

How to install Android Apk on Windows 10 phone

The installation of Android Apk application on Windows 10 phone helps you unleash discovering playing games and applications for Android devices on your Windows 10 phone.

The installation of Android Apk application on Windows 10 phone helps you unleash discovering playing games and applications for Android devices on your Windows 10 phone.

Note:

This method supports Lumina running Windows 10 Mobile operating system version 10149 or higher: Lumia 920, Lumia 925, Lumia 929 (Lumia Icon), Lumia 830, Lumia 930, Lumia 1520, Lumia 635, Lumia 730, Lumia 820, Lumia 435, Lumia 928.

To install Android apps on Windows 10 phones, follow the steps below:

Step 1:

Download the Wconnect Tool.

Download the wconnect tool to the device [here](#).

Step 2:

Download the Android SDK adb tool.

Download the adb tool kit to your device here.

Step 3:

Proceed to extract the Wconnect Tool file and Android SDK adb tool that you download.

Step 4:

Open the wconnect folder that you unzipped, then find and install **IpOverUsbInstaller.msi** and **vcredit_x86.exe** .

Step 5:

On Windows 10 phones, open **Settings and** select **Update & security => For Developers** , enable Developers Mode and Device Discovery.

Step 6:

Find the wconnect folder you unzipped to open Command Prompt (press Shift + Right click and select Open command windows here).

Step 7:

Connect your phone to your computer. There are 2 ways to connect:

- Connect via USB, enter **wconnect.exe usb** into Command Prompt window and press Enter.
- Connect via Wifi, enter **wconnect.exe 192.168.xxx.xxx** into the Command Prompt window (note, change xxx with your IP address).

Step 8:

Now on the screen you will receive a message asking for the pairing code. Enter the pairing code and press Enter.

Step 9:

Next, extract the Android SDK adb tool file and open Command Prompt.

Step 10:

To make sure your phone is connected, enter the keyword **adb devices** into the Command prompt window and press Enter to display the list of devices being connected.

Step 11:

Enter the APK file that you want to install to install directly (in the adb directory) and then enter **install APKNAME.apk** into the adb directory (note: change the name APKNAME with your APK file name).
