

# How to insert animation into PowerPoint

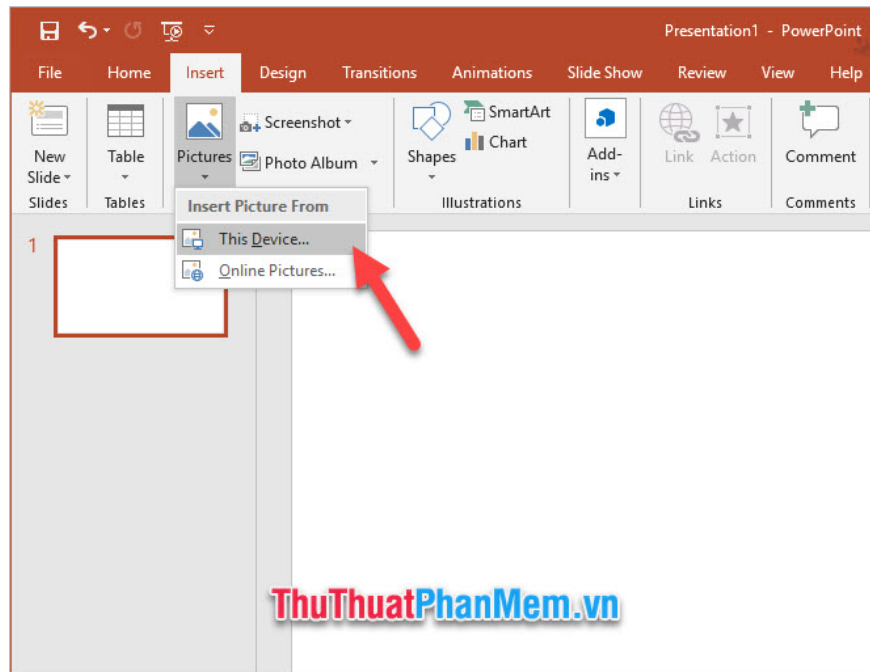

Animation is one of the best decoration for your presentation slides. To be able to insert animations into PowerPoint slides, you can follow the instructions of TipsMake.com.

To be able to insert animations into PowerPoint, you need to open the **Insert** ribbon in the toolbar.

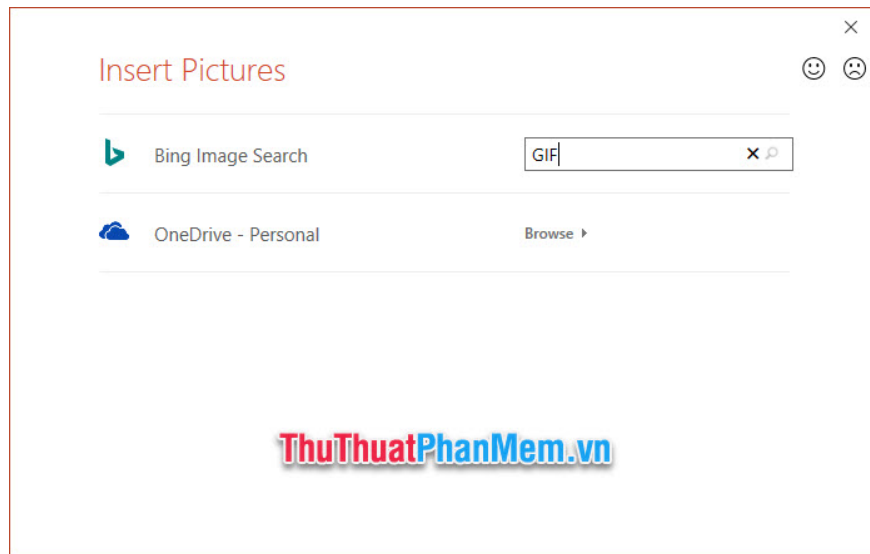

Next, you click on the **Picture** icon in the **Pictures** group . In this you have two options:

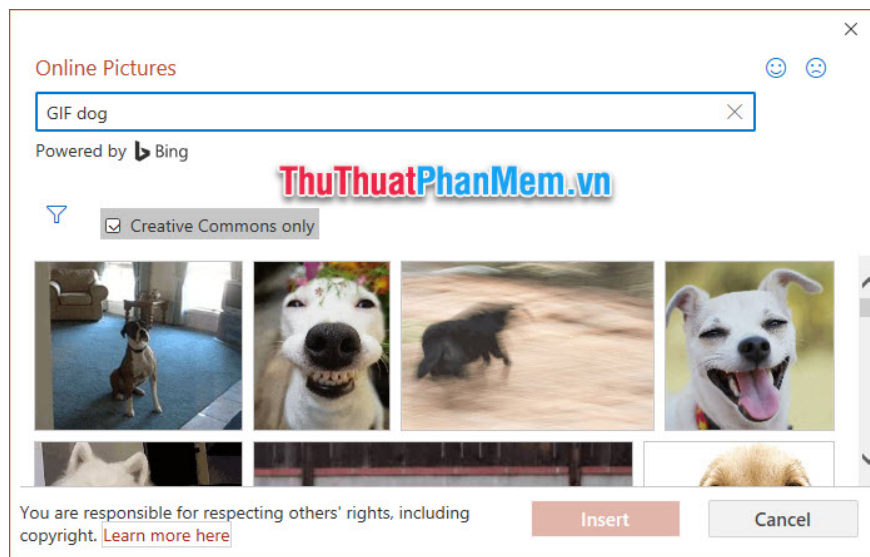

- **This Device** : So you can insert animations in your own computer.
- **Online Pictures** : So you can insert online search images that PowerPoint provides.

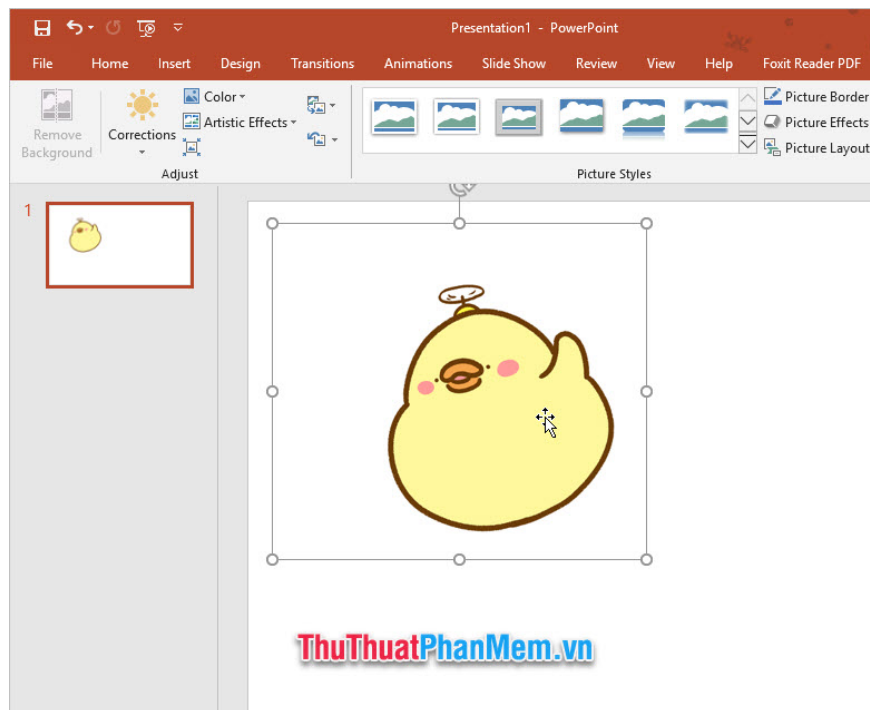

With online image insertion, you need to search for them with the keyword **GIF** .

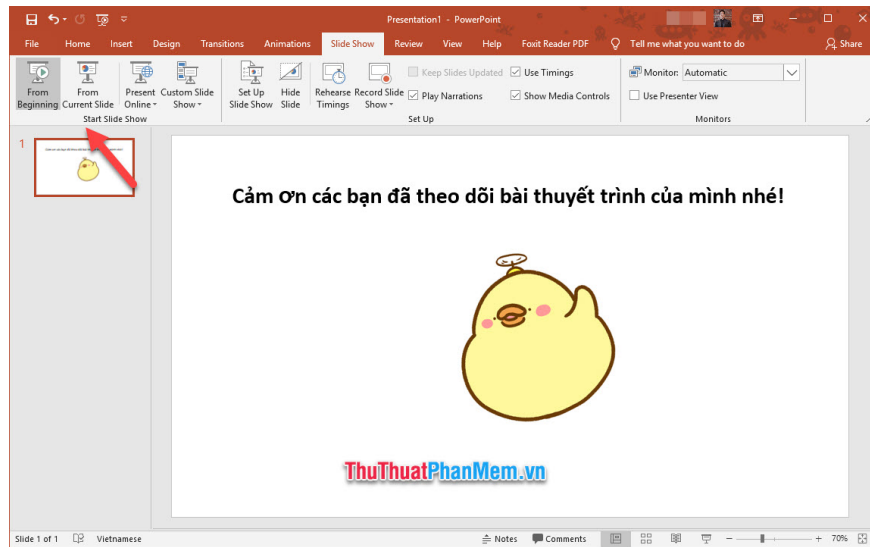

Only when searching with the keyword GIF, you can filter the animation results to choose to insert into your slides.

After inserting the animation into the Slide, you can click on it to move it to the appropriate position on your slide.

After inserting, you can open the **Slide Show** ribbon on the toolbar and click **From Beginning** or **From Current Slide** in the **Start Slide Show** group to be able to review the display of animations when presenting.
