How to increase font sharpness on Windows 10? Instructions to fix blurred text on Windows 10 with the ClearType tool, increase the definition of text on Windows 10...

This article Guides to use ClearType feature on Windows 10 to make Fonts sharper!

If you use Windows or any other operating system on your computer, you must have encountered a case of blurry text and images, which is very annoying, right?

Each operating system has a different fix, and on Windows 10 operating system, we can fix this situation with the ClearType tool provided by Microsoft.

Yes, and in this article, I will show you in detail the steps to fix the blur error on Windows 10 in the most effective way, if you don't know, please read through!

## #first. What is ClearType?

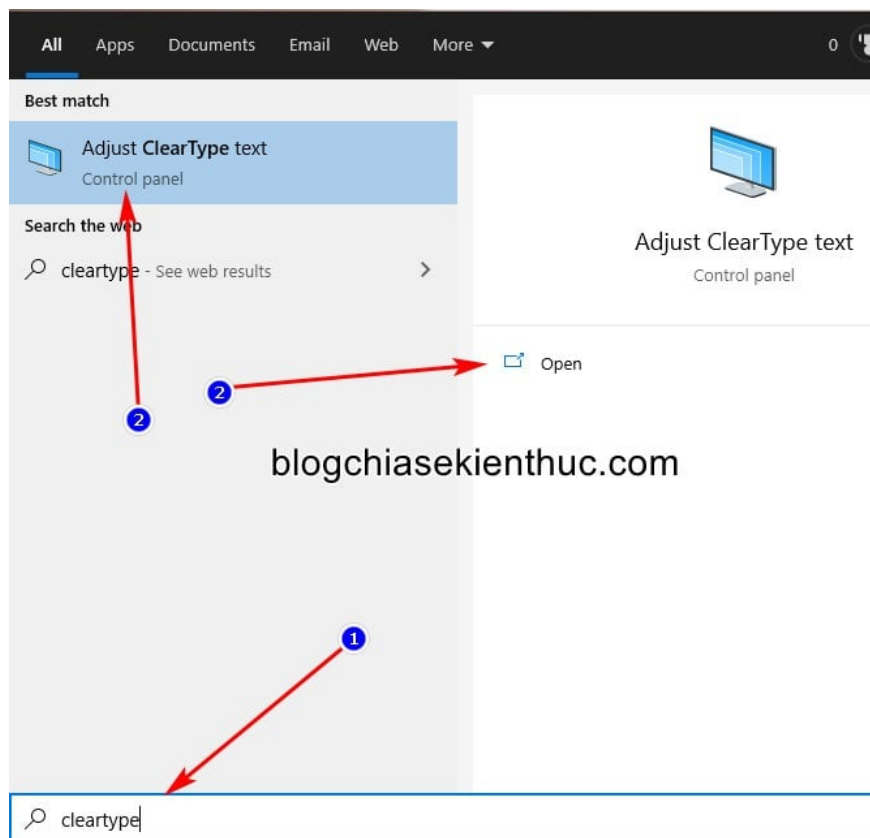

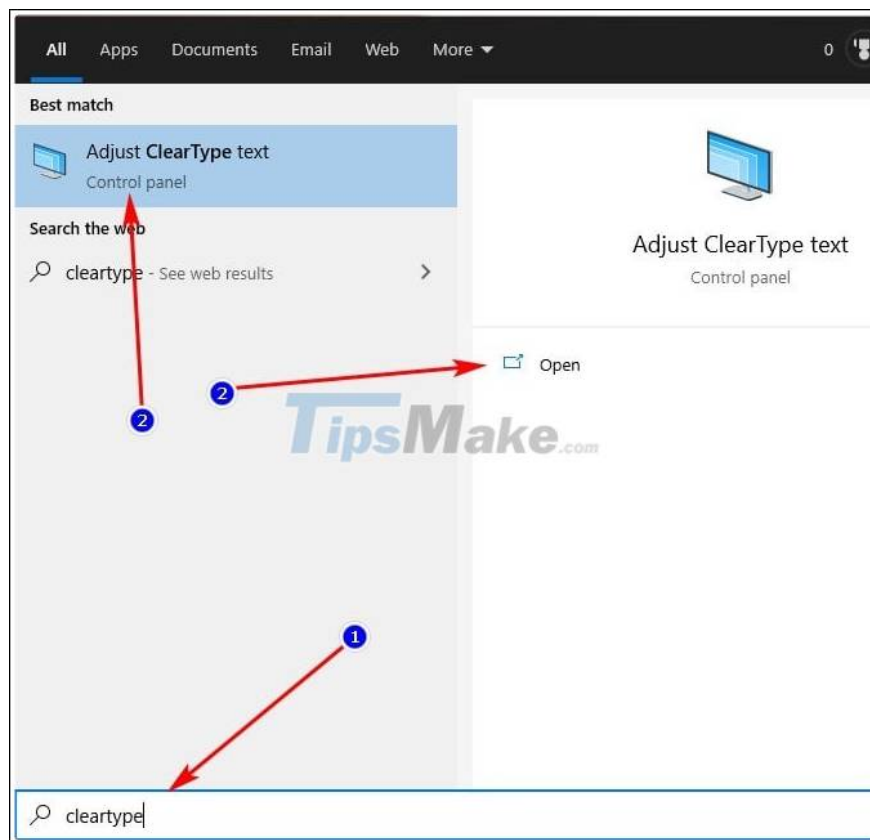

Before going into the setup, let's go learn a bit about ClearType's features. ClearType is a font smoothing technology that has appeared for a long time on the Windows operating system, it was first introduced by Microsoft on Windows XP.

ClearType's main purpose is to smooth the font on the screen with Sub-pixel Rendering (it has the ability to increase the clarity when displayed on a liquid crystal display), so it will be easier for users to see. , easier to read and more comfortable to work with – it's as simple as that.

## #2. How to make Fonts sharper on Windows 10

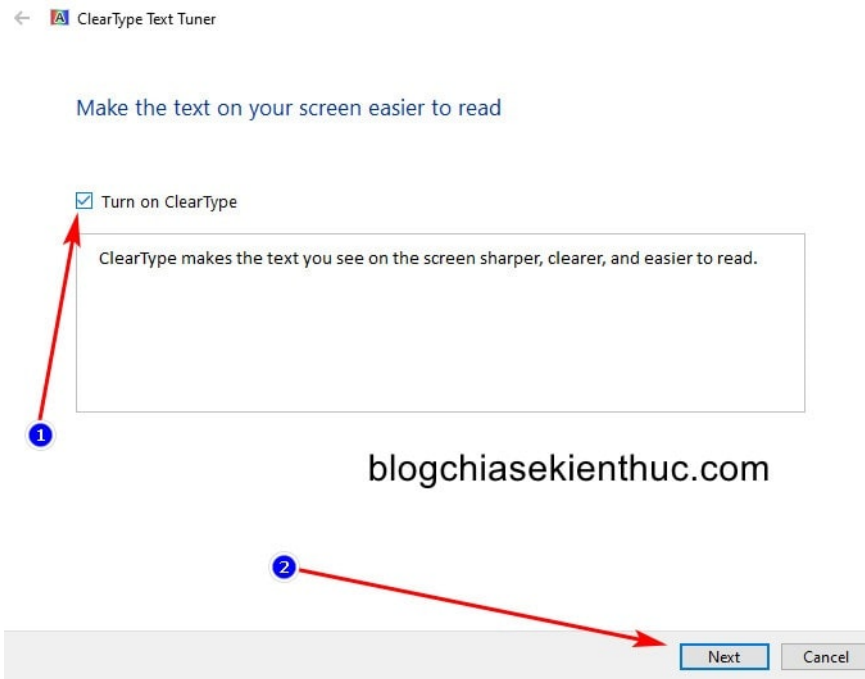

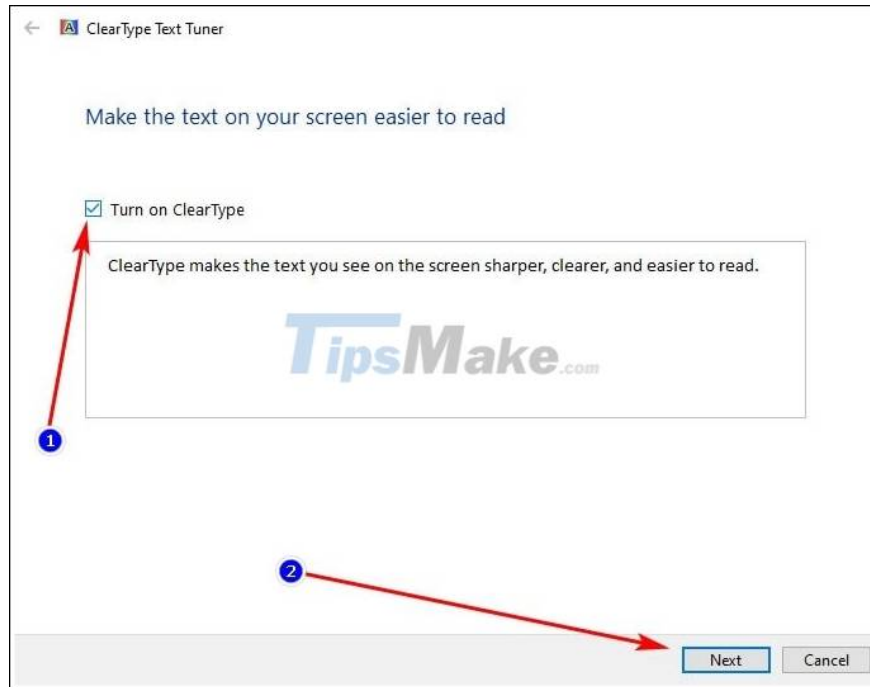

Oke, skip the theory part, now let's go to the setup part, you do the following steps in turn:

+ Step 1: Open Windows Search (Windows + S or Windows + Q is also possible) => and search with the keyword cleartype => Then you open Adjust ClearType text in the list of search results.

+ Step 2: The ClearType Text Tuner window appears, in the Make the text on your screen easier to read section, check the box Turn On ClearType => and click Next to continue.

This process will help you fine-tune the font on Windows so that it looks best.

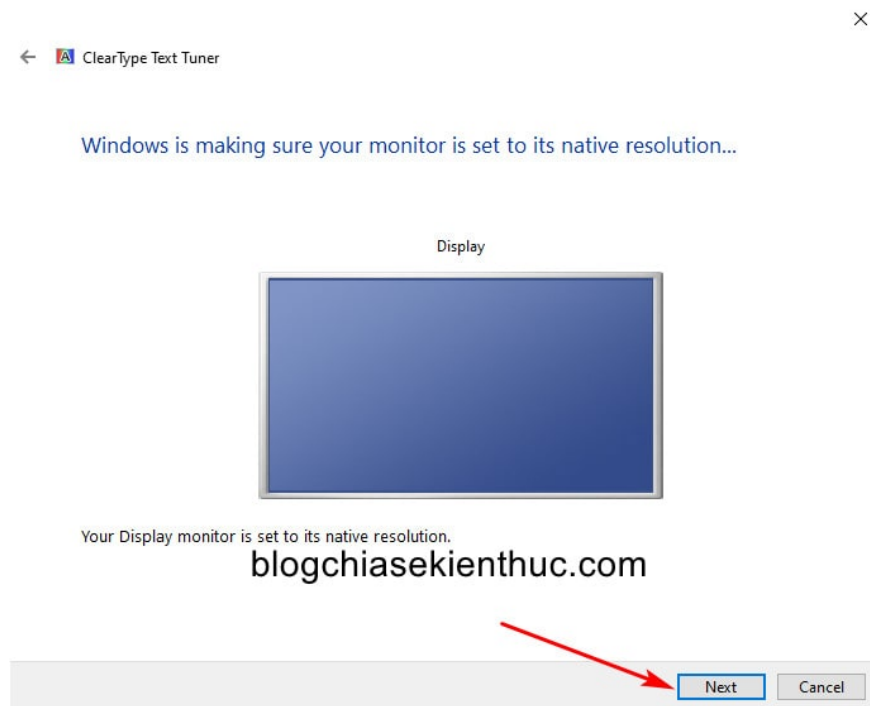

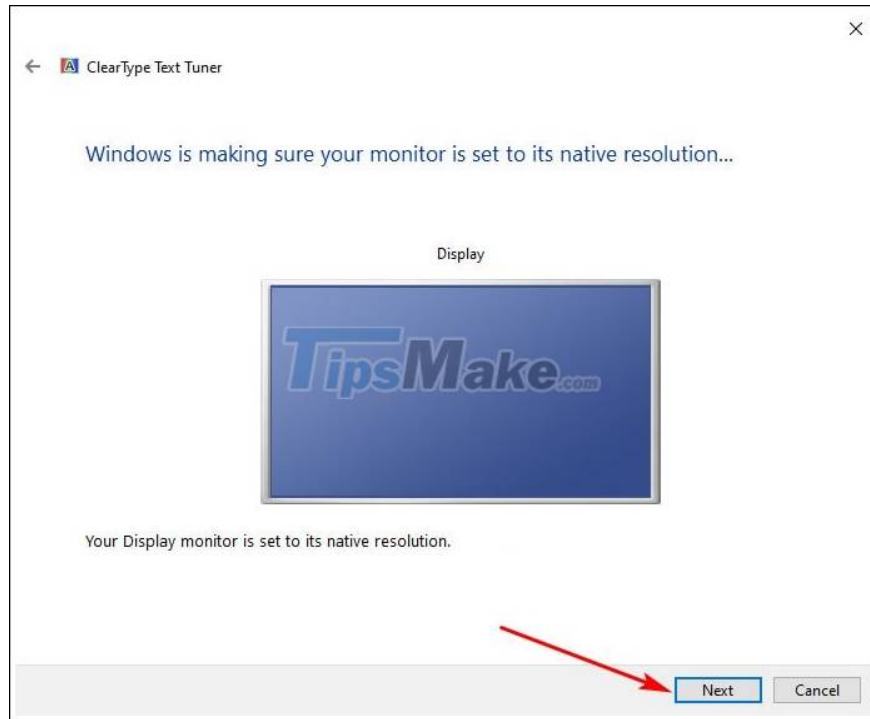

+ Step 3: If your computer is connected to more than 1 display, it will ask you to select the monitor you want to tweak.

If there is only one screen, it will appear as shown in the image below and you do not need to do anything => just click Next to pass.

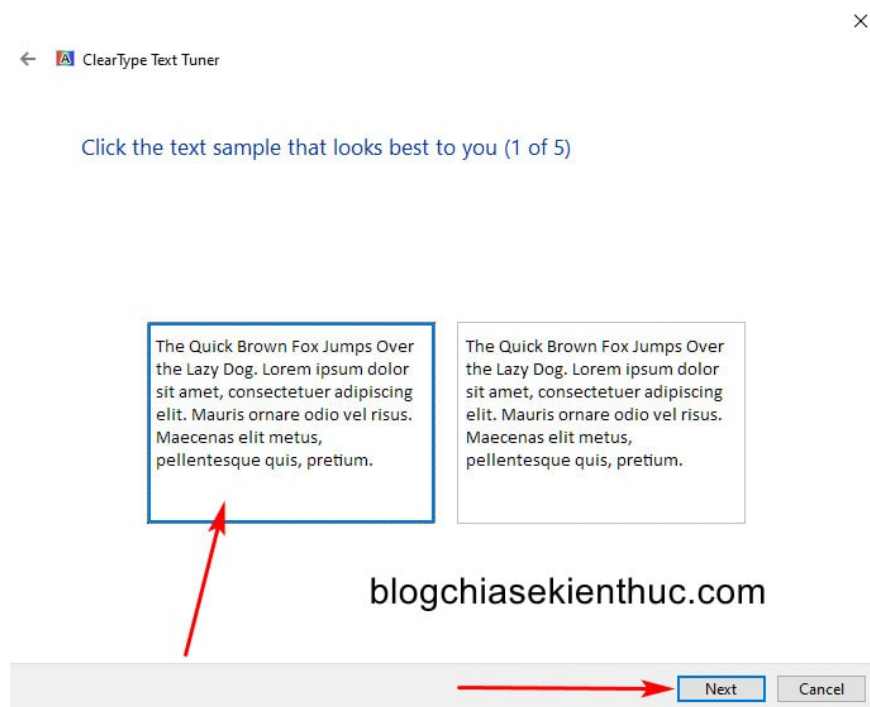

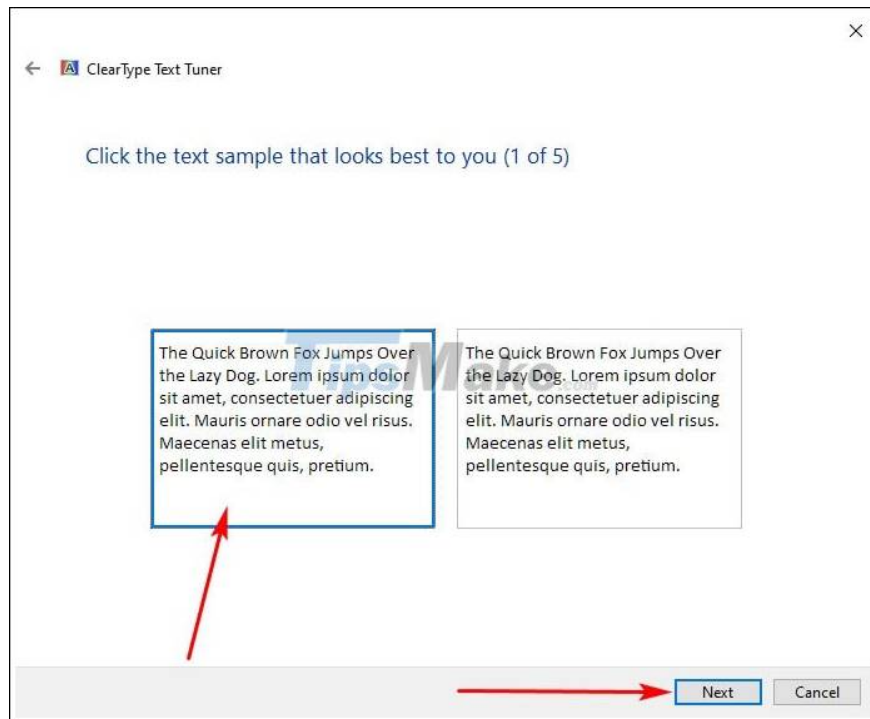

At the same time, it will also notify you whether the current monitor has the correct native resolution of the screen set or not (The text Your Display Monitor... native resolution that you guys).

Note: If not, please see the article on changing the computer screen resolution that the Admin has shared before. Because the resolution is not set properly, the font will be blurred or blurred a lot.

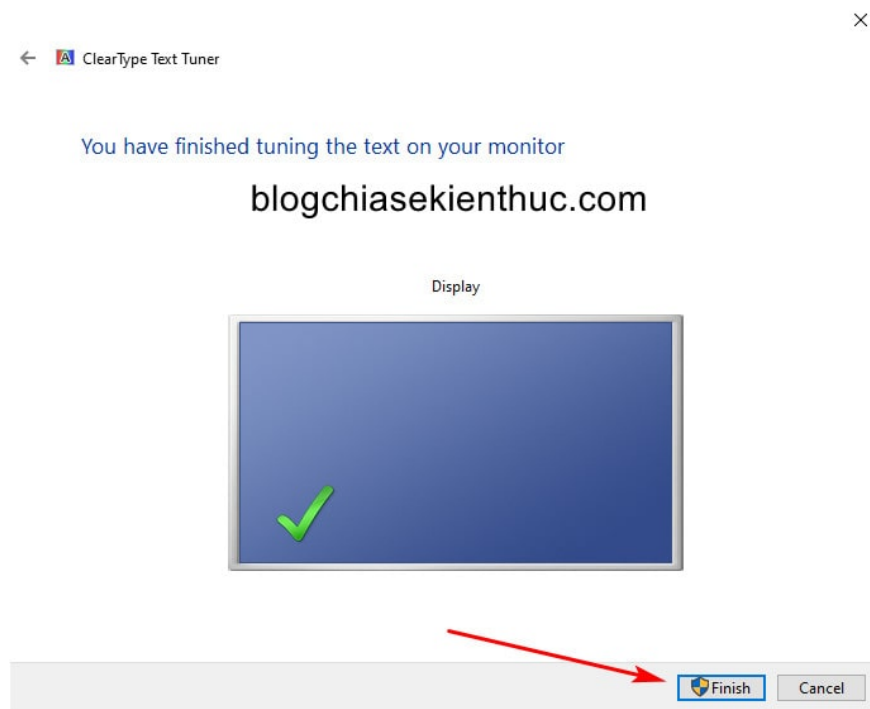

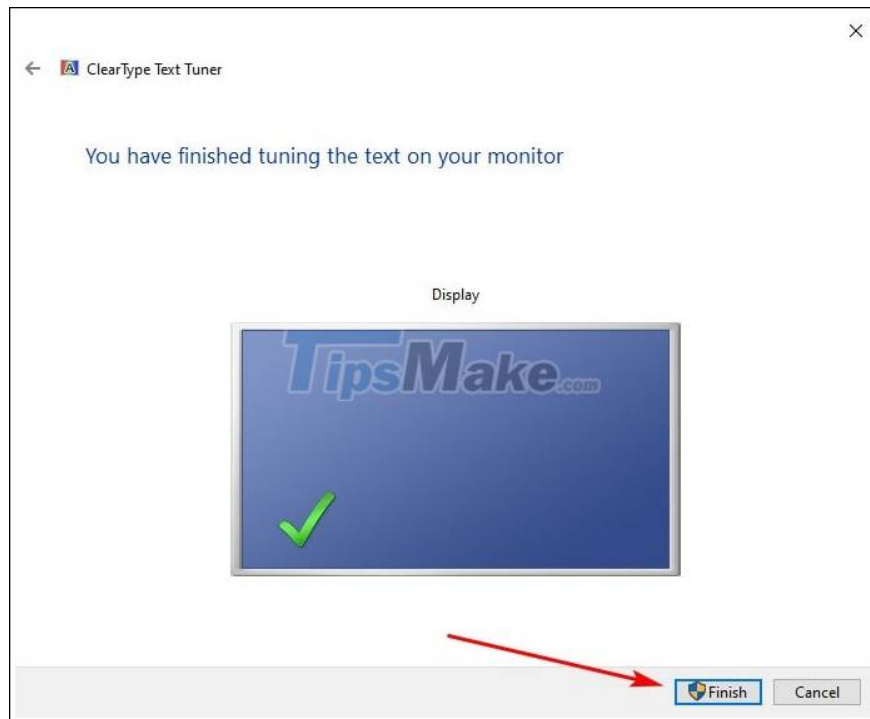

+ Step 4: As soon as you set up the screen, Windows will give you sample documents with different strokes for you to choose from.

You will choose 5 times and Windows will suggest the most suitable setting for you. You just choose the one you find most pleasing to the eye and then click Next.

+ Step 5: After the selection is complete, you will receive a notification that the font has been set on that screen => click Finish to close the window.

If you want to set up with another computer screen, you can repeat the same steps, just remember to change the screen in the screen selection step!

### #3. Use \*.bat file to fix text blur on Windows 10, 8.

Yes, you can use the \*.bat file below to fix errors very effectively. After downloading, you just need to extract it => run \*.bat file => select Yes if asked and done.

Once done, restart your computer and you're done. Download [here](#) or [here](#) !

Yes, so I just shared with you how to increase the sharpness of fonts on Windows 10 with the ClearType feature available on Windows.

And this is also how to fix blurry text when using Windows 10, but if you don't have blurry text, you can still use this tool to reset the font on Windows to suit you, to improve productivity. working, improving the experience of reading stories, newspapers.
