

How to insert multiple effects for a PowerPoint object

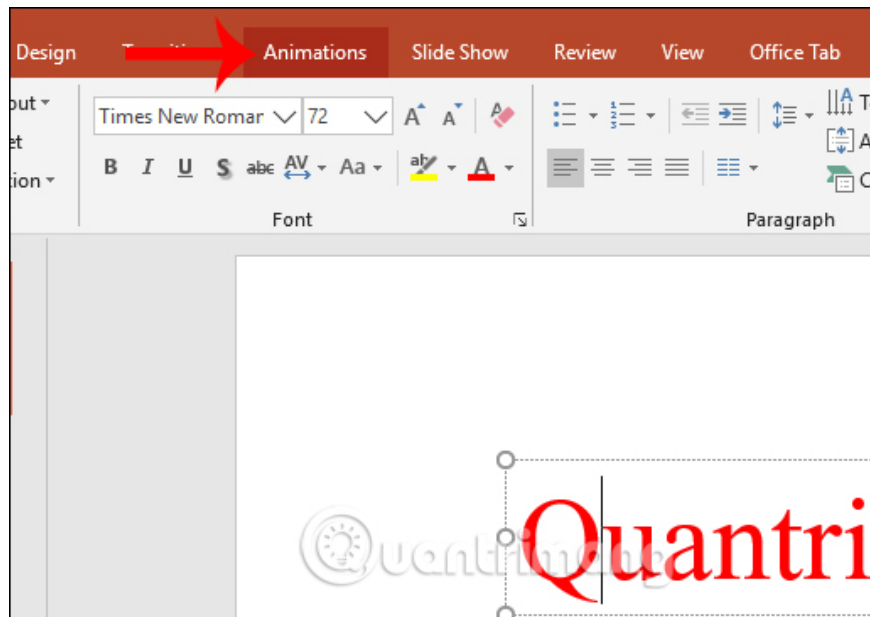

An object in PowerPoint can insert many different effects to combine to increase the vibrancy.

The effects in PowerPoint for inserting objects from images, writing are always essential and important when presenting slides, increasing the professionalism and artistry of slides. An object in the slide can insert a combination of 2 different effects to create more highlights for the object. For example, can combine effects appear and display text effects in slides. And when combined, you also need to pay attention to the time display each effect. The following article will guide you how to combine multiple effects in one object in PowerPoint

How to insert multiple effects for PowerPoint objects

Step 1:

Firstly, we click on the object that we want to insert many effects. Then click on **Animations** on the toolbar.

Step 2:

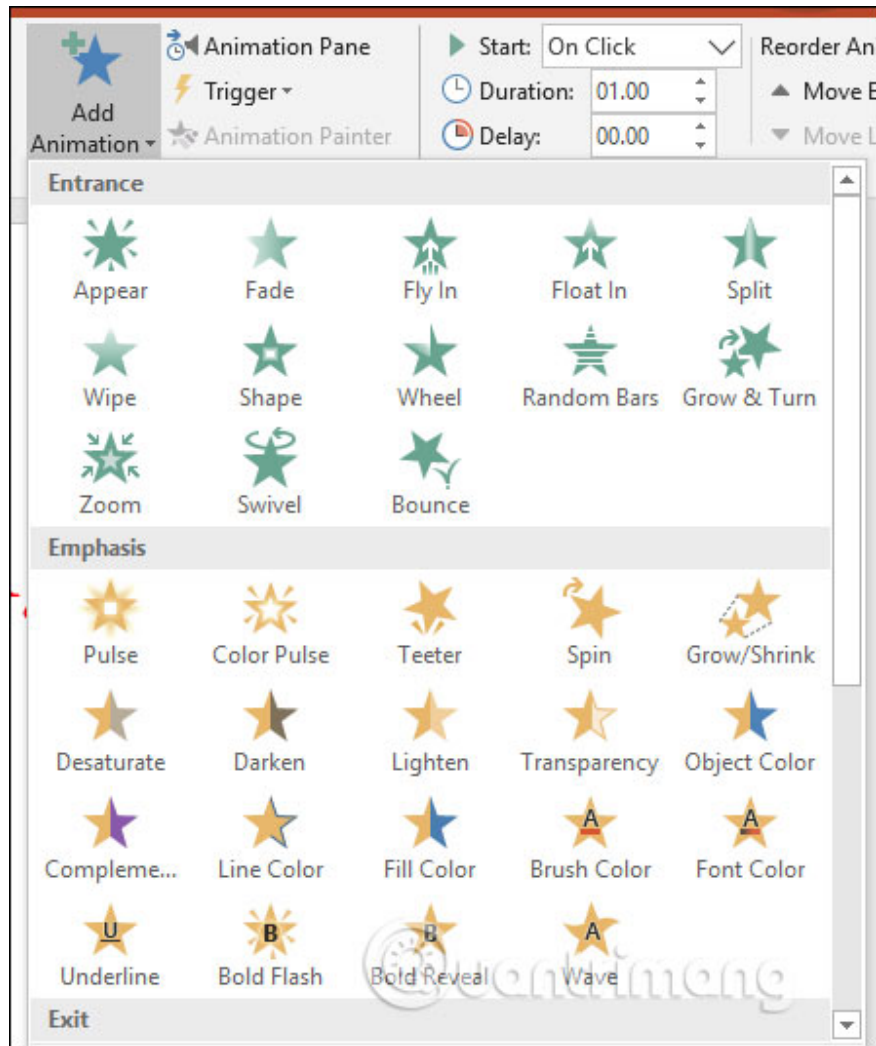

Display effects panel for users to choose. At the Entrance group, you will select the effect when the object appears, Emphasis is the effect to increase the attention of the object, Exit is the effect for the object to disappear.

First of all, the user chooses the effect in **the Entrance group** .

Step 3:

When you have selected the first effect, click Next to **Add Animation** . This time also displays a **list of other effects to choose from**. Can choose to add 2 other effects if desired.

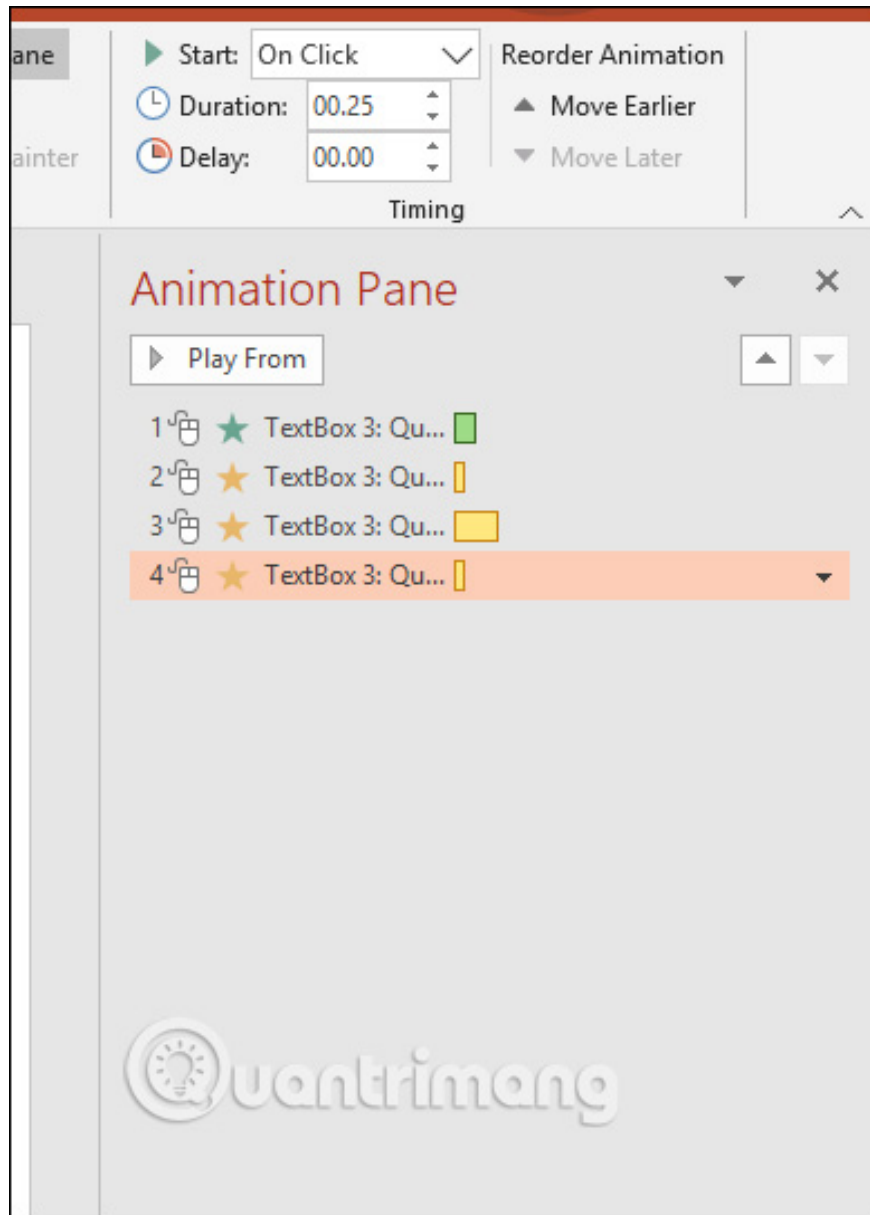

Step 4:

Next, click on **Animation Pane** . This will display the **Timing section** so you can **adjust the amount of time** the effects are used.

1. Start: The beginning of the effect, including On Click (starts with the click of the mouse), With Previous (starts at the same time with the instant effect), After Previous (starts right after the end of the instant effect) .
2. Duration: Time to display an effect.
3. Delay: Delay from the start until the effect starts.

Below **the Animation Pane pane** is a list of used effects. We can adjust the order in which the effects appear and how the mouse moves up and down. Each effect can adjust different display time.
