File Ghost Win 11 Pro 64bit

III. How to Ghost Windows 11 on PC, Laptop

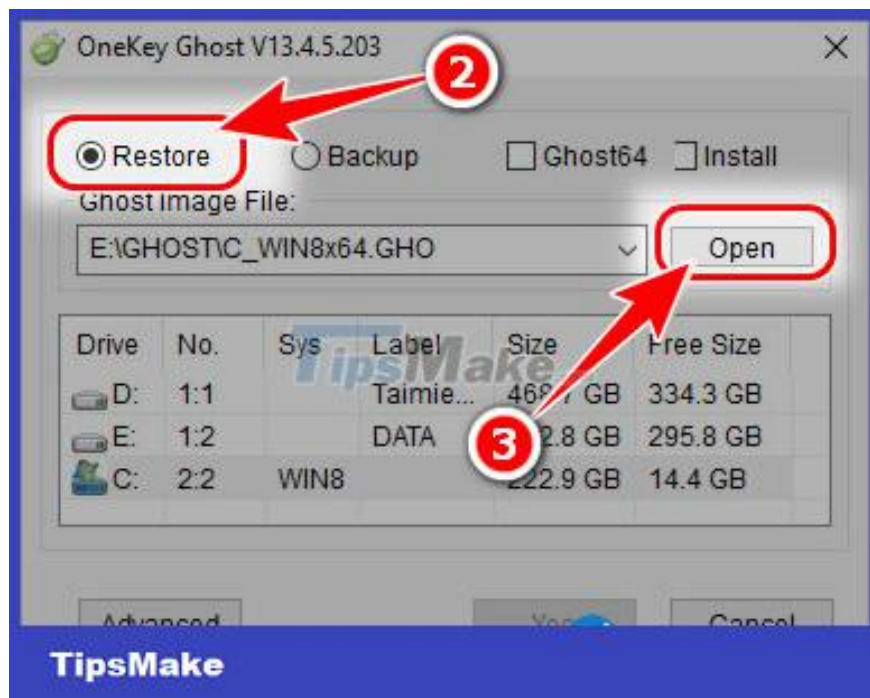

1. Use Onekey Ghost Windows 11 software

Step 1: Download **Onekey Ghost** standard version here.

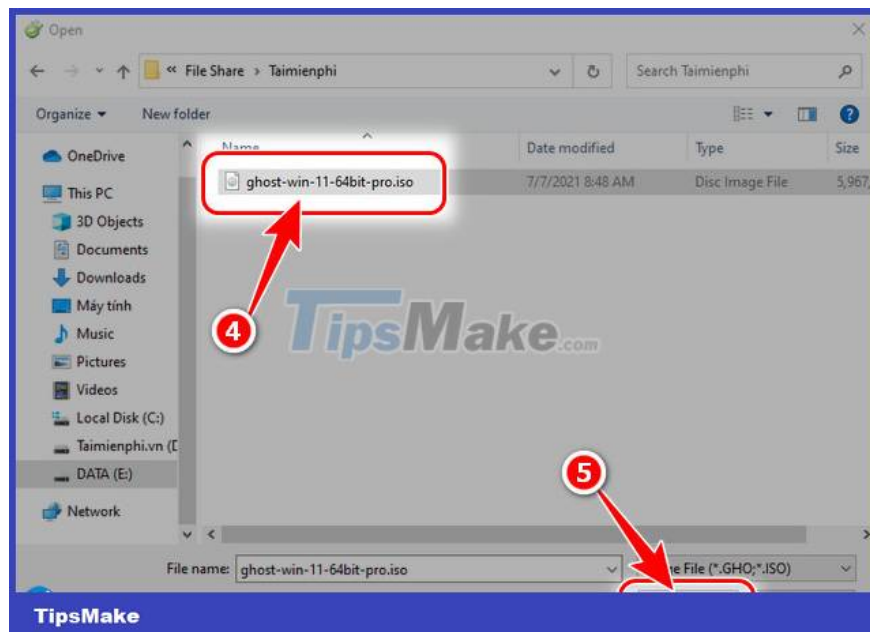

Step 2: **Right-** click **Onekey Ghost** and select **Run as Administrator** .

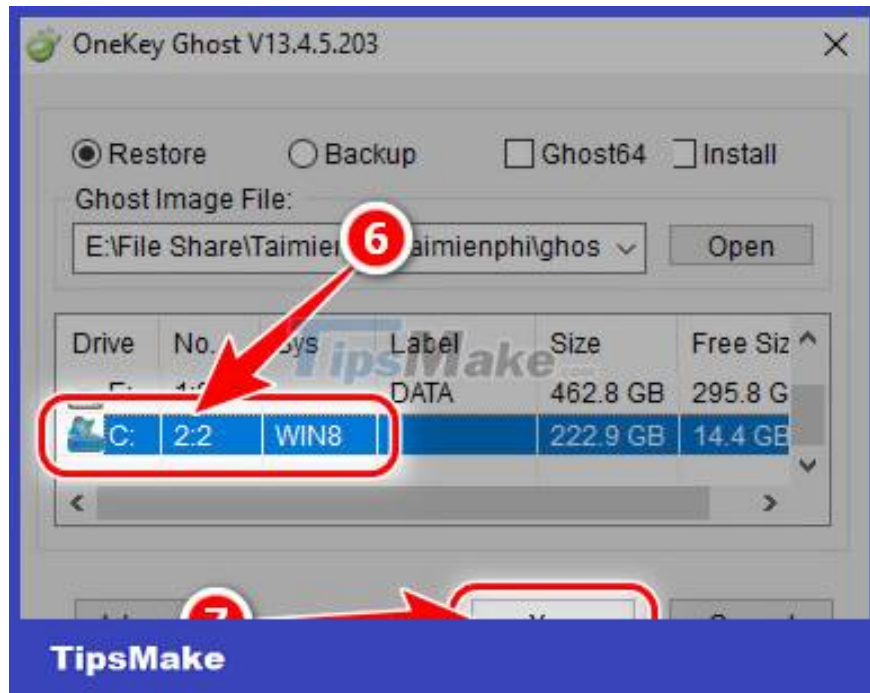

Step 3: Select **Restore** and click **Open** to find the file **Ghost Windows 11** .

- Click the file **Ghost Windows 11** => click the **Open** button .

Step 4: Next, you choose **the hard drive you want to extract Ghost Windows 11** (usually drive C) => click **Yes** => **Yes** and the system will automatically extract Ghost Win 11. The system automatically does all, your work. you are just waiting until the main screen of Windows 11.

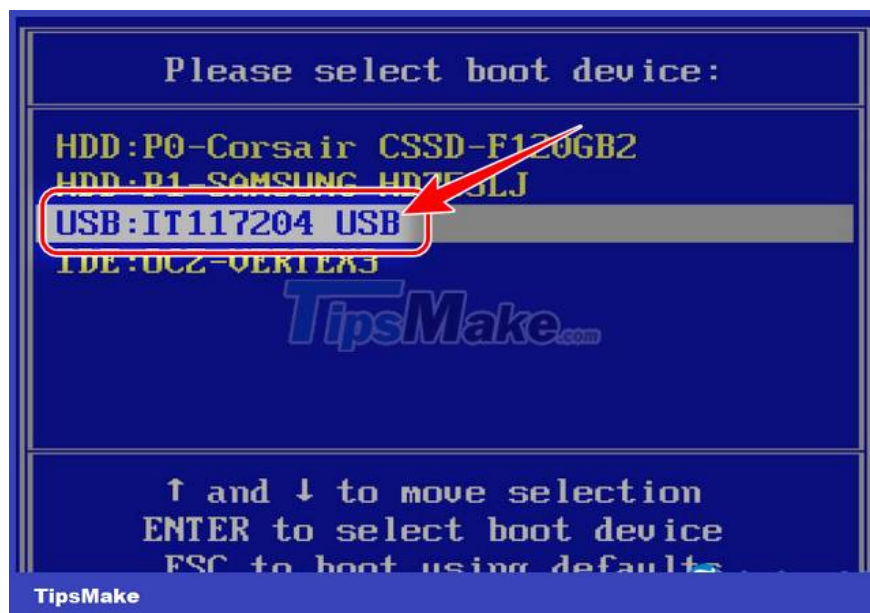

2. Ghost Windows 11 with USB

Step 1: Create USB boot using **DLC ??Boot 2017** standard version here, you can refer to the instructions below if you don't know how to do it.

Reference: How to create USB boot using DLC ??Boot 2017

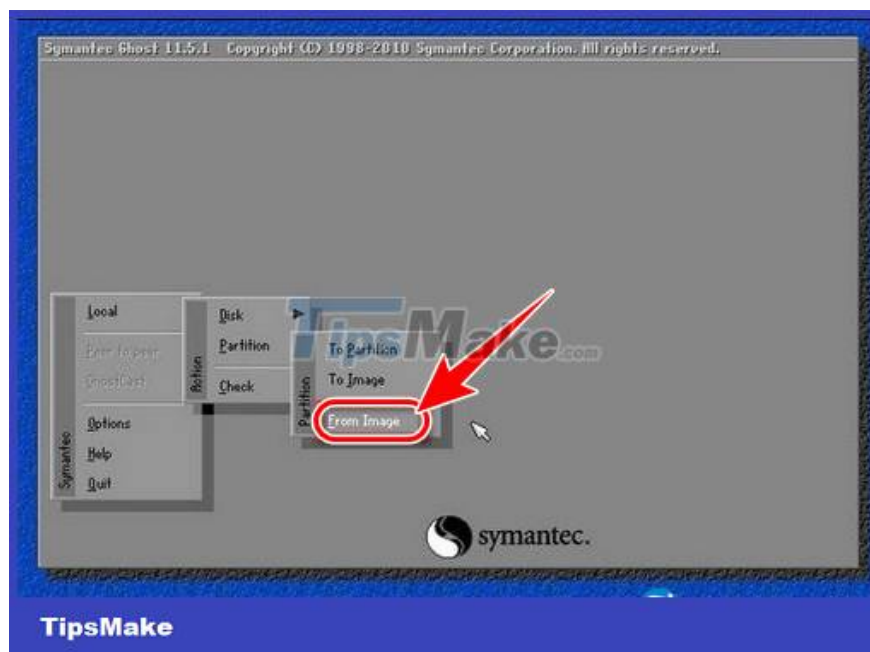

Step 2: Next, restart your computer, press the shortcut to enter **the Boot Menu** => select your **USB at the list**.
- Usually **the shortcut to Boot Option and BIOS of computer lines** will be **F2 , F9 or F12** . Depending on the BIOS you are using, there are separate shortcuts.

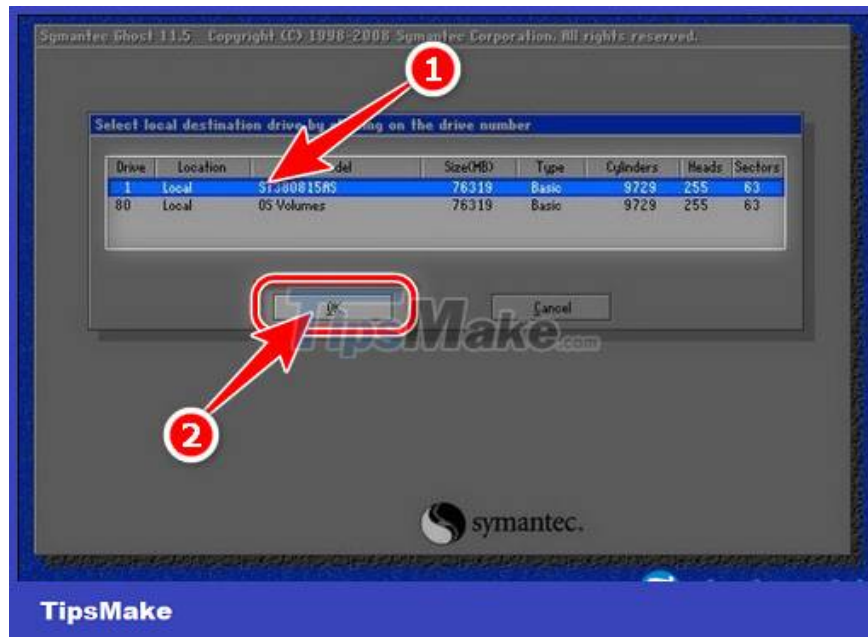

Step 3: At the **Boot Menu 2017** interface , select **Backup or Restore** => click **Norton Ghost** in the next panel.

Step 4: When the Norton Ghost blue screen appears, select **Local** => **Partition** => **From Image** => find and select the downloaded **Ghost Windows 11** file above => click **Open** .

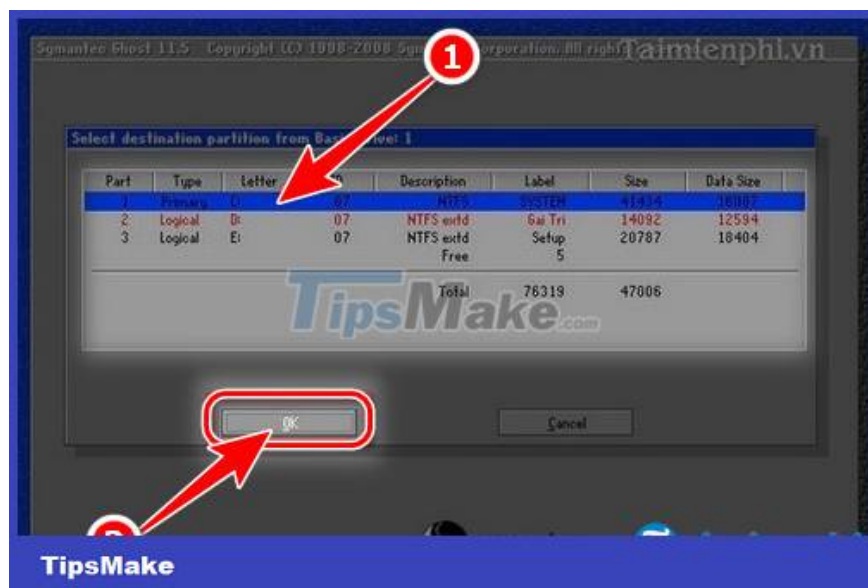

Step 5: You select **the hard drive** (based on the capacity of the drive to avoid choosing the wrong one, mistakenly moving to another drive) => click **OK** .
- If the computer has 2 or more hard drives, you must choose the correct Windows 11 ghost drive to avoid data loss when Ghost is mistaken.

Step 6: Select **the hard drive partition** (usually the default Windows installation drive will be C drive) => click **OK** => click **Yes** in the next table.

- **Note:** All data in this hard drive partition will be erased, lost all. So you need to make sure it is a Windows 11 installation drive and does not contain important data inside.

After clicking Yes, **Norton Ghost** will proceed to extract the ghost file on the computer partition you previously selected, this process can take place from 5 to 10 minutes, the system automatically reboots after it's done. The interface after extracting your Windows 11 ghost will look like the illustration below.
