

How to install and use Facebook Messenger on Windows 10

How to install and use Facebook Messenger on Windows 10. Facebook Messenger is a convenient messaging application for those who use Facebook. Facebook Messenger is available on all supported Windows 10 platforms and operating systems.

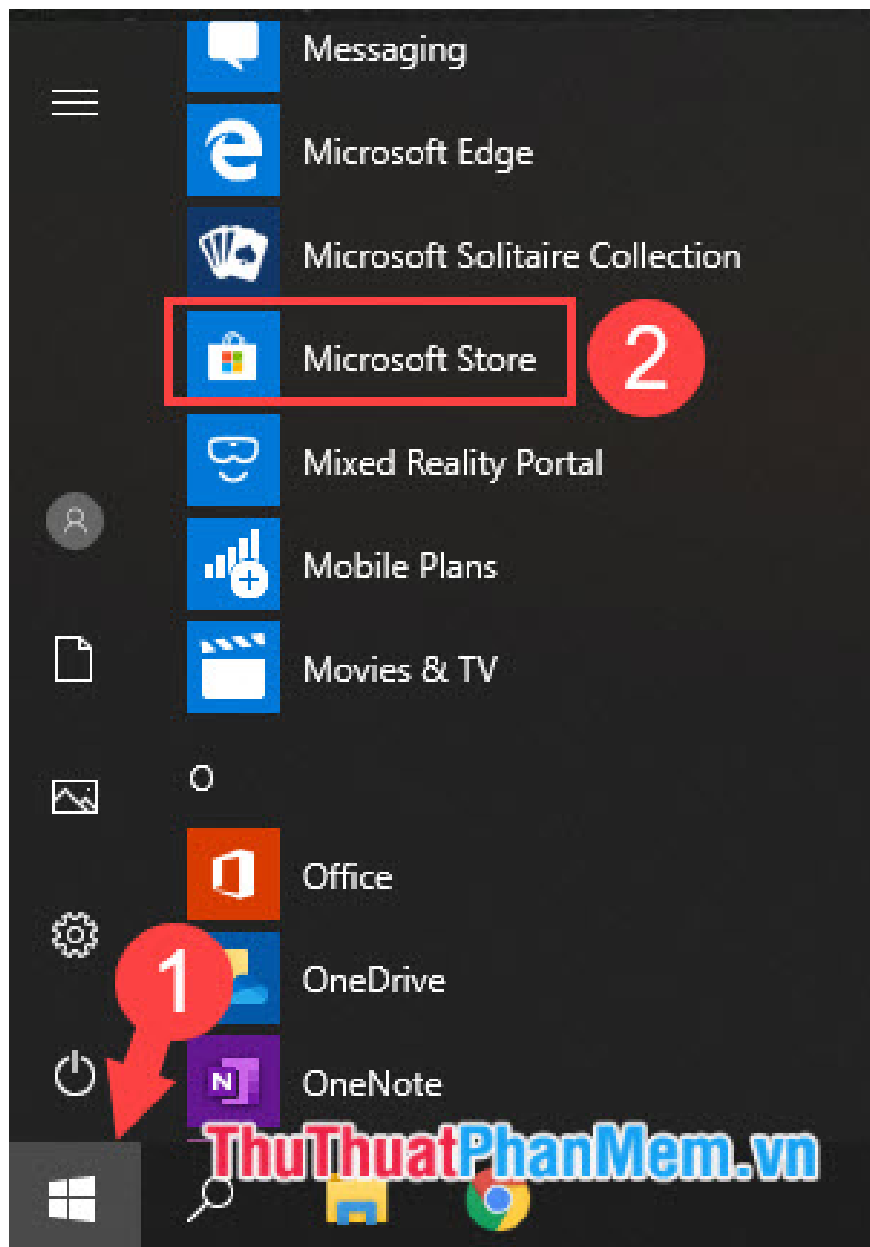

Facebook Messenger is a convenient messaging app for those who use Facebook. Facebook Messenger is available on all supported Windows 10 platforms and operating systems. If you still do not know how to install Facebook Messenger on Windows 10, please refer to the following article.

To install Messenger for Windows 10, do the following:

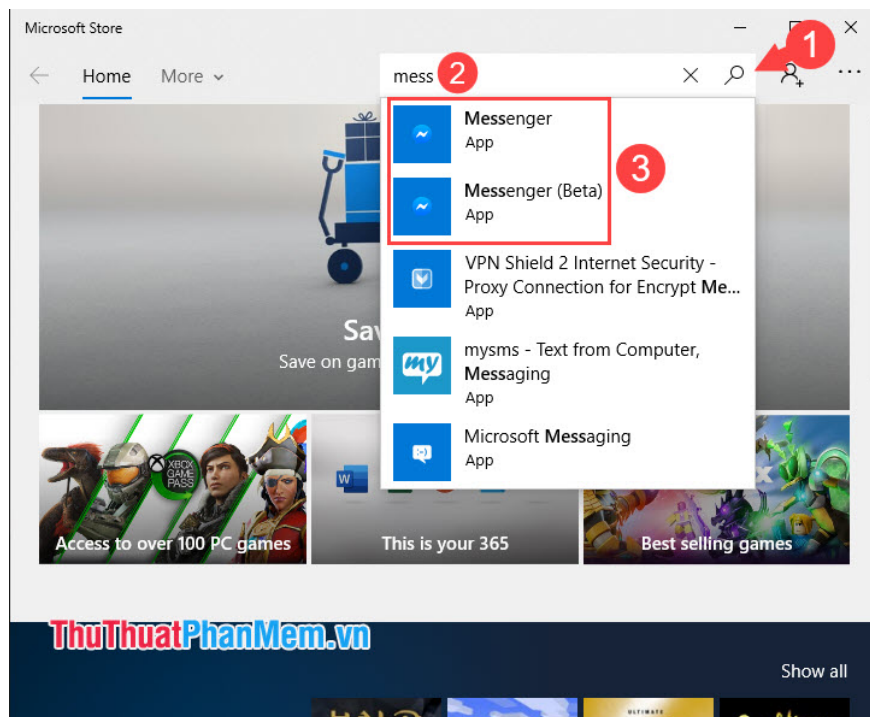

1. Install Messsenger on Windows 10

Step 1: Click Start (1) => Microsoft Store (2) .

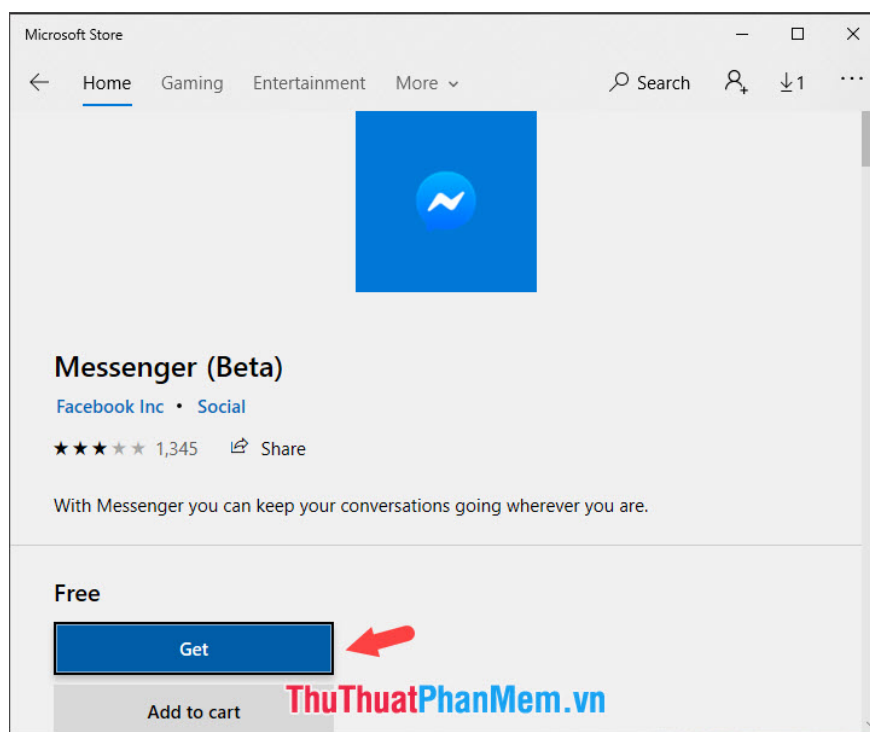

Step 2: Click on the search box (1) and search for the keyword **messenger** (2) . Here, we have two versions that are Messenger and Messenger Beta (3) .

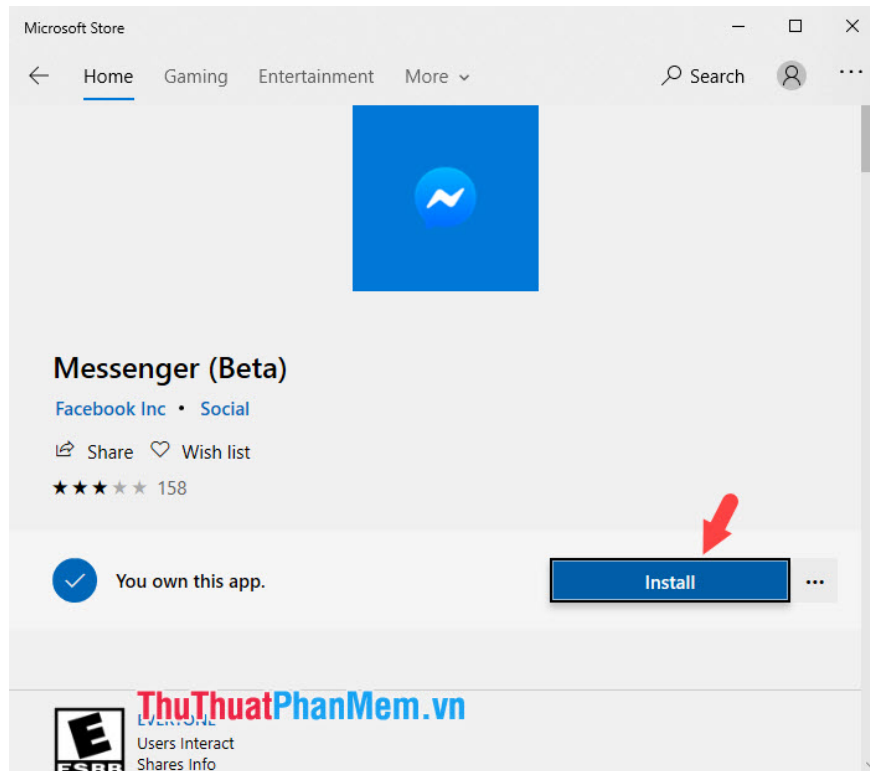

If you like simplicity and convenience, just text or call, Messenger is the right choice for you. And the Messenger version (Beta) has a new interface and many features similar to the versions on Android and iOS suitable for experience and aesthetic needs.

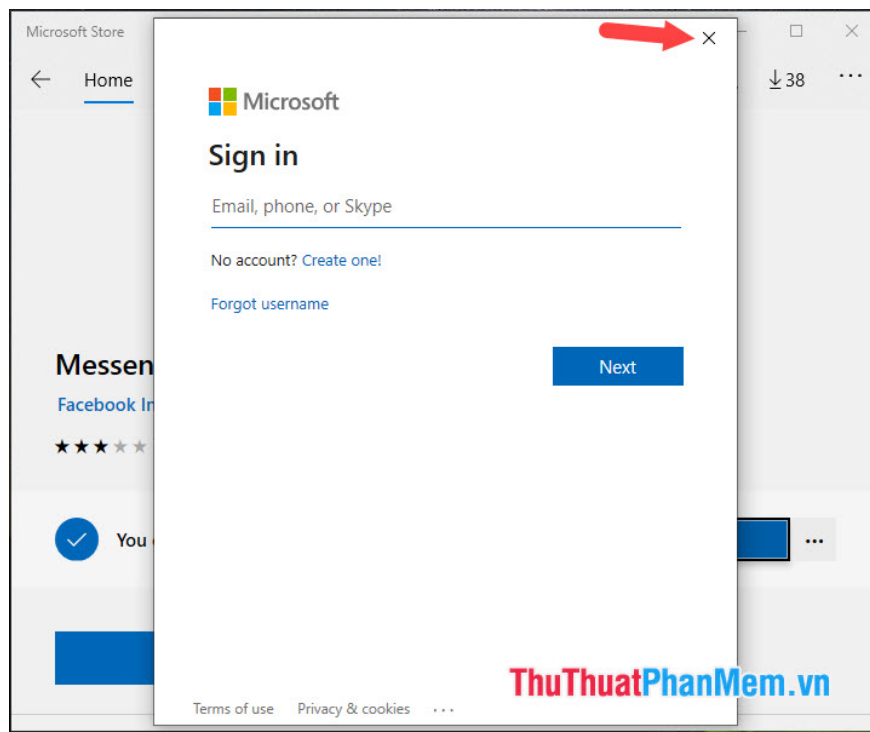

Step 3: In my tutorial, I use the **Messenger** version (**Beta**) because the Beta interface is more beautiful and has many new support features. Click **Get** to receive the application.

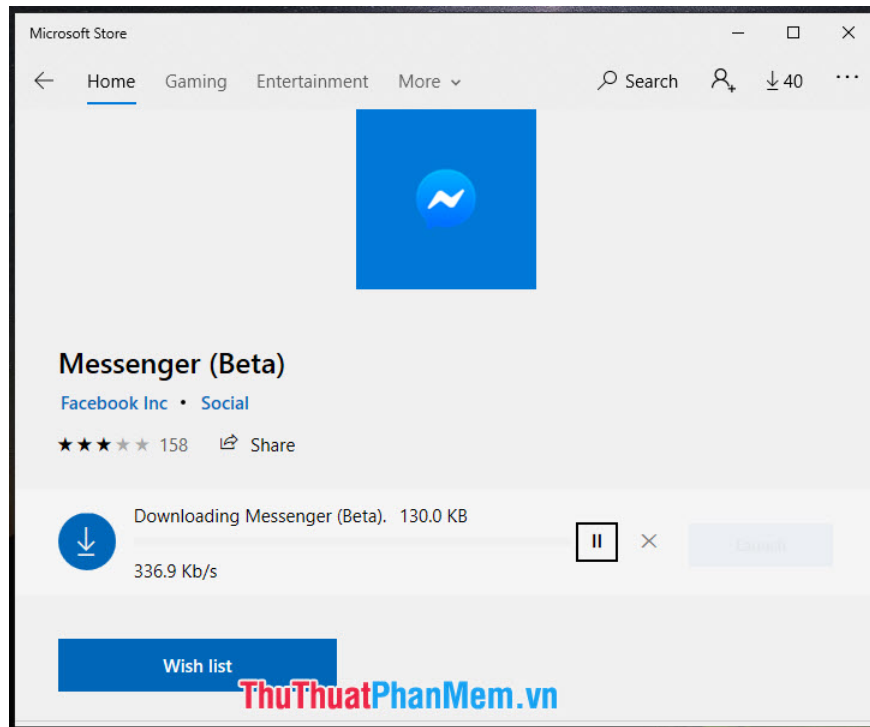

And you keep clicking **Install** .

Step 4: The login window appears, please login to your Microsoft account (if any) or click the [X] button to skip.

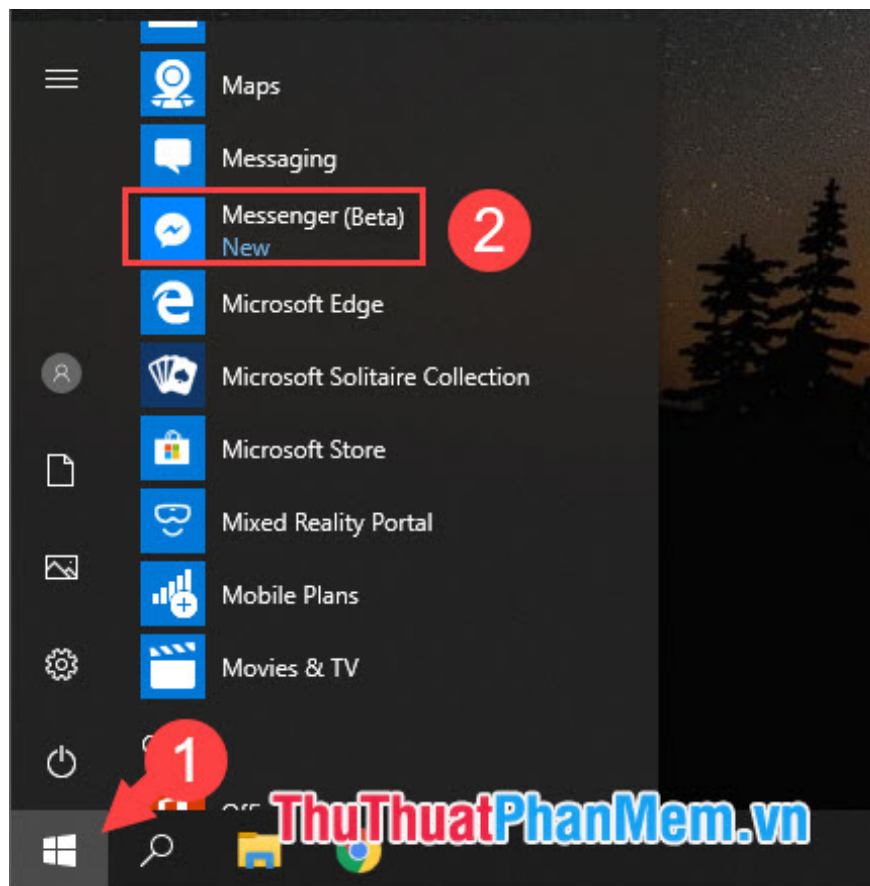

Finally, Messenger will download automatically and you wait 1-2 minutes to finish.

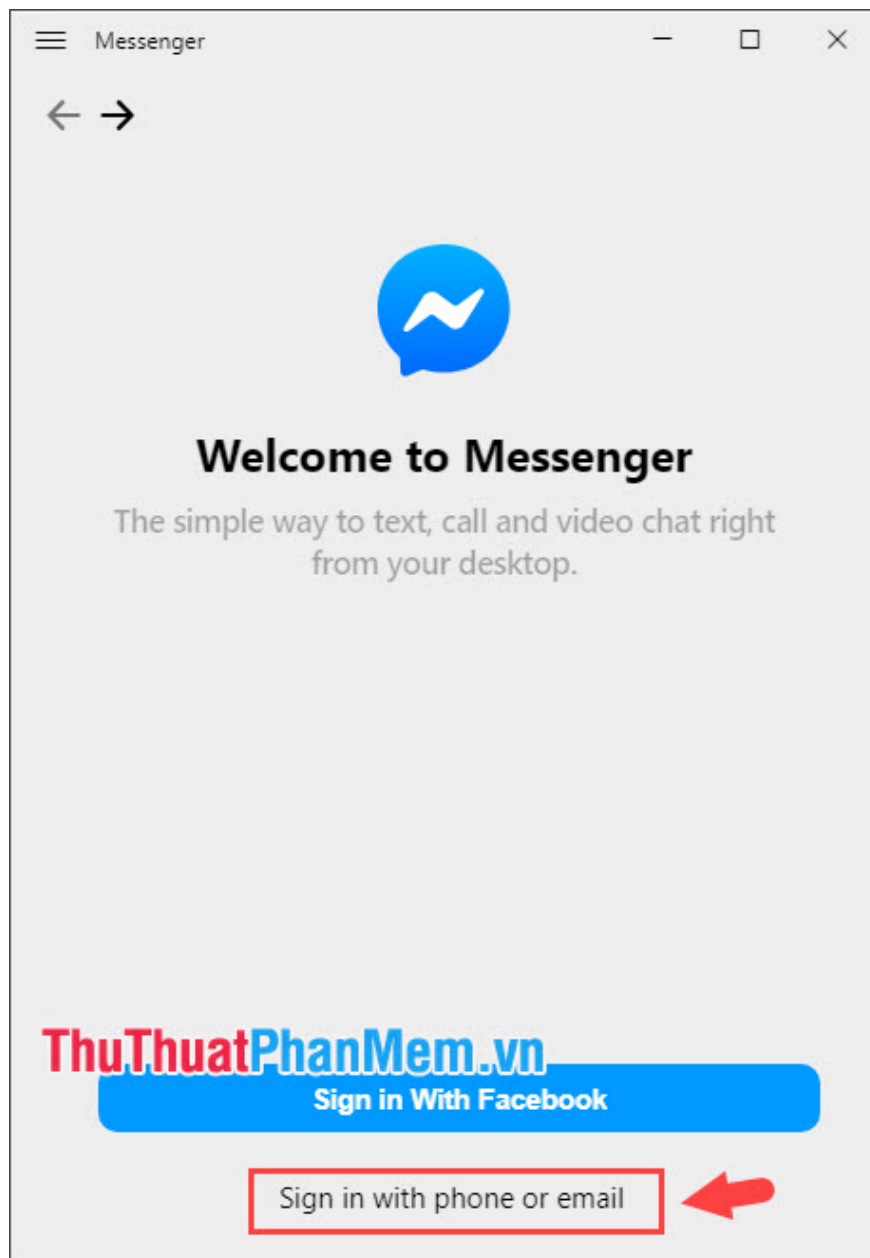

2. Use Messenger on Windows 10

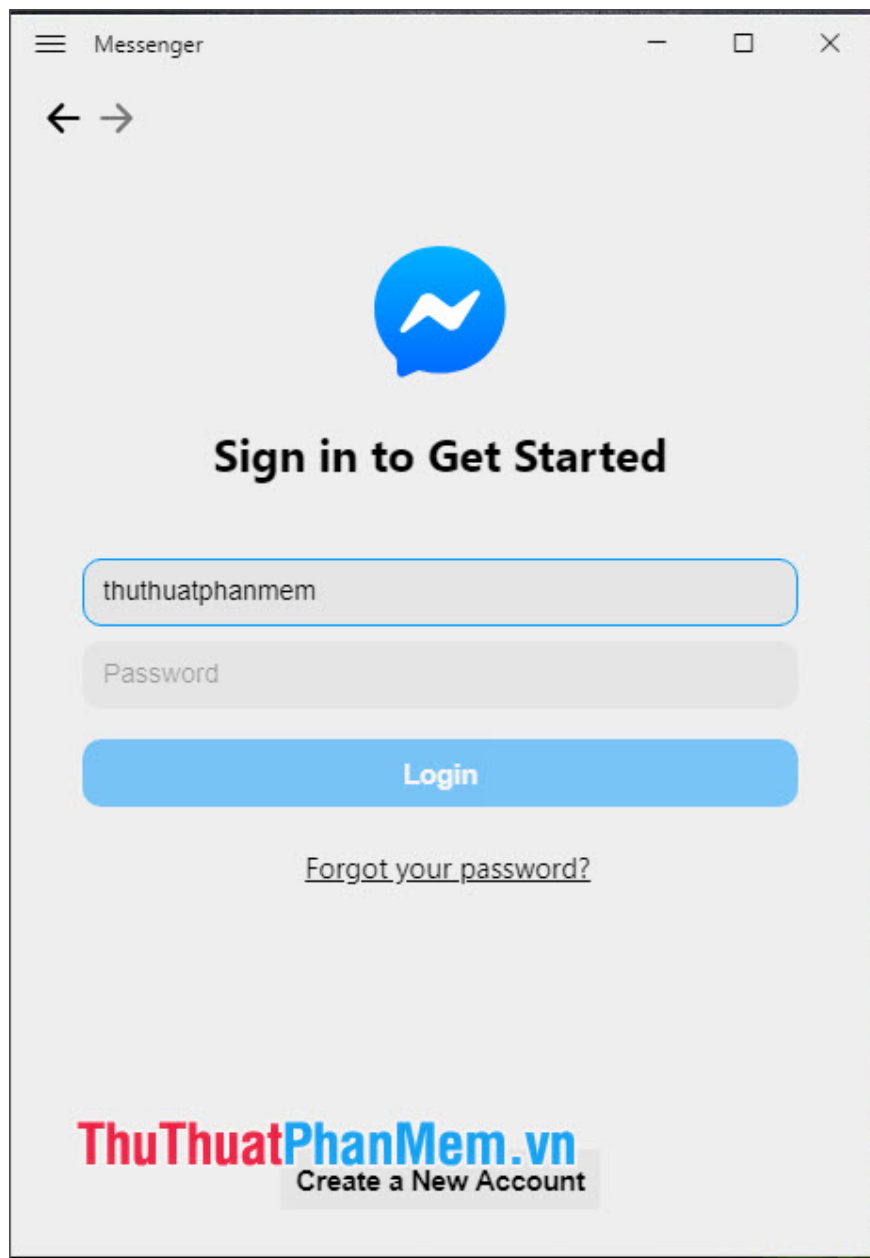

Step 1: Click Start (1) => Messenger Beta (2) .

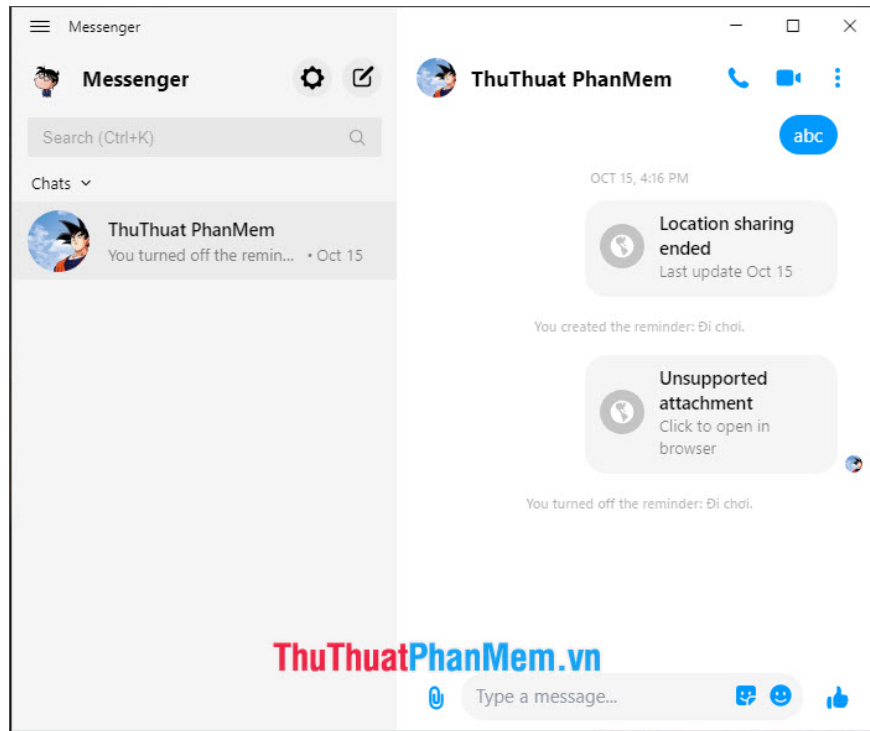

Step 2: Click **Sign in with phone or email** .

Step 3: Next you log in your Facebook account and click **Login** to login.

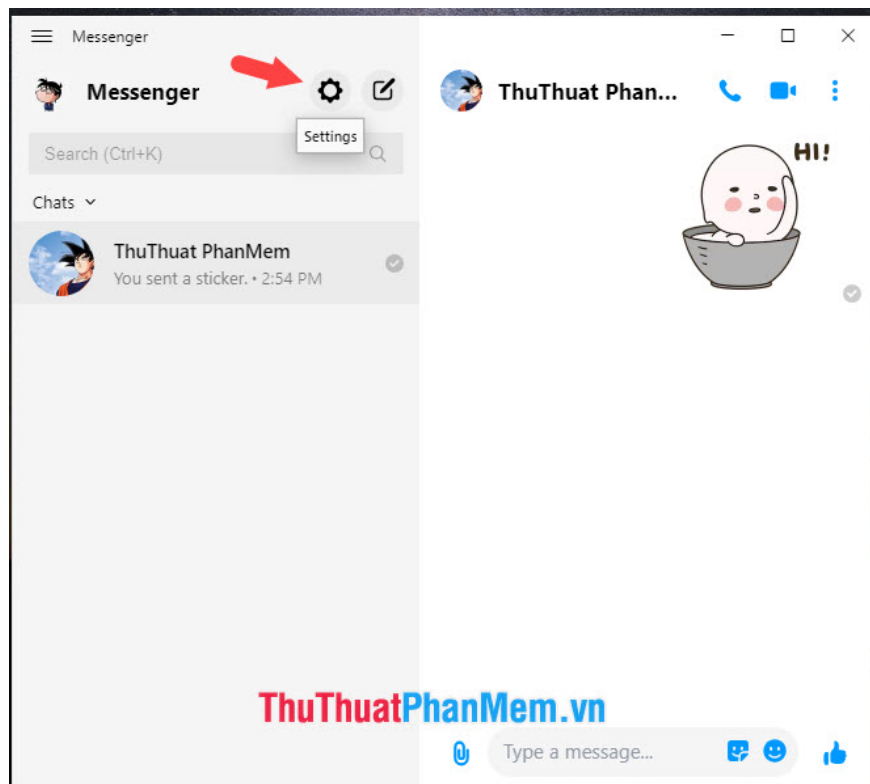

And finally we have successfully signed in to Messenger on Windows 10 with a full and beautiful interface like the version on Android and iOS.

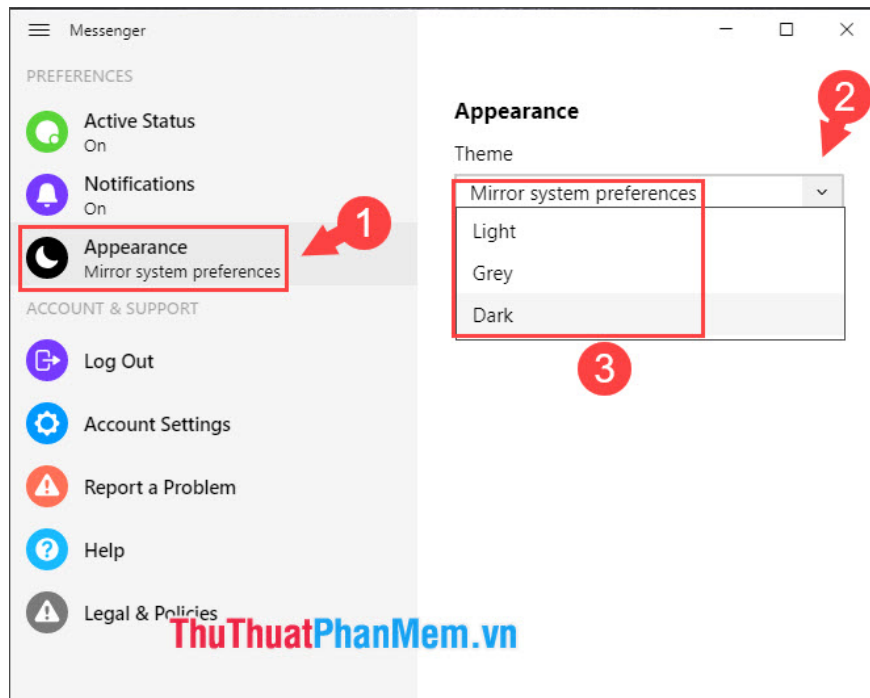

3. Some basic instructions on Messenger Windows 10

3.1. Change the light and dark interface

Step 1: Click on the **Settings** icon .

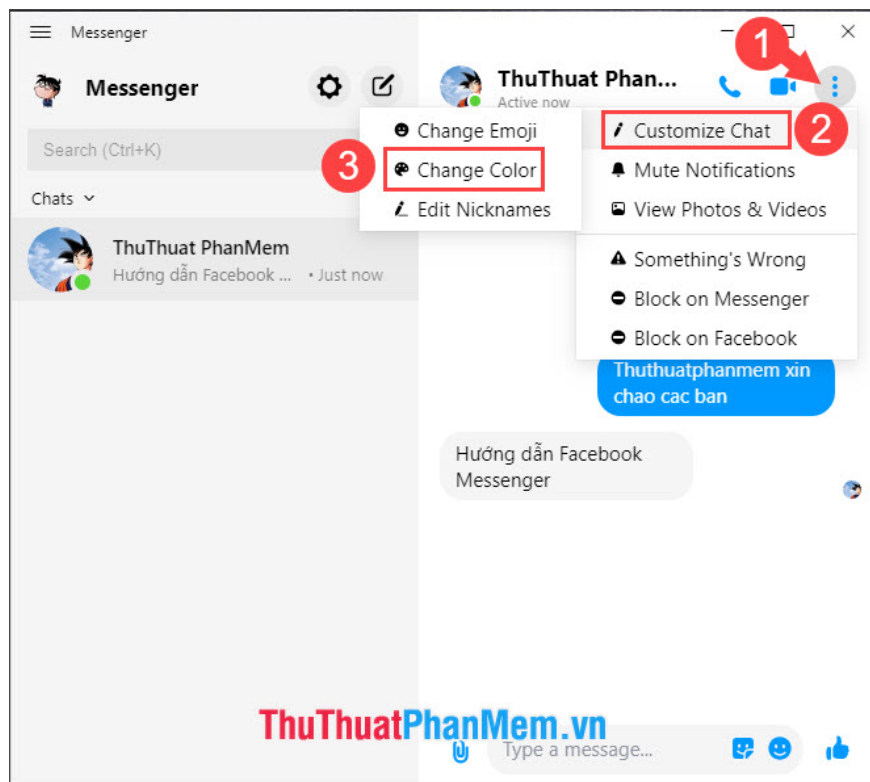

Step 2: Choose **Appearance (1)** => click on the arrow in **Theme (2)** and select the interface **(3)** such as **Light** (light), **Gray** (gray), **Dark** (dark).

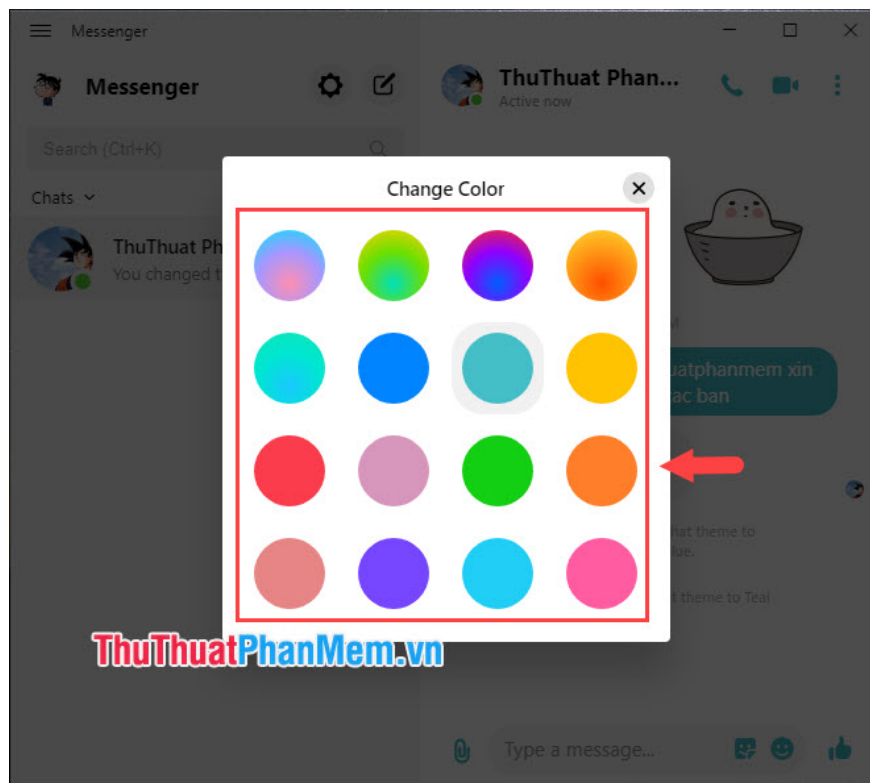

3.2. Change conversation color

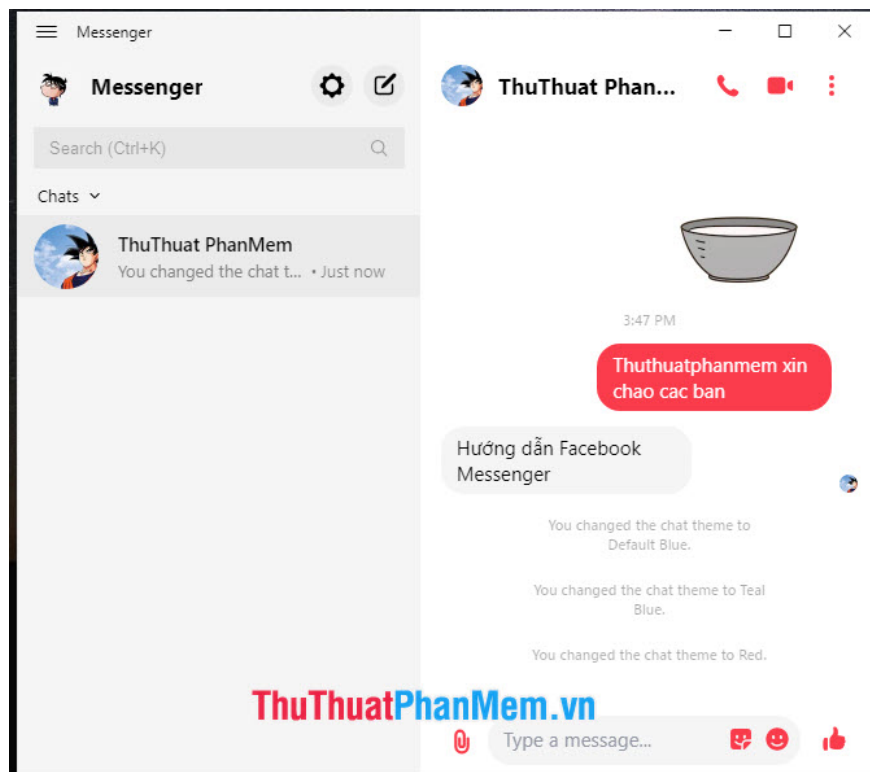

Step 1: Click on the 3 dots (1) => **Customize Chat (2)** => **Change Color (3)** .

Step 2: Click the color you like and the application will automatically change the color for you.

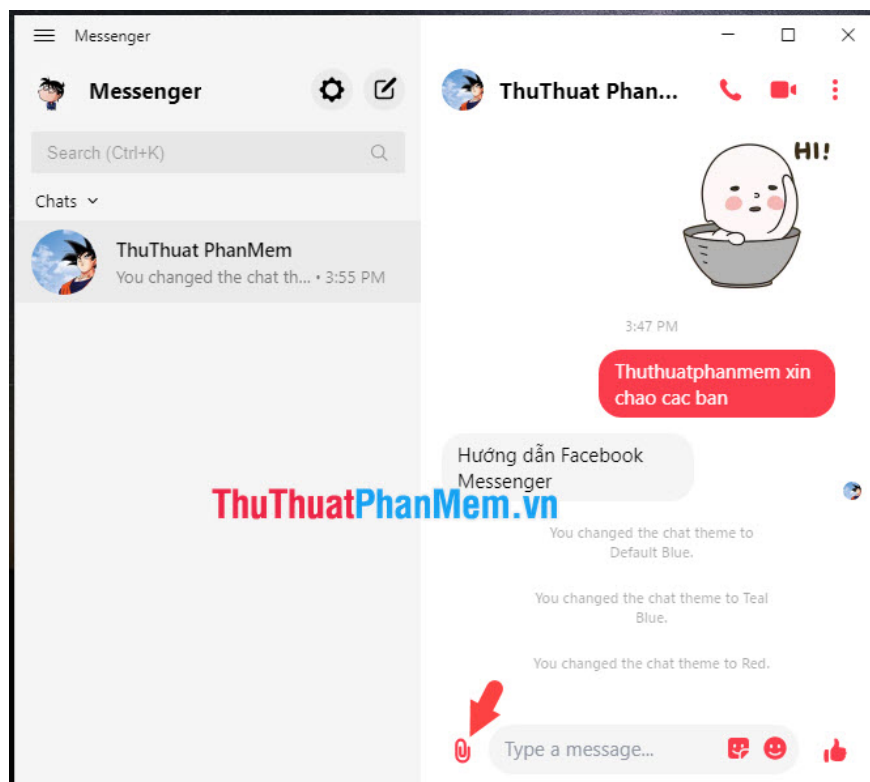

And this is the result after I changed the color of the chat box from green to red.

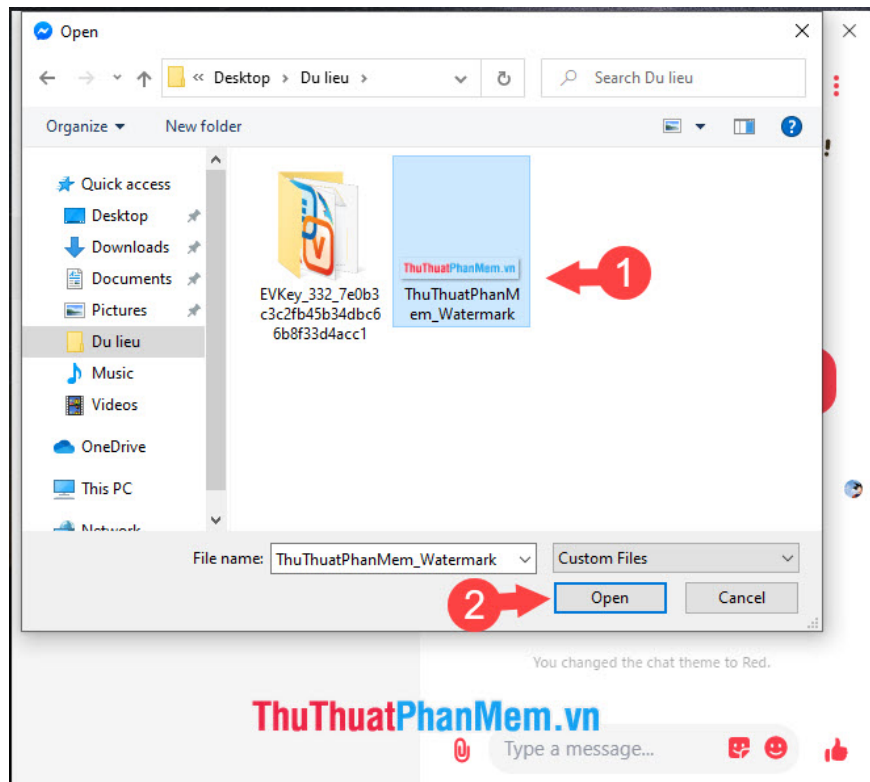

3.3. Send files with Messenger on Windows 10

Step 1: Click on the clip icon on the left of the chat box as shown below.

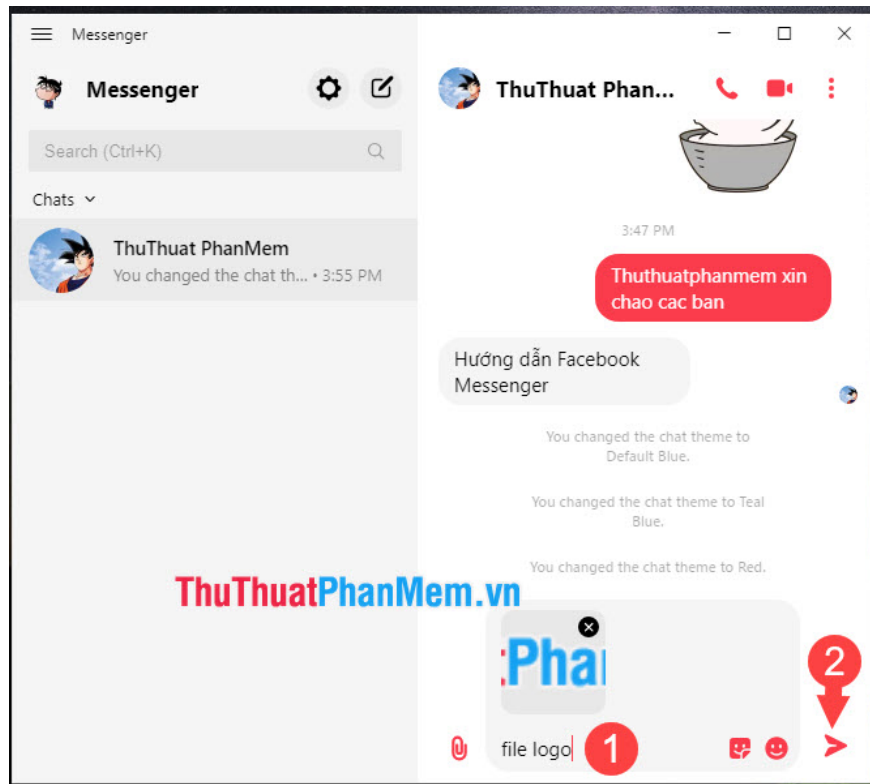

Step 2: Select the file from the computer (1) and click **Open** (2) to send.

Note: File sharing via Messenger is limited to 25MB / File. If you want to share a large file via Messenger, you can upload that file via cloud websites or split the file with a size smaller than 25 MB per file.

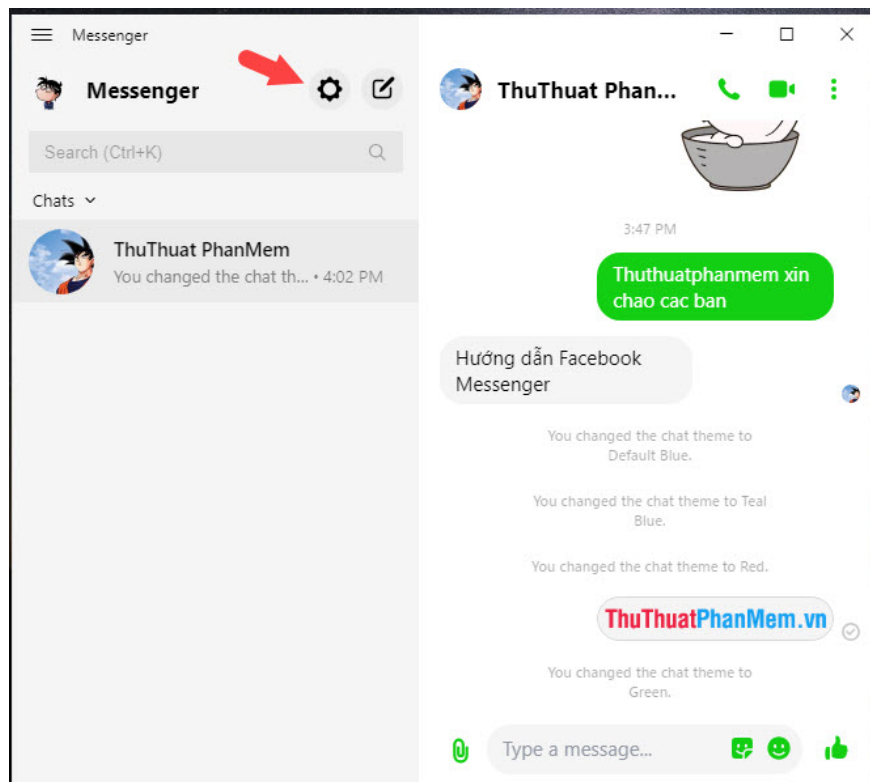

Instructions to send large files via Facebook, Messenger you can refer to the following link:
