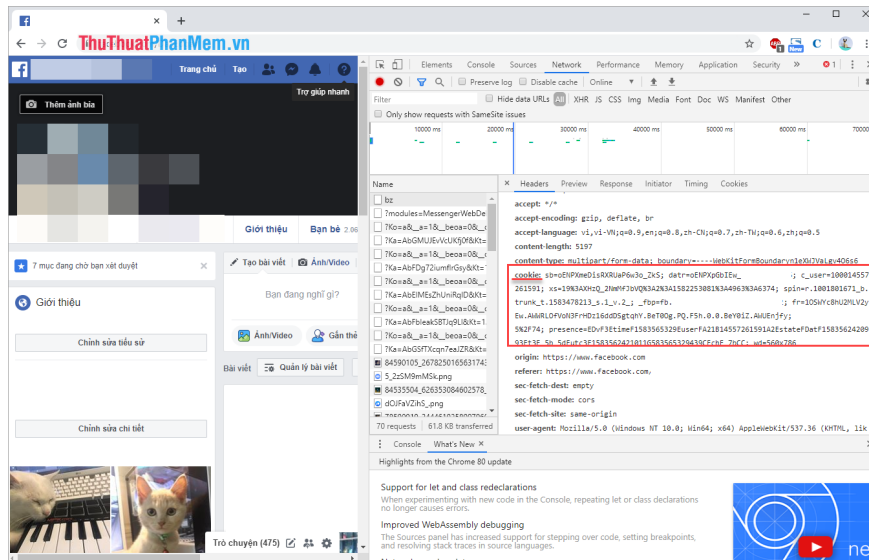

Step 2: Find the 'bz' tag in the **Name field** and select **Headers** to see the content inside.

If you do not find the 'bz' tag then you can press F5 to reload the page content and easily find them in the first section.

Step 3: Go to the **Headers** tab of the 'bz' tab, scroll down and look for **Cookies** . Complete the code behind the **Cookie** 's **Cookies** of you, you only need to store for use as done.

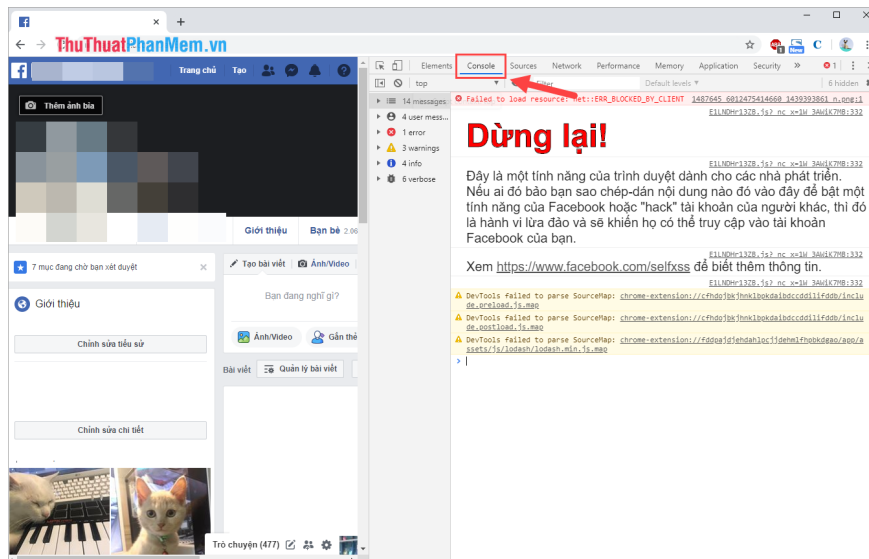

II. How to get Facebook Token

There are many ways to get different Facebook Token, you can use Code or an extension of Google Chrome.

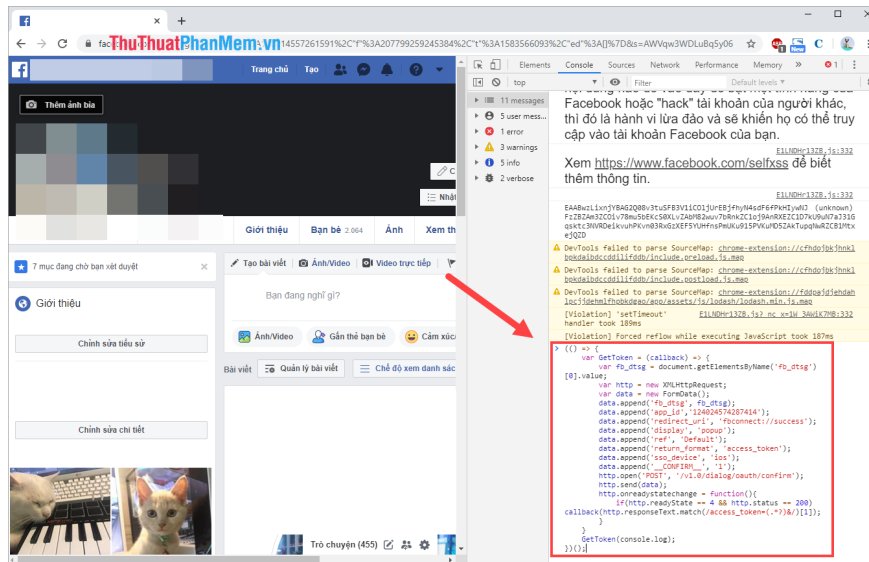

1. How to get Facebook Token with Code

Step 1: You proceed to access your profile and press **F12** to display the development mode table. Then, you select the **Console** tab .

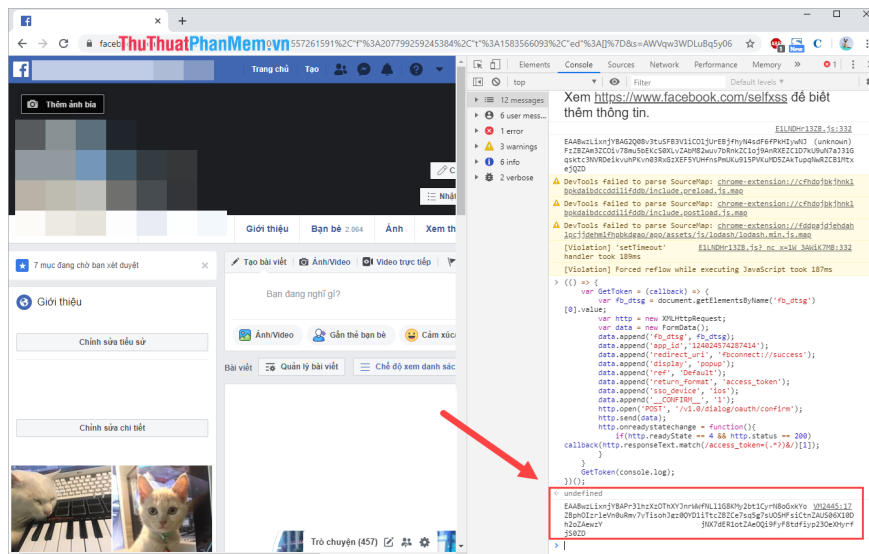

Step 2: Then, **Copy and paste** the following code into the **Console** tab and press **Enter** to run the Code.

```
(() => { var GetToken = (callback) => { var fb_dtsg = document.getElementsByName
```

Step 3: Immediately, your Facebook Token will appear in the Console window. Now you can Copy Token to use for different purposes.

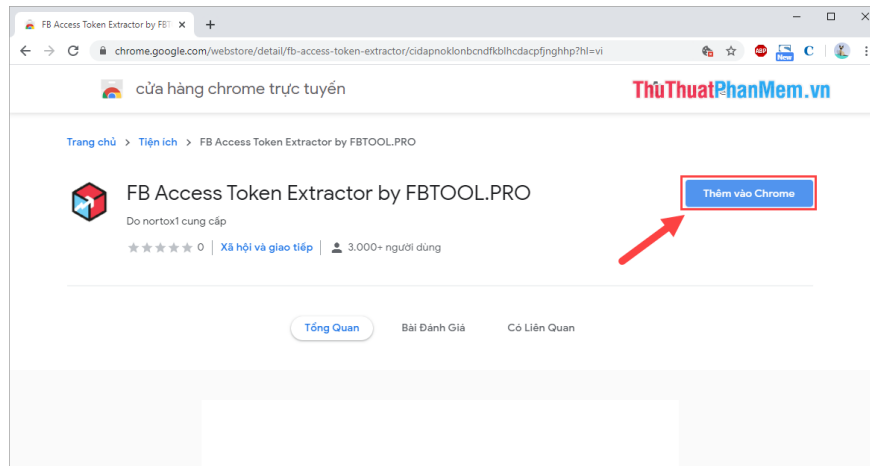

2. How to get Facebook Token using Google Chrome extension

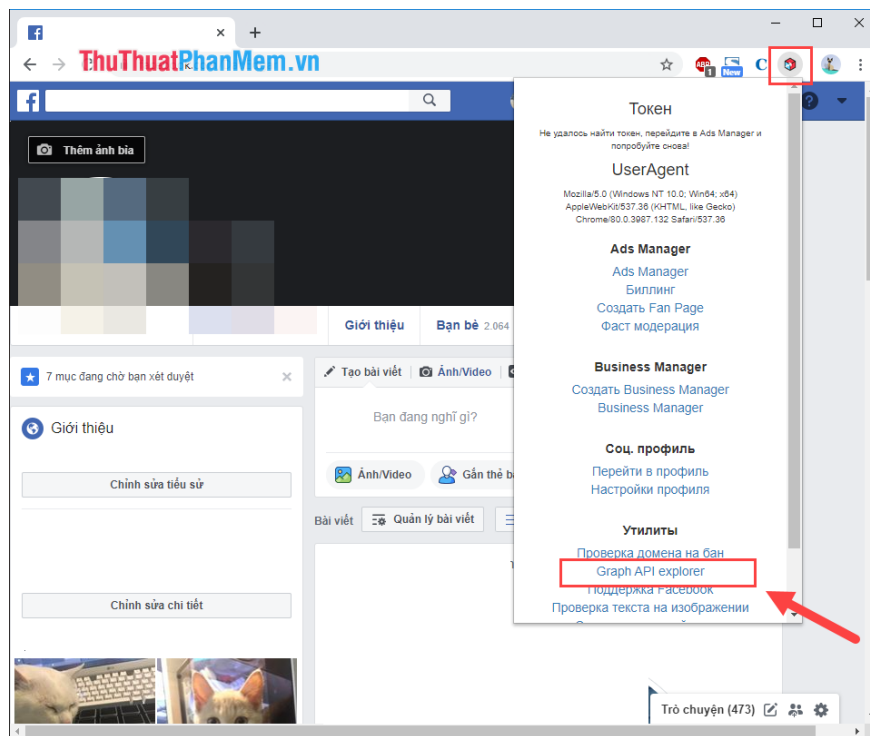

Step 1: You proceed to the following Web site to install the extension on Google Chrome.

Homepage:
<https://chrome.google.com/webstore/detail/fb-access-token-extractor/cidapnoklonbndfkbllhcdacpfjngnhp?hl=en>

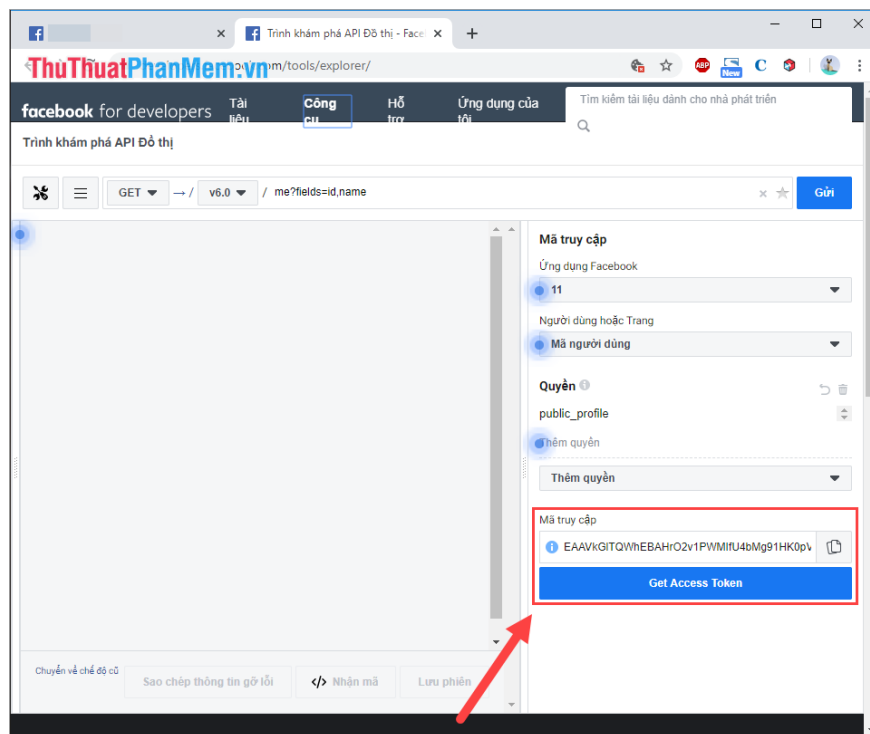

<https://chrome.google.com/webstore/detail/fb-access-token-extractor/cidapnoklonbndfkbllhcdacpfjngnhp?hl=en>

Step 2: After installing the extension, proceed to restart Google Chrome for the extension to work. Next, click on the **FB Access Token** utility icon and select **Graph API explorer** to get the Token.

Step 3: The system will open **Facebook Developers Tab** and here you will see your Token inside the **Access Code** dialog box . You can Copy them to use normally.
