

# How to hide message content on Telegram

Telegram has a very interesting feature that is to hide the content of sent messages through the Spoiler tag option. Then the content of the message you choose will be completely hidden, or partly depending on the user's setting.

Telegram has a very interesting feature that is to hide the content of sent messages through the Spoiler tag option. Then the content of the message you choose will be completely hidden, or partly depending on the user's setting. This is also an interesting way when you want to avoid revealing the content or interesting information of a certain show or movie in the Telegram group for others to know. The following article will guide you to hide message content on Telegram.

## Instructions to hide message content on Telegram

### Step 1:

First, **enter the content of the Telegram message** you want to send into the frame as usual. Then you **double-click on that message line**, then **highlight the part of the message you want to hide** or the entire message if you want.

**Step 3:**

Then we proceed to **send Telegram messages** as usual.

Telegram message results have been hidden as shown below. When messaging in the Telegram group, if members see the message shown below, they will know this content has been hidden and contains spoilers.

The other party will also see the hidden message and they have to **click on the message line to show it if they want to read it**. If you exit this conversation, the message will be hidden again.

Telegram messages hidden when displayed on the computer will look like the image below and just click on it to read the content.
