

How to hide the All apps list in the Windows 11 Start menu

Many people dislike the new Start menu interface in Windows 11 because it currently groups applications by default. Below is a guide on how to hide the list of applications in the Windows 11 Start menu.

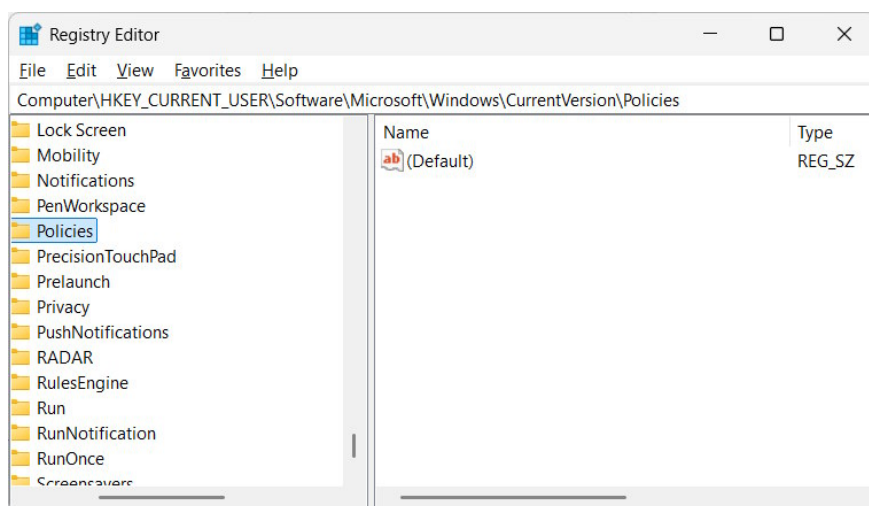

Microsoft introduced a new Start menu layout, combining the Pinned and All views into a larger interface, along with the option to disable the Recommended section. Many people dislike this new Start menu interface because the menu now defaults to grouping similar applications by Category view. Below is a guide on how to hide the Start menu application list in Windows 11.

How to hide the "All apps" list on the Windows 11 Start menu.

Step 1:

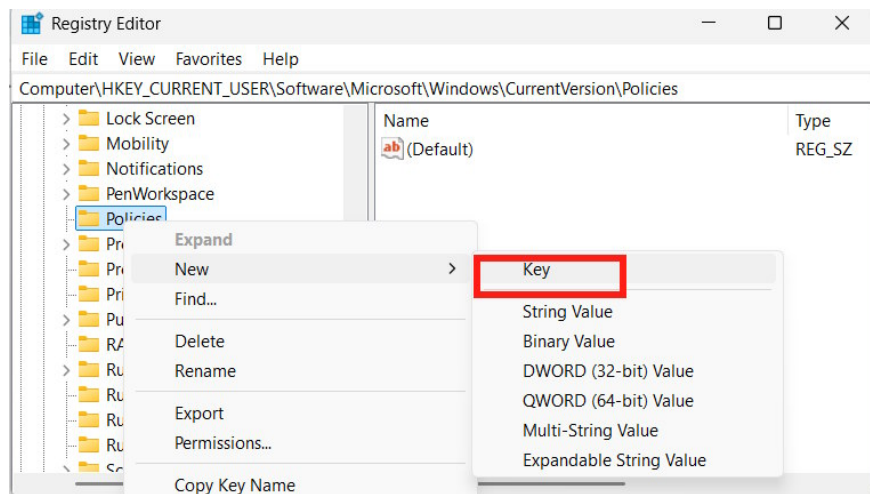

Type "regedit" into the search bar to access the Registry on your computer. Then, follow the path below.

HKEY_CURRENT_USERSoftwareMicrosoftWindowsCurrentVersionPolicies

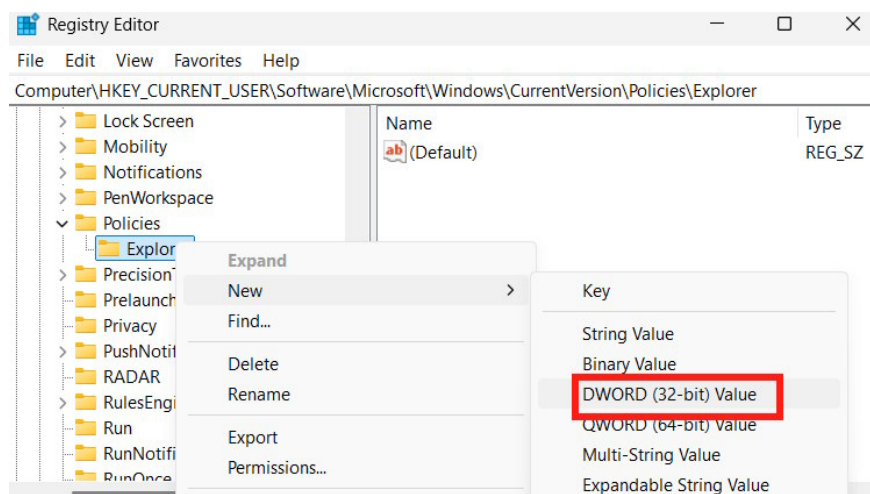

Step 2:

Right- click on the Policies key, select **New** , and then select **Key** to create a new key. We will name the new key **Explorer** .

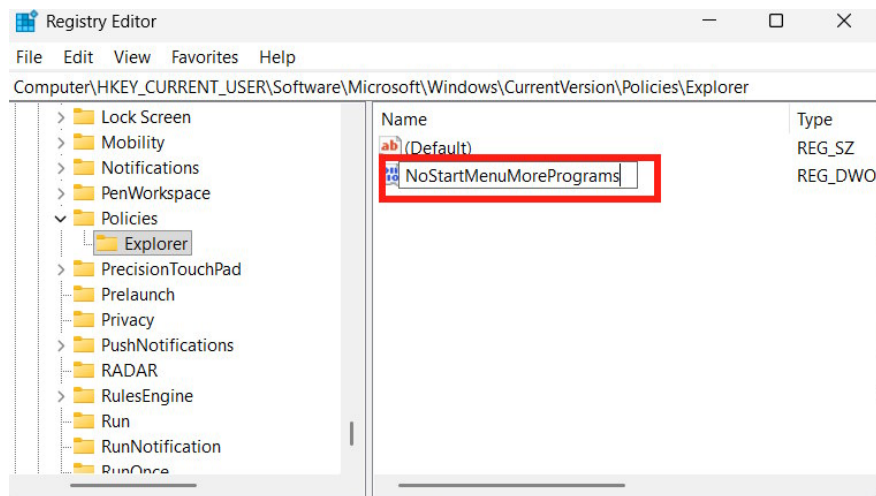

Step 3:

Right -click the Explorer key again and select **DWORD (32-bit) Value** to add a new value.

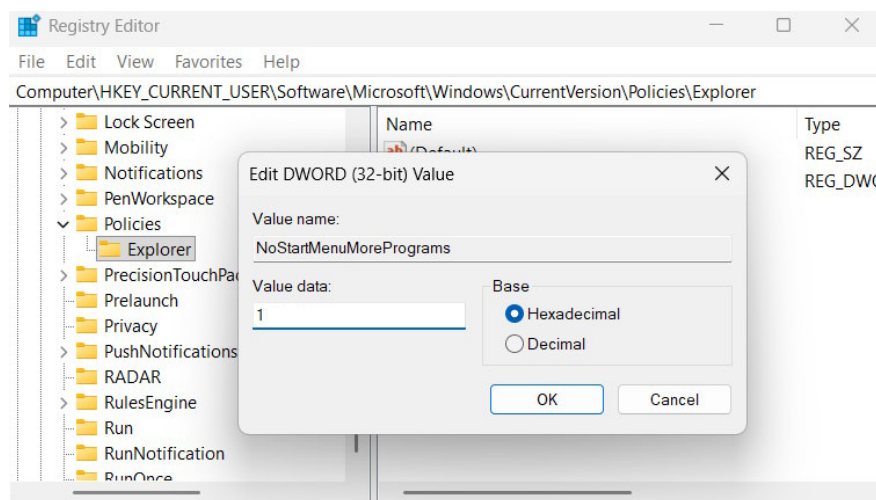

Now you name the new price as **NoStartMenuMorePrograms** .

Step 4:

Double-click on the **NoStartMenuMorePrograms** value , set it to **1**, and click **OK** to save.

Restart your computer for the changes to take effect.

After completing these steps, when you open the Start menu, the "All apps" list will no longer be displayed. Only pinned apps will be shown. You will have to use Windows Search to manually find apps if they are not pinned to the Start menu.
