

# How to hide personal information, image content on Redacted

To hide personal information on photos we can do it right on the browser via Redacted.

When posting personal images on public websites, personal information is absolutely not disclosed. To hide important information you need to blur or mask the content. And for image processing, we need photo editing software, like blurring on Photoshop or blurring photos with Skitch application.

However, if you only need to obscure the information, sensitive content can be used immediately Redacted, the online photo editing tool has the ability to hide content or image area depending on your choice. The following article will show you how to use Redacted to hide information.

1. How to blur photos with Image Blur
2. "Magical" photo wallpaper removal applications you should try
3. How to delete an image object using the Snapseed application
4. How to take photos to remove fonts on old phones

## Redacted user instructions blur information

### Step 1:

First of all, users access the link below to go to Redacted homepage.

<https://marky.space/redacted/>

### Step 2:

Next click the **select image button** to upload the computer's existing image to Redacted, or drag and drop the image into the web interface.

### Step 3:

Show image editing interface. Here the user localizes the content to obscure and hide the information. Then the information area is zoned as shown below.

### Step 4:

Continue double clicking on the blur area and the blurring effects will be changed to apply to the image. We can move the blurring frame to another location, zoom in or out on the area we want to blur.

### Step 5:

To change the blurring level, increase or decrease the blur percentage for the user content area click **Settings** to display the **Control levels adjustment bar**. We move the bar left or right to change the level of blurring, depending on the area of the image we want to hide the information.

When the adjustment is complete to blur the image area, **press Download** to download the image.

No need to install software to cover your personal content, Redacted helps you secure all information quickly through just a few steps. The level of blurring is also easily adjusted through the adjustment bar.

I wish you all success!
