

# How to get images in theme on Windows 10

The theme on Windows 10 download from the Store is high quality, many themes and you can get all images in that theme.

In addition to self-installing computer wallpaper with available images, the Windows Store also has themes or theme themes with many images according to different topics. The theme set after installation can automatically change the computer wallpaper and system theme color. With Windows 10, users have to install themes directly in the Store, and cannot extract images in the theme in the usual way. However, once we install the theme on Windows, there will be a folder to save the entire image in the theme. So how to get the entire image in the theme on Windows 10, the following article will guide you how to do it.

1. How to download Windows 10 lock screen image from Spotlight to your device
2. How to use the Theme on Windows 10
3. 3 ways to delete the theme installed on Windows 10
4. How to automatically change Bing wallpaper on Windows 10

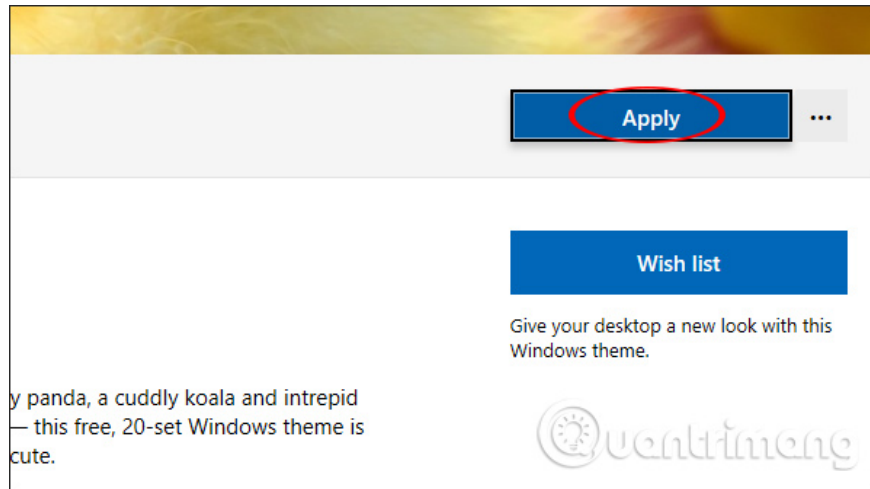

## Instructions for taking photos in Windows 10 theme

### Step 1:

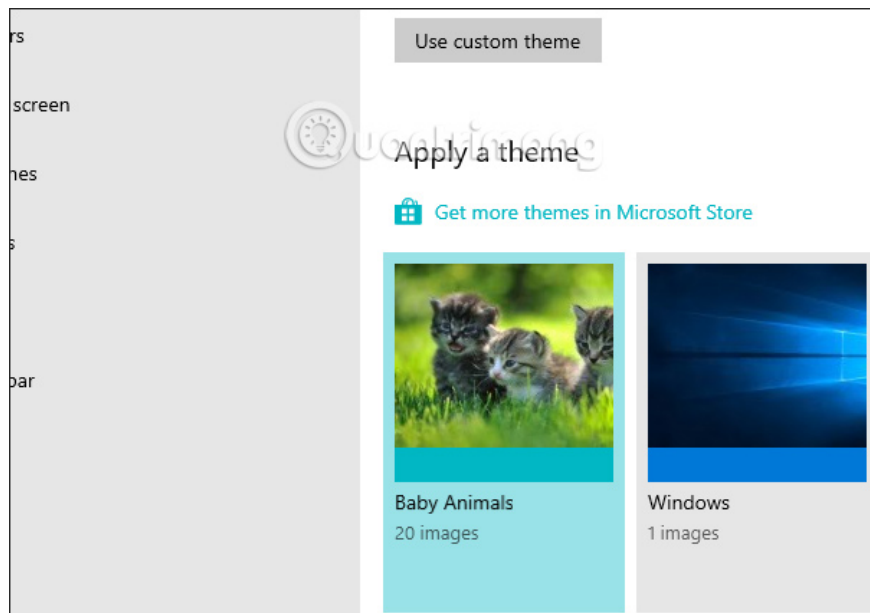

Users access Microsoft Store and find the theme they want to download. **Click Get** to proceed to download the computer.

After the installation is complete, display the **Apply** button immediately so we can apply the downloaded theme to the computer.

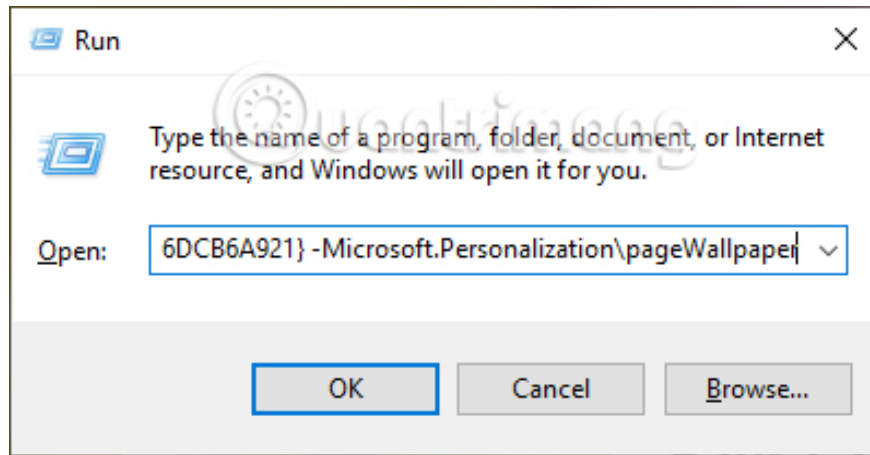

The resulting version will see the newly installed theme for the computer.

## Step 2:

Next, press the Windows + R key combination to open the Run dialog box and then enter the command line below and press Ok to access.

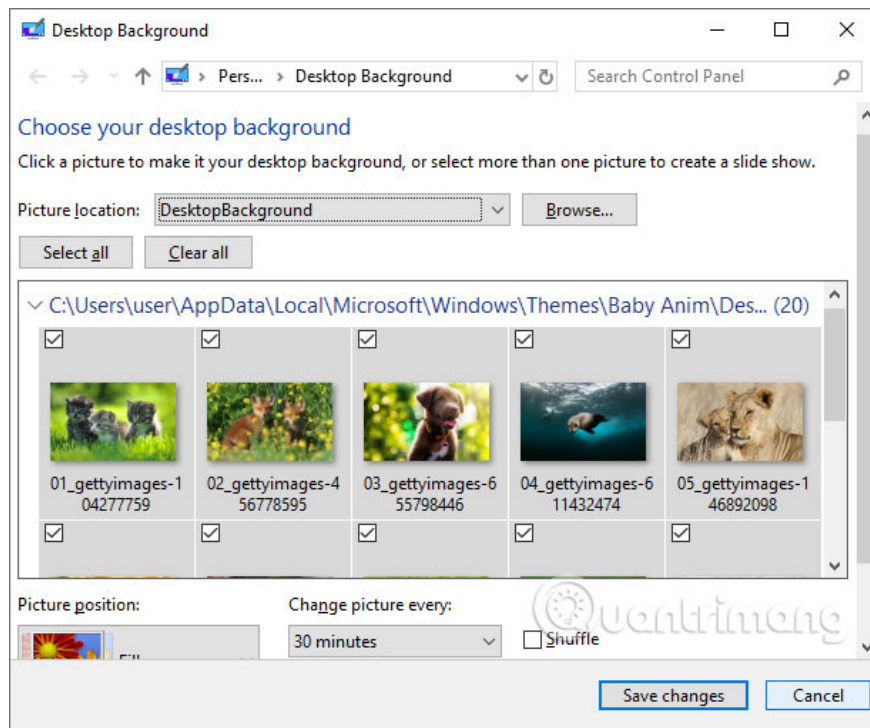

```
shell ::: {ED834ED6-4B5A-4bfe-8F11-A626DCB6A921} -Microsoft.Personalizationpage
```

### Step 3:

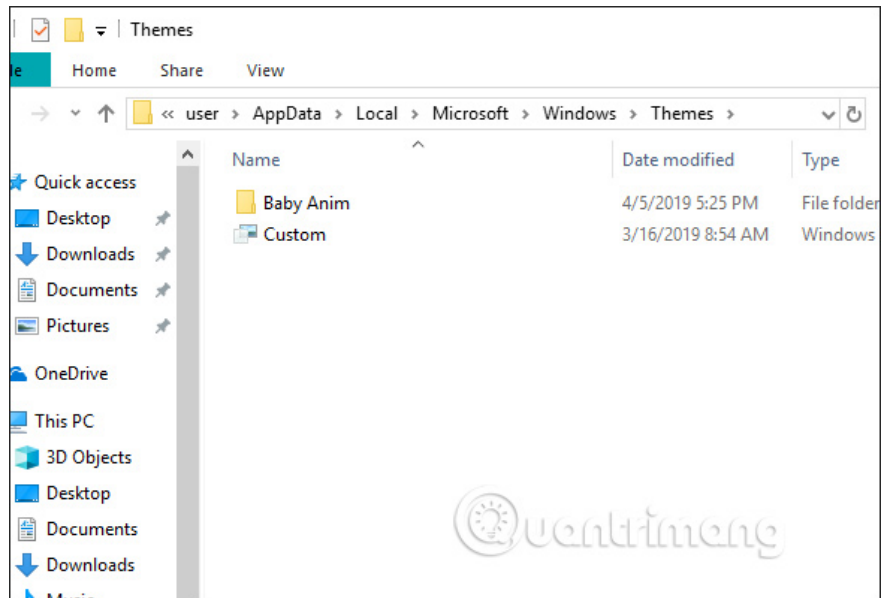

The result will display the Control Panel's Personalization interface with all the images being used for the theme installed on the computer. Above is **the directory path that** stores the images in that theme and this is the folder we need to access.

The directory path to save images in the theme is in the form of C: User on the accountAppDataLocalMicrosoftWindowsThemes.

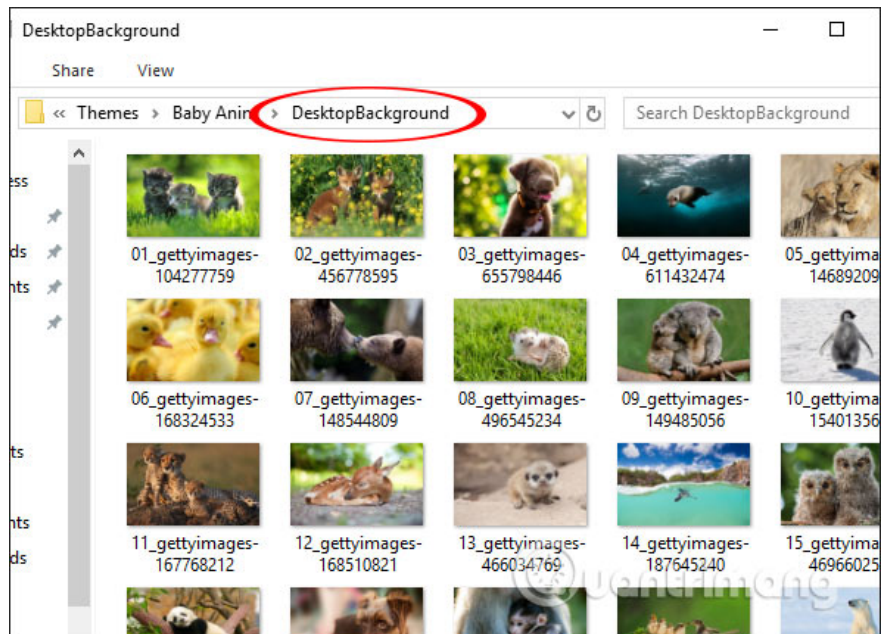

### Step 4:

Users can copy the above link and change the account name on the computer they are using. You will see the folder with the same name as the theme that is applied to the computer.

Clicking on the folder name then clicking on **the DesktopBackground folder** will see the entire image of the theme. Now, you can copy them to another location and use, store, share, . In case the theme is removed from the computer, the theme name folder does not exist.

Although it is not possible to extract images in the theme in the previous way, instead you have a folder for storing images in the theme instead. Each theme when applied on the computer is set into different folders and saved in the system.

I wish you all success!
