Guide to insert Google Drawing on Google Docs

Step 1:

After completing the drawing on Google Drawing, users click on **the File section** and select **Publish on the web**

.

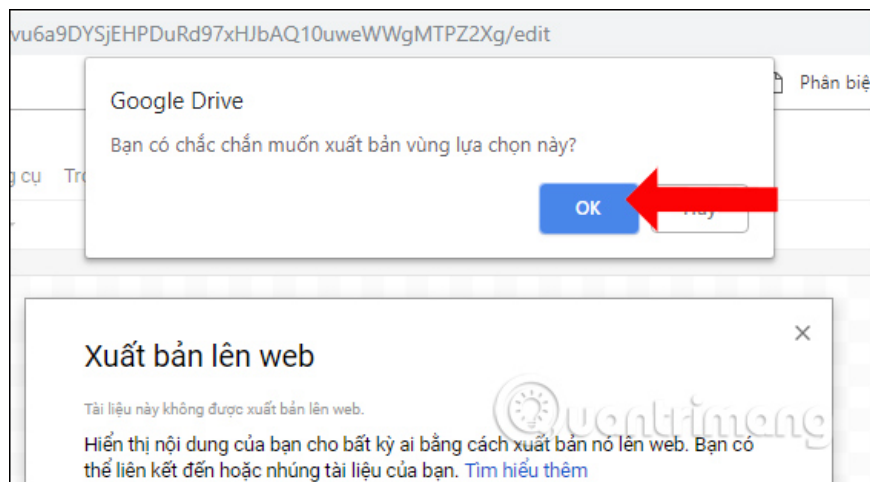

Step 2:

Display the new interface and click **the Publish button** to get the link for drawing on Google Drawing.

When asked if you want to be sure to export the drawing, click OK to agree.

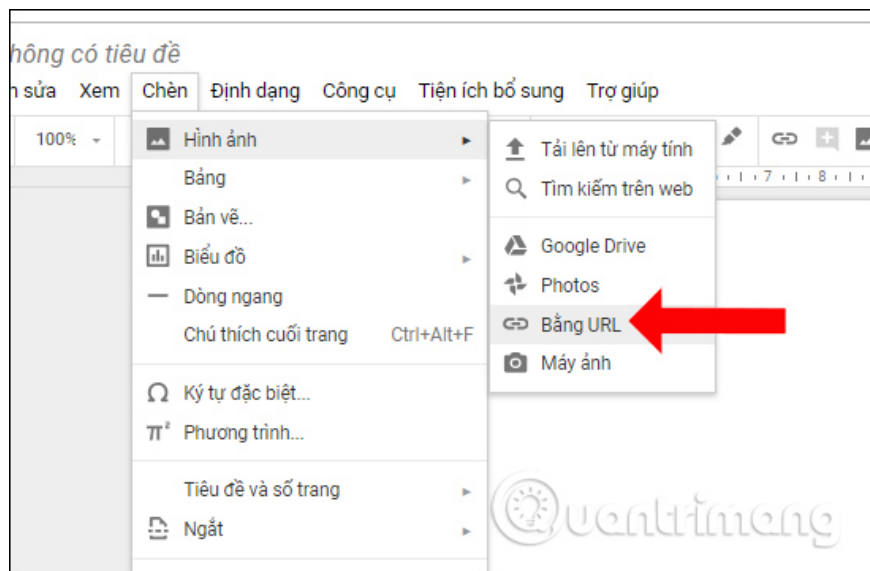

Users will immediately see **the drawing link** used to insert other editing tools through the drawing URL. Press **Ctrl + C** to copy this link.

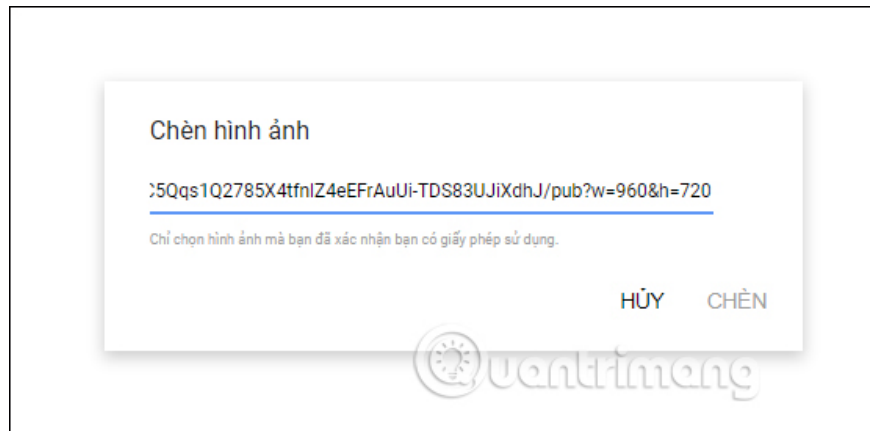

Step 3:

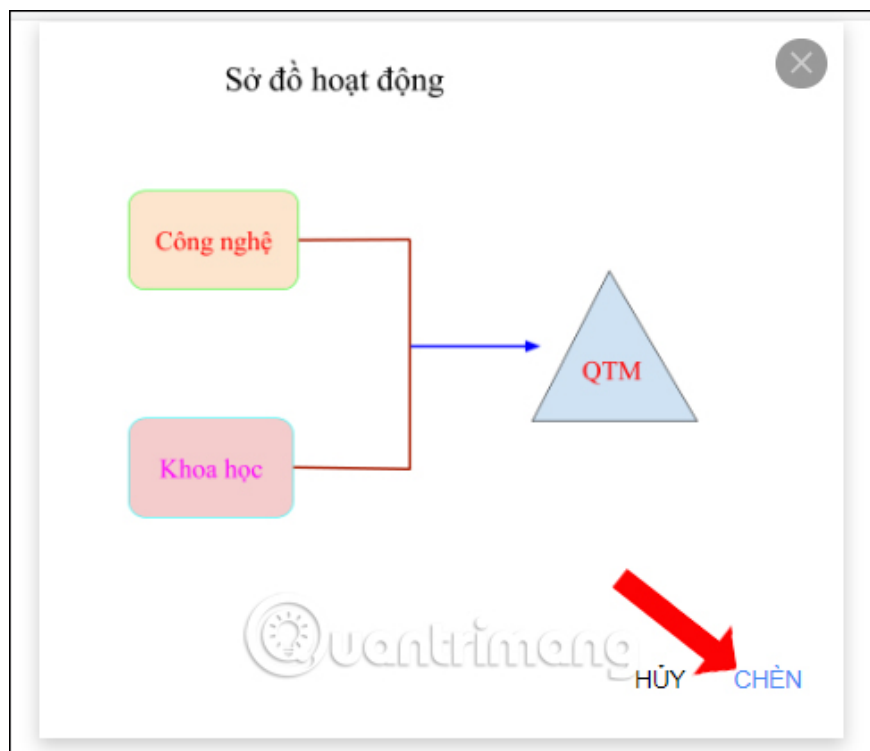

Now open Google Docs and click on **Insert** , choose Next to **Image** and choose the type of Insert **By URL** .

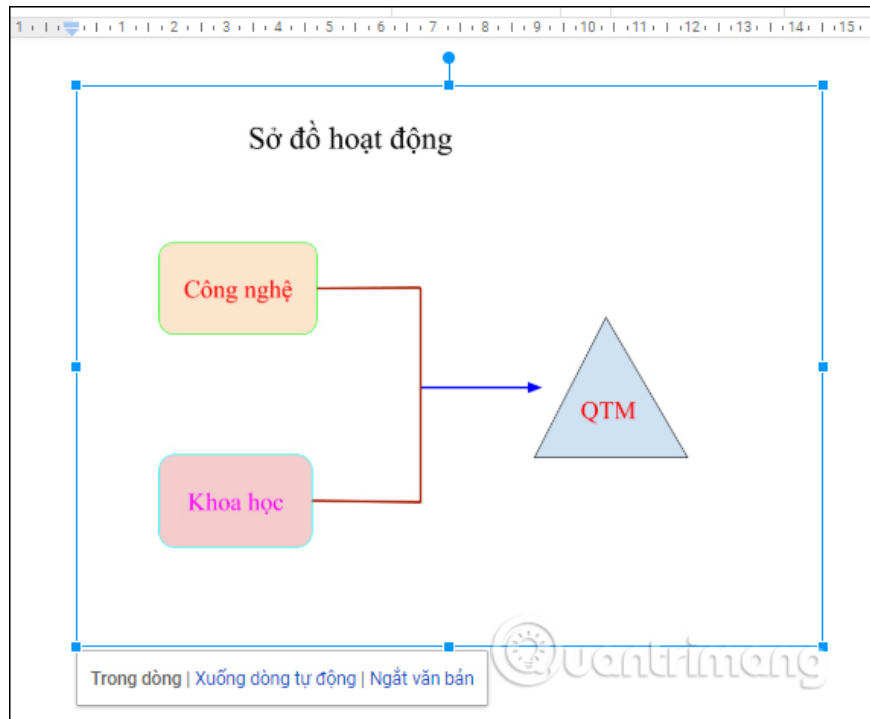

Display the frame to enter the newly copied drawing URL on Google Drawing into this interface.

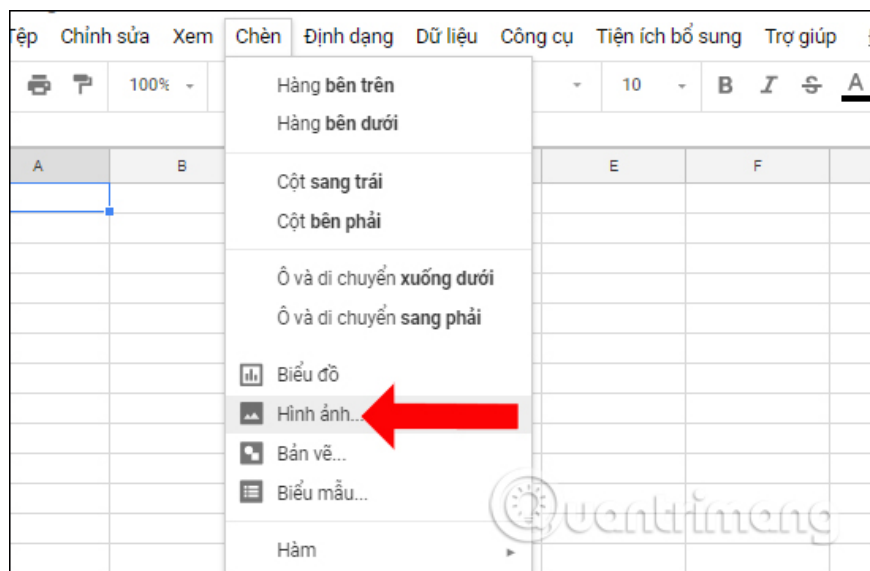

The drawing preview interface is displayed as shown below, click **the Insert button** to insert the drawing into Google Docs.

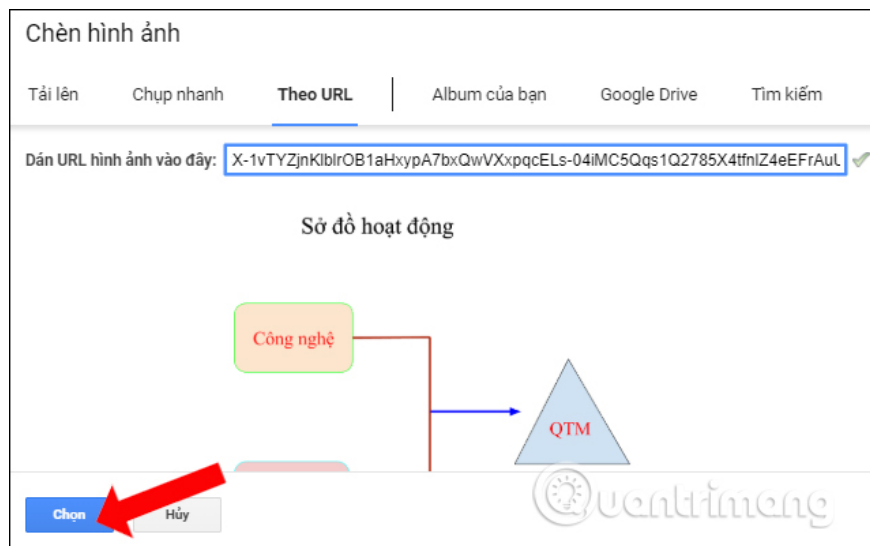

The drawing will display in Google Docs content as shown below. We can enlarge or shrink the size of the drawing, as it is inserted as an image. If you want to edit the drawing, you must edit it again in Google Drawing, then proceed to re-insert the URL from the beginning.

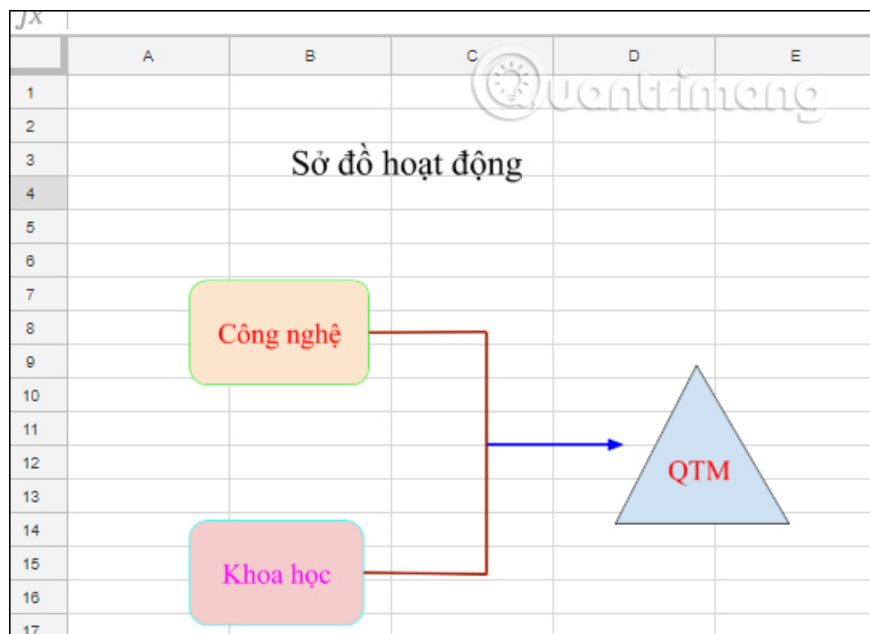

To insert Google Drawing drawings on Google Sheets , users click on **Insert** then select Next to **the Picture** section .

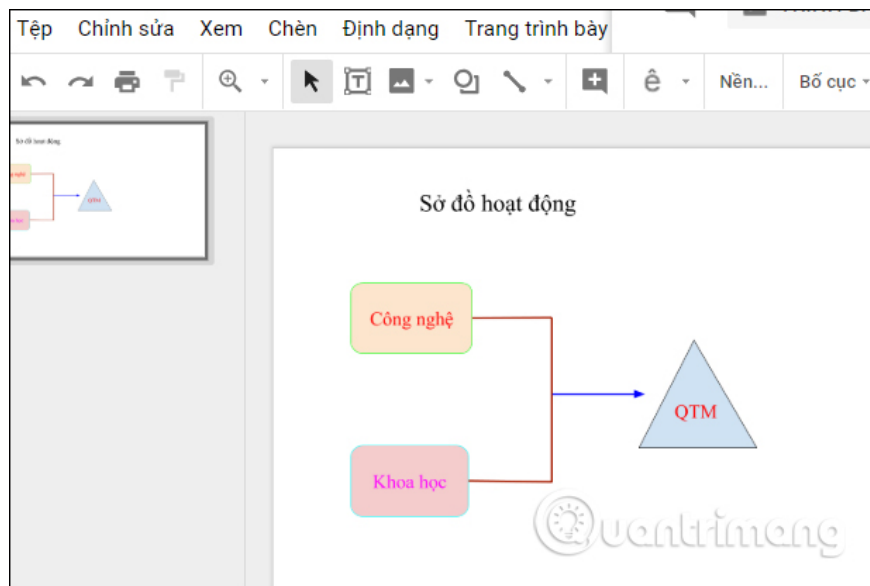

In the new interface, click on the **item Under URL** and paste the link for Google Drawing drawing. Click **the Select button** below to add.

Picture drawings displayed on Google Sheets as below.

Inserting Google Drawing drawings on Google Slides also works similarly on Google Docs and produces the following results.

Through the Google Drawing drawing URL, we can insert drawings on different drafting tools. The drawing will be inserted as an image so we can change the insert position, the size of the drawing depending on the layout and requirements when editing the content.
