

# How to install CyberLink Youcam on Windows

CyberLink Youcam supports video recording and webcam photo taking with many lively effects. This application is compatible with Windows operating systems and enhances the video call and livestreaming experience. If you are looking for how to download and install this software, please follow the detailed instructions from Tai Mien Phi.

CyberLink Youcam helps you record videos and take photos using your webcam, supporting many attractive effects. Installing this software on Windows is very simple and only takes a few minutes to complete.

## Computer system requirements

- Operating systems: Windows XP, Vista, Win 7.
- Laptop with 512MB RAM (1GB is best), using an Intel 945 VGA graphics card.

## Instructions for installing CyberLink Youcam

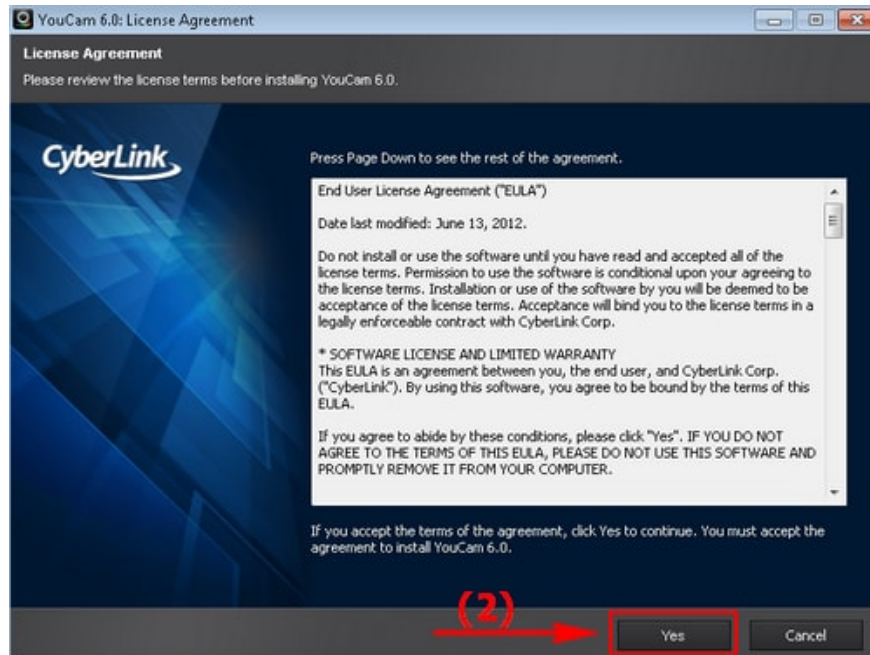

Step 1: Install the program

- **If you don't have the installation file, you can download CyberLink Youcam** software [here](#).
- After downloading, you will receive an installation file. Double-click this file to begin the software setup process.

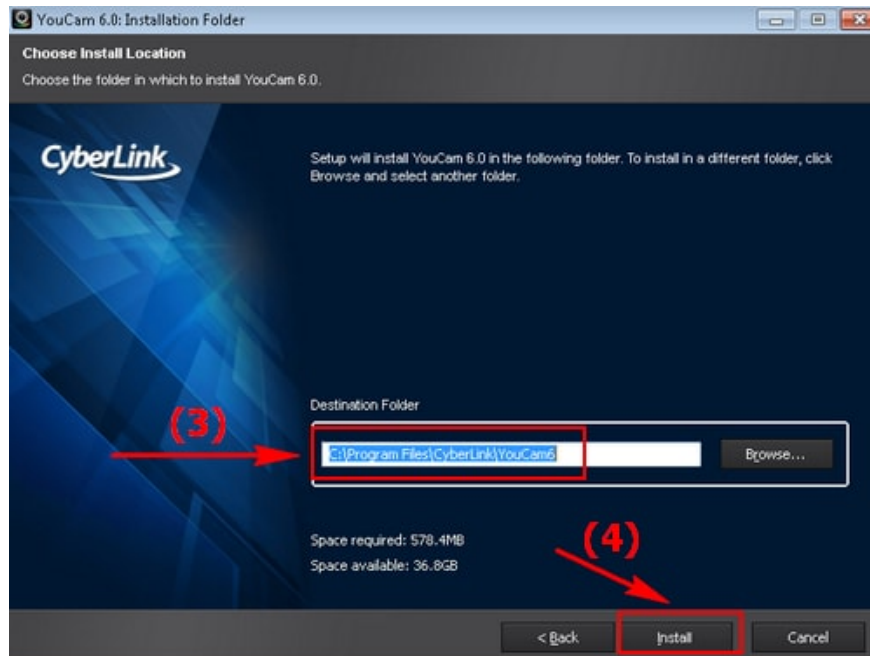

Step 2: Select your language and click OK.

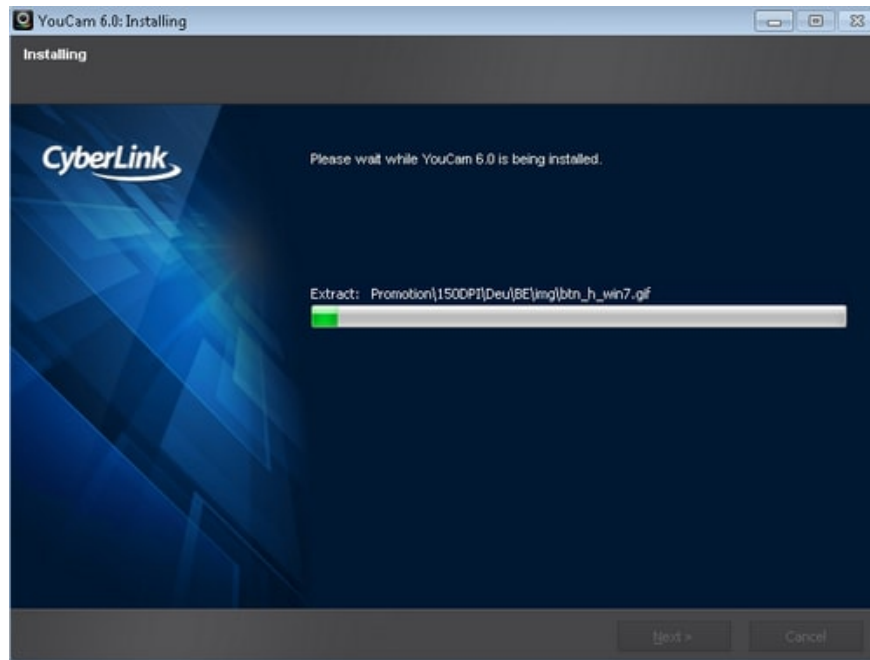

Step 3: Select Yes.

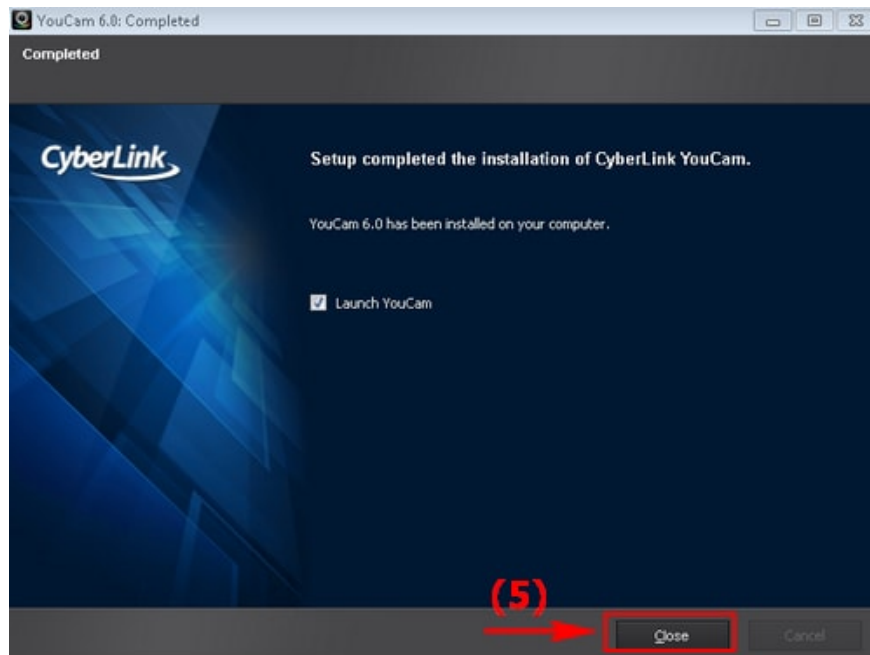

Step 4: Select the installation folder, then choose Install.

Step 5: The installation process will begin. Please wait a few minutes. The installation time will vary depending on your computer's configuration.

Step 6: Finally, select Close to complete the installation process (You can uncheck the box next to "Launch Youcam").

The software interface:

## CyberLink Youcam User Guide

After installation, launch the software. The main interface displays the following important functions:

- Option 1: Take a photo - Click the camera icon to use this feature. -
- Option 2: Record a video - Click the video camera icon to start recording.

With CyberLink YouCam, you can record videos, take photos, and even add effects to images and videos before sharing. This software is not only easy to use but also completely free.

After recording or taking photos, you can easily save and export the video for use. If you don't know how to retrieve the video after recording, please refer to the article "**How to retrieve video after recording using CyberLink Youcam**" on Tai Mien Phi for quick instructions.
