

How to hide Reels Instagram suggested videos

Social network Instagram will recommend Reels videos to increase the user experience as well as access new videos.

However, the suggested Reels Instagram videos may not be to your liking, or the Reels Instagram videos may have inappropriate content. If so, we can hide Reels Instagram suggested videos to not see those Reels videos. The following article will guide you to hide suggested videos

Instructions to hide Reels Instagram videos

Step 1:

First you need to access your Instagram account profile page. At the next interface, click on **the 3 dashes icon** in the upper right corner.

Step 2:

Now at the bottom of the screen showing different options, click **Settings and privacy** .

Step 3:

Display the adjustment items for your personal account on Instagram, users click on **Suggested content** to adjust the suggested content displayed on Instagram. In this section, we have some customizations for suggested content displayed on the Instagram app, including Instagram Reels videos. You will adjust **the item Snooze suggested articles on the Feed panel**, move the red circle button to the right to activate it.

Instagram will then adjust the suggested content on the Feed within 30 days.

Step 4:

To change the video Reels Instagram suggests, when you access Reels Instagram, if you don't like a post from any Instagram account, click on the **3-dot icon** and then select **Don't care** .
