1. How to download and install CCleaner on your phone

* Download the CCleaner junk file cleaning app

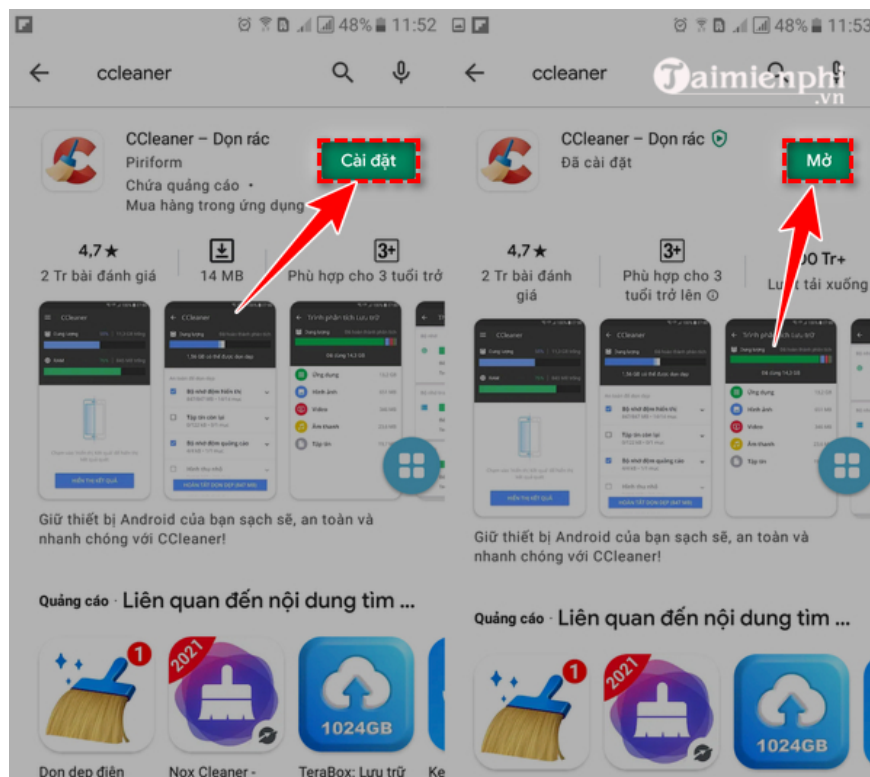

Currently, CCleaner is available for free on Android phones; you can easily download it by clicking the download link below.

- Download

How to install CCleaner on an Android phone

Step 1 : After clicking the CCleaner download link above, you will be redirected to the application installation interface. Here, click the " **Install** " button to begin the application installation process on your computer.

Step 2: Wait until the installation process is complete, then press " **open** " to start using the application.

2. How to use CCleaner on your phone

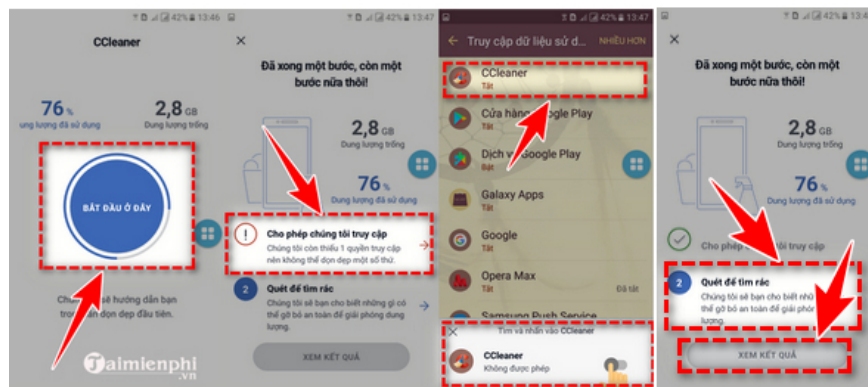

CCleaner on your phone has three main functions: **Cleaner** (analysis & cleaning), **App Manager** (application management), and **System Info** (system information). To use CCleaner on your phone, you need to launch CCleaner, press " **start** ," and select the function you want to use.

2.1. How to use CCleaner to analyze and clean your system

" **CCleaner** " is a feature that helps you analyze your phone and reclaim storage space. To use this function, follow these steps:

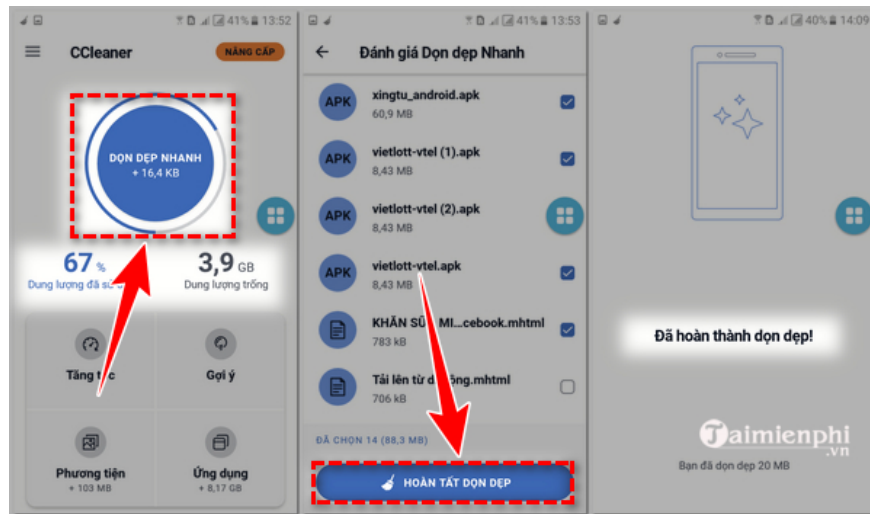

Step 1: On the application's main screen, the system will analyze all the used storage on your phone and the available free space. Tap " **Start here** " to begin the analysis and cleanup process.

Step 2: To proceed with the next steps of the analysis, in section 1 (**Allow us to access**), you need to click and follow the on-screen instructions to allow CCleaner access to your phone. Next, select section 2 (**Scan for junk files**) to allow the system to scan for junk files and remove anything that can be safely uninstalled from your phone to free up storage space.

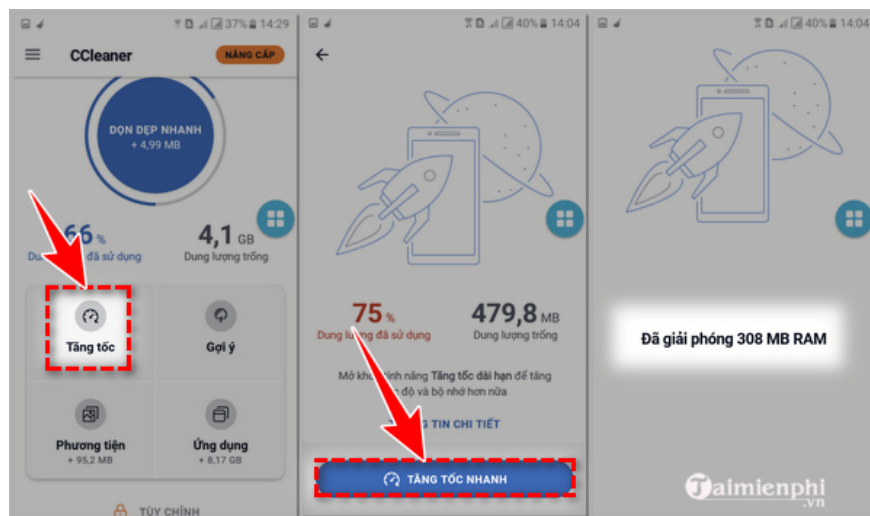

Step 3: The CCleaner app runs and automatically removes junk files from your phone. As you can see, after scanning with CCleaner, the used storage on our device decreased from 76% to 67%, and the free storage increased from 2.8GB to 3.9GB.

Step 4 : After the scan, the main interface of CCleaner will continue to display the quick cleanup tool. To clean up the remaining files, you can select " **quick clean** " and then manually choose the files you want to delete on your phone.

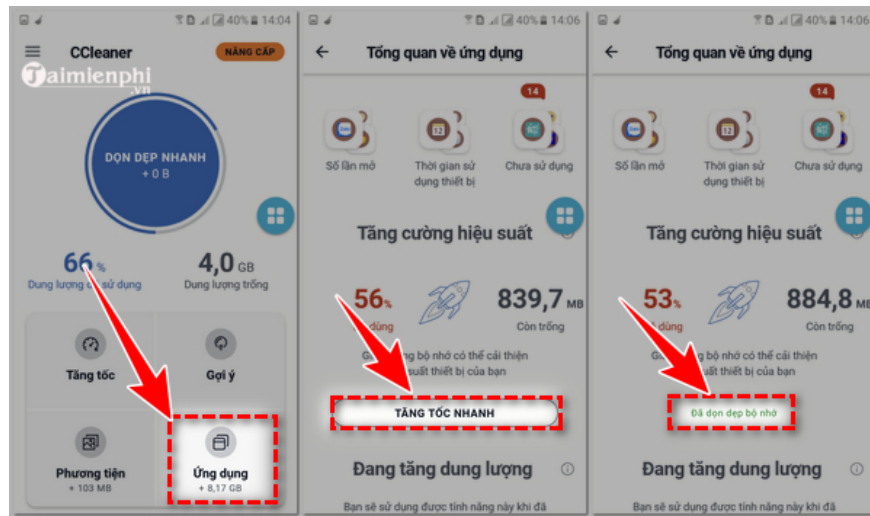

2.2. How to use CCleaner to speed up your system

This feature is also available right on the app's home screen. To use it, simply click " **speed boost** ," then select " **quick speed boost** " to unlock the long-term speed boost feature to increase your phone's speed and memory.

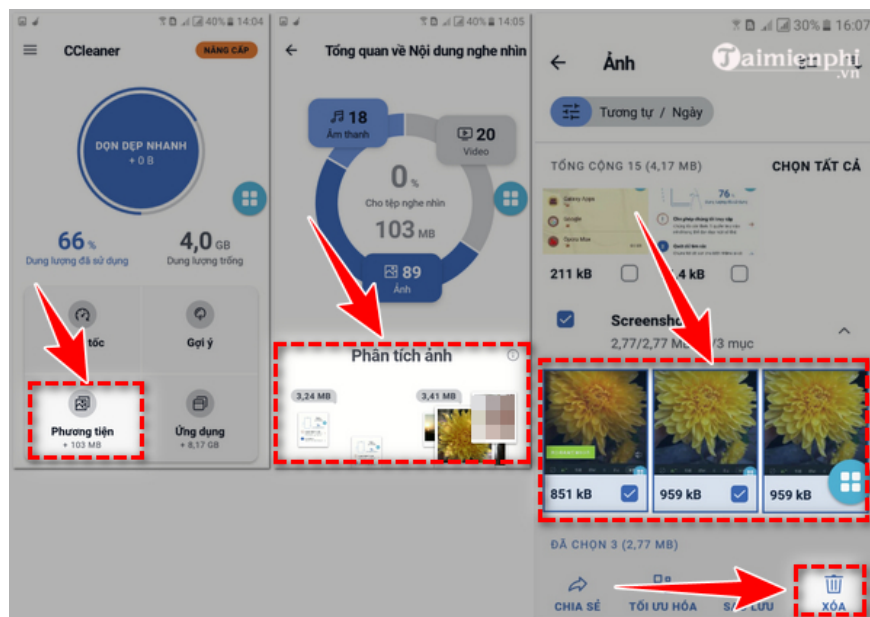

2.3. How to use CCleaner to manage applications.

From the app interface, click on " **Apps** " to view an overview of applications, fuel usage, and tips for improving performance and freeing up device space. Here, select " **Quick Boost** " to free up memory and improve app performance.

2.4. Using CCleaner to manage image folders.

Similar to the app cleanup feature, you can also review an overview of the photo files on your phone through the CCleaner app and remove old, low-quality, or inappropriate photos.

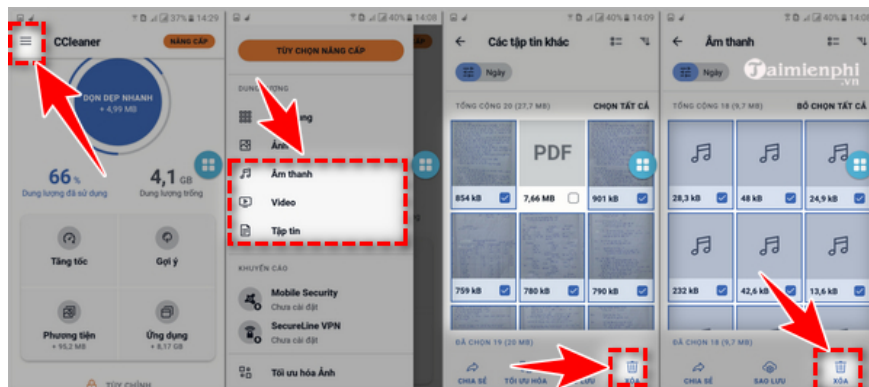

2.5. Using CCleaner to manage audio, video, and other files.

In addition to the features above, you can further free up space on your phone by doing the following.

Step 1: On the main interface of the CCleaner application, click the three lines in the top left corner of the screen, then select " **Audio** ", " **Video** ", or " **Files** ".

Step 2: Next, you need to perform the following actions:

- + Select "Free up space" for " **Audio** " files: Choose the audio files you want to delete, then press " **Delete** " to free up space on your computer.
- + Select "Free up space " for " **Files** ": Choose the files you want to delete, then press " **Delete** " .
- + Select " **Videos** ", choose the video files you want to delete, then press " **Delete** " .
