Instructions for using Chinese Windows keyboard

Step 1:

First go to **Control Panel** and click on **Clock, Language, and Region** .

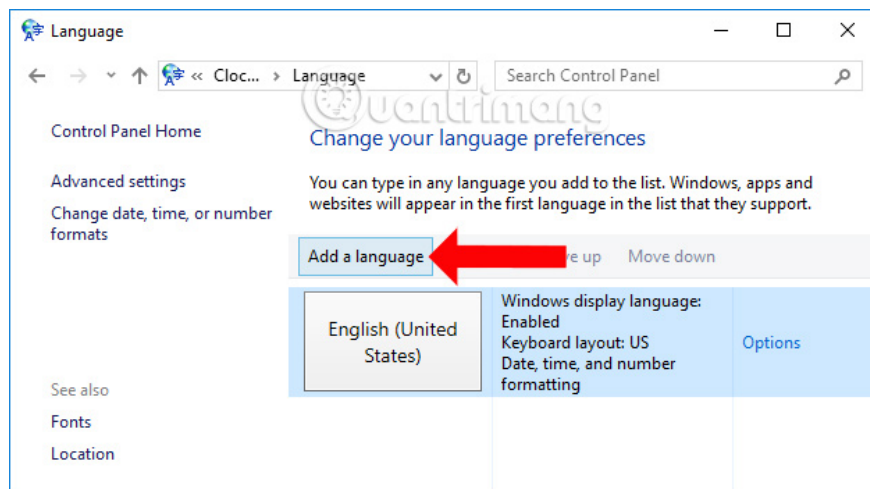

Continue to select **Language** .

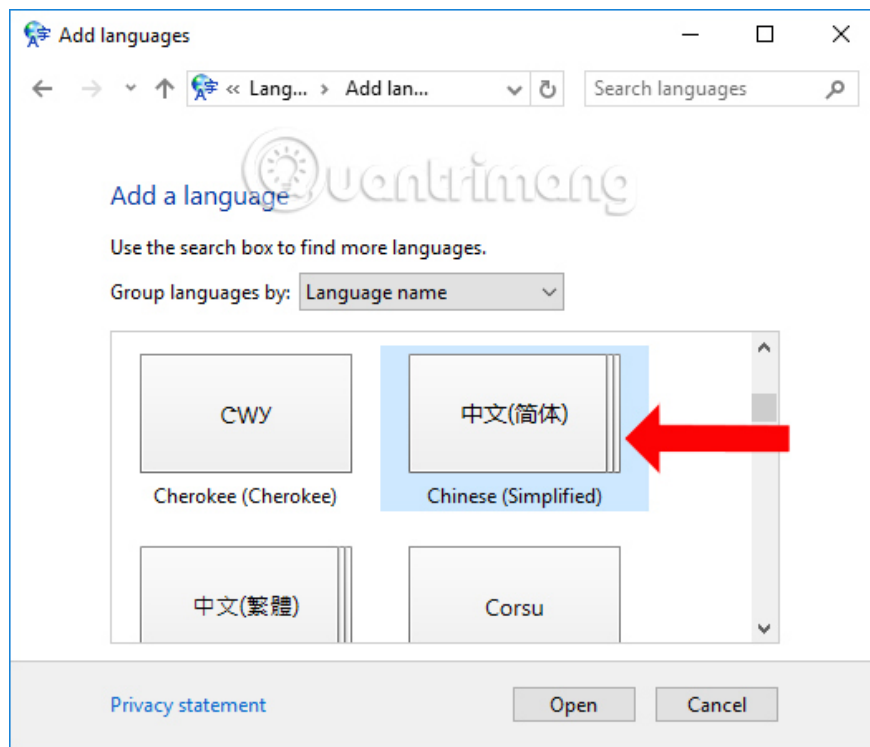

Step 2:

Next to the interface, we click **Add a language** to add a language keyboard to the computer.

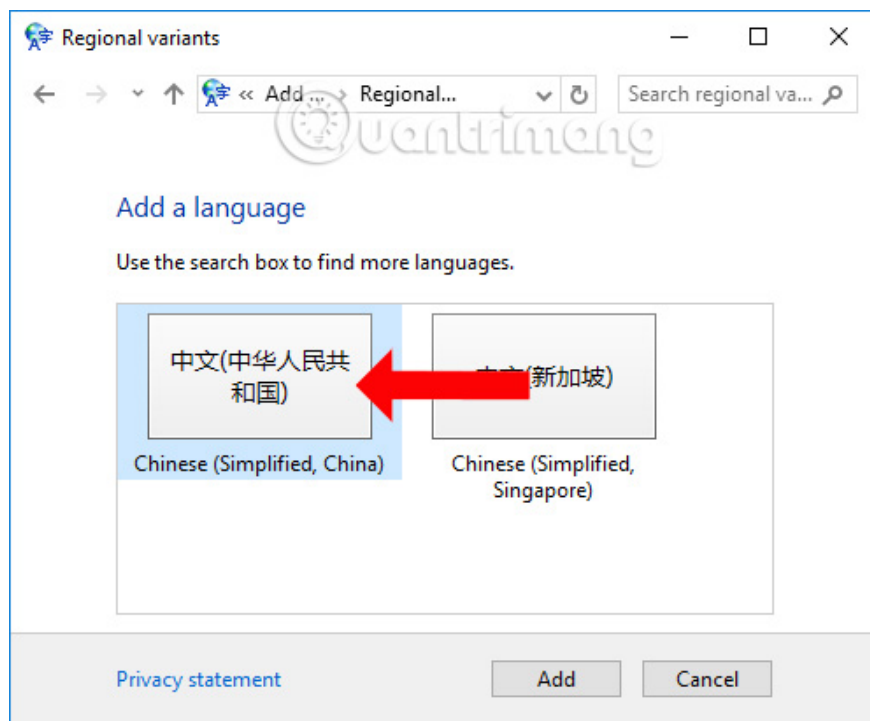

Step 3:

In the list of languages ??you find the letter C and then click on the **Chinese (Simplified)** language, then click **Open** .

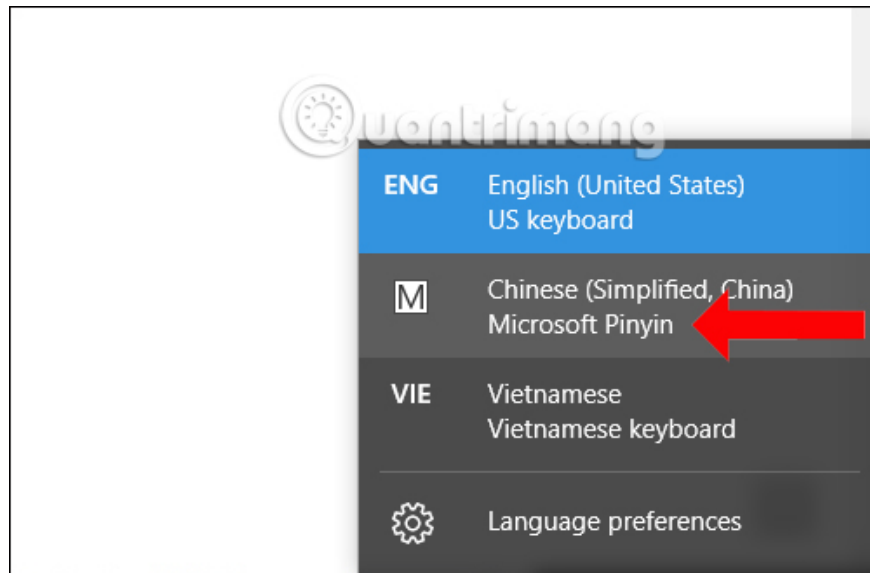

Continue to select **Chinese (Simplified, China)** and then click **Add** below to add it.

Step 4:

Going back to the interface on the computer clicking on **the current keyboard language** will see the Chinese keyboard language has been added. Click on Chinese **keyboard language** as shown below.

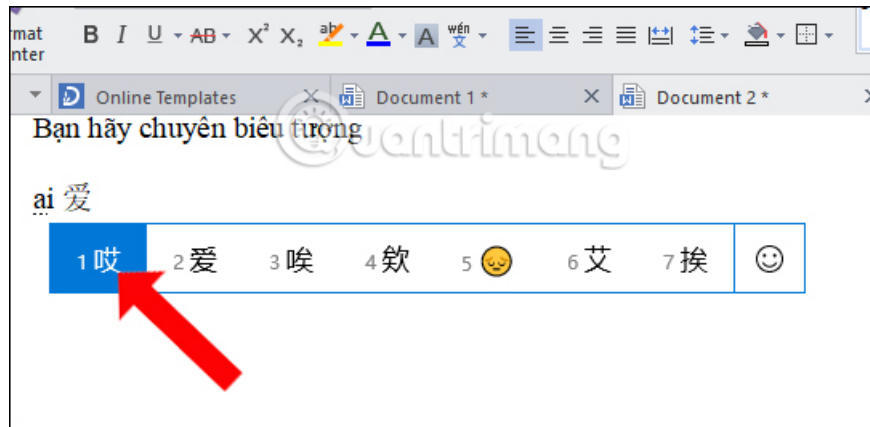

You will immediately see the Chinese keyboard appear under the Taskbar as shown below. Please change the symbol of 'Middle' in Chinese.

Step 5:

Finally type the phonetic transcription in lowercase letters then the tool will give suggestions from the numbered Chinese. If you want to select any word, just press the correct number key.

With frames with long hints, you can press the left or right arrows to select the text.

With the installation of a Chinese keyboard, users can learn and type Chinese easily on Windows computers. With Windows 7 operating system, the implementation method will be different, but generally will follow the basic steps above.
