

How to improve the Clipboard on iPhone

Copypasta for iOS jailbroken will increase the ability to copy data, instead of just copying the final content.

Clipboard on the computer or on the phone by default copies the last, closest content that the user has done. However, if you need to copy more content, you can install Copypasta for jailbroken iOS 11 devices. This tweak extends the ability to copy the Clipboard's content from any previous application or session. When you click on any location, the tweak automatically inserts the content at the cursor position. The following article will guide you to read how to use Copypasta on jailbroken iOS devices.

1. How to use Clipboard history in Windows 10
2. How to simply copy files from computer to iPhone / iPad
3. Copy photos from iPhone / iPad to computer without iTunes
4. Things to know about backing up your iPhone and iPad

How to set up Copypasta on iPhone

Step 1:

Users install Copypasta for iOS device according to the link below.

<https://repo.nepeta.me/depiction/me.nepeta.copypasta>

Step 2:

After installation is complete, click the Copypasta tweak to reset. At the setup interface we change some content.

1. Turn on or turn off fine-tuning.
2. Choose between automatic, bright or dark colors.
3. Blur background when Copypasta opens.
4. Hide or display the application name in the interface Copypasta.
5. Hide or show application icons in the interface Copypasta.
6. Remove the interface Copypasta when pasting content.
7. Use the spelling button to open.
8. Automatically expand Copypasta interface when copying or cutting content.
9. Do not push the keyboard interface up.
10. Custom height shaping for Copypasta interface
11. Select the number of items that will appear in history running Copypasta
12. Restore all settings to default.
