

How to hide Facebook ads, neatly interface with Social Fixer

To streamline the interface, hide ads and many unused content areas on Facebook, we can use the Social Fixer utility.

There are sponsored ads on Facebook and if you want to hide them, following how to adjust settings on Facebook will not work. So we need to use some other Facebook ad hiding tools like Social Fixer. This utility is installed on popular browsers like Chrome, Firefox, Opera and Safari. You can use Social Fixer to hide unused Facebook content areas such as the Story section, game introduction or sponsored ads.

Users can choose the content they want to hide on the Facebook interface according to the list that Social Fixer provides. The following article will guide you how to use the Social Fixer utility to customize the Facebook interface.

1. Change Facebook interface with 5 widgets on Chrome
2. How to adjust the interface, hide Facebook ads
3. How to hide comments on Facebook with keywords
4. 5 Facebook privacy settings you should know

Instructions for adjusting Facebook interface

Step 1:

Users access the link below to access Social Fixer's homepage and select the utility version that is suitable for the browser they are using.

1. <https://socialfixer.com/download.html>

Download Social Fixer for Chrome

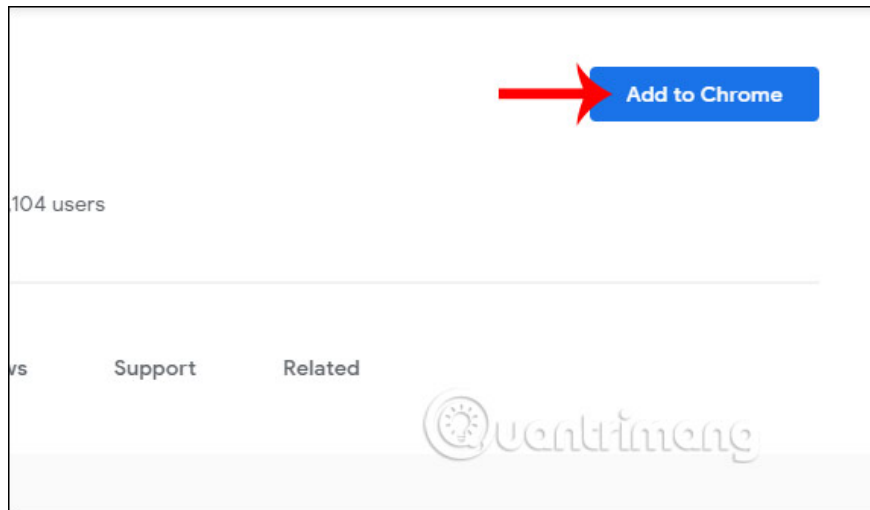

It looks like you're using Chrome.
Click to install the extension from the official Google Chrome Web Store.

[Download from Google NOW!](#)

You can also [view all download options](#): 

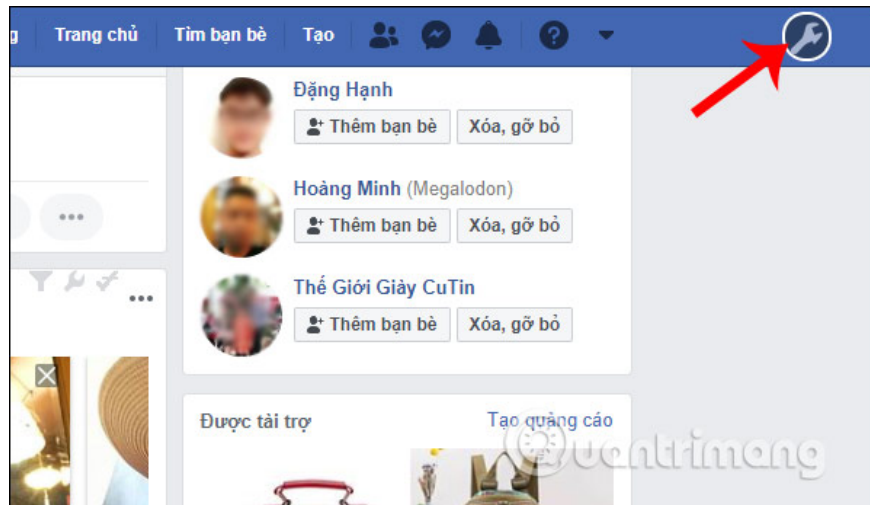

Download Social Fixer as a User Script

Next you install the utility on your browser to use. The article is done on Chrome browser, other browsers do the same.

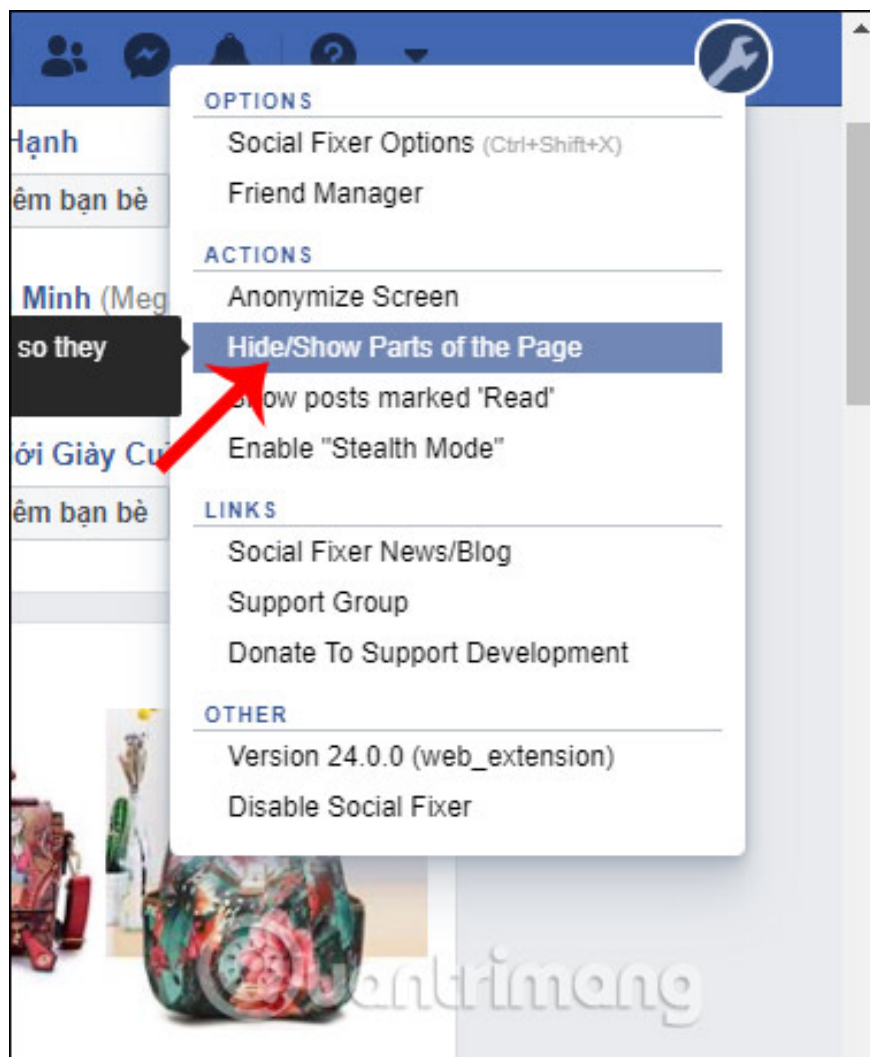

Step 2:

Access your personal Facebook account and you'll see **the wrench icon** in the top right corner of the screen.

Clicking on this icon will display a list of options to change the Facebook interface for users to choose. First, click **Hide / Show Parts of the Page** at the Actions section.

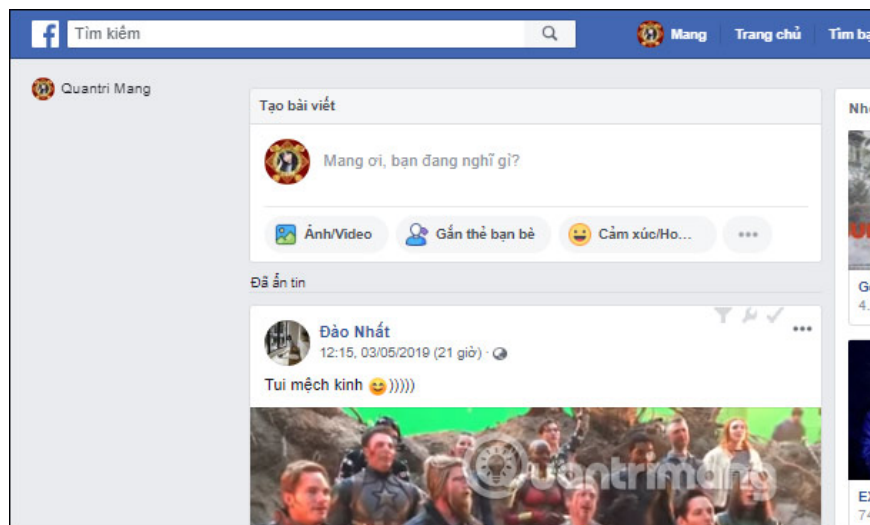

Step 3:

Immediately some of the content on the Facebook interface is covered in green so we can choose to hide them if desired. **Click on the area to hide** and click **Done Hiding** to proceed to hide the content.

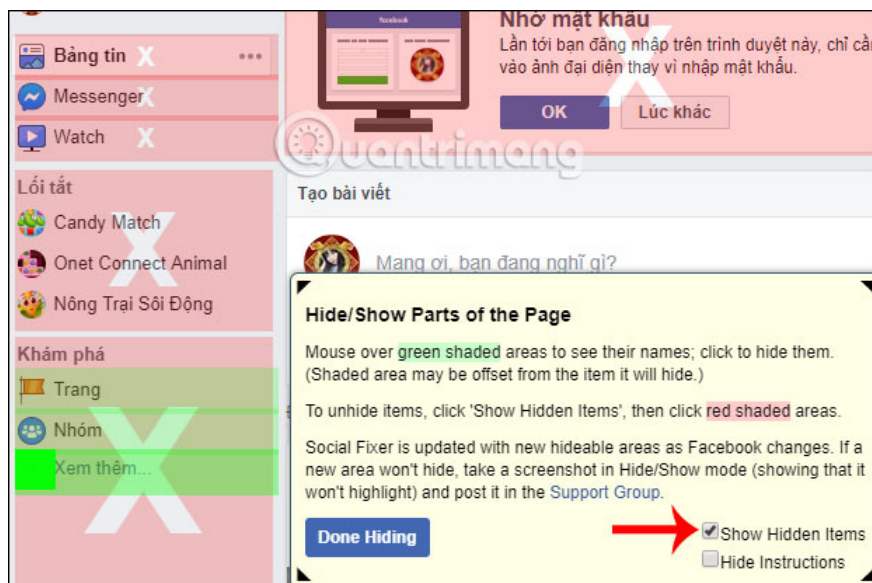

For example, press the X button to hide the list of menus on the left of the interface and the results of the Facebook interface are reduced as shown below.

Step 4:

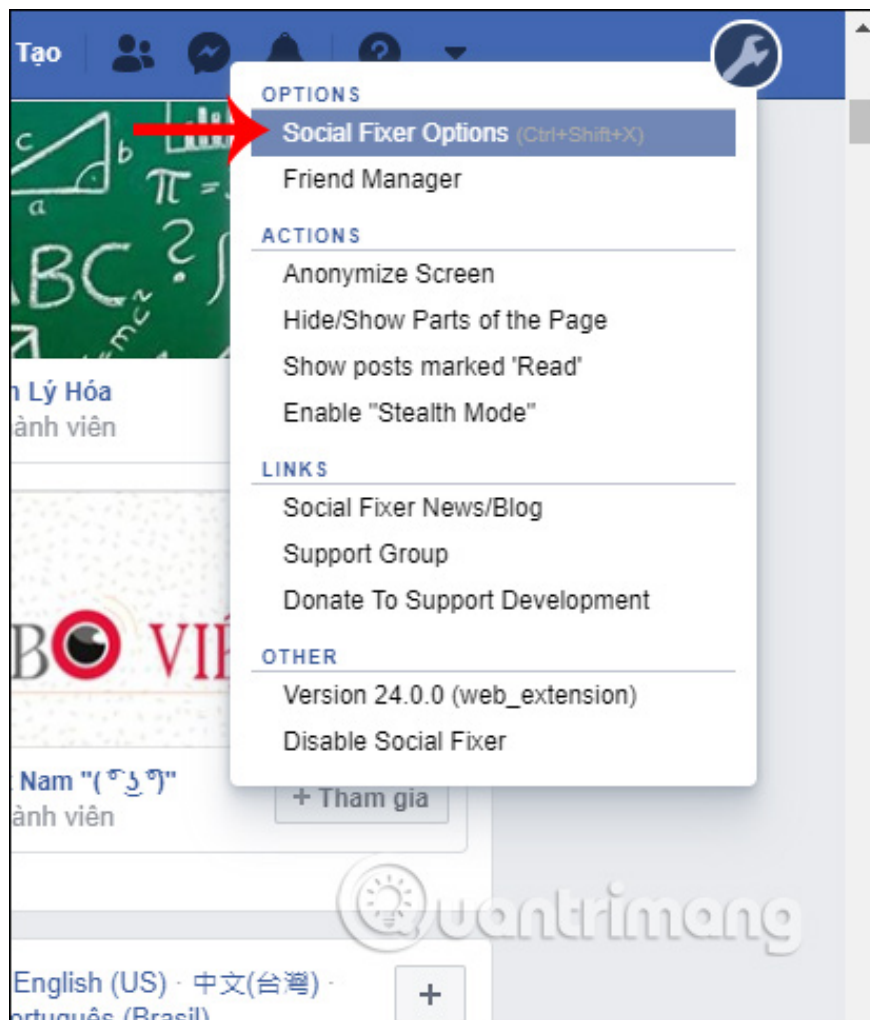

To display the hidden content again, the user also clicks Hide / Show Parts of the Page again. Display the pop-up content interface, select **Show Hidden Items** to display the hidden content.

The hidden content is covered in red, and also **clicked on the X button** and then click **Done Hiding** to confirm the display is OK.

Step 5:

If you want to **hide sponsored ads on Facebook**, users click on the **Social Fixer Option** in the Options in the menu of Social Fixer.

In the new interface, click **Filters** in the list on the left side of the screen.

Continue to look at the content on the right to find **Filter Subscriptions** and then click on the **plus sign at Hide Sponsored Actions and Suggested Posts (Social Fixer >= 24.0)** . Below we can also add a plus sign if we want to use the filter.

The pre-defined filters below are available for you to use. These "Filter Subscriptions" will be automatically maintained for you, so as Facebook changes or more keywords are needed to match a specific topic, your filters will be updated without you needing to do anything!

Title	Description	Actions
Hide Avengers: Endgame Spoilers	Hide spoilers for Avengers: Endgame. Show a placeholder where the post would have been, allowing you to click and view if you wish.	
Election/Politics 2019	Filter posts related to U.S. Politics	
Hide Sponsored and Suggested Posts (Social Fixer >= 24.0)	Hide all Sponsored and Suggested posts from the news feed	
Hide Game of Thrones Spoilers til Monday	Hide posts with any mention of Game of Thrones but only on Sunday night and show a spoiler warning note instead. Show them again on Monday.	
Hide all posts about Game of Thrones	Hide posts with any mention of Game of Thrones.	
Create Game/App Tabs	Create tabs for filtered views of posts by apps or games, but don't remove them from the News Feed	
Create Author Tabs	Create tabs for filtered views of posts by different people, but don't remove them from the News Feed	
I F'ing Love ...	Replace any Page names like "I F'ing Love Science" with "IFL"	

Immediately **the Active Filters section** displays a new filter. Click **Save Changes** to save the changes.

Users then need to reload Facebook to update the new filter. As a result we will see sponsored ads on Facebook not showing up on the interface anymore.

Active Filters

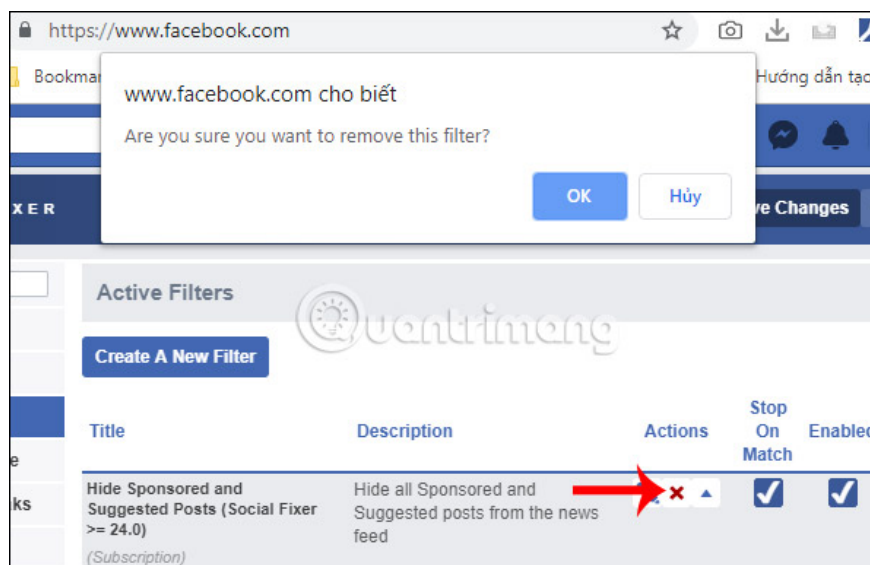

Create A New Filter

Title	Description	Actions	Stop On Match	Enabled
Hide Sponsored and Suggested Posts (Social Fixer >= 24.0) (Subscription)	Hide all Sponsored and Suggested posts from the news feed		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Filter Subscriptions

Step 6:

In case the user wants to **turn off this Facebook ad filter** , also access the Filters section again, then tick the red X to clear the filter. When the utility asks if the user is sure that he wants to delete the filter, click OK to agree.

Overall, the Social Fixer utility works relatively well, the Facebook interface is more compact when hiding some unnecessary content. Note to users, the option to hide Facebook ads is not applied to the entire ad, there will be hidden content and the content will still be displayed later.

I wish you all success!
