

How to highlight important notifications on iPhone

In order not to ignore any important notifications on the iPhone, we can install Priority tweaks.

Although new notifications sent on the iPhone will show up in the lock screen, with audio for users to know, but it will inevitably miss you important notifications. To limit this situation, users can install Priority tweaks for jailbroken iOS 11 devices.

This tweak will create vibrations for important application notifications, highlighting the rest of the content. The following article will guide you how to install Priority tweaks on iPhone.

1. How to customize notifications on iPhone
2. How to vibrate the unread app icon on iPhone
3. How to turn off iPhone application notifications?

Instructions for creating vibration notifications on iPhone

Step 1:

Tweaking Priority is now available for \$ 0.99 but you can experience it first at the Kiiimo repo according to the link below.

1. <http://cydia.kiiimo.org/index.php?pid=3037>

Step 2:

After the installation has been successfully tweaked, go to **Settings** and select **tweak Priority** to customize it.

1. Vibration Length bar will be used to adjust the vibration rate of the notification.

Under the Options section, there are options including:

1. Bypass Do Not Disturb: Skip mode Do not disturb with important notifications.
2. Priority Notifications At Top: Important notifications appear on the top of the list.
3. Manual Priority Clearing: Set priority notifications.
4. Select Priority Applications: Select the preferred notification for the application.

Clicking on the **Select Priority Applications option** will display a list of applications on the device. To select the priority notification for which application, push the horizontal bar to the right to activate.
