

How to install and use Automatic Tap and Auto Click on Android

Automatic Tap is an auto-click application for Android that helps users repeat actions at a specified location. You don't need to root your Android phone to install and use Automatic Tap; you can do so immediately after opening the application.

If you're looking for an auto-clicker app, Automatic Tap is the perfect choice. With no root required, a timer, and a user-friendly interface, Automatic Tap is very easy to use.

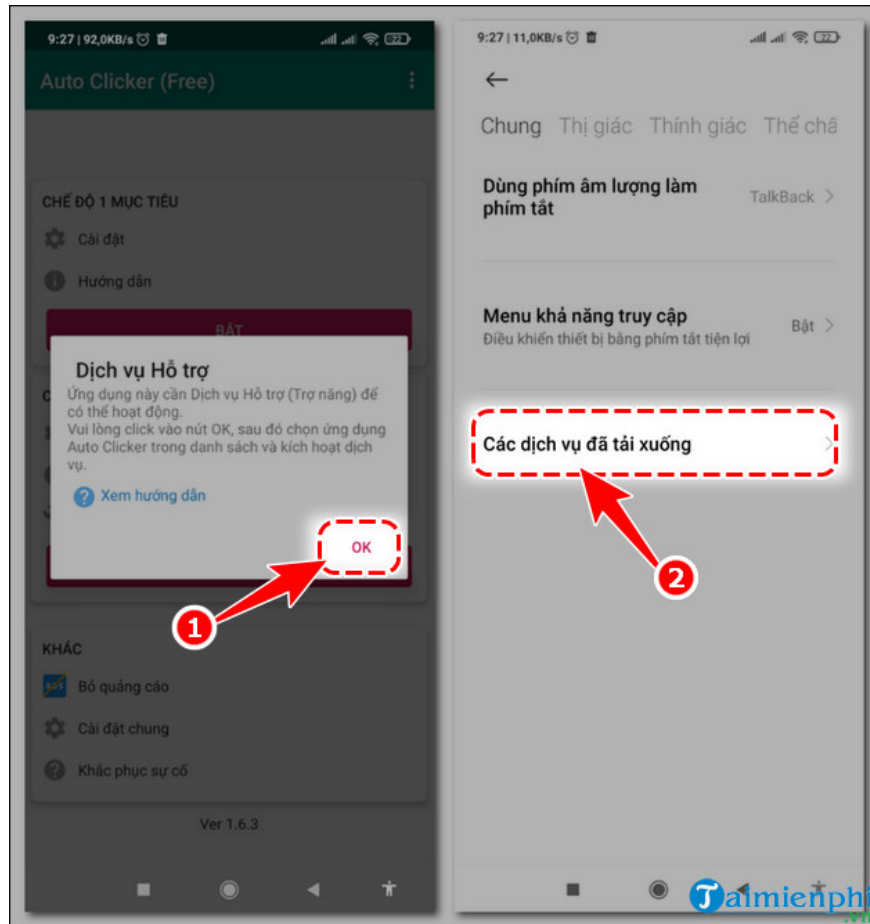

Instructions for using the Automatic Tap auto-clicker on Android.

I. Download and install Automatic Tap/Auto Click on Android

- Download link for the Android version: **Automatic Tap for Android**

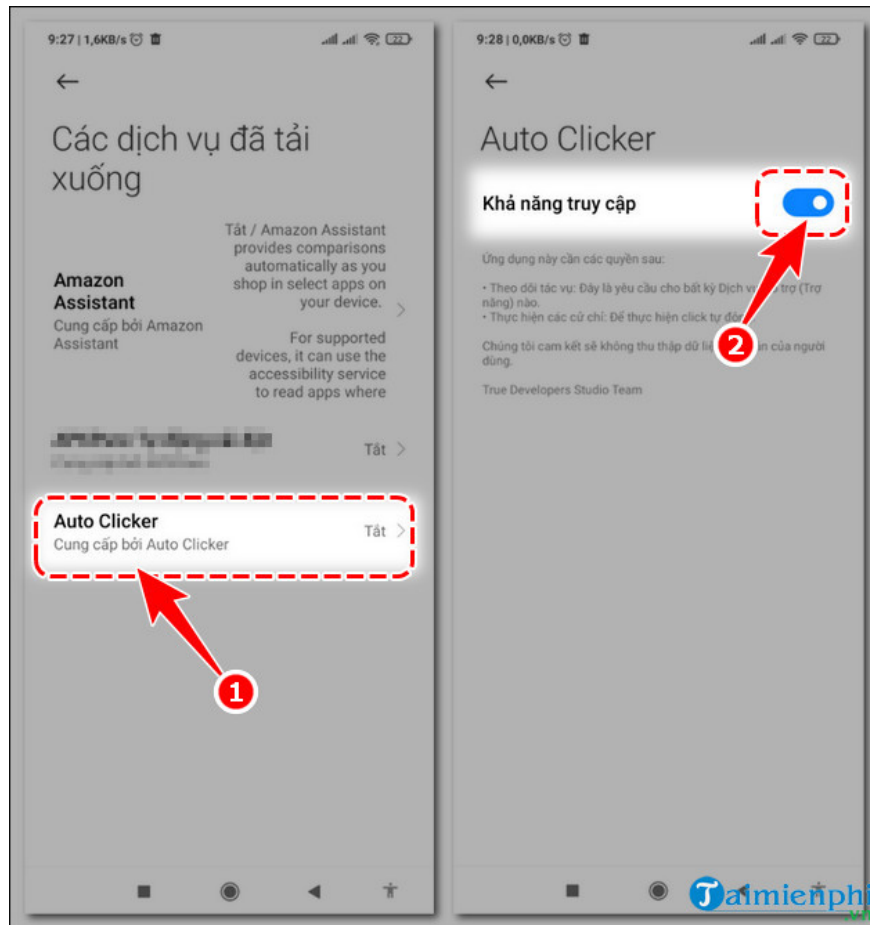

II. Instructions for using Automatic Tap and Auto Click on Android

Step 1: Open the **Automatic Tap** app on your Android phone, press **OK** => select **Downloaded Services** on the next screen.

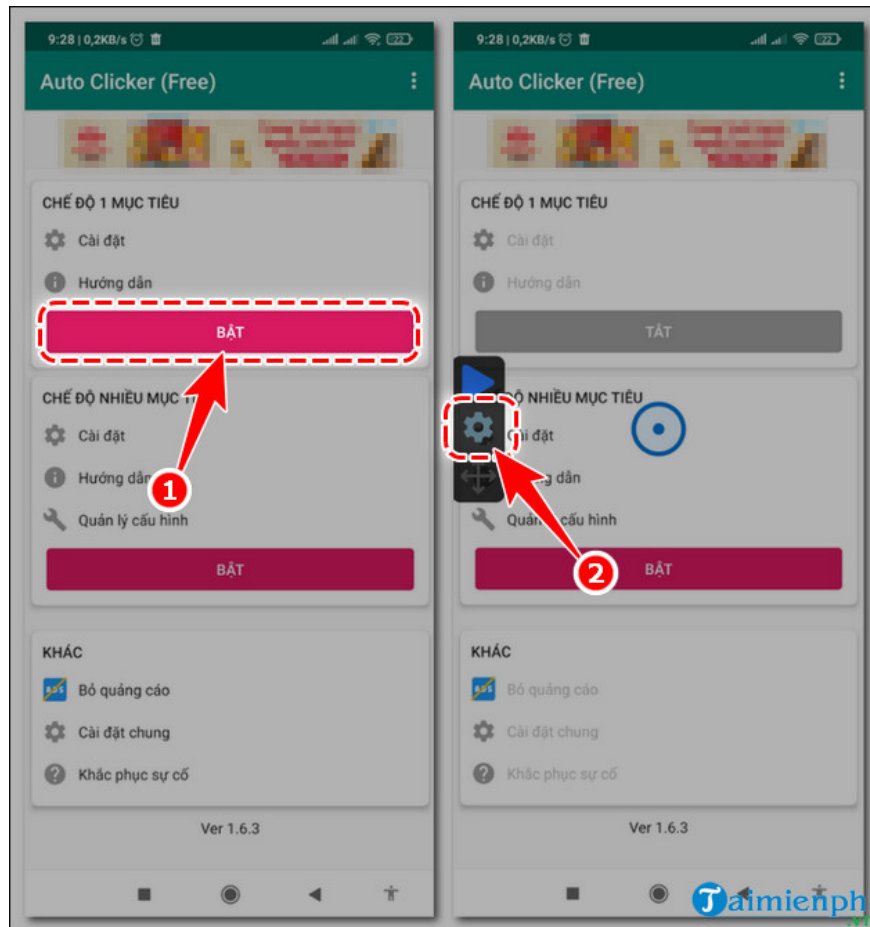

Step 2: Next, select **Auto Clicker** => enable **Accessibility** (toggle the round button to the right), press **Yes** or **Agree** if prompted.

- This grants permission for the Automatic Tap auto-clicker to run on Android.

Step 3: Return to **the Automatic Tap auto-click interface** . Here you can select:

- **Single Target Mode:** Auto-click at one location/point
- **Multiple Target Mode:** Auto-click at multiple locations/points (2 or more)
- For example, if Taimienphi wants to auto-click at one location:
 - + Press **Enable** in **Single Target Mode** .
 - + Click **the gear icon** in the settings section.

Step 4: Set up the Automatic Tap auto-click **settings on Android** and press **Save** .

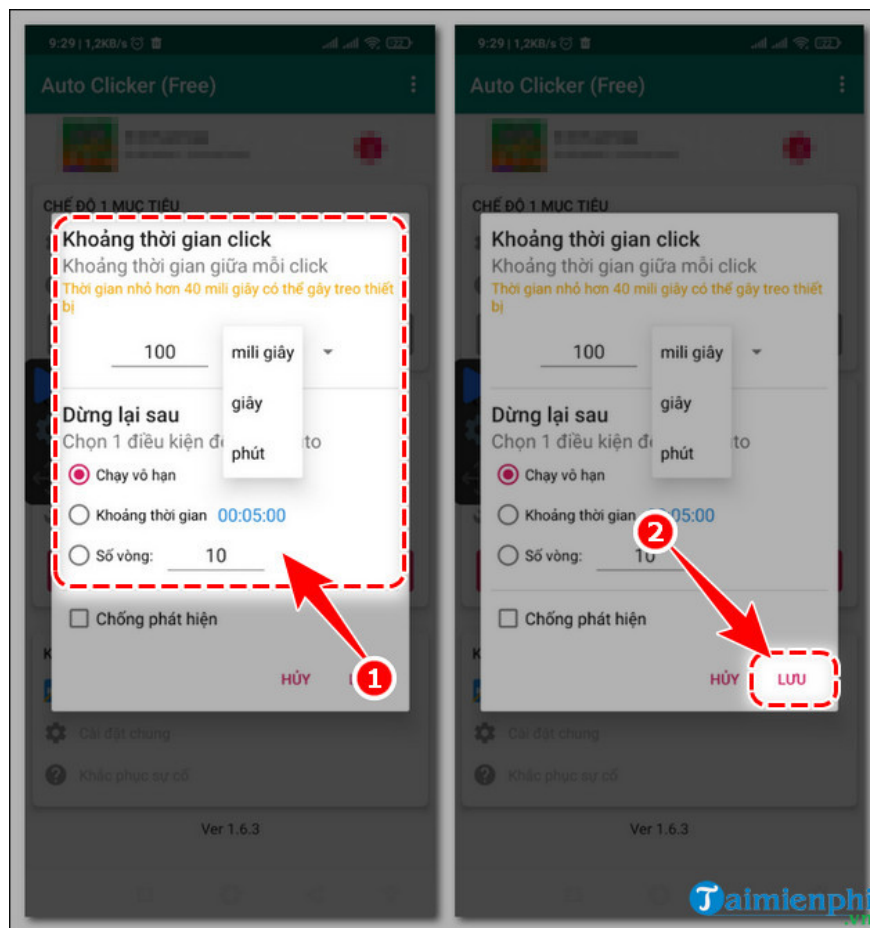

- **Click interval** : Set the time between each click.

- **Stop after:**

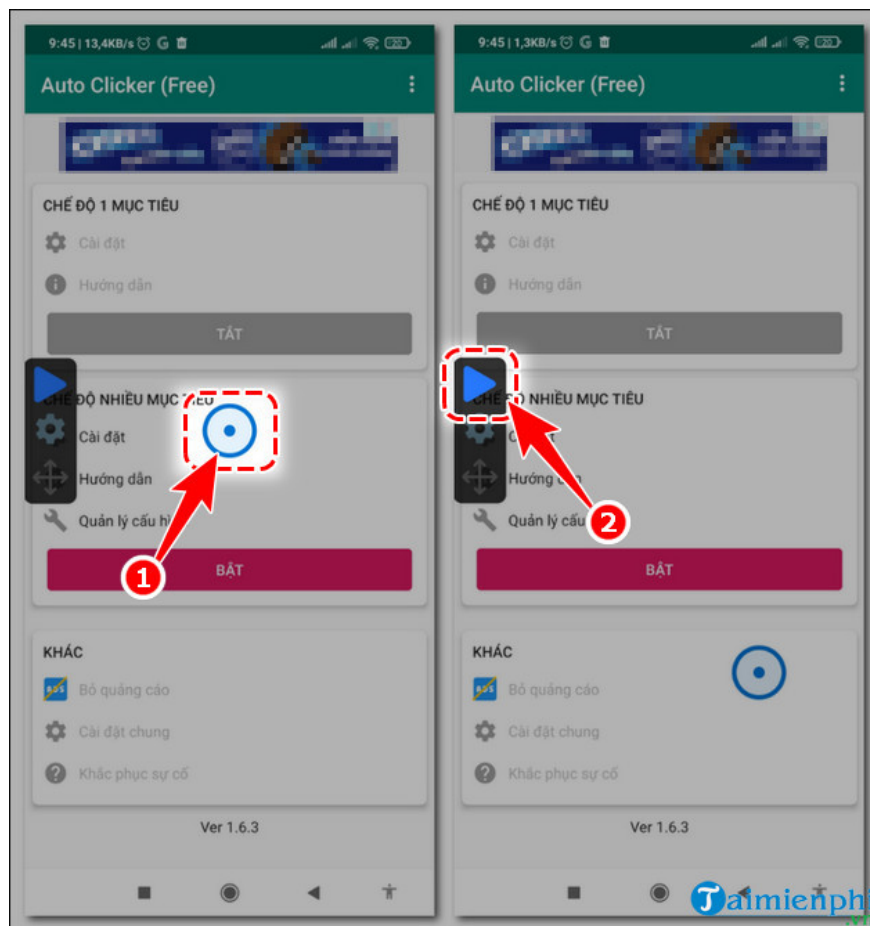

+ **Run indefinitely:** Runs continuously until you stop.

+ **Interval:** Set the duration for the auto-click to run.

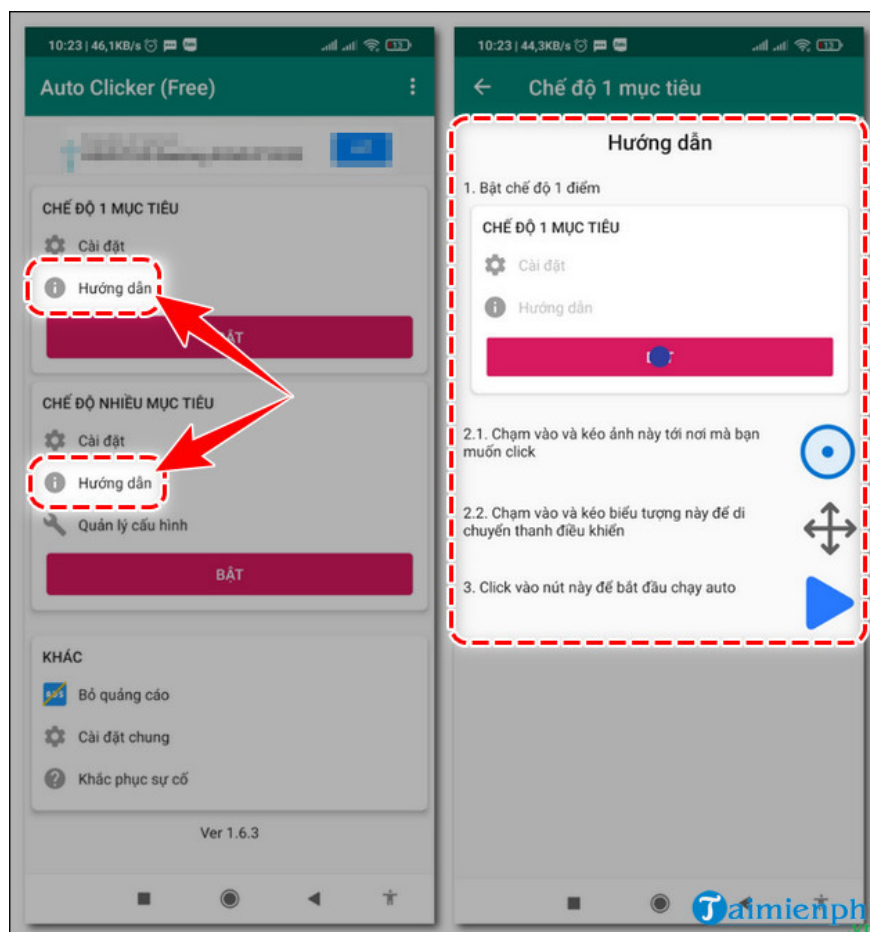

+ **Number of cycles:** Set the number of clicks on the screen.

Step 5: Move the circular click icon to the desired auto-click location, then press the **Play** button .

- Alternatively, you can click on **Instructions** to learn how to use the Automatic Tap auto-clicker on Android.

In addition, there are many other **Auto Click applications for Android that don't require root access** , but basically, Taimienphi finds that Automatic Tap on Android works well, has an intuitive interface, and is very easy to use.
