You want to post a video on the Internet and want to insert your Logo to stamp copyright to prevent others from copying the video. So today, *TipsMake.com* please show you *how to insert a Logo into Video with Camtasia Studio software* . Stay tuned!

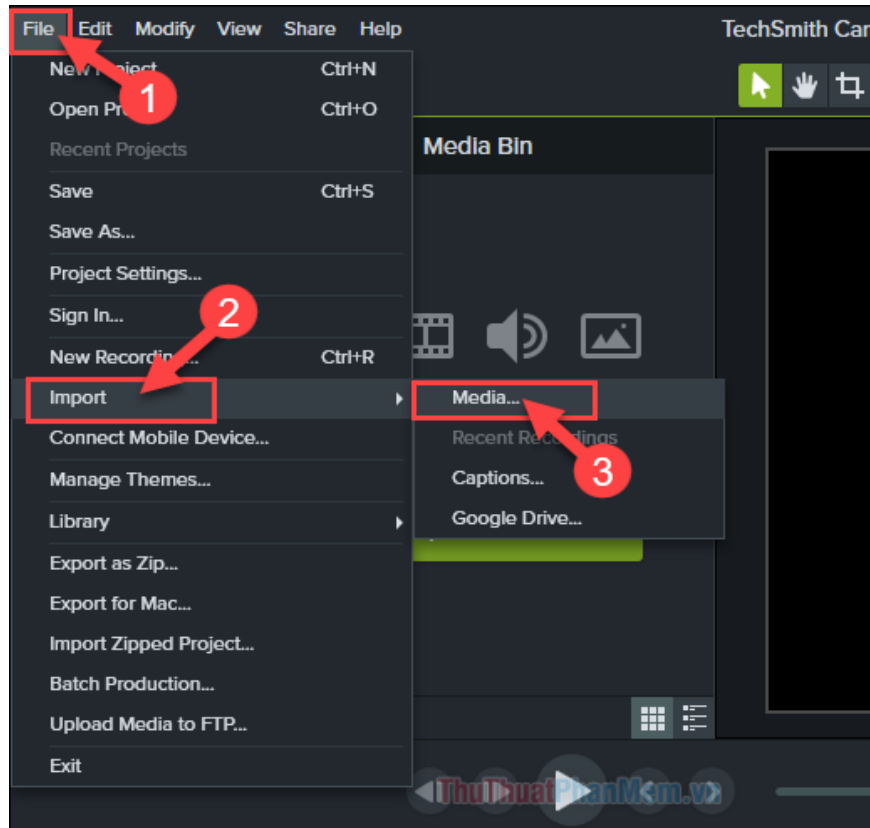

If you have not installed Camtasia software, you can download it from the software's homepage: <https://www.techsmith.com/video-editor.html>

Step 1 : After installing the software, open Camtasia Studio software. The interface of the software:

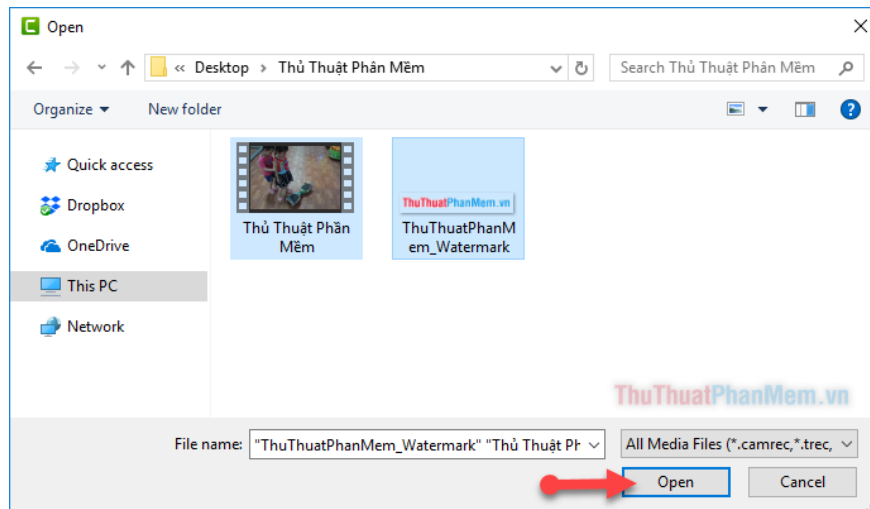

Step 2: In order to proceed with transplanting the logo into the video, the first thing that we will add in the software. You perform the steps in turn:

- (1) On the toolbar, select **File** .
- (2) Select **Import** .
- (3) Select **Media**.

Then *select the Logo and Video* you have prepared to pair. Then select *Open* .

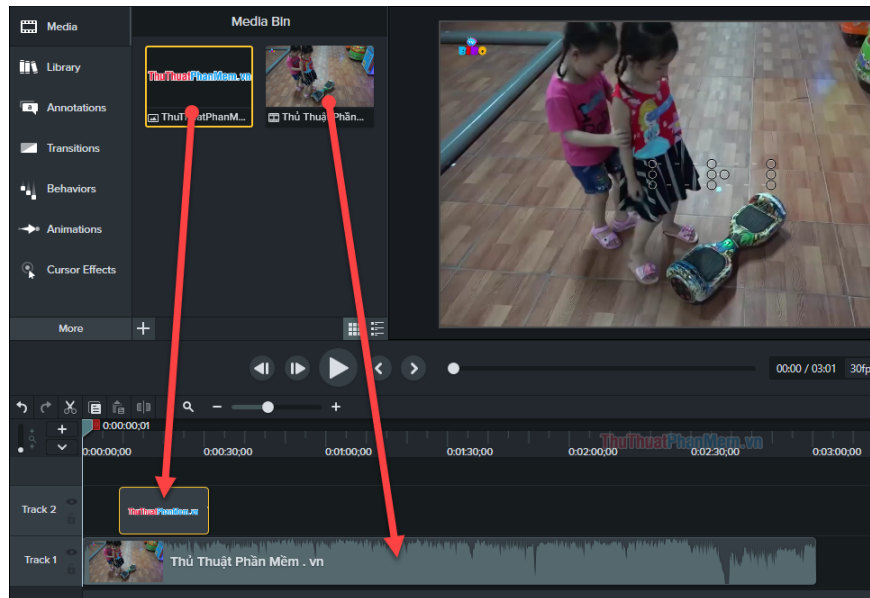

Step 3 : Now the Video and Logo you choose will be displayed opening *Media Bin* .

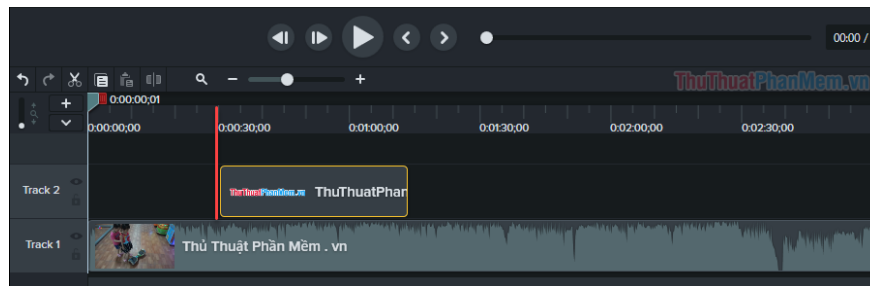

Step 4 : Here, you perform the left mouse click on the video file and drag it into the Track 1 tray.

- You also do the same with the Logo file, but drag the Logo file onto the Track 2 tray.

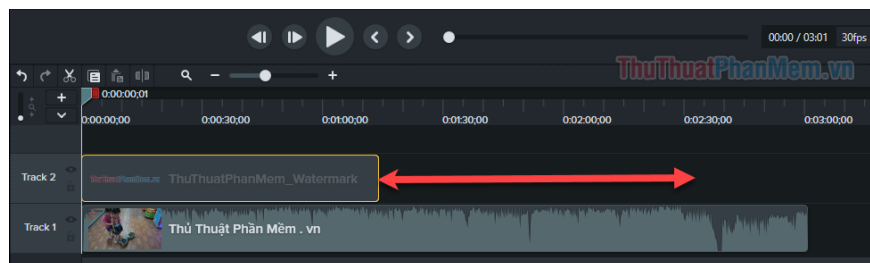

Step 5 : After dragging the Logo file and the Video file successfully, you can make customizations to the Logo file, such as:

- **Customize Logo appearance time:** You drag the Logo item equivalent to the time you want it to appear. For example, I want the Logo to appear in the 30s of the video.

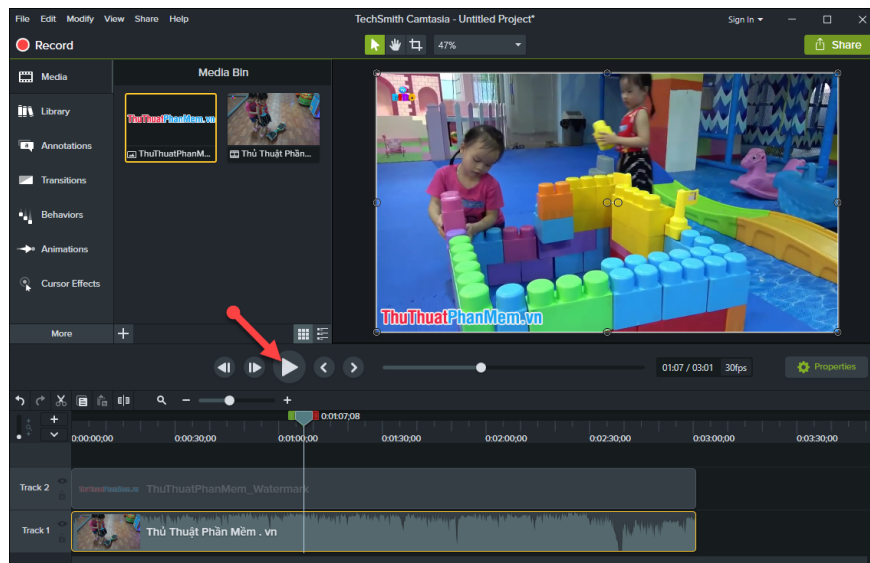

- **Customize the lifetime of the Logo:**

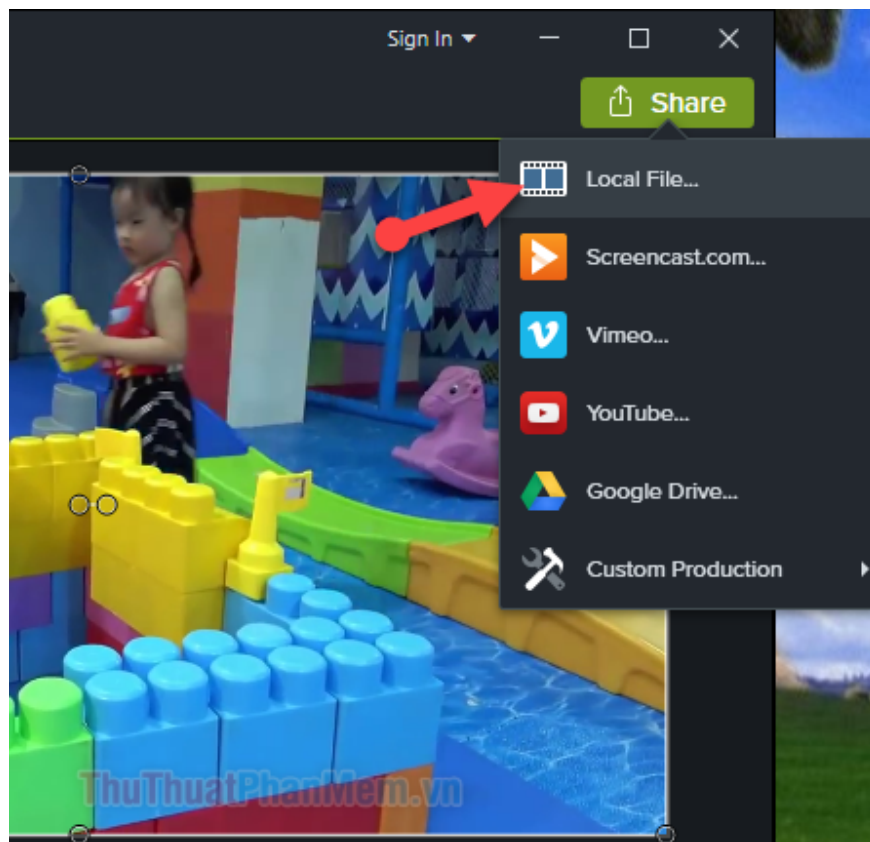

- **Customize the size and position of the Logo in the video:**

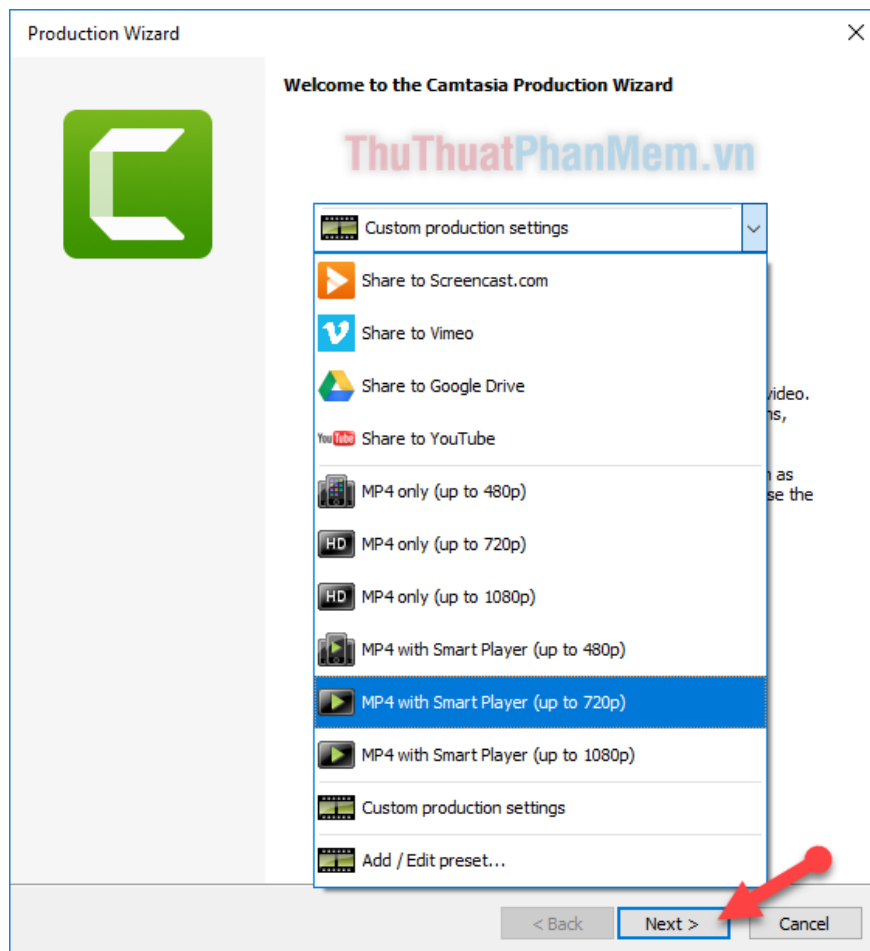

Step 6 : You can then select *Play* to check if the video after inserting the Logo is reasonable and true to your wishes.

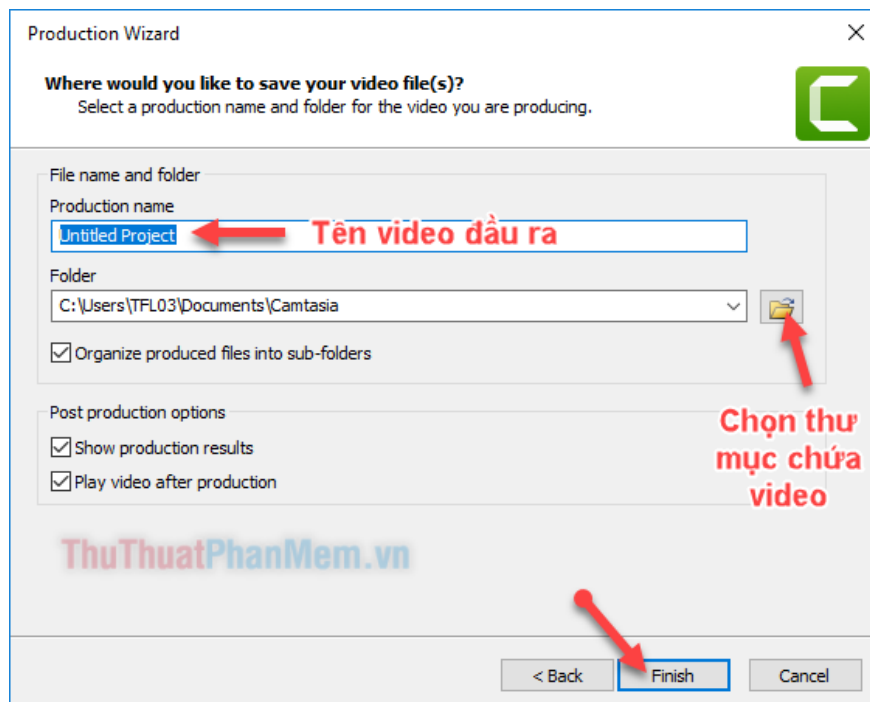

Step 7 : After you finish, you can share the video directly on *YouTube* or *Google Drive* or save it as a video file on your computer. By clicking the *Share* button? Select *Local File* (to save the video on your computer)

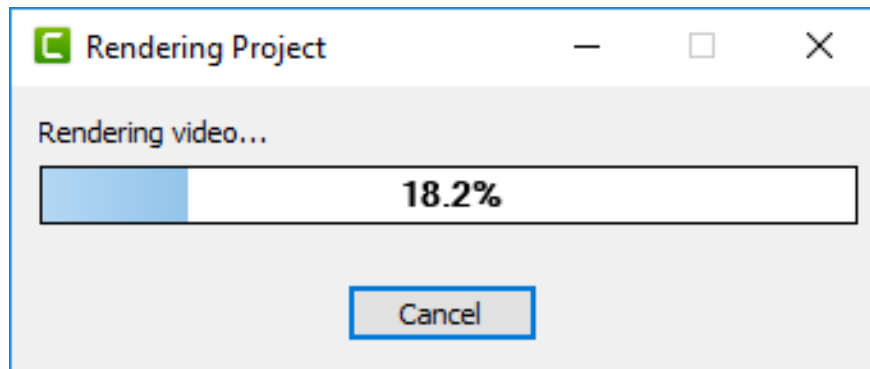

Step 8 : Select the quality of the output video. Then select Next

Step 9 : *Edit the video name* as well as *select the folder containing the video* . Then click *Finish* .

Video export will take place. How fast or slow it depends depends on the length of your original video as well as the quality of the output video you choose
