

How to insert a signature into PDF with Foxit Reader - Create a personal touch on PDF documents

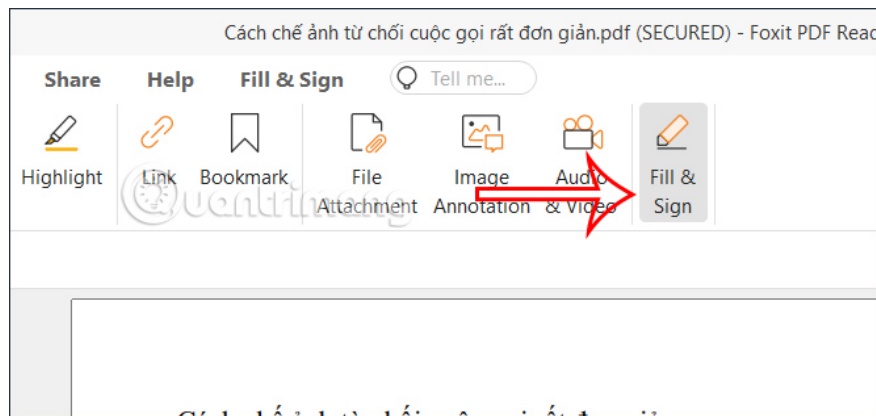

Foxit Reader supports you in editing PDF files. For example, we can insert a signature into a PDF with Foxit Reader, creating a signature right on the software and then inserting it into the PDF document.

Foxit Reader is a professional and quality software for reading PDF files on computers, chosen by many people to use. The article below will guide you to insert a signature into PDF using Foxit Reader.

Instructions for creating a signature in Foxit Reader

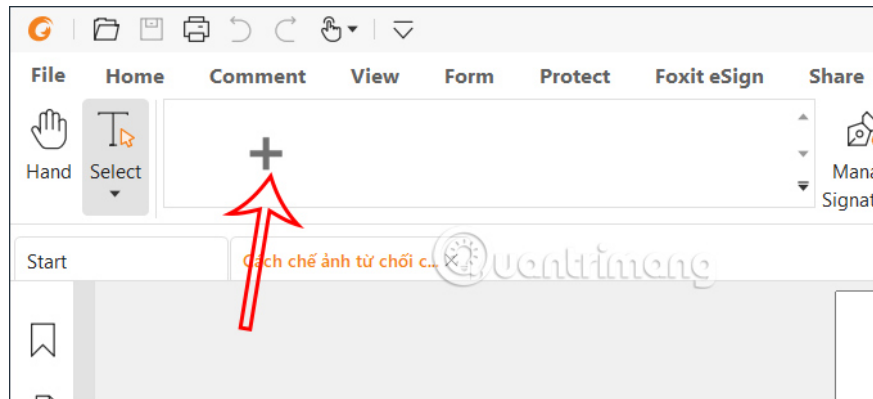

Step 1:

At the Foxit Reader interface, we first open the PDF file we want to use. Next at the software interface, click on the **Fill & Sign** option .

Step 2:

Now display the toolbar for you to adjust the signature, create a signature on Foxit Reader for later use. We will click on **the plus icon** to add a signature.

Step 3:

Displays the interface for you to add a signature to Foxit Reader software. Here you will see many **signature options to add to Foxit Reader** .

For example, **select the Type signature type** as shown, enter the signature content and then Foxit Reader converts it to a handwritten signature as below. You can **click Change Style to change the signature font again** .

Whichever font style you use, click on that font style to save.

Step 4:

In addition, you can also **draw your own signature on the Foxit Reader interface** .

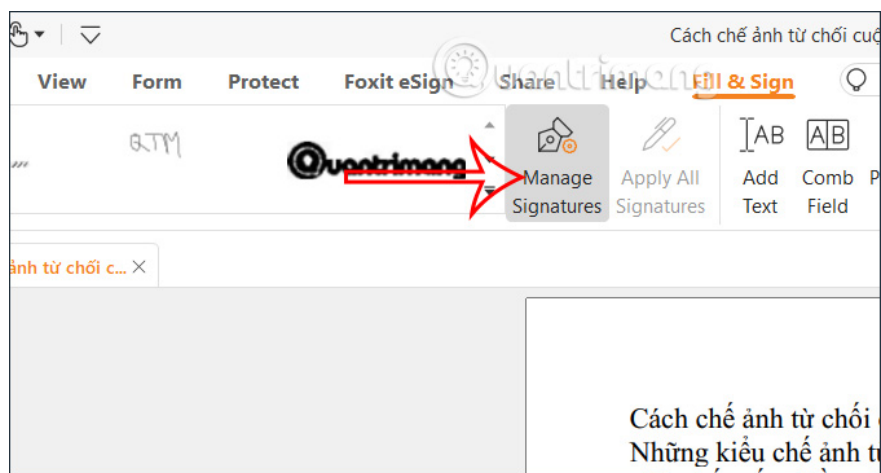

In particular, you can **capture the signature displayed on the computer using Foxit Reader** to import into this interface. For each signature created on Foxit Reader, you will click OK to save the signatures we have added.

Step 5:

To manage signatures in Foxit Reader , click **Manage Signatures** .

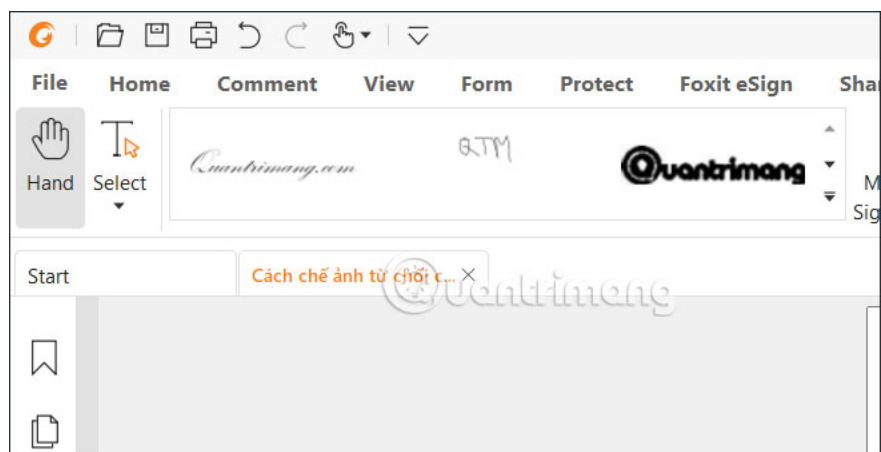

Here you will see **a list of signatures created on Foxit Reader**, with options to adjust the order, change the signature or delete the signature if you no longer want to use it.

Instructions for inserting a signature into PDF on Foxit Reader

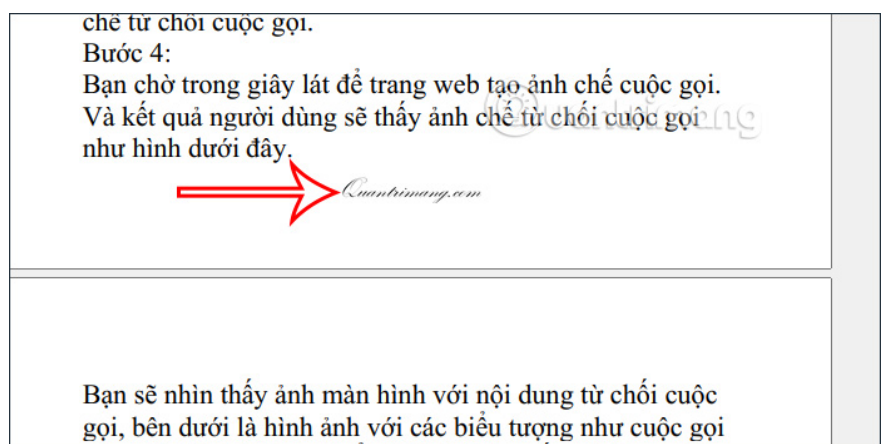

Step 1:

First of all, we also click on Fill & Sign to enter the interface of the list of signatures you have created. Here in the signature frame, find the signature you want to add to the PDF file.

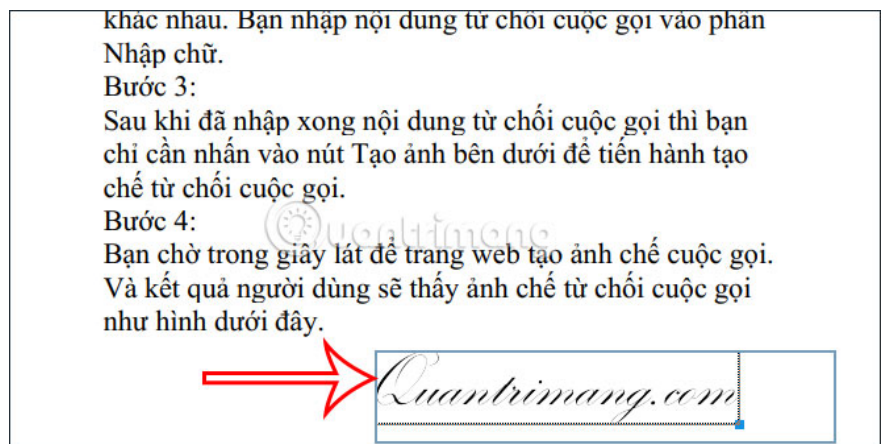

Step 2:

Click on the signature to insert and then move to the location where you want to insert the signature in the PDF file.

Step 3:

When inserting a signature into a PDF, you can adjust its size, enlarge or reduce it as you like and then move it to another location. So you successfully inserted the signature into the PDF file.
