

*Step 4* : In the **Apply to range** section , the data column you selected above will be automatically added.

Step 5 : In ' **Format cells if** ' we change the value here to ' **Custom formula is** '

Step 6 : Enter the following in the box below: '**=countif(A:A,A1)>1**'

Apply to range

A1:A997

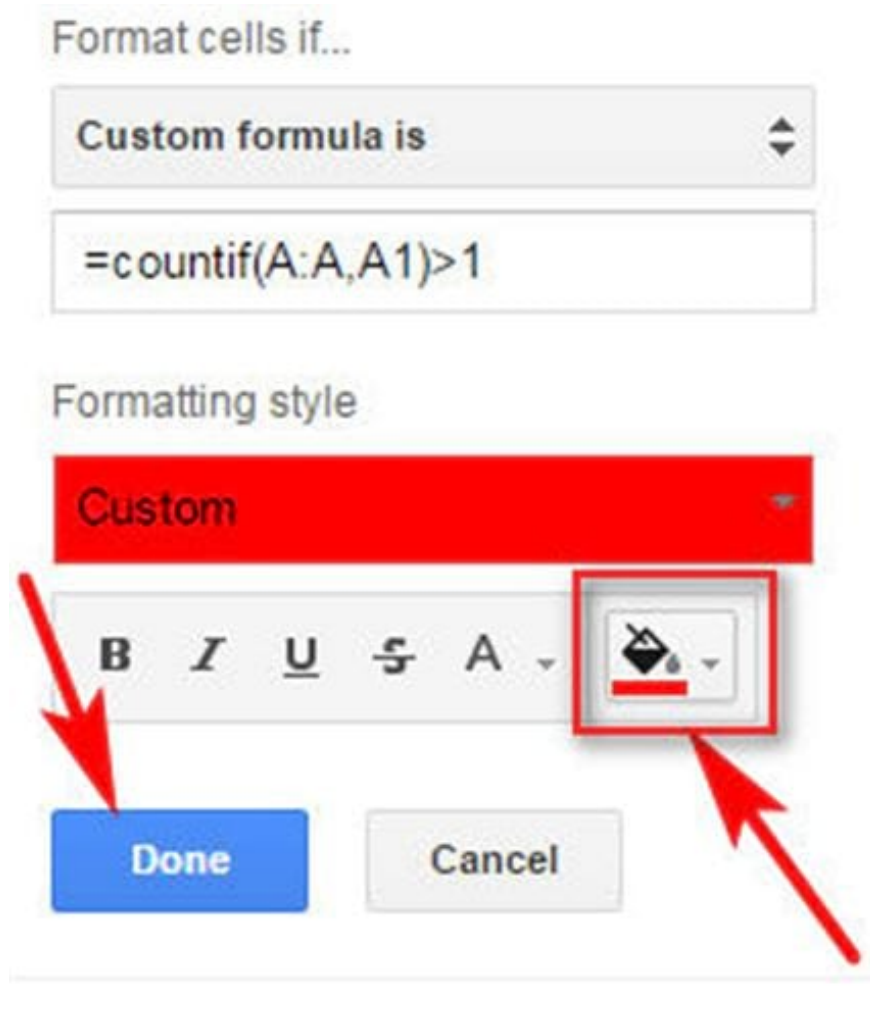

Format cells if...

Custom formula is

=countif(A:A,A1)>1

*Step 7* : In the **Formatting Style** section , you can change the color to fill the cells. Here I choose red. Then click **Done** to complete.

Now the duplicate data will be highlighted in red immediately. Now you can check again if this data needs to be deleted or not.
