

How to insert video and audio into Google Slides

There are many sources that take videos and audio to insert into presentation slides in Google Slides.

Inserting images, video or audio into external document files meets the requirements of the content but also creates accents, increasing the artistry of the document. Most Microsoft office tools have the option to insert media files into the content. With Google's online editor, we have more options to get media files to insert into content in Google Slides, for example.

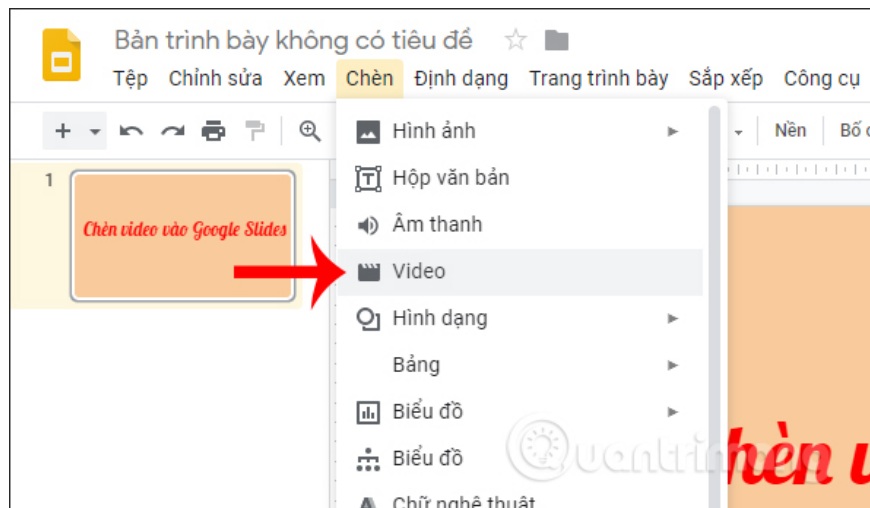

Accordingly, you can insert YouTube videos into Google Slides or videos uploaded to Google Drive by sharing a Google account or videos from third-party applications. The video inserted into the slide will play continuously until the user moves to the next slide. Inserting audio into slides is similar to inserting videos into Google Slides. The following article will guide you how to insert videos into Google Slides.

1. How to insert videos into PowerPoint 2016
2. How to insert audio and video into Excel
3. Instructions to insert Youtube videos into PowerPoint
4. How to insert Google Drawing into Google Docs

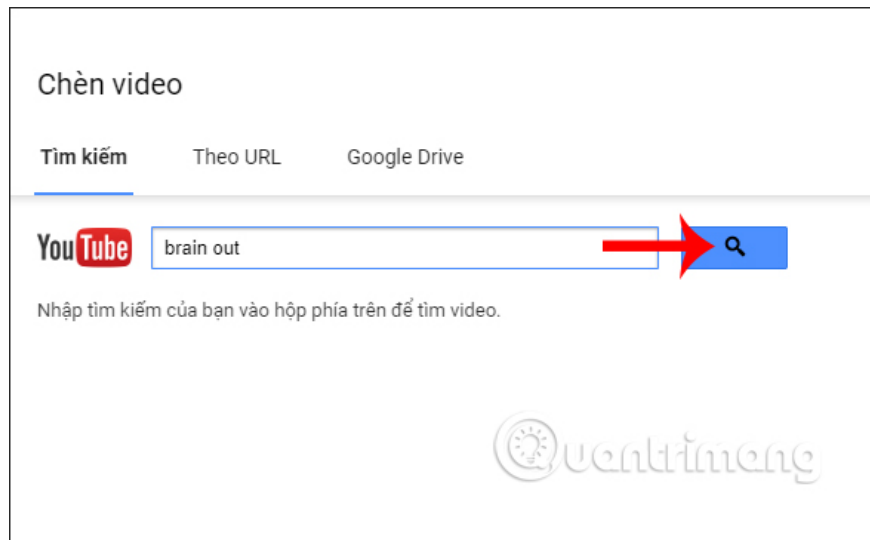

1. Instructions to insert videos into Google Slides

1.1 Insert YouTube videos into Google Slides

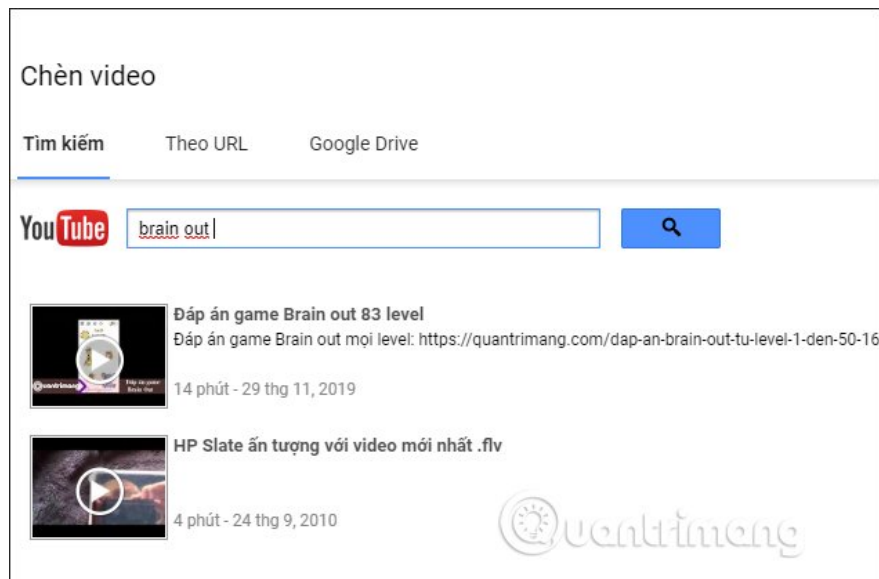

We click on **the Insert** in the toolbar above and then **select Video** in the displayed list.

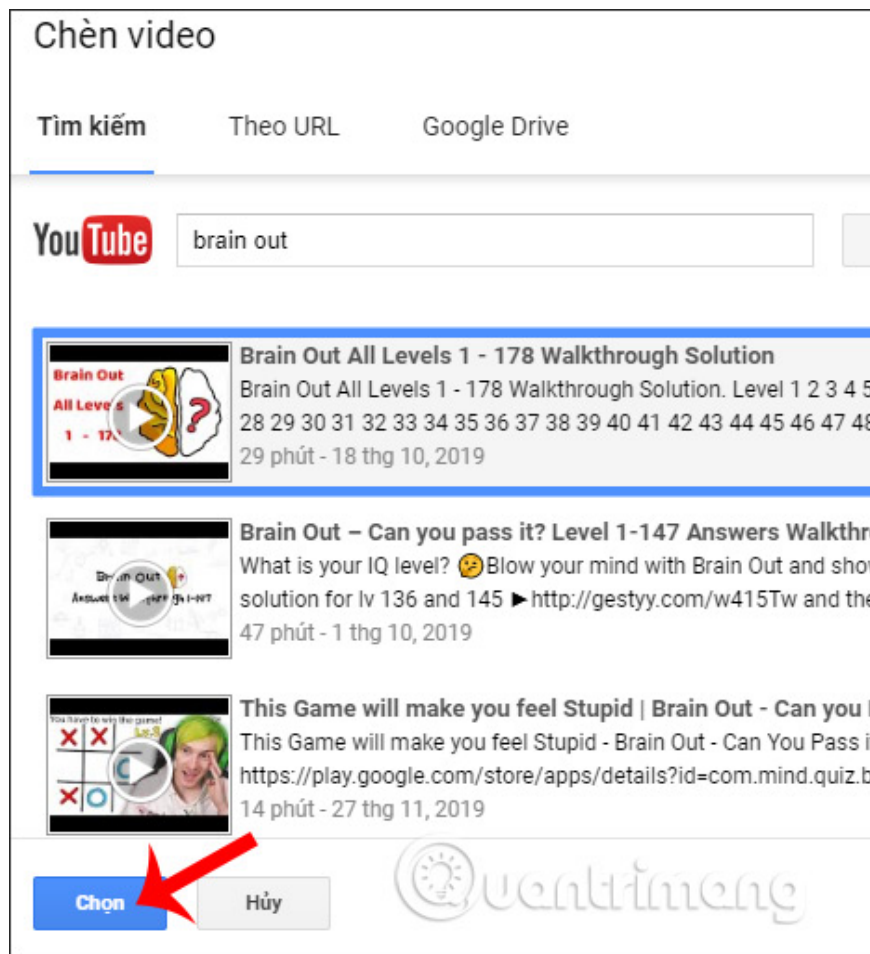

Now display the interface for users to choose where to get videos. To **insert a YouTube video into a slide** , we can click **Search** and **enter the video keyword you want to find**.

Soon you will see videos related to the keywords we have entered.

If you want to use any video, click **on the video** and then press **the Select button** below.

Or if there is a video link to insert, click the **Follow URL** and **paste the YouTube video link** . When it will display the video interface as shown, press Select below to insert the video.

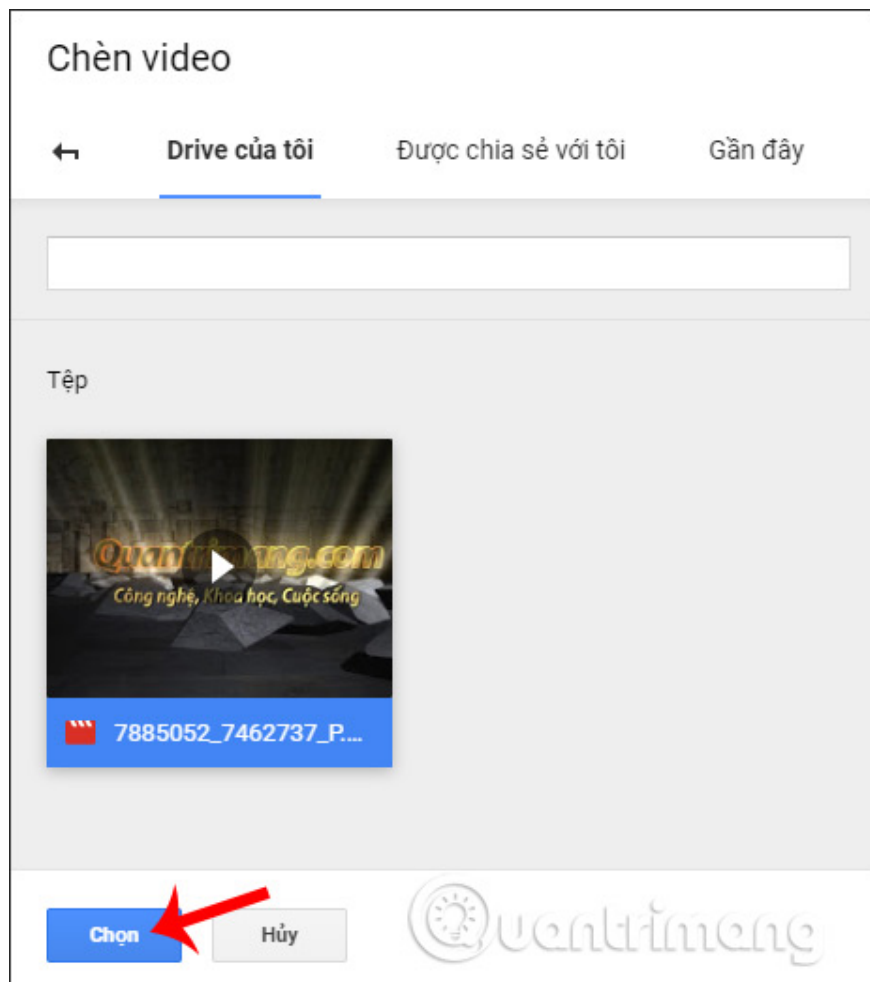

Videos inserted into the slide are automatically scaled to fit the normal size of the slide. We can still reduce the size of the video, move the position of the video in the slide if desired.

1.2 Insert Google Drive videos into Google Slides

In the interface where you want to get the video, users click on Google Drive and will see the videos you upload to your personal Drive account, or shared with you.

To use this video also press and video and then press **the Select button** below to insert into the slide.

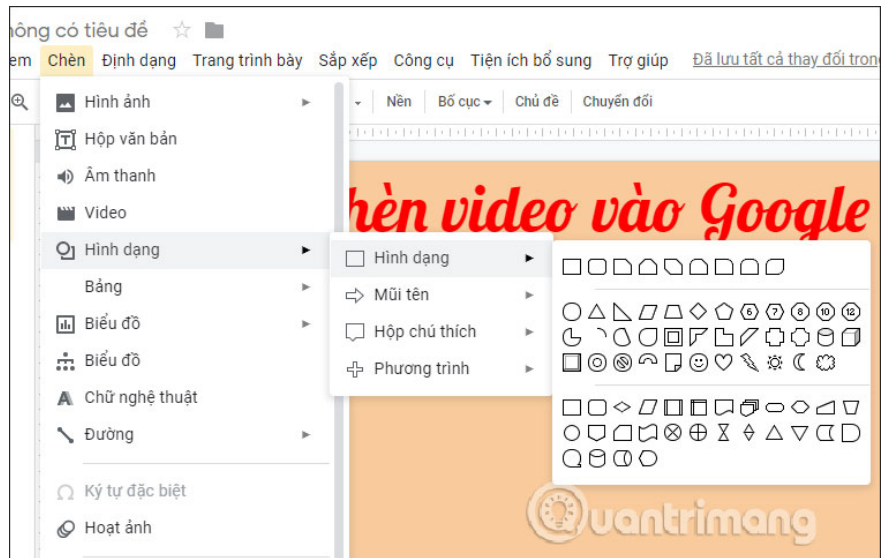

1.3 Insert videos via streaming service

This method can use videos on other websites because Google Slides only supports YouTube videos. However, when we click on the video, we will move to another music playing tab that is not in the same slide interface.

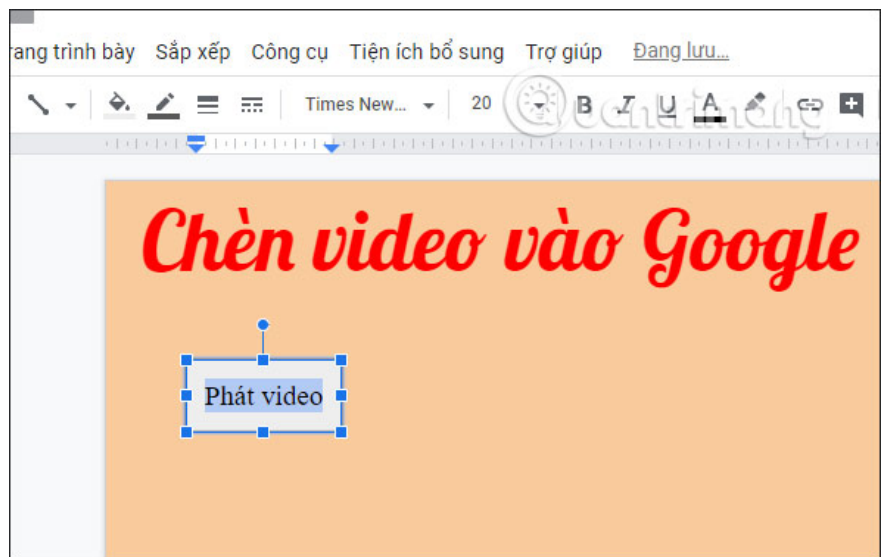

Step 1:

Firstly, we will click on **the Insert item** , select **Shapes** , select **Shapes**, then **select the square** or any shape to draw on the slide, create a frame to insert the video link directly.

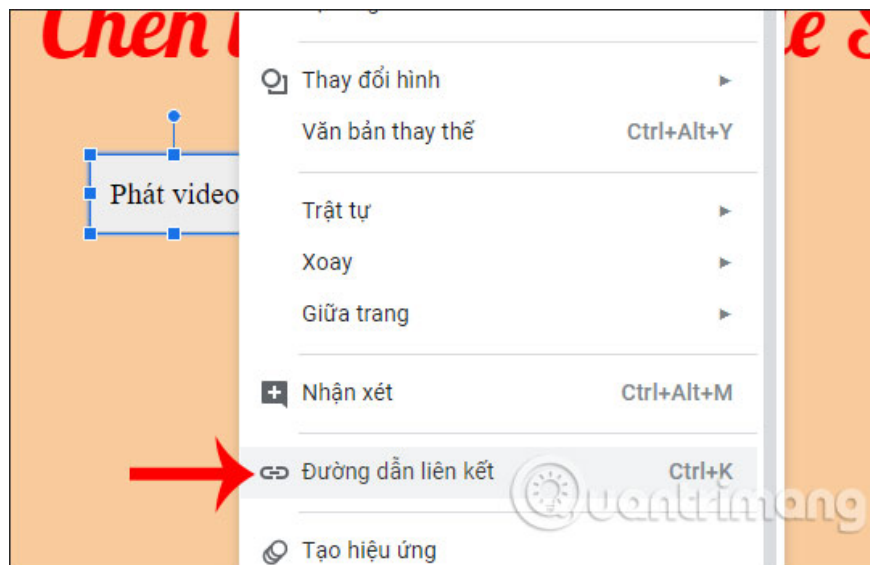

Step 2:

Draw a **small frame on the slide** and write the text on the frame if you want.

Then **right-click** on the frame and **select Link link** to insert the video directly into the slide.

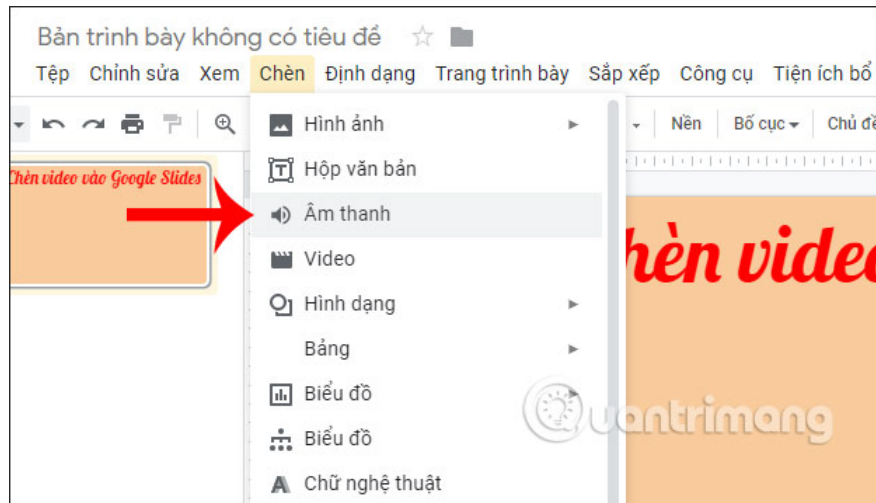

Step 3:

Display the frame for us to **paste the video link**, then **click Apply** to insert the link in the slide, When showing and clicking the link, we will be immediately moved to the video playing tab.

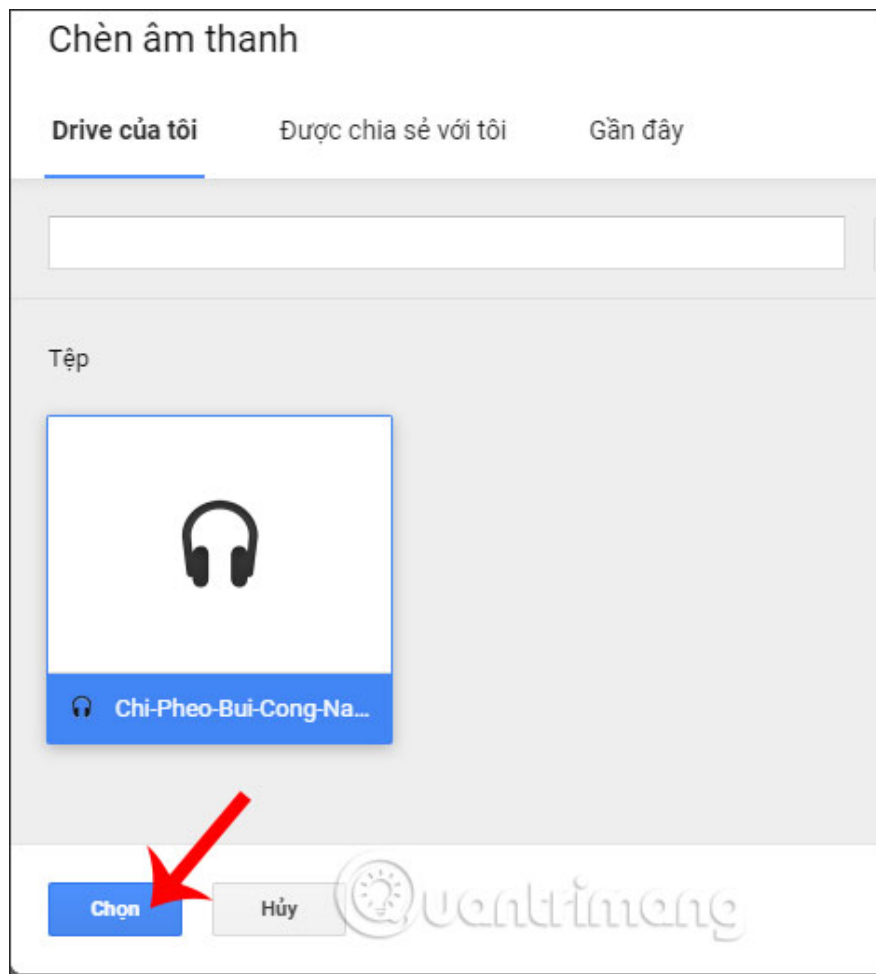

2. How to insert audio into Google Slides

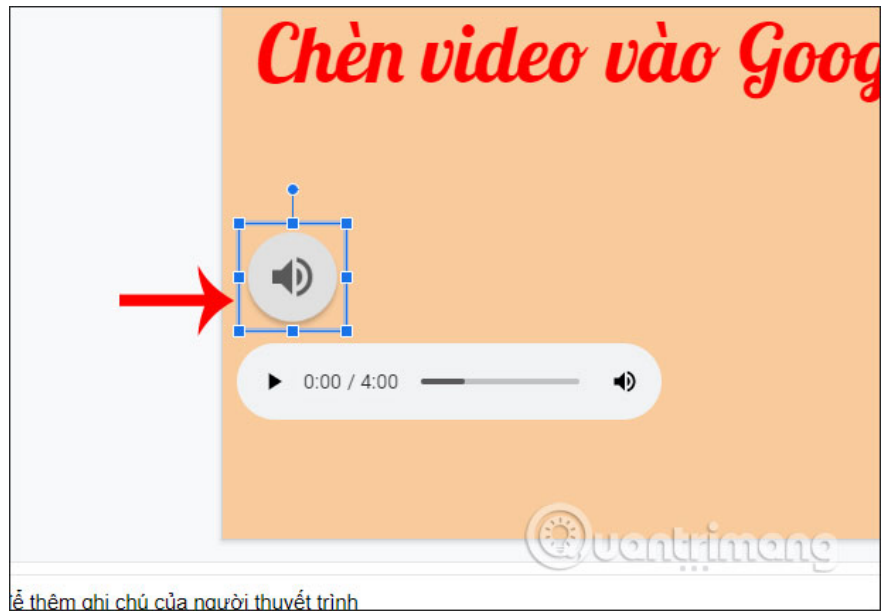

At the interface on Google Slide we click **Insert** and select **Audio** .

Then display a frame for you to find **audio files included in Google Drive** . Click on the audio file and then press **the Select button** below to insert.

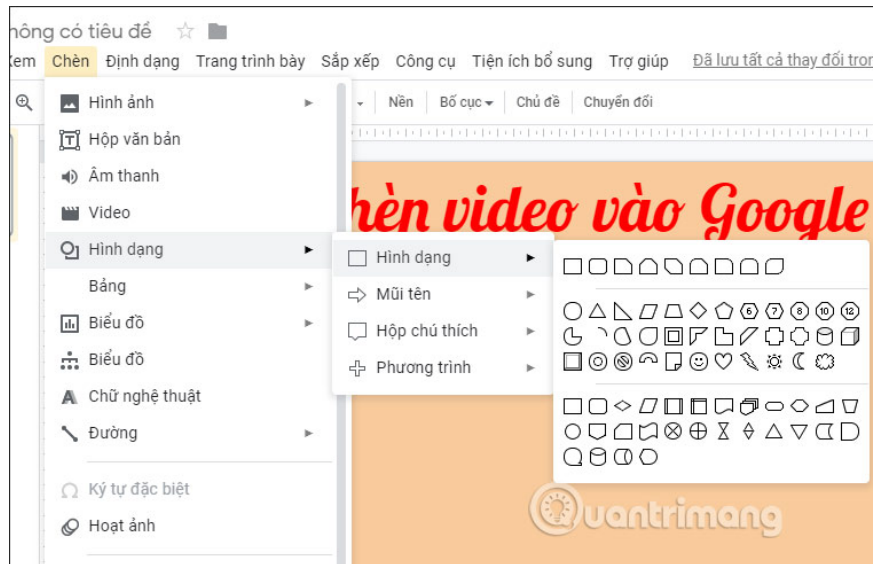

Shortly thereafter Google Slides proceed to create sound to insert in the slide. The speaker icon appears to play a sound when a slideshow This icon can change the size or position displayed depending on the user.

When presenting a slide just press the speaker icon to play the sound. Still can stop or adjust the volume of the sound.

Just like inserting a video from a 3rd application into a slide, we can also **insert a direct music link** to play during the slideshow. You also **draw a block frame** to insert music links into the slides.

Then enter text in the box and **right-click** and **select Link link** to **paste the music link** directly. Finally you just need to **click Apply** to insert the link.

So you know how to insert music or video into Google Slides with very simple steps. When inserting a video into a slide, there are more options than inserting audio.

I wish you successful implementation!
