### ***III. Instructions for using Chrome Remote Desktop***

*Step 1: Open the **Chrome Remote Desktop** app on your phone => select **the name of the computer** you want to control.*

*Step 2 : Enter **the PIN** => press **CONNECT**.*

*Step 3 : Control the computer just like you would use a touchscreen phone.*

Installing Chrome Remote Desktop on a computer is more complicated than on a phone, but to use it, you'll need to install it on at least two devices. Nowadays, Chrome is constantly evolving with new features, and using Google Chrome requires a comprehensive understanding of its basic functions. UltraViewer is another application that supports remote computer control; it has a relatively small installation size, an intuitive interface, and supports many features for users.
