

How to hide Instagram even when you're online

The online status of your Instagram account will not be displayed even when you are using it.

Like Facebook, Instagram also has active online notifications for friends to know. The Instagram account will then display a green circle and the notification line in action. Instagram's green online dots are displayed in the Instagram Direct message interface so that accounts are easier to message with each other.

In some cases users want to hide Instagram status, turning off the blue online mode displayed in the message interface is as simple as when you hide your Facebook nick. When hiding Instagram, others do not know whether you are online or not. The following article will guide you how to hide Instagram accounts.

1. How to verify Instagram account (add a green tick next to the name)
