

# How to hide apps that have been downloaded to iPhone

To keep the applications that have been downloaded to the iPhone secret, we can delete them from the list according to the article below.

Apps that were previously downloaded to your iPhone in the Apple Store will display a cloud icon instead of the Get button with the brand new app. Other people can rely on this icon to know if you have downloaded this application or game to your device. To keep the applications that have been downloaded to the iPhone secret, we can delete them from the list according to the article below.

## Instructions for hiding applications that have been downloaded to iPhone

For example, the ClevCalc application will display a cloud icon with applications that have been downloaded to the iPhone and deleted from the iPhone.

Step 1:

We access the App Store then click on the avatar icon in the upper right corner. Next, click on Purchased to proceed.
