

How to handle opened Word documents with font errors

You download a Word file on the Internet, but when you open the Word file on your computer, you have a font error and cannot read the text in the file. Here are two ways to handle when opening Word documents with font errors, unreadable text that you can refer to and perform

You download a Word file on the Internet, or copy a Word file of a friend . but when you open that Word file on your computer, you have a font error and cannot read the text in the file. Do not worry, please refer to the following article to find out how to handle when opening Word documents with font errors quickly.

Here are two ways to handle when opening Word document with font errors that you can refer to and perform it:

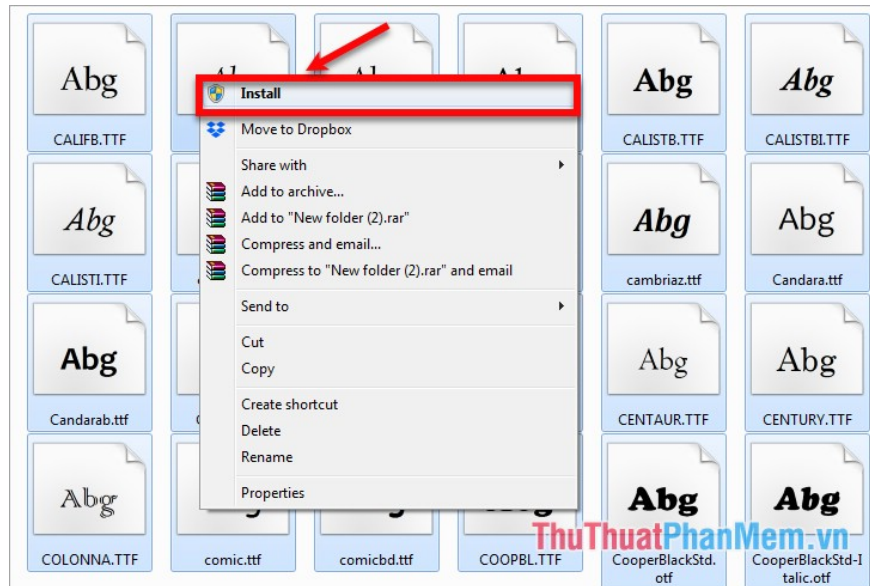

1. Download and install more fonts to your computer.
2. Use the Unikey Toolkit function of Unikey.

Method 1: Download and install FONT to your computer

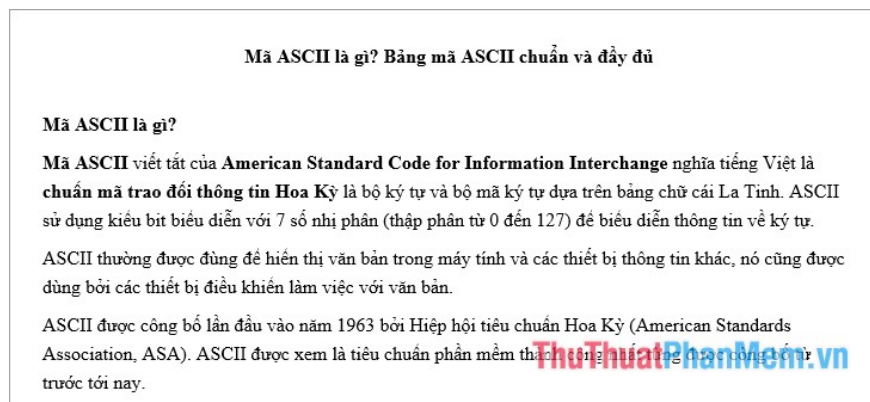

If you download the word on the internet, the font error may be due to the fact that your computer lacks the font that is exactly the font that the Word document uses. So you need to download and install more fonts for your computer to not be missing fonts.

You can go here <http://TipsMake.vn/download-bo-font-tieng-viet-day-du-cho-may-tinh-tcvn-vni-thu-phap-unicode/> to download more font sets full word.

After you've downloaded the font, open it and right-click **Install** to install the font on your computer.

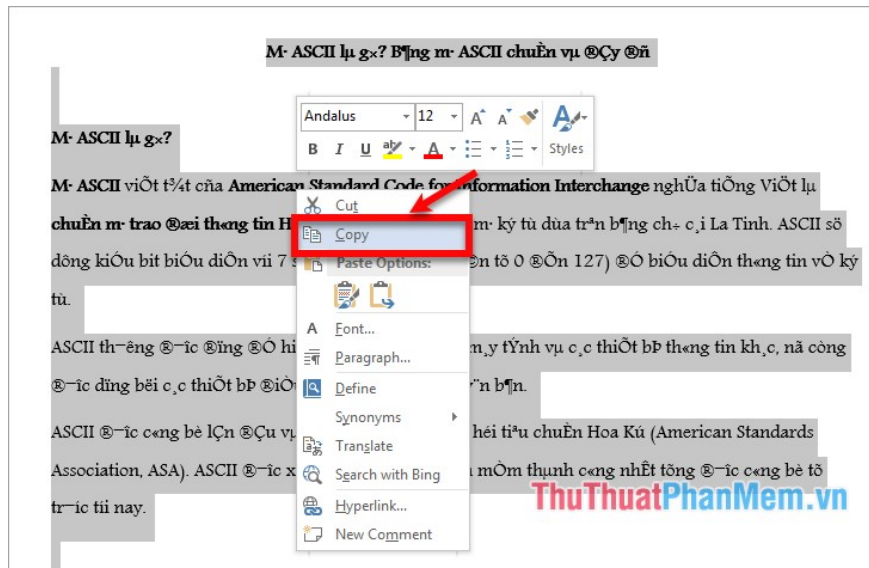

Then open the corrupted Word file and see the results.

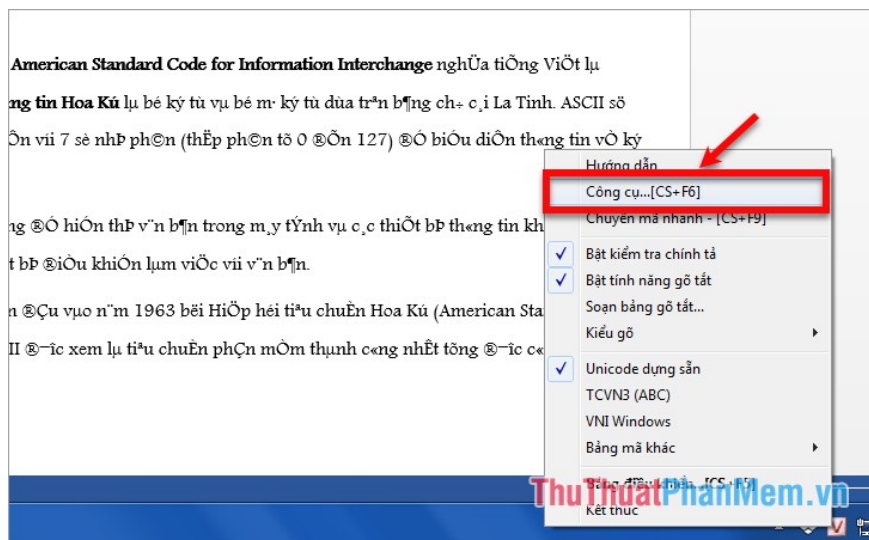

Method 2: Use Unikey Toolkit function of Unikey

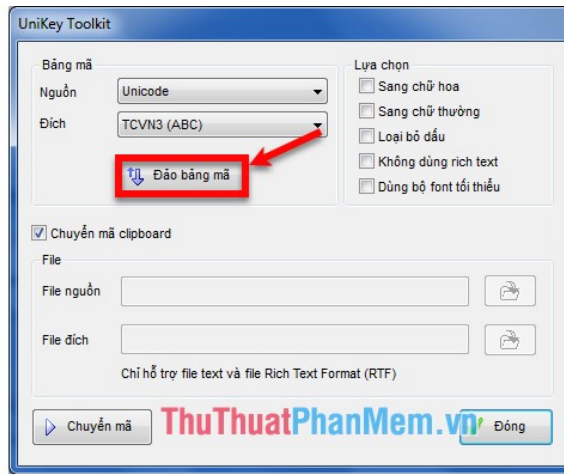

Step 1: Open the Word file, highlight all the corrupted text font (Ctrl + A combination), right-click and select **Copy** (Ctrl + C combination).

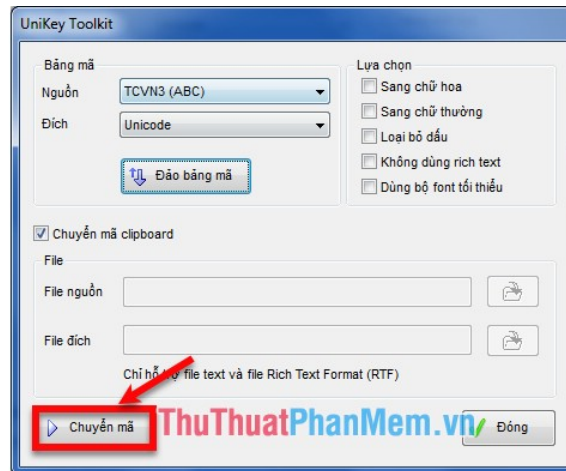

Step 2: Right-click the Unikey icon under the system tray and select **Tools . [CS + F6]** (**Ctrl + Shift + F6** key combination) to open the **Unikey Toolkit** dialog box .

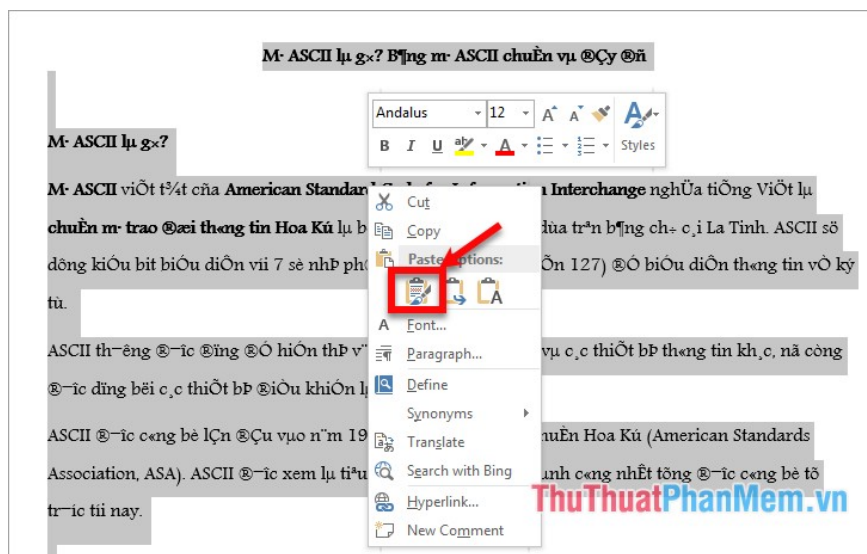

Step 3: In the **Unikey Toolkit** dialog box , you will see the source table is **Unicode** and the target is **TCVN3 (ABC)**, click **Select Code Island** to change the source code and destination code.

Step 4 : After changing the encoding, the source code will be **TCVN3 (ABC)** and the destination code will be **Unicode** . You click **Transcode** , a dialog box appears saying you click **OK** .

Step 5: Open the corrupted Word file again, right-click and select **Paste** (Ctrl + V key combination) to paste the transcoded text into Word.

As a result, the Word file will not have font errors anymore

Mã ASCII là gì? Bảng mã ASCII chuẩn và đầy đủ

Mã ASCII là gì?

Mã ASCII viết tắt của **American Standard Code for Information Interchange** nghĩa tiếng Việt là **chuẩn mã trao đổi thông tin Hoa Kỳ** là bộ ký tự và bộ mã ký tự dựa trên bảng chữ cái La Tinh. ASCII sử dụng kiểu bit biểu diễn với 7 số nhị phân (thập phân từ 0 đến 127) để biểu diễn thông tin về ký tự.

ASCII thường được dùng để hiển thị văn bản trong máy tính và các thiết bị thông tin khác, nó cũng được dùng bởi các thiết bị điều khiển làm việc với văn bản.

ASCII được công bố lần đầu vào năm 1963 bởi Hiệp hội tiêu chuẩn Hoa Kỳ (American Standards Association, ASA). ASCII được xem là tiêu chuẩn phần mềm thì nó cũng đã được công bố từ trước tới nay.
