

# How to increase audio and video on Microsoft Edge Chromium

The Volume Controller utility will manage the audio tabs on Edge Chromium and increase the volume of videos and music to the maximum.

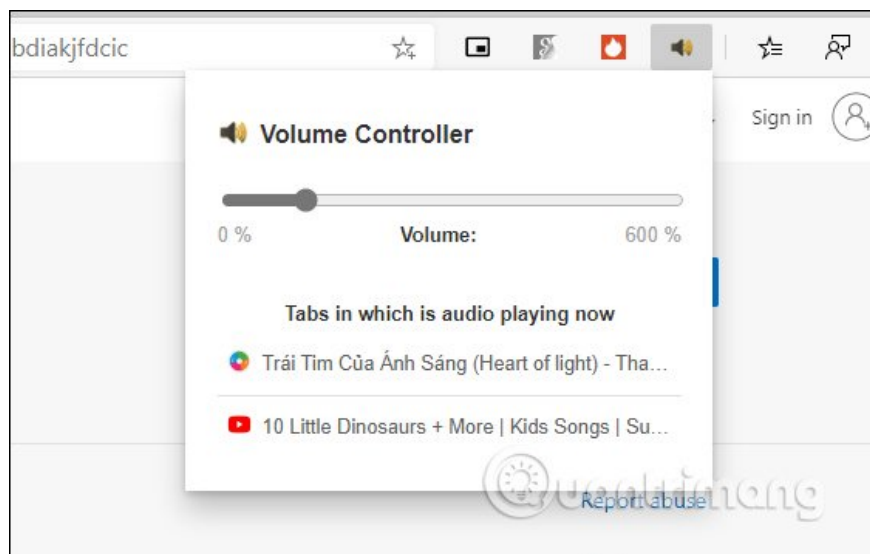

Audio video or music sometimes not as you like, too small or too loud. If so, we can install the Volume Controller utility on the Edge Chromium browser. This utility has its own volume control bar, so users can adjust the sound for videos or music in any tab they want. Besides, those websites that are opening audio are also managed by the utility in the interface, helping users to quickly adjust when they want. The following article will guide you how to adjust the volume on Edge Chromium with the Volume Controller utility.

## Audio guide on Microsoft Edge Chromium

### Step 1:

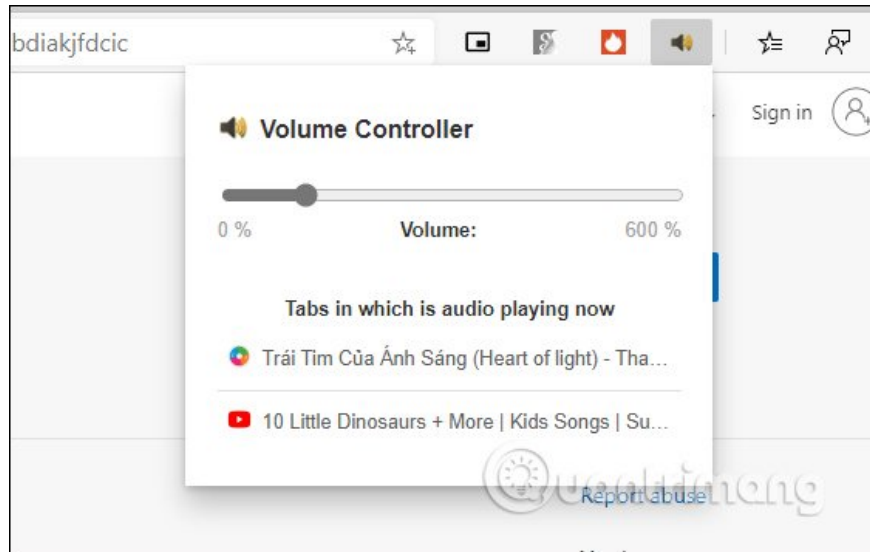

First, install the Volume Controller utility for the Edge Chromium browser by following the link below.

1. Download the Volume Controller utility

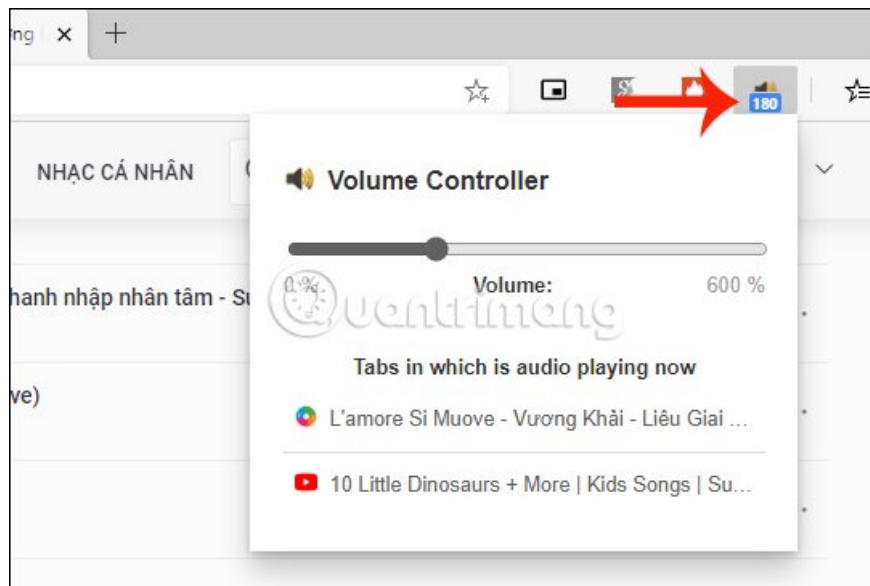

### Step 2:

After installing the utility, you will see **the speaker icon in the address bar** in the browser. When you click on the icon will display the volume adjustment interface and the tab is opening video or playing music.

To increase the volume of music for any music tab we **adjust the volume bar** . At that time, **the volume level is displayed at the widget icon** . If you want to turn off the volume of any tab, you can just drag it to 0% without adjusting the audio tab of the web music player.

**Note that** when the user gradually increases the volume level, attention should be paid to the problem of broken sound and timed sound, so attention should be paid.
