

How to Get Your Windows 10 Start Menu Back

If you recently updated to Windows 10 and you can't find your Start Menu, all is not lost. There is a way to get it back. See if you have any right click options at the Start Menu location. If you do, select Task Manager.

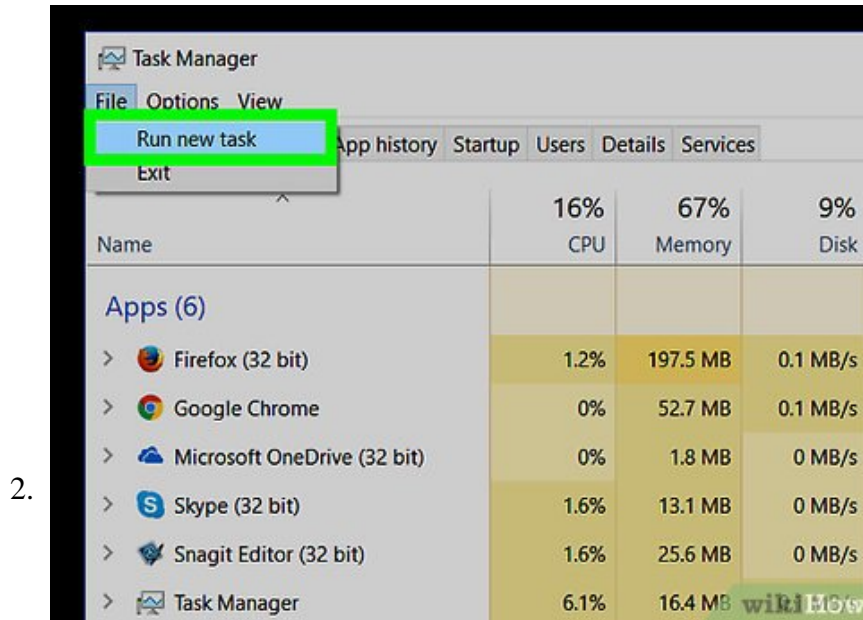

Method 1 of 2:

Checking and Repairing Corrupt Windows Files

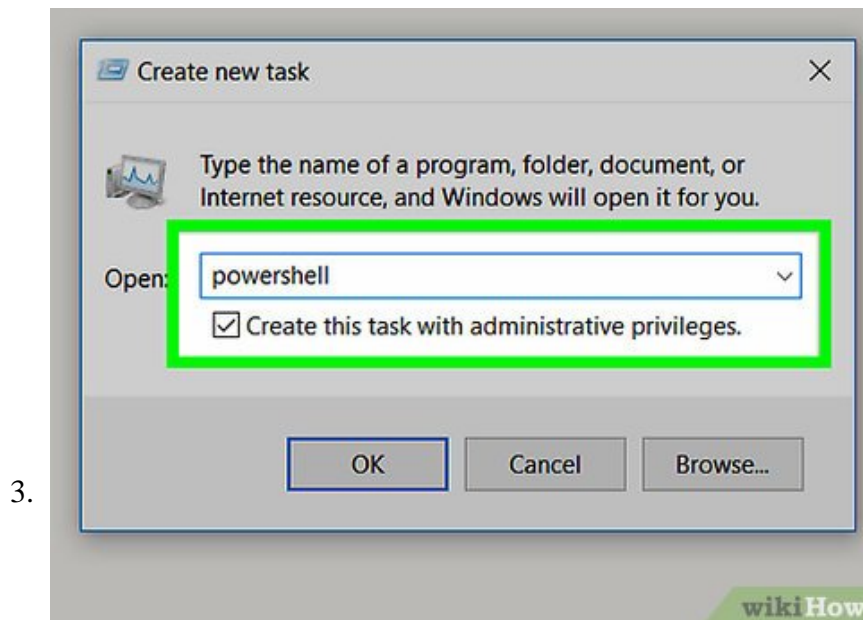

See if you have any right click options at the Start Menu location. If you do, select Task Manager.

1. If you can't get to it that way, do the '3 Finger Salute' (**Ctrl** + **Alt** + **Delete**). That will bring up several options, one of which is the Task Manager.

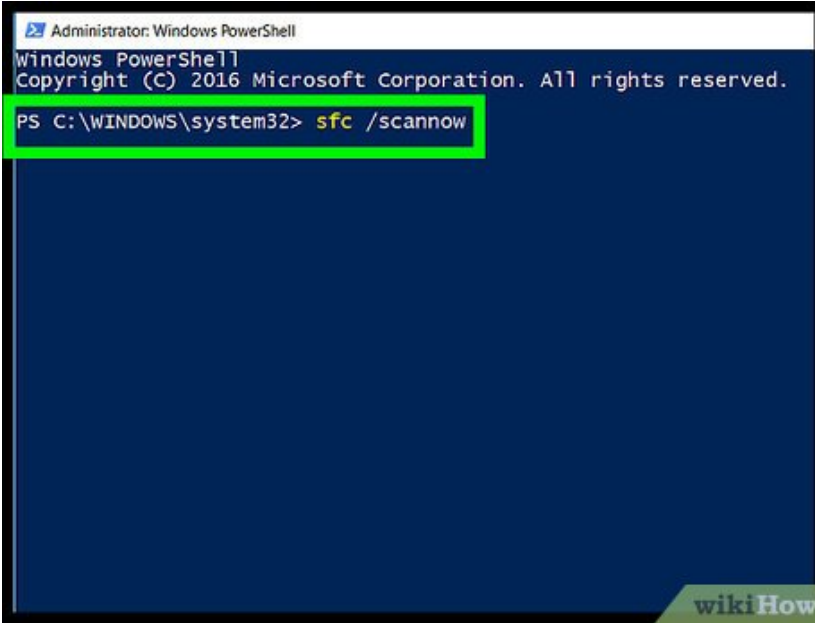

In Task Manager, go to File and then Run new task.

Type in 'powershell' and make sure that 'Create this task with administrative privileges.' is marked.

1. This is what you will be seeing.

4.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) 2016 Microsoft Corporation. All rights reserved.

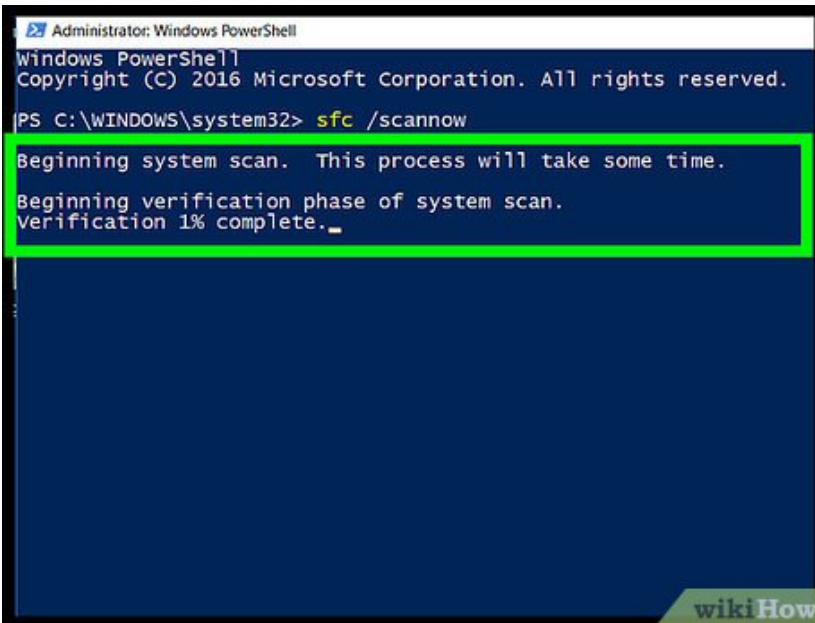

PS C:\WINDOWS\system32> sfc /scannow
```

wikiHow

Run the System File Checker. Type in (or paste) '**sfc /scannow**' after the C:/ prompt.

1. It will run. Depending on your computer, it could be fairly quick or take a little while.

5.

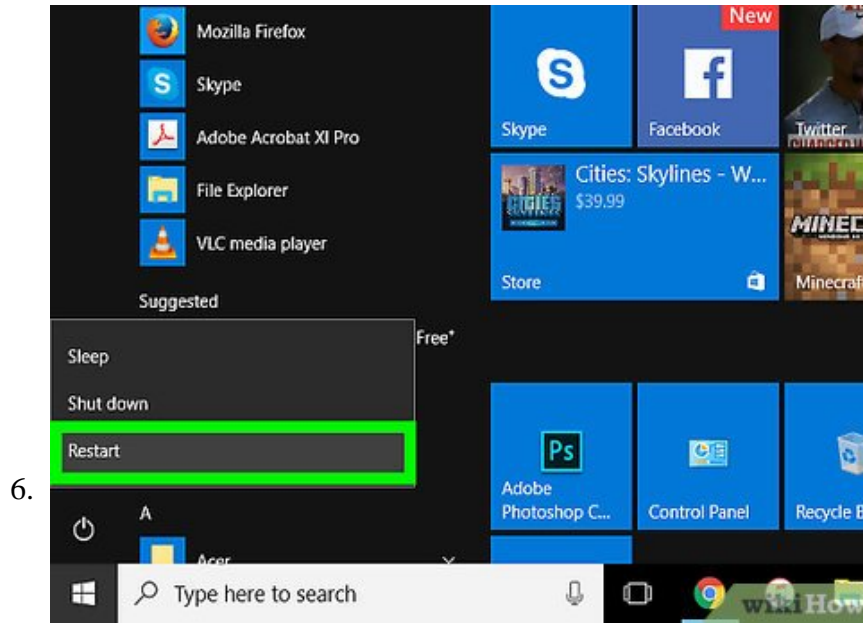

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) 2016 Microsoft Corporation. All rights reserved.

PS C:\WINDOWS\system32> sfc /scannow
Beginning system scan. This process will take some time.
Beginning verification phase of system scan.
Verification 1% complete.
```

wikiHow

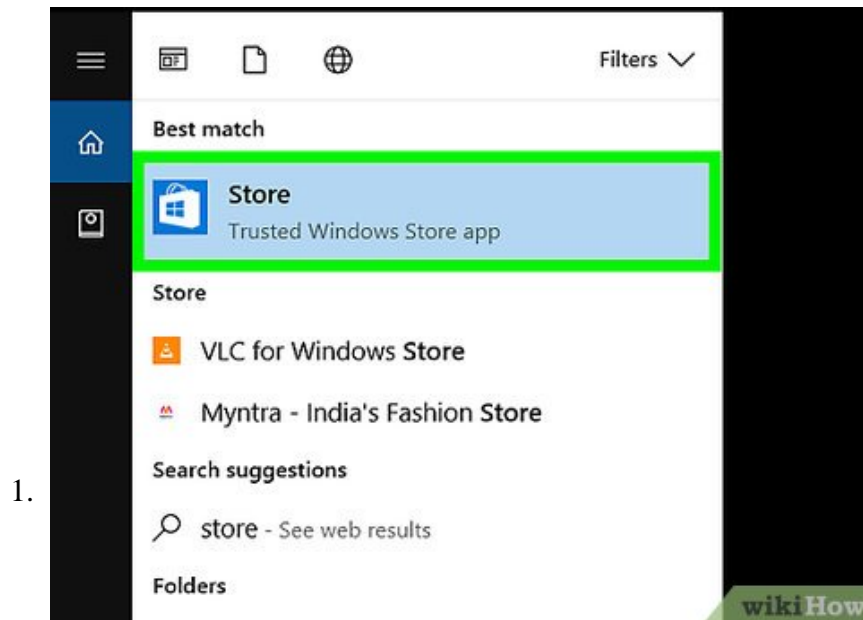

Check out the results. It may correct the problem there. Read what the screens says. Perhaps, even take a screenshot of it.

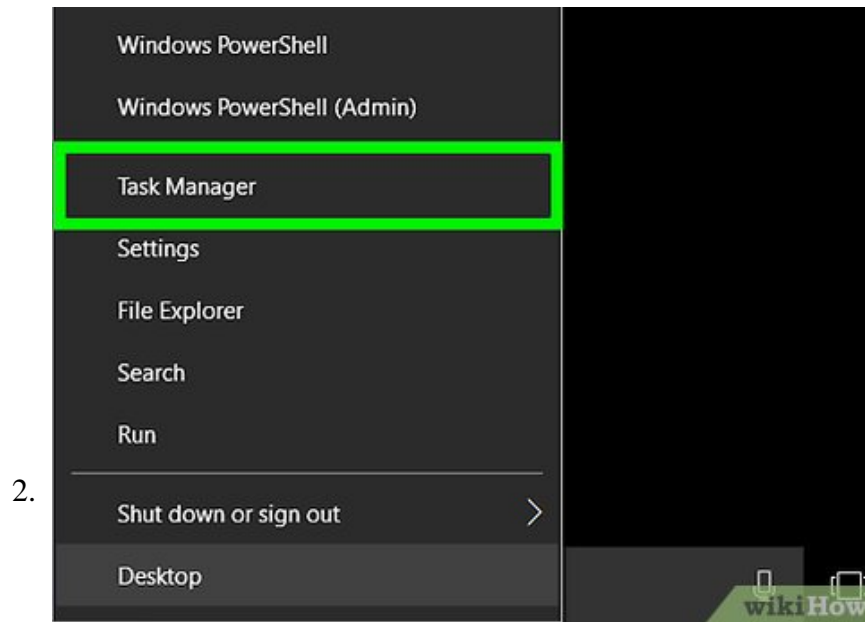

Restart and see if you have the Start Menu back.

Method 2 of 2:

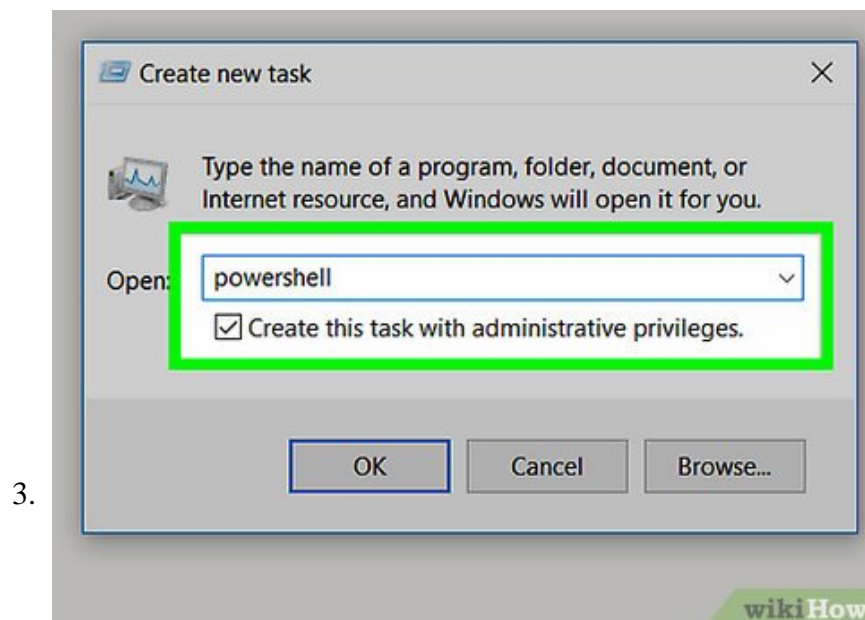

Reinstalling Windows Apps

If that doesn't work, reinstall the Windows Apps. While the apps aren't the problem, it does fix the issue.

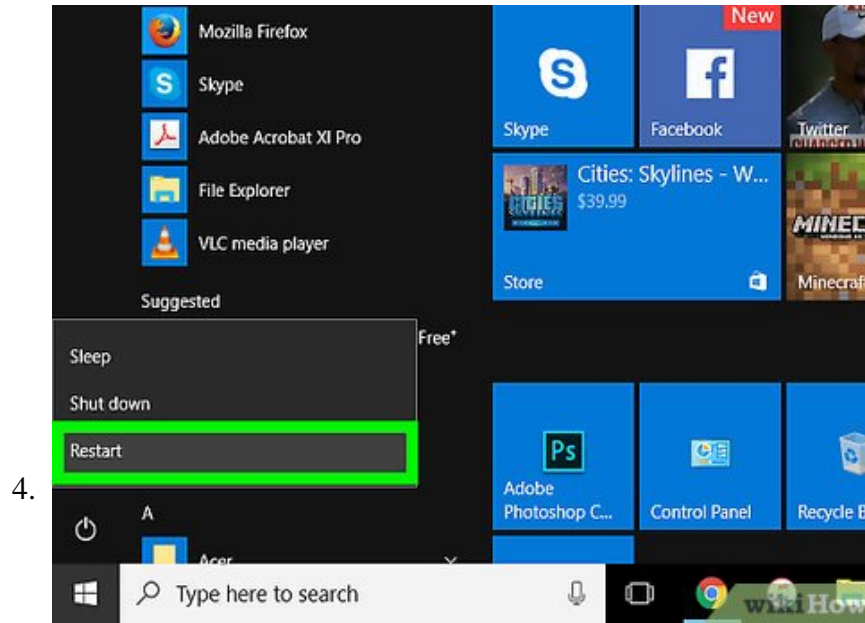

Launch the Task manager, like before, and start another task with administrative privileges.

Type in 'powershell' and then type (or paste) the following:

1. `Get-AppXPackage -AllUsers | ForEach {Add-AppxPackage -DisableDevelopmentMode -Register "$($_.InstallLocation)AppXManifest.xml" }`

Let it take its course and then restart. Your Start Menu should be working now.
